Even the time has been set, it is claimed, by Japan's military experts. Armageddon will be let loose in the Orient late in 1936 or early in 1937. A world still struggling to recuperate the bitter aftermath of a Great War then, or so far distant date, will be faced with another world crisis. Even the preconditions are there, may complete the horror of the last. The naval expert of the world, the House of Commons at Ottawa, economists and statesmen generally, are satisfied Japan is headed for war.

What are the evidences which have provided front page stories for newspapers, leading articles for editors and journalists, texts for sermons and subjects for radio lectures, and which point so unmistakably to war in the Far East?

Ever since its Shanghai and Manchurian adventure, Japan has been shoving its hand, and has made it plain that establishment of a dummy kingdom, Manchukuo, under its puppet emperor, did not satisfy Nipponese ambitions with respect to the Asiatic mainland and China. Withdrawal from the League of Nations was but a considered step in a pre-conceived plan which envisaged war with Soviet Russia as a necessary preliminary to further imperialistic expansion. The recent ultimatum to the great powers designed to prevent fortification or armament add to China, is indicative of the fact that Japan proposes to exercise complete tutelage over that vast territory. The ultimatum, construed as a trans-Pacific "Monroe doctrine", directly affects Great Britain and the United States, both of which have far greater financial interests in China than has Japan.

Furthermore, Japan is arousing at greater speed than any other country in the world. More than 60 per cent. of its budget is devoted to armaments and war purposes. The Nipponese air fleet is among the most potent in the world. It is asserted the Japanese government is about to demand naval parity with Great Britain and the United States, which demands if granted, are an ominous threat. Japan is not for distant war.

What of the economic aspect of the situation, perhaps the most significant of all?

That Japan should have imperialistic ambitions is, of course, a direct sequel to its adoption of western "machine" civilization. The growth of its industrial plant and productive power has been enormously stimulated by a rapid growth of population. In ten years, Japan's population has increased from 56,000,000 to 66,000,000. It presses upon the resources of the country. Strangely enough, it has reached the same point at which Germany felt the urge for "room room" at all or any cost.

The entire population of the Japanese islands has been enlisted in a gigantic effort to capture world markets. Systematic inflation of currency, ruthless exploitation of the masses, are component parts of the nation's merchandise. But development of export trade, it is claimed, has doubled itself in three years. Against the flood of cheap Japanese goods, bound upon world markets at "unbelievably low prices", tariff barriers have proved unavailing. Sixty per cent. of Japan's trade is with Asia, India and Germany, even in the heyday of their foreign trade expansion, never exceeded 35 per cent.; the United States never has exported more than 10 or 12 per cent.

"These ominous statistics of world trade contains the seeds of its own destruction", says one writer who believes "the foundations will crumble beneath such excessive export trade maintained by the most fantastic exploitation of the native population. Through forced labor, child labor, sweat-shop conditions, generally, Japan is selling abroad at less than production costs in Japan! The government is behind the productive machine and the export program. Because of its actions, capital replacement is impossible for war purposes; malcipiion, dividends are high, while workers slave and their families starve.

How long will it last? The "machine" is geared to run until Japan is ready for war. It would appear to be a race between preparedness on the one hand and national breakdown and insurrection on the other. War will be declared on first threat of the internal crash.

Time has been Japan's greatest friend in the bewildering on the wait. Can the counter-action for peace gain weight enough to prevent the catastrophe before Japan has reached the breaking point?

Abbey Gets Milk Bath

Historic Westminster Abbey recently received a milk bath. Workmen applied pailes after gallons of skimmed milk to its massive arches, pillars and even its statutes. The treatment, recommended by architectural experts, was intended not only to clean the stone work, but to aid in preserving it. The results will be watched with care, although it is said five years must elapse before the value of the treatment is apparent.

Wind Rolling Coals

Here is something to worry about. If you only spend an average of 10 cents per month during your lifetime, it costs you $19,250 to satisfy the "money man." Average individuals spend $7,000 yearly in a lifetime, according to statistics compiled by M. Davison, who presided at a meeting of market and grocery owners, restaurant and hotel men, members of refrigeration experts and city health authorities at Cincinnati recently.

A Head, Have Got Women Can't Make a Happy Home

There is no happiness in the home when the mother is sick and worried by the never ending household duties. She gets run down and becomes nervous and irritable, has disorders of breath, head and stomach, dizziness, and puts up in the morning feeling as tired as she went to bed, and is discouraged and full of despair.

Milburn's H. & H. Pills will soon overcome women's ills and constipation in adults, as they build up the nervous system and bring back the bloom to pale and sallow cheeks.

Old London Growing Fast

Every Year 150,000 People Added To Big Metropolis

Figures have been quoted by American statisticians to show that within so many years New York will be a larger city than London. Presumably that means Greater New York and Greater London, because the working population of both cities, as to the case with all large centres, is drawn to nearly the same transport services, living in the outer rings of the areas.

New York is still about a million and a half behind, and if it is going to catch up on London it will have to go some.

Lord Ashfield, the Englishman who once drove a street car in Detroit, and who is now the chairman of the London Passenger Transport Board, has to lower exactly the traffic needs of Greater London. He told an audience the other day that London is attracting new industries at the rate of 1,000 per annum. London doesn't want them, he says, but the increase in the midst of the largest assemblage of human beings in the world. Every year 150,000 people have been added to the population within the past decade, and there are 30,000 new houses built each year.

London is growing, therefore, at the rate of 150,000 persons a year—obviously another big city is added each year, every twelve months.

At that rate plus the present million and a half advantage, New York will overtake London in 1945. Who is trying to overtake London.—St. Thomas Times-Journal.

Another Fad Diet

Bananas And Skim Milk Latest Idea For Reducing

One more is added to the list of fad diets for reducing. This one, consisting of bananas and skim milk, is reported to have the recommendation of a physician connected with the Johns Hopkins University. Bridge Hudson, a writer, declares he may be depended on to spread the new skim-milk-banana gospel.

Both the bananas and skim milk deprived of cream are recommended by the wholesome foods. But the fact remains that there is no danger in issuing for general application any prescription no matter how great the authority advancing it. What may be good for one person for accomplishing any particular change, may be positively harmful to another desiring the same end.

Those who want to reduce should not take the advice of a friend even if that friend is a physician. Only a physician's directions based upon a careful physical examination. The same physician may prescribe entirely different advice to his patient's friend.

OFF COLOUR?
HOW IS YOUR LIVER?
Wake up your Liver Bile
—Without Calomel

Your liver's a very small organ, but it can cause a lot of trouble when it doesn't work properly. If you're off colour, if you're sour and bilious, if you're constipated with the usual headache and dizziness, don't resort to calomel to make you sick by taking more, or, mineral waters, laxative candy or chewing gum, or purgatives that only move and irritate your bowels. Instead—and you can depend on it—get a bottle of Dr. Edwards' Olive Tablets. They're purely vegetable and act directly on the liver. You'll know the difference after the first dose. 60 in a bottle.

Unusual Use For Honey

As Foundation For Gold Dish It Is Excellent

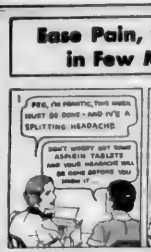
Bee men to which honey is put are many and various, but perhaps the most unusual is in making gold leaf. The honey is placed in a round stout rubber sac and is forced in under tremendous pressure. Around this the usual rubber is pressed and it has the ordinary outside. It is said that honey being non-evaporable and partially absorbed by films or membranes gives the gold leaf that will stand up under all conditions.

"My immortal mind the Hun finds on my birthday asking whether he should buy me a Rembrandt or a Titian. How, think would you have?"

"Well, as far as that goes, most of these French cuts are very good."

According to subscribers, our earth appears blue to the people, if gray, via black.

Ease Pain, Headache in Few Minutes



For Quick Relief Say ASPIRIN—*When You Buy*

Now comes *amazingly quick* relief from headaches, rheumatism, neuralgia, neuritis—the *tested safe relief, it is said, get discovered.*

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture and keeps to start "taking hold" of pain a few minutes after taking.

The illustration of the glass here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you see above it. *And then it is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Radio is Still Wonderful

People Who Think Never Full To Get Thrill

The public has heard so many wonderful broadcasts transmitted across oceans and continents that it has grown blase and almost ceased to get a thrill out of radio nowadays. But those who still do a bit of thinking must be hard-chilled indeed if they fail sometimes to be moved.

In connection with the previous Byrd Antarctic expedition there was a remarkable incident. The New York Times radio visitor was afforded by means of short-wave sets. In order to avoid interruption from the office he took his telephone receiver off the hook. The office wanted to call him up but couldn't. The other man also in communication with another member of the expedition, so they gave him a message to relay to their staff man a few miles away. They told the man in the Antarctic to tell their radio editor in Washington to keep his receiver up as the physician's directions based upon a careful physical examination. The same physician may prescribe entirely different advice to his patient's friend.

There are still some thrills left, even in radio.—St. Thomas Times-Journal.

Famous Painting Found

Picture By Millais Passed Out Of Notice In 1925

After many years of search, Millais' famous picture, "No," is now owned by the sister of the model. The picture which was the central topic of the Royal Academy Exhibition of 1875, shows a young woman reading a letter in which she has refused a marriage proposal. The original sitter was Miss Dorothy Tennant, who afterward became Lady Stanley, wife of Sir Henry M. Stanley, the explorer. It was once sold for $7,500. The recent buyer was Mrs. F. W. Myers, sister of the late Lady Stanley. She had been searching for it for years, but it passed out of notice when bought privately shortly after the 1875 Academy Exhibition.

Belgium Protects Frontier

The plan for fortification of Belgium's frontier, extending French defenses along the Germans line underway for the past 15 months is rapidly nearing completion. Several hundred concrete pill-boxes are being constructed all along the border.

Library Of Small Books

A miniature library of 6,000 books, few of them larger than a postage stamp, has been collected by a Massachusetts man. The books include a complete Bible and all of Shakespeare's plays.

Record Tornado Of Arctic

Ocean Opening Now Trade Route Assured Northern Mines

Russia is reaching out to make use of her frozen territories in the Arctic, it was revealed by Dr. Otto Schmidt, leader of the Soviet scientific expedition shipwrecked on the ice floes of the north while opening a new trade route around Northeast Siberia.

Using heavy ice breaking ships, the Soviets hope to open vast resources of gold and oil in frozen Siberia, using the ports of Vladivostok and Archangel, he said.

The brave-hearted man who kept up the morale of more than 100 Russians when they were stranded for many weeks on the hummocks, overspitting ice floes of the Arctic ocean by the wreck of their ship, the Cheliuskin, said he hopes to come back in a few months with a new Soviet expedition to continue his scientific and explorat ory work.

Three nations want the territory his Wrangell Island expedition sought to open, before they were stranded on the ice, then rescued by his airplane expedition.

The United States navy in cooperation with the coast and geodetic survey, plans to map the rocky Aleutian Islands this summer it is reason talk Japan keeps a wary eye on the territory. Now Russia reveals she can cover it by airplane and boat, through the Schmidt expedition and the present rescue command of Professor George Usbakoff.

Sickness Ideal Canada

Diseases Rather Than Vitality More Mightily Two Years Ago

On his arrival in Montreal nearly a century ago Charles Dickens, English author, was impressed by Canada's quickly changing seasons and by the permanence of Montreal's business houses and public works. One proof of this statement is that Dickens's hotel where Dickens himself stayed at the time is still standing, forbearly perhaps, but none the less a memento of the famous writer's visit.

Dickens arrived in Montreal from Toronto early in May 83 years ago. In his letters home Dickens dealt pleasantly on the first stages of his journey and of what he met with.

His told of how Montreal was situated, about the streets and shops and different suburbs, and was enthusiastic about the Canadian visit generally. At one point he wrote "spring comes as rapidly here that it is but a day's leap from Winter to Summer by the blooming youth of summer."

Fashions

SMART JACKET DRESS

Slenderizing lines for matrons or for younger women rather heavy of figure.

So simple to make in this charming jacket dress for ladies in patient.

Trinity blue linen crests a very slenderizing effect. The dress can contrast or be in of self material and look very charming.

The original in twin prints in navy and white crepe silk is very pretching and smart. It will carry on all through the summer. It's perfect for week-end vacations and travel.

Other lovely schemes in cotton prints, pastel and white bib silks, linen prints, etc., are smart and impressive for your summer wardrobe.

Style No. 677 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 38 requires 3¼ yards of 35-inch material with ¼ yard of 35-inch contrasting. Separate coat requires 2¼ yards 35-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A butterfly has organs of taste in its feet.

The hunting preserve of one red not colony may cover 17 acres.

Over Six Million Trees Being Distributed This Spring Among Farmers Of Prairie Provinces

Dust storms sweeping across the three prairie provinces will soon have another obstacle to contend with as 6,000,000 broad leaf trees and 300,000 evergreens find a resting place somewhere in the different farming areas of Alberta, Saskatchewan and Manitoba.

From 200 to 400 holes of trees will leave the forestry station at Indian Head and its sister plantation at Sutherland to farmers who have bedevelled themselves in trees for the sake of their beauty, and also as a method of combating the dust storms that have been playing havoc in the three provinces for some time.

A recent census of farms of the three prairie provinces covered by the forestry authorities showed that of the 368,079 farms, nearly 200,000 of them are not wooded. Since its inception in 1901 the forestry farm has supplied 30,653 of them with at least some trees. There are still close to 150,000 to be supplied.

Since its inception the forestry farm at Indian Head and Sutherland, have supplied 118,150,979 deciduous trees, evergreens and 2,885,000 coniferous or evergreen trees to the farmers of the three provinces.

During the last few years the work and in such areas the demand has been somewhat lessened, but the officials believe this area as normal conditions prevail the demand from these areas will be greater than ever. Where trees were planted before the drouth people have not been as hard hit as in other parts as it was always possible to grow a good garden where a shelter belt had been set out.

Loss of the specimen as a result of an insect pest can be partially held overcome by keeping in close contact with the parties receiving trees, by mail and submitting them to inspection periodically regarding growth, etc. In this way close to 90 per cent. of the people interested are heard from and data gathered for reference work.

All the labor is not in the shipping of the trees. Before the evergreens are taken off the land they have reached an age of four or five years. Price are four cents old when they have left the land, and cutsgreens are the speediest and require only a year's growth before shipping. Ash and elm require two years. Poplars and willows are shipped from cuttings.

Machine-like precision is the feature of the shipping department as between 25 and 30 men ship out the 6,000,000 trees to just over two weeks of time. Out in the plots the evergreens are lifted and the roots are packed in sand to preserve them. From here go to the first shed where they are sorted into the right sized bundles, labeled and addressed. Then they are tied. Next is the wrapping and covering and these into the stock for delivery to the freight sheds. And so to the farmer.

When the shipping is done another round of work starts for forestry officials. Farm locations on the active planting list for 1936 number 1,500. Before the next season rolls around these will all have to be communicated with and all particulars necessary to the successful culture of the trees ascertained. Then a planting plan is made for each individual farm with suggested arrangement and all particulars for the best methods of growing, etc., to ensure as great a return as possible from the trees sent out.

Making Synthetic Stones

Professor Otokaba Fernandes, head of Madrid (Spain) University's pharmacy faculty, reports progress of chemists in making small diamonds synthetically, and believes larger synthetic diamonds are a commercial possibility of the near future.

Two men sat at the bar drinking liquor. Presently one of them said: "Do you know, Dick, I think I'll buy this hotel."

"Wat 1ft we've had a few more drinks," said Dick, "and I'll sell it to you."

United States Scientist Predicts Period Of Great Floods, Based On Effect Of Huge Sunspots

Great floods throughout the world in 1942-50 were reported by Captain Thomas J. Sec, veteran professor of mathematics in the United States navy. He based his forecast on the effect of huge sunspots.

Rainfall will increase for the next two years, after which the floods will occur, said Captain Sec, adding that the sunspots cause the weather variations by mixing hot and cold air through lessening the heat of the earth, thereby permitting the cold currents of air to descend.

Captain Sec, with 60 years' experience in scientific work, collaborated for many years with the late Rev. Jerome S. Rinard of Santa Clara University in the study of Father Rinard's theory that sunspots cause weather changes.

"Since the decrease of sunspots began in 1926," Captain Sec declared, "very great drouths have been observed to occur in all the countries of the globe, notably the drouth of 1930, in the Mississippi valley, which accentuated the evils of the depression, and that of 1934, which destroyed agricultural recovery.

"But new huge sunspots have appeared and the effect will increase the next four years, yielding vast floods in 1942-50, and an increasing rainfall this year and next. After which the floods will become notable, as during the Mississippi floods of 1927.

"The sunspots cast hot and cold air upon the earth's surface, yet not in a slightly different way, by cutting down the heat of our globe, thereby letting the cold currents of air descend nearer the earth, for cooling more than. That's the whole meteorological effect of sunspots."

Advisor Considers Rockies

Travelling Ski Journey Across Coast Range Of B.C.

High lights of a thrilling ski journey across the Coast Range of British Columbia from Twin Lake, were given by Sir Norman Watson, of London, England, consulting engineer of the United Service Institute of Ottawa.

Sir Norman was enthusiastic with regard to the possibilities of British Columbia as a paradise for the ski devotee and also expressed the view that land should become the 1st. Merits of the Dominion.

New blizzards were doled by the Alpine skiing party were ingle and by the end of the week that at one time it was necessary to cut 2,000 steps in the fury gap ice wall and also dwelt on the hardship of a struggle through dense bush to Knight Inlet.

The distinguished visitor remarked that he was empire-minded in many things and this applied to skiing. He thought the scenery of the coast ranges was unsurpassed in beauty and was unexcelled as far as skiing attractions were concerned in the temperate zone.

Established Eight Centuries

Smithfield Meat Market in London Largest In World

Most farmers throughout the Empire have heard of Smithfield Market, or of Smithfield Show. Smithfield is London's meat market not very far from St Paul's Cathedral, but the show of cattle held annually in London, quite a long way from the meat market, and is merely a Christmas cattle display with no connection with the meat market other than adopting the name.

Smithfield Market is the largest meat and poultry market in the world. Last year over 4,864,000 tons of meat and poultry were handled there. Four out of every five carcasses of Australian and New Zealand mutton and lamb went to Smithfield, and two-thirds of the chilled beef reported from these countries and from the Argentine.

Around Christmas time as much as 3,000 tons of meat and poultry are sold there in one day. The annual wholesale value of supplies amounts to about $175,000,000.

There has been a cattle market at Smithfield for over 800 years.—St. Thomas Times-Journal

THE CHIEF SCOUT RETURNS HOME AFTER HEALTH TOUR

Lord and Lady Baden-Powell are shown returning to England after a long cruise in the Mediterranean with two months sad guides. Lord Baden-Powell, who has been seriously ill, is shown being assisted by Lady Baden-Powell. The Chief Scout is to visit Canada next year if his health permits.

WORLD HAPPENINGS BRIEFLY TOLD

The N.R.A. has decided to impose a code upon the telegraph industry in the United States.

Capt. James Mollison has entered in the Round-the-Australian air race. He will fly with his wife, the former Amy Johnson.

Touring the Mackenzie river to head water from the north, the Hudson's Bay Company will ship 800 tons of supplies from Edmonton this season for its posts in the western Arctic region.

Speaker Nancy Rainey said he understood President Roosevelt intends to make a war debt settlement with Finland, which is not in default, and then will enter a similar agreement with other nations.

Canada's membership in the League of Nations has cost her $1,269,374.96 in her contributions to the league to 1933, according to an answer given in the House of Commons.

Amateur whale hunting under the guidance of experts is to be one of the vacation attractions in Manitoba's support this year, J. F. B. Fletcher, chairman of the tourists committee of the Churchill Board of Trade, announced.

The government commissioner that the King and Queen hope to go to Glasgow at the end of September to launch the new giant Cunard liner "534". Her Majesty, the announcement said, will perform the actual ceremony of launching the vessel.

Ernest S. Pentland, student in the school of graduate studies at Toronto University, has been awarded a University of Alberta research scholarship valued at $1,200. He will leave for Alberta in September to conduct investigation into rabbit paralysis.

Horses from Alberta ranges may soon gallop about the green pastures of the Fiji Islands. Deakers in the Cordova district, if proposed negotiations are successful, expect to ship a hundred of light draft horses to the Fiji Islands via Vancouver shortly.

Wise Speculator

Wise speculator is the only thing that keeps business going. Hopeful prosperity has no place in real progress. The great trouble with so many days, so we are told, is that in time of plenty we did not reach foolish spending. Need for diligently conserve for dates that warrant investment, we hounded an orgy of spending by spending only. In which wisdom runs that considered and pleasure only thought of.

Send Lame To Swim

All French citizens will have to clean or swim in the future. Maurice Petsche, minister of war and veterinarian, director of Verdun, has issued an order that everyone will be part of the common consideration to all French military schools from now on. It is the intention to have everybody swim at military camps with swimming pools, where soldiers will be obliged to learn how to keep afloat.

Little Journeys In Science

METALS

By Gordon H. Cook, B.S.

Interesting examples of the progress that has been made in every day life may be found in the production and use of metals. The metals are found in the earth in the form of ores. Gold and copper have been used since prehistoric times, and it is likely these were the first metals used by man. Until the middle of the 19th century the only metals known to the ancients were iron, tin, zinc, and the mixtures or alloys called bronze (copper and tin) and brass (copper and zinc). Steel is simply a form of iron containing small amounts of carbon and other substances.

Aluminum was discovered in 1825 and was at first very rare and valuable. It is now produced by the ton. In 1854 a method was devised by which it could be produced cheaply by the French chemist Deville. In 1886, C. M. Hall, a university student, invented a new process depending on the use of electricity. By means of this new method aluminum was produced cheaply in large quantities, and the metal is now used extensively. Science has not yet discovered a method of extracting aluminum from clay, and most of it is obtained from the mineral bauxite

Magnesium is another metal which was not known until early in the 19th century. The metal is also obtained by an electrical method. An alloy of magnesium with aluminum known as magnalium has great value in the manufacture of airships. It is only about twice as heavy as an equal volume of water, whereas steel is about eight times heavy as water. Alloys of this kind are used in air ships and motor construction.

Many valuable metals are produced by mining, or sifting, gravel metals. For centuries man has used bronze and brass, which are alloys of copper, and has known that sometimes gold is found in the sand of streams and tin, is an alloy which is the property of magnesium to unite with the molten metal hardens, so that sharp types of moulds of metal are obtained. Stainless steel is an alloy of iron with chromium and nickel, and is remarkable because certain iron alloyed with metals such as chromium, manganese, molybdenum and cobalt. These special steels are used in making cutting tools, armor plate, table knife, parts of motor cars, railway tracks and the steel for bridges.

Blind Man Legged Golfer

Helped Win Match On Links In Cornwall, England

Blind Cornish Sir Caden Staniland At British Museum

Record crowds have been attracted to the Golden Stadium, the 6960-yard fourth-century manuscript Bible brought from the Sinai Monastery. One day's attendance was 7,041, and from the opening to closing times there has been a fine evening to get into the building. Reopening to the public appeal for $250,000 to complete the purchase of the work has been unusually generous. More than $50,000 was contributed in a few days and the entire amount is expected of to be raised within three months. The government will supply the other $250,000. The treasure has been written in the Soviet government reports to fragments of the Codex, about three inches long and one inch wide, which is missing from the monastery, it is having been lost while the Bible was on the way from Russia, they say.

A Midget Automobile

Czechoslovakia is to have a midget automobile which will be retailed at less than $300, according to a report from Prague. The motor is of the front-driven, two-cylinder type, developing 10 horsepower. The cars will be two or four-seater construction, with a wheelbase of eight and one-half feet.

THE FUTURE OF THE KINGDOM

Golden Text: "The kingdom of the world is become the kingdom of our Lord, and of his Christ and he shall reign for ever and ever."

Lesson: Matthew 24:1-31:30

Devotional Reading: Revelation 21:1-7.

Explanations And Comments

The Parable of the Wise and Foolish Virgins, 25:1-13. The Kingdom of Heaven Jesus likened to virgins who went forth with their lamps to meet the bridegroom.

Five virgins were wise (prudent) and carried an extra supply of oil in their oil vessels, but five were foolish (imprudent) and took no extra supply. The bridegroom tarried and all slept. There is no hint of reproach in this statement, the bridegroom might tarry a long time. Midnight came and the approach of the bridegroom was announced. All the virgins arose and trimmed their lamps preparatory to going forth to meet him. The foolish ones found their lamps going out, and begged the wise ones to share with them their oil. But the wise ones refused, lest there might not be enough oil for them all, and counseled them to go out and buy oil. In the application of the parable the thought is that the righteousness of one cannot avail another

While the foolish virgins went forth to buy their oil the bridegroom came. Those who were ready went in with him to the marriage feast, and the door was shut. What does the coming of the bridegroom mean? The coming of Christ is certainly not a time when he draws away in the world, for he is in the world always. Philips Brooks explains "It means, then, some time or times in which his presence becomes manifest to the world—times when the servants of Him discern which of them the text refers to—whether to the final coming for judgment, the coming to every man at death, or the coming of the Spirit at such a crisis as now. Let us not try to settle which it means, but cultivate the life of watchfulness within us, not to know when Christ is coming to judge the world, when he is coming to call us to himself by death, when he is coming by some special opportunity to work."

When the foolish virgins arrived with the needed oil and begged to enter, they found the door closed. The bridegroom answered, "Verily I say unto you, I know you not."

"Watch, therefore," Jesus added, "for ye know not the day nor the hour!" Be not unprepared.

Has Attracted Many

Record Crowds See Codex Sinaiticus At British Museum

Golden Stadium, the 6960-yard fourth-century manuscript Bible brought from the Sinai Monastery. One day's attendance was 7,041, and from the opening to closing times there has been a fine evening to get into the building. Reopening to the public appeal for $250,000 to complete the purchase of the work has been unusually generous. More than $50,000 was contributed in a few days and the entire amount is expected of to be raised within three months. The government will supply the other $250,000. The treasure has been written in the Soviet government reports to fragments of the Codex, about three inches long and one inch wide, which is missing from the monastery, it is having been lost while the Bible was on the way from Russia, they say.

A Midget Automobile

Czechoslovakia is to have a midget automobile which will be retailed at less than $300, according to a report from Prague. The motor is of the front-driven, two-cylinder type, developing 10 horsepower. The cars will be two or four-seater construction, with a wheelbase of eight and one-half feet.

DOCTORING YOUR DAIRY HERD

Cows aren't machines. They are living things. They have feelings, and they react to any change in their daily life. Take the case of Jack Ellis, Kamloops, B.C., farmer and he had with a heavy lot for sale. "I picked it with Holstein Lilacs," he says, "and it soon got home."

Ellis' herd is for Cow Testing, Calf Club and Boys' Club work, and is noted for its type. It was named "King of Pails".

Canadian Drama For London

Suggestion Is Made By Adjudicator That Some Years Can Company Should Visit Old Land

The hope that in the near future one of the Canadian amateur dramatic groups which has been victorious in the Dominion drama festivals, may be sent to London, was expressed by J. T. Grein, veteran critic and essayist, who judged the festival this year.

If a Canadian company were successful in London it would receive "as it were, a universal hallmark," he added. He was aware that the main question involved was one of finance but this might be solved if Great Britain and Canada were both willing to assist. If, for instance, the British Drama League would invite a Canadian entry to play in the London festival, there might be some way in which necessary financial arrangements could be made.

One important suggestion which he made was that there should be a special committee to select the plays for presentation at the festival next year. He referred to the "spell of gloom" which surrounded some of the performances at the festival just concluded.

"Therefore," suggested Mr. Grein, "I think that towards the next festival there should be established a small special committee to select plays so that humor may become a gear of gloom."

No Argument

After the husband had smashed a flower at the crossing, a flapper rose from the wreckage uninjured and powdered her nose. The engineer then came to her assistance.

"Why in the world didn't you stop when you saw the engine coming?" asked the engineer.

The flapper was indignant.

"I sounded my horn before you blew your whistle," she said defiantly

CONSIDER PLAN TO STIMULATE TOURIST TRADE

Ottawa. A $700,000 federal advertising and publicity campaign in support of the tourist industry throughout the Dominion, to start immediately was advocated before the massive tourist committee by Theodore G. Morgan, Montreal, chairman of the executive committee of the Canadian Association of Tourist and Publicity Bureaus.

The senate committee under the chairmanship of Senator W. H. Dennis, Halifax, is engaged in formulating a plan for national consideration of the tourist industry, supplementing the present activities of the provincial transportation companies, automobile clubs and various individual organizations.

It had been suggested that a federal tourist department of advertising, publicity and development be established to supplement the activities of the provinces and local organizations.

The campaign for this year should be pushed immediately, said Mr Morgan. The summer tourist traffic also commences in May and builds up throughout June, July and August. An immediate campaign would only be effective this year, but would stimulate fall and winter business, and should be continued into 1934.

Based upon financial returns of Montreal from the expenditures of the Montreal tourist bureau, Mr. Morgan advanced $300,000 as a minimum amount that should be appropriated for a 1934 campaign. He further suggested that $500,000 expended annually by the Dominion in newspaper and magazine advertising for tourist trade expansion would be more than justified by the increased business that would follow

This estimate was based upon an appropriation for advertising and publicity of five per cent of the total annually expended by tourists from outside the Dominion, apart from the non-provincial tourist traffic. The Dominion bureau of statistics estimated the 1933 tourist business at $160,000,000.

J. Van Wick, general manager of the Canadian National hotel department, told the committee that numerous tourists from the United States spent $350,000 in Canadian National hotels last year. Newspaper and magazine advertising to attract this business had been $15,000.

Accepts Invitation

Sir Landseer Maike To Be Played By Toronto Symphony Orchestra

Toronto. Wilfred C. James, manager of the Toronto Symphony Orchestra, announced that Percival Price, Ottawa 'cellist, has accepted an invitation that the orchestra play his "Sir Landseer" suite as the opening presentation of the 1934-35 season.

The invitation, Mr. James said, was made by Dr. Ernest MacMillan, conductor of the orchestra.

Price, "Sir Landseer" was him a Pulitzer scholarship valued at $1,500. It was rejected by the University of Toronto School of Music as it was by the means of obtaining his doctorate of music. Dr. MacMillan was a member of the committee that rejected the work.

Discuss War Debts

President Roosevelt Has Talk With Belgium And France Ambassadors

Washington. A re-statement of the United States' attitude toward war debts came from President Roosevelt and clearly thereafter the ambassadors of two nations that are in default Belgium and France, called at the state department to discuss the matter.

The position outlined by the president called for an insistence upon payment by the debtor nations, but a will agree to talk over their individual problems separately and give consideration, either to proposals for below payments or for new terms of settlement.

W. N. U. [illegible]

More Confidence Needed

W. Sanford Evans Places Responsibility For Depression Years

Montreal. Rewritten from the ones, and the actions of governments in the following years are responsible for the four-year depression from which the world is beginning to recover, and not failure of the economic system W Sanford Evans of Winnipeg, president of the Canadian Chamber of Commerce and leader of the delegation in the Manitoba legislature, told the Montreal Board of Trade.

Needed chiefly to-day said Mr Evans, was more confidence If a business man could be given enough time under which he might lay out plans in propositions with security the world would not be long in recovering.

Fortunately, he observed, there was reason for confidence Canada had set its feet firmly on the road to recovery between April and July last year

Discussing the economic system as he had obtained he admitted there might have been seldomness and smallness in business in the past but the ordinary method of conducting affairs by trial and error was preferable to the conception of planned economy as originated in Russia

The summer tourist traffic also commences in May and builds up throughout June, July and August. An immediate campaign would only be effective this year, but would stimulate fall and winter business, and should be continued into 1934.

Based upon financial returns of Montreal from the expenditures of the Montreal tourist bureau, Mr. Morgan advanced $300,000 as a minimum amount that should be appropriated for a 1934 campaign. He further suggested that $500,000 expended annually by the Dominion in newspaper and magazine advertising for tourist trade expansion would be more than justified by the increased business that would follow

This estimate was based upon an appropriation for advertising and publicity of five per cent of the total annually expended by tourists from outside the Dominion, apart from the non-provincial tourist traffic. The Dominion bureau of statistics estimated the 1933 tourist business at $160,000,000.

J Van Wick, general manager of the Canadian National hotel department, told the committee that numerous tourists from the United States spent $350,000 in Canadian National hotels last year. Newspaper and magazine advertising to attract this business had been $15,000.

Advice To Nurses

Should Take Up Work In Smaller Places

Montreal Nurses were advised to take up residence and practice in smaller places by Miss Elizabeth Bagshaw, superintendent of Canada of the Victorian Order of Nurses, at a dinner of the Alumnae Association of the Royal Victoria hospital here.

Schemes submitted to the legislatures of British Columbia and Alberta proposed to indicate the training of public responsibility in health matters, said Miss Smellie, and she wondered whether in future there would be two divisions, one for medical care, including hospitals, and the other for preventive work.

Crude Oil Freight Rates

Matter To Be Considered By Board Of Railway Commissioners

Notice of proposed increases in freight rates on crude oil from southwestern United States to refineries in eastern Canada will be considered by the board of railway commissioners in a series of hearings in Western Canada, commencing in Regina May 22.

Afterward hearings will be held in Edmonton, May 25; Vancouver, May 26; Calgary, June 1, and Winnipeg, June 5. Dr S J McLean, assistant chief commissioner, and J. A. Stonewall, commissioner, will make the western trip.

Hard To Discover Royalty

London. The king and queen of Siam had luncheon at the House of Commons as guests of Captain Victor Raikes, Conservative M.P., who was a public school colleague of King Prajadipok at famous old Eton. It is believed to be the first occasion on which a ruling monarch had taken a meal in the precincts of the house.

To Prevent Warfare

Calgary. A resolution asking government control of boy bakeries as a method of war prevention, endorsed by the Vancouver Women's Canadian Club and the Calgary Business and Professional Women's Club, will be sent to the League of Nations Society, at Ottawa, for further action.

May Use Own Judgment

Britain Not Asking Dominions To Reduce Japanese Imports

London Britain has informed Dominions of its proposals in regard to Japanese competition, but has made no request for similar reduction of imports by Dominions, it was stated in the government's White Paper. There would be two divisions, one for medical care, including hospitals, and the other for preventive work.

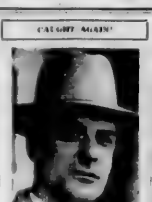
CAUGHT 'EM AGAIN!



Undaunted by failure of two previous attempts to enter the United States, Hugh J. McLeod, Scottish war veteran, tried again. This time as a stowaway on the Aquitania. He is shown at Kilkenny Island after he had been captured. He wants to reach his wife in San Francisco.

May Visit Canada

United States Wheat Expert May Make Official Trip

Washington. Frederick B. Murphy, Minneapolis publisher and expert on wheat acreage reduction problems, may make an official visit to Canada this year, but the plan is being held in abeyance for the time being

This was disclosed when it was learned Murphy will not visit Argentina this year as previously announced

Murphy was a United States delegate to the London and Rome International Wheat Conferences, and it was intended originally to send him to Argentina to explain to officials there the details of the acreage reduction programme now in effect in the United States.

In official quarters it was learned the publisher of the Minneapolis Tribune probably would not go to Argentina because the planting season is past, that country already is well advanced, and his presence there would not have the practical value it might had he if he had gone earlier in the year

Salaries Of Bank Employees

Minimum Is $900 And Maximum $13,500 Per Annum

Ottawa Salaries of bank employees in Canada ranged from a minimum of $360 per annum for junior clerks up to a maximum of $13,500 for managers, according to a statement tabled before the banking committee of the House of Commons by Jocelyn Dodds, president of the Canadian Bankers' Association. The statement was filed in response to a request from Dr Raymond Morand (Cape Essex).

Salaries for junior clerks ranged from $360 to $1,000; ledgerkeepers $600 to $2,500, tellers, $600 to $3,000, accountants $760 to $4,000, managers $1,200 to $13,500, stenographers $360 to $2,000, according to the statement

The methods of four different banks in respect to pension fund living allowances, clothing allowances, etc., were outlined in the statement The names of the banks were not given

Criticize Wheat Conference

Sir Herbert Ashton Voices Views Of British Traders

London An attack on the work of the wheat conference by one of the British delegates, Sir Herbert Robson, was construed as simply an expression of the attitude of the grain traders.

Sir Herbert, president of the London Corn Trade Association, voiced the views of the Liverpool and London wheat traders when he decried "government interference" with the wheat trade and declared

"I must say I view with deep concern the increasing interference of governments with international trade"

He criticized the current conference and a recent meeting of the commission in Rome "for concentrating on price and quota schemes rather than the production problem"

PRINCIPALS IN STRANGE CONTROVERSY

The Duke of Atholl (left), who ran a sweepstake last year for charity and was fined by a London court, recently figured in the news when he refused the coincidence of being fined £20 after being told by a police inspector to plead guilty and the fine would be £25. Sir Thomas Inskip, K.C., British Solicitor General (right) denied the Duke's statement, at which the Duke came back steadfastly adhering to his previous statement. Hence a first-class controversy ensues.

CROP PROSPECTS FOR WEST SAID BELOW AVERAGE

Ottawa. — Reports received from crop correspondents throughout Canada at the end of April indicated that the prospects for the 1934 crop were below average, according to a report issued by the Dominion bureau of statistics. Since May 1, conditions had improved, however Prospects were uncertain on the prairies

Up to the end of April the most unfavorable conditions were reported in Ontario, Manitoba and Saskatchewan In Manitoba and Saskatchewan, the crop prospects were lessened by the contraction of wheat acreage and the extremely unfavorable soil and weather conditions

In Alberta the spring season opened early Soil-drifting was widespread but not as general nor as damaging as in the other prairie provinces. Rains fell at the end of the month to benefit crops already sown.

There has been no noticeable improvement in crop conditions in the Province of Quebec. A scattered precipitation was not sufficient to settle the top-soil and further dust storms have occurred, especially in Manitoba and Saskatchewan The prevalence of soil drifting and the fear of grasshopper damage make prospects extremely uncertain. Conditions have been such as to lower the "intentions" expressed by farmers on the first of April and there seems to increase them This is especially true for wheat although the rise in prices is partial compensation

Forest Fires In Europe

Heavy Loss Of Life And Property In Three Countries

Paris. Forest fires in the aftermath of the serious drouth gripping many parts of Europe caused widespread damage and loss of life in three continental countries.

In Poland, flames destroyed two villages in Silesia and Volhynia. Three children lost their lives and many were injured as 600 houses were burned

Fires starting in the dense forests of Roumania crept into the city of Campulmo-Muscel, and the towns of Pompeu and Slatiera, taking a heavy property toll.

Strong winds fanned the flames at Campulmo-Muscel, where more than 60 houses were destroyed. Damage was placed at $500,000. Shortage of water hampered attempts to curb the blazes

Forests area that had waste 5,500 acres of pines and threatened the valuable turpentine region southwest of Bordeaux, France, were believed to be under control. A 15-mile area near Belin and the small district of Arcachon was swept by the flames.

Heavy Damage From Flood

Peace River Rise Seven Eighty Feet Above Normal

Fort Chipewyan, Alta. —Sweeping buildings and trees in a mad rush, waters of the Peace River continued their record-breaking rampage as they rose 80 feet above the normal summer level at a point 100 miles west of here, reports reaching this point and Never before in white man's knowledge or Indian's memory has the river reached such terrific flood proportions

No lives were lost, but property damage is heavy. The flood meant the loss of the important spring muskrat catch to trappers who depend largely upon this for summer livelihood Trees over 100 years old were swept away like matchwood as the waters struck after an ice jam of huge size gave way Fortunately the area is sparsely populated for had the flood been in the average riverside agricultural community, nothing could have saved those in its path.

Commands Cape Breton Forces

Sydney, N.S. Inspector John McIntosh, of the Royal Canadian Mounted Police, just returned after spending six months in Regina in training, has resumed command of the Cape Breton forces.

Birthplace Of Aviation

Handsome Memorial Erected At Kitty Hawk, North Carolina

Celebrations in fifty American cities of the 30th anniversary of the Wright brothers' supreme-ate at Kitty-dovil 1903, Kitty Hawk, North Carolina, direct attention to this remote sand dune where, at that time, man first flew in a power-driven, heavier-than-air machine

To-day the summit of Kitdevil Hill is crowned by a handsome memorial. Strictly speaking, however, the new monument does not mark the exact spot where man first took the air. Kitdevil Hill has "settled" a quarter of a mile in 30 years, and the gargantuan take-off point had to be designated by a granite boulder on a comparatively level stretch of sand. This boulder and an engineering bronze tablet were dedicated on the 30th anniversary of the first flight, in 1933.

To prevent the ninety-one foot high Kitdevil Hill from continuing its southward stride with every passing windstorm, we've grass and other native vegetation, nourished by local wood ashes from camp fires, has already been planted on the dune's slopes, and day-by-day some determined modelist is unwisely "mothering". Its moral toward oblivion is Afterwards has been halted.

Standing out clearly on its commanding and overlooking both the open Atlantic and Albemarle Sound, the newest wing-flyer is a striking tribute to the genius of two pioneers of aviation. The structure itself is sixty feet high and its base twenty-one feet and fifty-six feet above the near-by sea. The gleaming white exterior of the pylon is North Carolina granite and the interior is lined with warm pink granite.

On the polished steel doors of the memorial the flight of fleet, the myth of Icarus, experiments with kites and other events in the history of aviation are depicted allegorically in raised White are niches in the walls for proposed bronze busts of the Wright brothers. Another interesting feature of the interior is a runtime and memorable steel copy of the outstanding engineering exploit of the first twenty-five years of aviation.

Spiral stairs lead up the tapering shaft of the pylon to a gallery at the top, where a powerful orbiting beacon flashes a friendly beam for not on land and sea. The base of the memorial is in the shape of a huge colonial star, and across the front of the pylon are deeply carved the names "Wilbur Wright" and "Orville Wright," and the line "In Commemoration of the Conquest of the Air."

When the Wright brothers flew to Kitty Hawk three hardy, determined people could be reached only by boat. To-day on the Virginia Dare motor road, called the Virginia Dare Highway, runs down a narrow peninsula from Elizabeth City, North Carolina, and crosses Currituck Sound on a new toll bridge, named in honor of the Wrights. The roadway continues southward along the beach to connect with historic Roanoke Island, birthplace of Virginia Dare, the first white child born of English parents in North America.

May Be Cousins

Hot Shot And Count Agen Show Its Close Affinity

Consider it what you will—bad news or good news—there is no close affinity between man and the great apes.

This is the decision of Dr. Alex Hrdlicka, curator of physical anthropology of the Smithsonian Institution, Washington.

Dr Hrdlicka admitted, however, that there is "some relationship, but at best they are but cousins at the farthest biological."

"There are striking resemblances between man and the great apes which show beyond a doubt a common, but very remotely common, ancestry," he said.

Specimens Of "Blue Sheep"

From the far reaches of western Szechwan province in China the Smithsonian Institution in Washington has received specimens of the "blue sheep," an animal almost as rare as its better known cousin, the gora pall.

W. N. U. 2048

Whistles shrieked and thousands of enthusiasts shouted cheers of good fortune as the "Rainbow-V", steered by Sir Thomas Lipton's "Shamrock" as challenger for the America's Cup, sped down the water into the harbor of Newport at her launching ceremony. Inset is T. O. M. Sopwith, who is taking up the battle for the coveted trophy where Lipton's five Shamrocks left off. The "Rainbow" is the 18th challenger.

Motor Vehicles In Canada

Over One Million Cars Registered In Dominion In 1932

The motor vehicles of Canada if clustered end to end in one monster parade with a hundred feet of space between the bored to each vehicle, would form a procession over 20,000 miles in length —four-fifths of the distance around the world at the Equator. With a little crowding, and utilizing the Trans-Canada and Yellowhead highways of the Dominion could be carried. Such a motorcade, in motion, would consume approximately 1,000 gallons of gasoline for each mile of travel.

The number of motor vehicles registered in Canada in 1932 was 1,032,-967, of which 911,237 were passenger automobiles. The number of persons licensed to drive cars was 1,137,916. The total value of motor vehicles in use was 2,505 gasoline and service stations and 7,226 garages.

The popularity of the motor car in Canada encourages, and in turn is encouraged by, the system of good roads which now exists in every province. Roads open for traffic at the beginning of 1933 totalled 382,-000 miles, and on their improvement and maintenance during 1932 \$65,000,-000 were spent during the year, exclusive of nearly \$9,000,000 spent on unemployment relief work. Of the year's outlay contributed almost \$30,000,000 to gasoline taxes and over \$20,000,000 to license fees.

That all above figures will be exceeded in 1934 is indicated by the fact that motor car manufacture in Canada has increased 100 per cent. in the first three months of 1934, over the production in March, 1933.

Have One Supreme Value

British People Will Make Any Sacrifice For Their Country

The British people doubtless have faults. They are slow to realize danger and always suffer in the first battle; their habits, or methods, even when the necessity for change stares them in the face. But they have one supreme virtue which saves them in every crisis in the community. Let there once be created in their minds the conviction that the country is in danger, whether of conduct, misery, health or even his chief, which they will not endure.

When the need came in 1931, the sacrifices which were then demanded of our people were accepted cheerfully, and they have since undergone with unexampled courage and patience. Their truest respect is that they never feel discouraged.—Stanley Chamberlain.

Very Old Butter

Rolls believed to have been made by some forgotten Indian, dead for several centuries, have been discovered in a pit near Squamish, B.C., and identified by Dr. H. T. Williams of the University of British Columbia's department of geology. The find was made at a depth of six feet and the rolls were six old, all traces of the deciduous wood with which they probably rested, have disappeared.

To Stop Soil Drifting

Saskatchewan Taking Steps To Check Further Of Prairie

Saskatchewan's master farmers will be called upon to sit in conference with officials of the department of agriculture in an effort to meet a situation in the soil drifting problem.

The question of attention to soil such a conference after the drought of 1931 and 1932 had brought to the attention of the west and indirectly the welfare of the nation.

A fuller understanding of these European settlers as a means of conserving moisture in Canada was urged by Count Ignatieff. Already in the west a new altitude was being developed and Canada is the only country in the world "now Canadians" half-way between the better parts of the new and the old.

A problem that confronted development, he said, was whether international finance or the original settlers should be used in maintaining Canada's growth.

Not Burdened By Debts

New Canadians Not Depression More Thoroughly Than Natives

Avoidance of too much credit has helped "new Canadians" to meet the depression more tranquilly than their native neighbors, Colonel Count Aylmer Ignatieff of Toronto, himself a Russo-Canadian, who has travelled widely throughout Canada, it's an address at Montreal. As a result, he said, they are adding much in the colonization of the west and indirectly the welfare of the nation.

A fuller understanding of these European settlers as a means of conserving moisture in Canada was urged by Count Ignatieff. Already in the west a new altitude was being developed and Canada is the only country in the world "now Canadians" half-way between the better parts of the new and the old.

A problem that confronted development, he said, was whether international finance or the original settlers should be used in maintaining Canada's growth.

No Earthquakes in London

Because City Built On Soft Cushion Of Clay

London is safe from earthquakes. Or, at least, if one did effect the city it would be so serious that the rest of the world would be destroyed. Dr. W. H. Winter, the seismologist, made that statement, and explained it in a lecture at the Herschel museum, B.B.

The reason for London's safety, he said, is that it sits on a "cushion of clay."

Dr. Winter also said:

Serious earthquakes are not usually caused by volcanoes, but by readjustment of the earth's crust in the lateral process of contraction."

Lush-over vegetables, fruits, meat, and fish may be prepared with gelatin to make delicious salads.

Gardening

Avoid Planting Seeds Too Deep And Too Close Together

The most common mistakes in gardening are sowing seed too deep and allowing plants to grow too close together. As a general rule three times the diameter of the seed is the proper depth to sow. This means merely pressing things like lettuce, turnips, and radish into the soil but covering the larger seeds such as corn, beans, peas, and beets to a depth of about an inch. With flower, the finer sorts like Alyssum, and Poppies should be sown on top of the ground and barely pressed in. Some of these very fine seeds are best mixed thoroughly with a little dry sand and the mixture sown to avoid sowing too thick Bulb and tubers such as potatoes, gladiolus and dahlias are put in from six to eight inches. Thinning is just as important With flowers the rule is follow it in after half as much space between as the plants are high. In every seed catalogue the height of the mature plant is given Suppose one is sowing with the dwarf variety type Stocks. When fully grown this will be a bushy plant about 12 inches high and the same in diameter, therefore it should be thinned to stand about ten inches apart. Not only will such thinning result in sturdier plants but they will also be more bushy and symmetrical. Even the quick growing leaf lettuce and radish should be thinned, though an inch between plants will be enough. Beans, peas and corn being big seeds can be sown at a greater distance, that is at least three inches apart and in the case of corn in rows, six inches. Such a space apart will be enough for beets and carrots. Of course this does not allow full development but it does allow a good start to be made and, later any aiding much in the elimination of the weed and indirectly the welfare of the soil.

Gardening is very inexpensive in the way of necessary equipment. With a rake, a small hoe and a spade one can accomplish wonders, though of course if there is a lawn to be rolled a heavy roller will come in handy. One of the most garden trasters which cultivates, weeds, and even plows will take the place of a hoe. Later on when it is necessary to cultivate once a week, first to conserve the moisture and secondly to destroy weeds, if the soil is heathed, hand cultivator costing less than two dollars will save hours of labor with the hoe. Of course a dig-ger is a necessity for the planting but is to be preferred to a spade. For the flower garden, a trowel and hand fork will be found too. Tender vegetables must be grown quickly. Especially with such things as radish, carrots and beets. A slow growing disastrous as the roots become woody and filled with objectionable fibre. Just the opposite applies to these things used for salads. On this account it is important to push growth along with frequent cultivation which in addition to checking weeds also conserves moisture. Cultivation alone will often keep the vegetables growing through a dry spell but of course a few pails of water or an hour or two with the hose at this time will be very much appreciated. When the supply of water is not as convenient as it might be it is a good plan, in laying out the garden, to plant those things used in the driest moisture, such as radish, lettuce and celery, closest to the pump. Sweet corn, is needs a supply of nitrogen for growth and therefore securing vegetables of the highest quality.

Used On Harbors

Wrack factors are starting a campaign to dissuade men from growing their hair in the Lloyd George manner. In Wales administration for Mr. Lloyd George has led men to alter their bodies to aid in long passages over the neck. Barbers are losing money and so they are advertising in order to persuade Welshmen that short hair is not only healthier but cleaner.

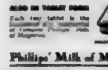
If you're planning you need more mail.

FANCIFUL FABLES

How Acid Stomach Makes Itself Known to You

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine *Phillips' Milk of Magnesia*, or *Phillips' Milk of Magnesia Tablets* when you buy—NOT the substitute.



Each tiny tablet is the equivalent of a teaspoonful of Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia

OCCASIONAL WIFE

By
EDNA KENTON WHITEHEAD

Author of "Loretta", "Lipstick Girl" Etc

BY SIX PROPHETS

Camilla, Hoyt and Peter Ames, young and in love, marry secretly, deciding to hide their even lives apart until Peter is able to provide for her Peter is a young, struggling sculptor trying to win a competition for a schoolchild's head and Camilla is the adopted daughter of a wealthy family who is set to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Cleo Mayo, a fellow boarder-mate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to their beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This seemed necessary for Camilla to announce before the party that she and Peter are married. Avis Worth rents a studio on the same floor as Peter and invites Camilla to be her bunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of $1,000 Peter and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artistic people.

(Now Go On With The Story.)

CHAPTER XLIII.

Terry resolved Camilla gently, when he danced with her. "You're a little sorry for the way you deceived and then deserted us all? I'll never be the same again, since I lost you," he sighed.

He was probably as sincere as he could be about anything, but Camilla knew that he could not have been deeply offended. "Perhaps it is just as well you are engaged," she taunted him, laughing. "Besides, I didn't desert the crowd just because I married Peter. It was all arranged that I should meet drop out of your life long before that."

"Glad if you had listened to me. I've tried to persuade you to marry me for two years What's this about Doing I hear about your working?"

"I am, and it's not the least bit absurd. It's wonderful. I never was so happy in my life."

"But that's not fair, you taking care of yourself when you are married. That's a husband's job."

"Oh, I'm saving him for the future," she laughed. "It isn't that Peter can't take care of me," she defended him. "I just won't interfere with his work, now, when every day is an important to his career. Besides, I have my own ambition to work out and I don't want him to interfere with that, either."

"That's an ambition? Do tell me, because I should like to recognize one if I see it. Is it a chance, and can I be cured?" Terry ridiculed.

"Oh, I could tell you all about it, but you never would be able to recognize the symptoms. You should be more sympathetic, Terry Wayne, for being such a master Where do you suppose the money comes from that you spend?"

"Why, from the old man," he exclaimed, as guiltcous as a child discussing money.

"But did you never try to estimate what it represents of thought and effort, to provide you with so much?

"Why should I bother about that? One person's thought and effort are as much as another's to me. What I think about these days is the fact that the governor has cut me about twenty per cent. and-I can't convince him that my expenses are more instead of less."

"Everyone is trying to reconcile these times to their purses," Camilla says. Too bad for you that you don't have to earn your living for awhile".

"Say, what have you got against me, anyway?" Terry's astonishment was genuine. "I haven't a single row with you that I can remember."

"Don't be silly," she protested, and turned her attention to someone else.

Peter and Camilla were invited to see her again. Camilla discovered. They chided her for her neglect of them, were curious about her marriage to Peter and admired her seriousness. She gave them no details concerning her position, only that she did not like Avis. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of $1,000 Peter and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artistic people.

HOLDS FALSE TEETH TIGHT AS CEMENT

Please can't something slip when you sprinkle on Dr. Wernet's Powder. Support softer to world holds plate so tight they can't upset or rock—and when they actually feel and act like your own. Keeps mouth sanitary, breath pleasant. Special comfort-cushion prevents sensitive gums from getting sore. Small cost. Any druggists.

While Camilla worked at her sketches, she lived in a different world, alone Hoyt Peter never entered their thoughts and Camilla lost herself in the pleasant, dreamy days she spent alone. Late in the night, she accomplished more work with better results. It was even more pleasant than working at the apartment, which she did sometimes, also. No conflicting thoughts or disturbing influences. She grew to appreciate more her wisdom in living apart from Peter so that he might work alone, also.

She was more concerned over the fact that Avis had come to live across the hall from Peter, than she admitted. Not so much because she was jealous of Avis' interest in Peter, but because she feared that her presence there would take from Peter the opportunity to do as much to provide for him, his privacy.

Fortunately, for her peace of mind, Peter never told her how many times Avis interrupted his work and insisted on entertaining her as host in her company. These confessions in his confidences were not so intentional as they were natural. He had learned that to discuss anything with Camilla in those days and, like all men, he did not realize himself. Camilla was the child poet in Avis' company They were so casual and pleasant, conversationally interspersed with working hours, as she had been with Camilla herself, he was scarcely aware that he saw more of Avis than he did his wife

They clashed at her reception. Avis took possession of Peter and ignored Camilla so casually that no one noticed it. However Camilla departed with flushing thanks for a marvelous evening, and vaguely impressed with the memory that Avis had been rude to her husband and friend. With Peter's studio across the hall and he a new tenant in the building, it did not seem at all improbable

Avis insisted that Camilla and Peter remain until the last guests went, then she turned her full attention wholly upon Camilla. "I can't thank you enough for helping me so beautifully this evening, dear. It was too sweet of you, the way you got people together and helped to entertain them. Do stay with me for awhile, and, while Tillie clears up the worst of the wreckage, we can have a bite together. I'm sure you don't want to be out -I know I don't. But I think everyone did have a good time, don't you?" anxiously.

"No doubt about that," Camilla assured her with sincerity. "But I didn't do so much. I had a good time, myself."

"I'm so happy if you did. I'm afraid I rather neglected you, depending on you or help me as I did. It kept me pretty busy, telling everyone about Peter Did you notice how popular he was?" she asked, pleased and impressed

"Oh, I say!" Peter objected. "It was you who were popular, and they listened to what you said about me because you were talking."

"Isn't that just like him?" she asked Camilla with exasperation, as if they shared his idiosyncrasies with a common indulgence of them.

She poured glasses of punch and a plate of sandwiches

"You will be needing me a hand till some day," Peter remarked casually, "if I don't quite outing over here.

Camilla looked up quickly.

Avis laughed. "He has the most exaggerated sense of obligation I ever met. Just because he can't read here and I make him stay much long enough to drink a cup of coffee occasionally, he wants me to punch a meal ticket for him. Actually!"

Camilla, with working so hard to finish that figure, I believe he would starve if someone didn't tell him it was time to eat. And since you are not here to do it, I've taken it upon myself to watch over him a little. We don't want our prize winner to collapse at the last minute, do we?"

"Oh, you women!" Peter made a depreciating gesture. "You do like to baby us. That's because you don't know what it means to apply yourself to something that means more to you than your physical comfort."

Oh, didn't she, thought Camilla, with a flash of resentment at Peter's attitude. Unconsciously, he had developed the habit of crediting the living there in Avis' rooms, eating a meal and discussing food everything with her

"I am glad you take such good care of him," Camilla offered humbly, but she grudged Avis even one poscious privilege of serving Peter.

"I'm 'playing the way,'" he changed the subject, "we haven't named the figure yet." Actually, he had only discussed the matter with Avis then with considered included both girls

Ask Mother—She Knows

Mother took this medicine before and after the babies came and it gave her more strength and energy when she was going through it. . . . And how she does rave about it! . . . Mrs. Chicago. No wonder she has such a family!

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

CRAWLING ABOUT WITH LUMBAGO

Here is some useful information for anyone troubled with that uncomfortable complaint, lumbago. A woman writes:—

"For years I suffered from lumbago. During wet weather, I could only turn in bed with great effort and pain. I was so stiff and ached so much. Two years ago I had both feet badly frozen and crushed about for a fortnight, feeling very ill indeed. I was advised to take Wincarnis. Before I had finished the second bottle, my lumbago had gone. I felt fine, and I have taken them ever since, with the result that I hardly ever get a bout of lumbago these days."—Mrs. I. G. P. C.

Why is it that Wincarnis is so effective in keeping lumbago at bay? Simply because it goes right down to the root of the trouble and removes the cause, which is an impure bloodstream. The uric acids in Wincarnis are quickly eliminated, and your rheumatism pain and vigorous by promoting a cleanliness regularity of all the organs of elimination.

Little Helps For This Week

"If thou draw out thy soul to the hungry, and satisfy the afflicted soul, then shall thy light rise in obscurity and thy darkness be as the noonday. And the Lord shall guide thee continually." Isaiah 58:10-11.

If thou hast yesterday thy duty done,
And thereby cleared firm footing for today,
Whatever clouds make dark tomorrow's sun,
Thou shalt not miss thy solitary way.

O Lord who art our guide even unto death, grant us I pray Thee grace to follow Thee wherever Thou leadest us. Help us to be thankful to which Thou hast called us, how down our wills to simple obedience, patience under pain or persecution, humility of word and manner, humility and kindness. In great acts of duty or perfection if Thou shouldst call us to them, help us in self-sacrifice, heroic courage, laying down of life for Thy Truth's sake, or for a brother.— C. G. Rossetti.

Collar Of Pure Gold

Valuable Antique Dating From About 700 B.C. Is Found In Ireland

A collar of pure gold which is believed to have been made about 700 B.C. has been found at Burren, County Clare, Ireland. Its discoverer was a local farmer who noticed it glittering in a clod of earth. The National museum has claimed it as treasure trove. Dr. Mahr, keeper of Irish antiquities in the national museum, has confirmed the belief of its antiquity. The type is well known, he said in an interview, and four similar ones are in the museums.

Drive Against Lotteries

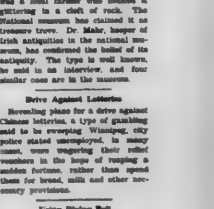
Revenue Canada plans for a drive against Chinese lotteries, a type of gambling said to be sweeping Winnipeg, city police stated unemployment money is being diverted into relief vouchers in the hope of reaping a sudden fortune, rather than spend them for bread, milk and other necessary provisions.

Using Diving Bell

With the aid of a great diving bell, Dr. William Beebe plans to go 2,500 feet below the surface of the Atlantic near the Bermudas. He is carrying on the work solely for the purpose of making scientific observations of as large a number of deep sea creatures as is possible

Kidney Troubles

seem poisons to accumulate in the system and bring on backache, rheumatism, Lumbago, Rheumatism, or Sciatica, Gin Pills to restore the kidneys to a healthy condition and eliminate the poison from your system.



It's very embarrassing when one's wife is jealous, and very humiliating when she isn't.

Weed Experts Make Report On Sow Thistles

Line Elevators distribute Booklet on latest methods of Eradication

The manner in which Sow Thistle reduces grain yields is shown in figures produced in a booklet dealing with latest methods of control and eradication of the weed just compiled by Dr. G. P. McRostie, Professor of Agronomy, and W. Tibbey, M.Sc. Assistant on Weed Research, of the Agricultural College at the University of Manitoba. The Survey was conducted over a period of three years under the direction of, and financed by, the Northwest Grain Dealers' Association. Booklets dealing with this weed are being distributed this week to all line country elevators.

The booklet deals with the plant; distribution in the West, origin of the weed; methods of spreading through seed and root system; the manner of damage caused by Sow Thistle; tables showing the average reduction in yield of wheat plants growing at different distances from Sow Thistle plants; methods of control through cultivation; use of chemicals and growth of sweet clover as areas where it is not necessary to summer-fallow to conserve moisture in combatting Sow Thistle growth.

Farmers who are troubled with this weed and who wish to keep their fields free from infestation are advised to obtain this booklet which is now available free of cost at all line country elevators. Booklets were recently issued by the Northwest Grain Dealers' Association dealing with Couch Grass control and the loss brought about by weeds in farm areas of the West.

J. GAUF AGENT FOR CREDIT COMPANY

J. B. Gauf, of Fort Saskatchewan, has been appointed agent for the Dominion Agricultural Credit Company Limited. The Company gives credit to farmers to acquire breeding stock.

A recent address, "Alternatives to Grain Growing in the Prairie Provinces", by Dean A. R. Shaw, has been printed in pamphlet form for free distribution to all who write to the Dominion Agricultural Credit Company Limited at Regina.

JOSEPHBURG NEWS

The Victoria U.F.A. local held their regular meeting on Thursday, May 17th at the school with Mr. E. Griffen in the chair. R. R. Rippel was appointed secretary for the evening.

The next meeting which is to be a social meeting will be held on Thursday, May 31st, in the school. Mr. A. E. Meyer and Mr. Unterschultz are expected to speak at this meeting. The ladies are kindly asked to bring lunch.

Mrs. W. E. Griffen and Mr. A. H. Reingruen are in charge of the program for this meeting.

Mr. Alfred Hennig and Mr. Jack Porter are in charge of the program for the following meeting.

HEAVY DEMANDS FOR TOURIST LITERATURE

There is an exceptionally heavy demand for tourist literature this spring at the provincial publicity bureau which is taken to presage an increase in tourists to the province. A new tourist booklet together with a revised and extended tourist map and guide is issued and being distributed through travel agencies and tourist bureaus throughout the continent. The provincial government has also been asked to present its views on tourist traffic development to the senate committee at Ottawa.

MOTOR CAR LICENSES

About 60,000 passenger motor car licenses have been issued to date, while truck licenses to April 30, numbered about 10,000.

Fort Tennis Club Enters Intermediate League

The Fort Community Tennis Club played the first match in the Intermediate Tennis league here on Tuesday evening. Three events were played in edmonton and five here There are nine events to a match

Three new teams have entered the league this year and one old one dropping out. On account of the large entry of teams in the league the starting date is two weeks earlier than in previous years.

The games on Tuesday evening were very much one-sided, with Nonna Cleitz winning eight events and Ethel Tapsell seven, every one of the locals had not had a racquet in their hands since last year, but gave a good accounts of themselves.

The following schedule for the season has been arranged

May 26—Fort Saskatchewan vs. home team and five events will be played at home and four away

May 28—Junior Play vs. Fort

June 5—Fort vs. Garneau

June 12—Highlands vs. Fort

June 19—Fort vs. Civil Service

June 26—Ind. barbs vs. Fort.

July 3—Alberta Ave. vs. Fort.

July 17—C.N.R. vs. Fort

July 24—Fort vs. Grierson

July 31—Leduc vs. Fort.

August 14—Fort vs. Eastwood.

RAIN IN MANY DISTRICTS

Reports of rain this week throughout many districts of the province have been reported. Rain has been fairly light in some districts in the South, where they would be very thankful. Crop conditions this week have greatly improved, due to recent rains.

Large Crowd Attends Hope Sports Celebration

With beautiful weather Fort Saskatchewan held another successful sports day on May 24th, when over 1000 persons witnessed a large program of sports including five baseball games, and three basketball games. An incident which lent color to our sports day was an aeroplane circling above the grounds.

For the soft-drinks, and ice cream booths the weather was ideal and before evening all stocks were exhausted.

Starting at time, the baseball tournament got away to good start, when Bruderheim defeated Lamont by a score of 9 to 4. Fort and Morinville played the second game with the former winning by 7 to 5.

Rudolph Rippel's spectacular home run in the last inning of this game, with bases full, doubled the game for the Fort. Incidentally, Rudolph won the baseball bat given for the best hit during the game.

For the afternoon series, the Fort won the bye, leaving Bruderheim to play St. Albert in the semi-finals, the former won by a score of 9 to 6.

After supper, Bruderheim and the Fort teams battled for nine innings with the Bruderheim team finally winning by one run to win the first prize and Fort second.

The referees were J. B. Gauf and J. Dewar, and their work was highly satisfactory.

In the basketball competition Bruderheim girls were the winners defeating the Fort and Lamont girls.

Fort girls won the exhibition softball game from Josephburg.

Lamont boys defeated the Fort High School boys in the basketball event.

The foot races and novelty races were keenly contested by the young people.

Mr. and Mrs. Robert Schmitz won the prize for the heaviest couple, (307) and they also won the prize for the largest family, six children being present. The prize was flour donated by the Robin Hood Mills.

Mr. and Mrs. A. Whitford came

(Continued on page eight).

What About Social Credit, Canada

(Continued from last week)

No. 5

"The wages, salaries and dividends distributed (as mentioned previously all money incomes) and thereafter any other method of distribution must in each and every period of time, do not and cannot, buy the product of that period and the wholesale price can only be bought by a draft and an corresponding draft on the purchasing power distributed is received for future production, which purchasing power can only come from future bank Loans and consequent drafts.

"Do you see the trouble, A ($500), B ($500), A plus B ($1,000) Five hundred dollars in purchasing power equal to five hundred dollars in goods.

J. "That's how people think. There's something wrong with the analysis. Well, what is it? If you can prove it you're the first one to do so since it was formulated fourteen years ago."

J. "Fourteen years! Why I thought this thought had come to other of these new old prophets of the depression.

W. "Yes, so do a lot of people who do not take trouble to investigate anything at all, but before forming an opinion it does oh so much for the A + B Theorem. You were going to show me where it is at fault."

J. "Give me just a minute now and I bet I'll find it. Ah! I thought so. Look here, Uncle, if payments Ten and they are paid in three months to you. Well, they are 'A' payments and the other corporations to add them to the "A" payments of this factory and there will be no shortage of purchasing power

W. "Well done. I don't know just why any times that a student has voiced this criticism (for it is the stock objection) but the number must be fairly high. However, you have overlooked one little phrase in my explanation."

J. "What was that?"

W. "Rate of flow. You are assuming a static situation or at least one where parts of the system stand still and allow other parts to catch up with them. You overlooked the time lag. In order to understand our economic system you must visualize it as a continuous process."

W.—"To give a simple illustration. Think of a tank with two pipes leading from it and a continuous flow of water through the pipes. The rate of flow expression means that it is a physical impossibility for the quantity passing through one pipe in a given period to equal the quantity passing through both pipes in that period. In the case of the factory we are considering it as a series process where a particle undergoes a different operation in several plants. You know that industry is financed largely by bank loans. At each stage of the process the money received in payment through the sale of goods is repaid to the bank and cancelled. So that this shortage of purchasing power can be demonstrated at any stage of the process. The greater part of incomes must be spent as received and they can only be spent on goods which are already for sale. It may be several months or months before the article (for which the purchasing power was distributed) makes its appearance on the market. In the meantime this purchasing power has been spent and cancelled. Consequently when the goods finally appear there is no way to purchase them except by the purchasing power distributed in the last period for all the purchasing power distributed at each of the earlier stages of its manufacture will likely be spent and cancelled."

J.—"But if this were true, our industrial system would have broken down long ago."

W.—"You forget that I did not say that these goods cannot be sold. I said that they must be distributed by some other agency than that of consumer purchasing power, and that agency is bank loans forming, as Douglas says, "a draft on purchasing power distributed for future production." But you know that industry is continually breaking down. We are in the midst of one of these collapse right now, and there have been twelve major depressions in the last 100 years. The physical facts all support this analysis."

J.—"Well I don't know what to say. I don't seem to grasp it very clearly yet."

W.—"All right. Let us look at it this way. Suppose a business man wishes to erect a building and asks his banker for a loan. The banker agrees to make an entry in his ledger and the man is now permitted to draw cheques up to the limit of $5000, the amount of the loan. (To simplify this illustration let us imagine it to be) not in a self-contained community consisting of you and me, Joe Black the builder, and our friend Smith, the banker.) Now suppose it was Joe Black who received the loan, and he hires us to build the house. Suppose too that the material for building did not cost anything and that we did the work in our spare time so we would save all that Joe gave us as wages for building the house Now, when the house is finished Joe perhaps needs the money and offers to sell us the house We say how the five thousand dollars that he gave us for building it. In other words we got the house for working for it, although I guess we should say we paid five thousand dollars for it. Now Joe can repay his loan and he does so. The amount is cancelled as you will remember this is what happens to money when a loan is repaid. So neither Joe, nor the banker, nor either of us have the money. Of course it isn't likely that Joe would do business in this way but I wanted you to be clear that the trouble in our system does not arise out of what we call "profit.

J.—Why do you say that?"

W.—" Because that is the orthodox Socialist reason—that profit is proved because others are rich, that the trouble with our system is because it is a 'profit' system I want to show you that if you take out the element of profit you will still have in your system a fundamental error which causes the trouble So Socialist schemes of collectivism aimed at eliminating profits are useless as a means for recovery."

J.—"Oh well. Go ahead. Let's hear the end of this example."

(Continued on page 5)

Keeping up Quality
The reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.
And the reputation of United Grain Growers is similarly based on unremitting efforts to keep up the quality of his service to farmers in handling their grain and furnishing them with farm supplies.

"Fresh from the Gardens"

Music Festivals And Spring

The music festival season, whether by accident or design, coincides with spring in this Western country, and it is peculiarly fitting that it should. The two seasons are highly compatible

Spring is essentially the season of song of the joy of new birth, of life freed from the trammels of winter of new hope and refreshment, of the mood-time and the tilling and burning of the lands, of the urge to new endeavor of faith and a more expansive contentment. The pagans of old celebrated its advent with rites in which music was the vehicle of expression of their mirth and jollity the reflex was inspired

The association of spring with song is universal has been universal down the ages: for in the spring, nature awakes from long hibernal sleep to the notes of its own orchestra and the song of its own throat. What more fitting then than that the soul of man should "blossom in singing" when spring brings life anew to prairie and woodland!

The music festival idea has given point and purpose to man's urge to vocalize the finer aspects of his emotional existence and experience. The remarkable growth of that idea in prairie communities, indicated in the consistent expansion of the festivals, is one of the most reassuring evidences of the enduring quality of the social organization these communities reflect. The joy of singing and the love of music, emotions never realized nor appreciated to the full unless they are shared, are indubitable builders of closer ties of friendship and fellowship. The association of musical interests is a deeper sense of that brotherhood of man which makes the whole world kin.

Song is of the heart and of the spirit a weaver of the very fabric of community life Music symbolizes the harmony of which that life is composed and without which it cannot long survive. It is significant that visitors to rural communities of the prairie west have been struck with the fulness of the social life obtaining in them, despite the lack of those adjuncts which are considered indispensable to the assemblies of city life. This feature has been remarked upon particularly in relation to the remoter communities where residents have learned to rely upon their own resources and their own proclivities for social organization, and where, in co-operative endeavor, they have managed to add spice and variety to their ordinary

Music and song have thus become the greatest adjutants of peace and contentment among the scattered communities of the far-flung prairies. They have contributed greatly towards the alleviation of the pangs of disappointment They have made hardship less onerous, reaction less disruptive. These annual festivals, bringing, as they do, urban and rural dwellers of hundred meter together, and demonstrating, as they do, a heritage common to the divers peoples composing the population of the western provinces, are contributing much towards developing that fellowship which, wider than the communal, reaches through the provincial into the national life

It is right that the winter should be a season of preparation and practice, but it is essential that the festivals should be of the spring. That's where they belong

Showery Skies Cool

Rye On Ashcroft Ship Has Become Popular With Crew

Fourteen-year-old Einar Lamberg, who stowed away on the whaling factory ship Southern Princess, has made good. Einar was discovered when the ship was on her way to the Antarctic. He had crept into the ship the night she left Sandefjord, Norway, and hidden under a barrel until hunger forced him to reveal himself. The skipper informed the lad's plight, and made him assistant [illegible]. His quickness and keenness soon made the boy extremely popular with all the crew. In dark hours after a hurricane had smashed the rudder of the Southern Princess and it seemed certain that she would be [illegible] on the rocks, Einar proved his worth. His bright cheery manner and utter disregard for danger helped the morale of the older men.

According to experiments in Italy, hens fed wheat sweet flour and macaroni throw eggs than hens fed white flour, and the chickens from such eggs were larger and healthier.

In [illegible] rainy and the eggplant are identical in composition, their difference in color is due entirely to naturally included metallic oxides.

Wolves Kill Caribou

Troopers Bring In Tale Of Winter Destruction From North

Bringing with them news of terrible onslaughts made by roving packs of wolves while the caribou were migrating southward, Sergeant Kemp and Trooper Bridges, of the Royal Canadian Mounted Police, the sub-Arctic, reached The Pas, Manitoba, following nine months of travel west of Churchill.

Accompanied with his partners, John Ivanchuk and Charles Hendren, left last July with supplies for winter trapping 165 miles north of Brochet.

They travelled by canoe, and reached their headquarters on Oct 11. During the trip they met no whites. But on the morning after their arrival they went outside to find the migrating herds passing their location. Thousands of animals were moving south. Following close on their heels were packs of from five to 25 wolves. Stampeded into the water in places, some killed purely for wantonness, and when there were not deer to hunt down, they turned on each other.

The tail-growing hybrid dahlias seem to be popular in Canadian gardens can be raised from seed easily, but, as they do not come true, anyone wishing to increase the stock of a special plant must do so by division of the roots of that plant.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too fast or the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the heart so it will respond to the demands made upon it.

50c per druggist for Milburn's H. & N. Pills.

Big Changes Coloring At Different Altitudes

Meteor Expedit Studying Records Taken In Stratosphere Flight

Remarkable evidence of changes of color in the sky at different altitudes in the stratosphere is one of the results which have been obtained by the experts in Moscow who are studying the records left by the crew of the Soviet stratosphere balloon Stratostat which reached after reaching the record height of over 13 miles.

Investigations are being carried on under the direction of M Thomasit, the meteorologist member of the Central Weather Bureau. The geophysicists of the Stratostat carried numerous instruments for making meteorologic observations at various periods of the ascent and descent.

Among the data on which the experts have been working are twelve photographs taken at different altitudes, and twenty-seven spectrum photographs.

The results of the preliminary investigations are stated to show that the color of the sky varies as follows: 8.36 miles, marine blue; 8.63 miles, dark blue; 8.68 miles, dark violet; 11.81 miles, dark violet marine; 12.42 miles, dark violet grey; 13.67 miles, black grey.

The evidence hears out observations made by Professor Picard, the Belgian balloonist, and also by the crew of the Soviet Stratostat U.S.S.R. 1, which made a previous high record attempt, who recorded that the sky at 11.81 miles high was "very dark dispersion."

The experts state that valuable records of sky colors were made by M Vassenko up to the time when the instruments froze at such a height, apparently of 7.46 miles on the downward descent

China's Guide For Pilots

Lighted Clock Greets Ships Entering Port At Shanghai

Instead of Liberty's flaming torch in great arriving vessels, China has erected a memorable landmark in a clock, thirty feet in diameter. Visitors entering the Whangpoo river off the Wusung forts are now struck by the new tide indicator

Figures from zero to 12 cover the face of the gigantic dial which at night is illuminated by Neon tubes visible for at least a mile out in clear weather.

The hands of the clock are geared to an automatic mechanism for regulating tide depths. The device was put into operation by the Port Conservatory Board as a guide to skippers.

The base of the dial is a great arrow, whose position shows whether the tide is rising or falling. The complete outfit, rising high above the Bund, is a conspicuous sight to visitors, particularly when it shines in welcome out of the darkness.

Tomsk Steel Building

Skyscraper Is Place By Place To Spoke Landlord

Charged with stealing a building, several tenants of a row of flats in Tomsk were arrested in Rhodel, Poland. Back of this is a case of revenge against the renters' landlord. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. House by house, floor by floor, window by window [illegible] each flats was taken away and reconstructed there. Calling to collect his rents the landlord found an empty space where his flats had been. He scoured the village in a search was started. After many days the flats were found. Inside were the tenants enjoying life in the shadows of a landlord's walls. The brute owner had them arrested, but in pointing how he will get the building back where it belongs.

Of recent years, a number of passenger-carrying motor buses have been produced by different plant-investing manufacturers, but the Dominion Transportation Bureau, at Ottawa, has these varieties have not yet been tested for a sufficient length of time to say which is the most desirable. For the present, however, the variety called Velvet is favored in Hudson Canada, while Regal possesses more [illegible] in the West.

More Tobacco for the Money!

and POKER HANDS, too with

Figures Show Improvement

Average Value Of Canadian Farm Lands Has Increased

The average value of farm land in Canada in 1935, including both improved and unimproved land as well as dwelling houses, barns, stables and other farm buildings, is placed at $34 per acre in an estimate recently issued by the Canadian government. This shows no change since 1932. Average farm land values range from $63 per acre in British Columbia to $16 per acre in Manitoba, Saskatchewan and Alberta.

Average values placed on farm livestock are: Horses, $62; milch cows, $31; other cattle, $17; sheep, $4; swine, $6.60. The changes from 1932 values are slight except in the case of swine, which have almost doubled, having increased from $4.72 to $8.60. In the same period the average value of [illegible] has risen to ten cents a pound. Total values of all farm livestock in 1935 amounted to $468,135,000, an increase of about $27,500,000 over 1932. The value of farm poultry is placed at $33,456,000, a slight falling-off from the value in the previous year

Average wages of farm hands during the summer season were $17 per month for men and $10 per month for women, board and lodgings, in both cases, being furnished by the employer. Counting in the value of board and lodgings wages for men were $31 per month and for women $20 per month.

Iceland's capital is named Reykjavik, meaning smoking harbor, after the hot springs, which are so prevalent in the country.

Cattle are now branded painlessly with a chemical that removes the hair and leaves the skin white.

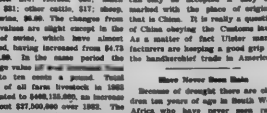
"Made in China"

Orientals Make Up Irish Linen Handkerchiefs For American Trade

Handkerchiefs for sale in Atlantic City bearing the tichets, "Pure Irish Linen," and "Made in China," so aroused a visitor that he promptly wrote to the Belfast Times about it. In reply John Gilliland of Belfast, Director of the Irish Linen Guild declared that China is now buying thousands of pieces of linen to be made up into handkerchiefs and embroidered for the American trade. "Although Irish linen is used," he said, "owing to U.S. Customs laws, articles coming into that country can only be accepted if they are marked with the place of origin . . . Hence China. It is really a question of China obeying the Customs laws. As a matter of fact Ulster manufacturers are keeping a good grip on the handkerchief trade in America."

Have Never Seen Rain

Because of drought there are children ten years of age in South West Africa who have never seen rain. They have been discovered by the Minister of Lands who reports that rain has not fallen for seven years in some districts.



W. N. U. 2047

Future World Peace Will Be Assured When Nations Learn To Live And To Let Live

The following article, being an editorial on war, appeared in a recent issue of the Rotarian Magazine

Anyone who believes that from the beginning of time the World War was failed to come in as an illogical position even to hope for a wartorn world But he who regards all wars as a direct consummation of policies of participating nations, can build an optimous arsenal a conviction that gives them courage and better smokes for the same money and Poker Hands to exchange for free gifts

A turn to Turret Fine Cut is a turn in the right directions . . . greater economy, greater pleasure and the extra value of Poker Hands. Don't wait!

Wars do not happen suddenly. They are made in time of peace Then popular desires are shaped into national policies which conflict and eventually clash with those of other countries.

It is interesting to conjecture what might have happened if, my in 1900, peoples of the 27 nations that were drawn into the holocaust of 1914-18 had clearly realized that the policies then being town would lead to that conflict. Perhaps, in considering whether the national aims should be pursued unmodified, far-seeing leaders might have stated the case thus:

"These policies will lead to war. That war will take 30,000,000 lives, cost $400,000,000,000, scrap the morals of civilization, precipitate a world-wide depression.

"If these policies are not pursued, 30,000,000 lives will be saved, civilization will proceed without interruption. And with the $400,000,000,000 we shall be able to give a $2,500 house, furnished with $1,000 of furniture, and five $100-acres to every family in the United States, Canada, Australia, Great Britain, Ireland, France, Belgium, Germany and Russia; to put a $5,000,000 library and a $10,000,000 university in every city of 20,000 population in the countries named; and, furthermore, establish a fund which, at five per cent, interest, will for all time pay a $1,500 annual salary to 133,000 teachers and 135,000 nurses.

With the question so posed, it would seem to us certain that the nations of 1900 would have been willing to sacrifice their policies for the [illegible] in the benefits of peace. But would they? With thousands of unarmed men yet living and feats of unarmed combat running from fist to rammed on of the east of the last war, we of 1934 persist in desiring policies and aims that can but lead to conflict. Realistic newspaper correspondents each morning send home dispatches that can but lead to conflict. Realistic newspaper correspondents each morning send home dispatches to headlines the cradle of "the next war"—a war that admittedly will bankrupt civilization.

It can, however, be avoided—at a price. The price is that nations learn how to live and to let live, even though it involves relinquishing of what in an early day of relations between individuals was called "rights". Men of goodwill will continue to believe that some day governments having weighed the case, will elect to do this.

Finds Them Expensive

Many American Hens Tower Found Unsuited Stationary

However rude or crude are American terms, they are so expressive and impolitely near the truth that it is very hard to resist giving them a place in any honest lexicon. Such terms are "graft," "once-over," "foolproof" and "step on the gas." This was the explanation given by President George Gordon of Magdalen College, Oxford, England, for their inclusion in the new supplementary volume of the Oxford Dictionary Among other phrases which have been introduced into the English language in the last 80 years and given a place in the dictionary are "sit of a duo de," and "give it the once over."

Rhubarb may be propagated from seed, but as the identity of the variety is likely to be lost through cross-breeding in the fertilization of the seed, it is better to propagate by transplanting sections of the root.

W. N. U. 2047

Points in Rose Planting

Necessary To Make Sure That Roots Have Not Become Too Dry

When new rose plants are received, it is important that the roots should not be allowed to dry out under any circumstance. It is a good practice when opening the parcel of rose plants to plunge the roots into water and loose them there for several hours, or to bury the plant root and branch, in moist soil for a few days before planting. This process will restore the moisture in the stems that has been lost during the winter season

Hybrid tea roses should be planted about 18 inches apart. hybrid perpetuals, two and a half to three feet and the rugosa hybrids, the many roses, and other large-growing hardy sorts about four feet apart. It is necessary to prune back severely, and the buds or eyes be planted deep enough so that the point of the union between stock and scion is from two to three inches below the surface of the ground This is important, because, if the union is at or very near the surface, the sun shining on it hardens the wood and prevents a free circulation of sap, which is not desirable as a strong vigorous growth is necessary for best results. Roses need an abundance of moisture and the surface of the soil should be kept loose and free from weeds throughout the season spring until midsummer. After each rain the rose bed should be hoed or raked, leaving a rather loose surface, or during a dry time it will be necessary to water the roses, the soil should be loosened after watering. It is better to water roses thoroughly once planted deep enough so that the point of the union between stock and scion is from two to three inches below the surface of the ground This is important, because, if the union is at or very near the surface, the sun shining on it hardens the wood and prevents a free circulation of sap, which is not desirable as a strong vigorous growth is necessary for best results. Roses need an abundance of moisture and the surface of the soil should be kept loose and free from weeds throughout the season spring until midsummer. After each rain the rose bed should be hoed or raked, leaving a rather loose surface, or during a dry time it will be necessary to water the roses, the soil should be loosened after watering. It is better to water roses thoroughly once planted deep enough to give them a light watering frequently.

The First Coal Mines

This Week's Challenge And Coal Was Obtained By Tunnelling

Coal was first dug in the British Isles on the south shore of the Firth of Forth Five centuries there were no means of draining coal pits, and the coal was obtained only in dry districts, where it could be reached by tunnelling. In some places shallow "coal pits" were dug. In 1710 the deepest coal mine in the country was only 300 feet deep. Gun-powder was first used to blast coal in that year. In pits where fire-damp accumulated, it was exploded each morning by "a reasists man of purpose," who went down the pit with a lighted candle in his hand and provided with a long pole at the end of which was a lighted match. "There was no fear of safety lamp until the year 1815.

AN ADORABLE NEW CAPRI SLEEVE DRESS

And a Blonde model from every point of view.

You'll adore this delightful little model with all its new, young and lavish features.

It has the cape sleeves so a la mode, can back and wrapped skirt which allows plenty of freedom for action.

Lovely ach-ment in cotton, linen and the silks can be worked out most attractively in this model.

The sleeves can be of self-material, if you prefer

Style No. 665 is designed for sizes 11, 13, 15, 17 and 19 years.

Size 15 requires 3¾ yards of 35-inch material with 1 yard 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully

Address:

Acted As Bumpers

Hit by two torpedo, fired in naval manoeuvres at Hano Bay, Sweden, a vessel was considerably damaged. The torpedo was deflected and completing a circle, struck the ship from which it was fired.

MARY PICKFORD RETURNS TO THE CITY OF HER BIRTH

The famous screen star, Mary Pickford, went home to Toronto, the city of her birth, recently, and was received a tumultuous welcome. It was her first visit in many years and was made at the special request of Toronto, which is this year celebrating the centenary of its incorporation as a city. Above we see Miss Pickford as she responded to the various tributes tendered her at the civic luncheon in her honor, while at the right is a view of one section of the enormous throng that crowded the City Hall to participate in the civic welcome given them in her honor.

Canada And United States Relationships To Be Studied By The Carnegie Endowment

Subsoil Destroying Cattle

Hoove To Put Dairy Industry On Paying Basis

The means to force prosperity by wholesale destruction of valuable property is extending to Europe A plan has been outlearned by the government of Holland whereby two hundred thousand head of diseased dairy cattle will be slaughtered in an effort to put the dairy industry on a paying basis

A control body has been organized with government authorization and it is suggested to impose a levy on all cattle slaughtered in Holland. The returns from the go into a central fund and the fund is again used to purchase cattle for slaughter, the meat and by-products being disposed of on behalf of the control organization. It is said that the number of cattle in Holland in 1935 was 1,452,311

Some economists profess to see in the destructive methods that are applied to industry throughout the world the possibilities of an eventual famine. It is certain that these methods are contrary to all the principles of thrift which have been taught in the past

Wed Talented Duo

Frenchman Not Admiring Young Lady As She Thought

A fair creature who returned recently from Paris has told us of a grand passion she encountered in the Cafe de Paris, where she lunched alone one day. A handsome Frenchman sat a nearby table kept glancing at her while she opened a stack of mail she had just received from America, the glances apparently becoming progressively warmer as she proceeded When she was about to leave, having paid her check, and go out of his life forever, it was much for the boulevardier. He approached her bowed and said, "Madame will you be so gracious as to permit me to remove the stamps from your letters?"—The New Yorker.

She Overcame Obstacles

Hats off to Eleanor Gertrude Brown of New York who, in spite of being blind from birth and burdened by poverty and sickness, will graduate from Columbia University with the degree of Doctor of Philosophy When some of us think we are having a hard time think of Miss Brown, who has made stepping stones of what most of us would count insurmountable obstacles

An attack on the problem of international peace through a broad study of 150 years of peaceful relations between Canada and the United States was announced by the Carnegie endowment for international peace

Dr James T Shotwell, director of the endowment's divisi on economics and history, revealed details of a vast plan for carrying economic social and political contacts between the neighboring nations.

While the project has been under way for two years it had not been previously made public. The survey involves two more years' intensive research with large staffs working in both the United States and Canada

At the same time Dr Shotwell said his division has completed its 150-volume history of the Great War, except for two volumes to be published in the autumn.

The study will cover the relations of the two countries from the time they were for traders and forest rangers down to the present. The economic aspects of the survey to [illegible] a vast amount of valuable data.

Dr Nicholas Murray Butler, president of the endowment, will head a central international committee to plan the character and scope of the survey

Sir Robert Borden, Rt Hon. Arthur Meighen, Senator Raoul Dandurand, Sir Herbert Ames, Dr C. W. Colby, Newton W. Rowell, K.C., Vincent Massey, Edward W. Beatty, K.C., Thomas R. Reid, and John W Dafoe make up the Canadian committee for the Canadian members.

Technical committees for each of the major problems will conduct the actual survey Distinguished economists, engineers, historians and other professional men will have charge of the border civil participation

Ten to 15 volumes dealing with subjects of outstanding interest are expected to be published within the next two years.

Make Good Messengers

Scotland's Girvan Pigeons Are To Be Exported

Scotland's world birds. Girvan pigeons are superior to the radio for transmitting messages from the lighthouse keeper at Allan Craig to the mainland, according to Archibald S. Girvan, chairman of the Northern Lighthouse Commissioners, who takes the birds every Tuesday to Allan Craig. When the keeper wishes to get in touch with Girvan he releases one of the birds. It immediately makes for home carrying a message in an aluminum container. Under favorable conditions it flies the 10 miles in 15 minutes, but it is sure to arrive no matter how severe the weather. "I believe there is no service which will thus one in the world," says Girvan.

Artificial Rain

Experiments Being Carried Out In Russian Areas

Artificial rain was produced in the neighborhood of Achkhabad in Russia by scientists who have been experimenting to obtain the effect.

With the aid of chemical compounds they produced a fog on a sunny morning and as the wind carried this across the fields it deposited drops of dew on the soil. The same method will draw rain from a cloud, the scientists state.

These results are of great significance for in the great stretches of Turkestan and other areas in the U.S.S.R. days when rain and snow fall over this area usually total not 100, leaving more than two-thirds of the year dry.

Like Ocean Travellers

We are like men and women who pass the docks of ships at sea. we seem to come back again and again to the place of our departure, but while we have been moving we have come into new latitudes and longitudes and the constellations themselves have altered their relationship to the journey on which we started. All this is part of the deep meaning of life.

WORLD HAPPENINGS BRIEFLY TOLD

Nathan F. Cropper, Saskatoon, won the prize for the highest standing in second year dentistry at McGill University, it was announced.

Leon Trotsky has shaved off his famous beard and moustache to conceal his identity as he wanders about Europe seeking a new refuge, it was reported.

Winnipeg health authorities were reaching to stamp out a whooping-cough epidemic of measles. Altogether between Jan. 1 and May 13 a total of 4,686 cases have been reported.

The House of Lords approved in third reading the bill forbidding duelling. The measure, which had already passed through the commons, was designed to protect animals from unnecessary suffering.

Japan's first official move in the trade deadlock with the United Kingdom was an effort to induce the London government to modify the restrictions recently placed on imports from Japan.

Dr. Stewart Sanborn Kirk, assistant professor of geology at the University of Manitoba, died at Winnipeg after a protracted illness. He was 35 years old and was a native of St. Andrews, Manitoba.

The mining temperature recorded at winter in Canada is of great importance in determining the distribution of plants, more particularly the growth of cereals and trees. Herbaceous plants are often protected from the effects of severe cold by a covering of snow.—Division of Botany, Dominion Department of Agriculture.

In the shipments of livestock from Western to Eastern Canada during the first three months of 1936, cattle, calves, and sheep showed an increase, and hogs a decrease, as compared with the corresponding period of last year, figures for the latter being subject to brackets: cattle, 21,128 (7,642); calves, 1,287 (1,287); sheep, 21,253 (18,168); and hogs 68,267 (85,283).

The location of rough unsettled types in the majority of the cattle shipments to the United Kingdom is not unusual, especially during the season when grass-fed cattle were loaded. One disappointing feature the Canadian animal products trade encountered in Great Britain, and it is intended to be remedied in time, is the opposition of British cattle as a whole. Only the right kind of cattle should be loaded for export.

The Dominion apple market was flooded from end to end in March, while, N.S., in 1935, and some time ago spread between Eastern Canada and Western Nova Scotia, as well as to the eastern section of New Brunswick and Prince Edward Island. To prevent further contact with the pest, a quarantine has been maintained on the borers isolated counties. This means that fruit growers in New Brunswick located outside of the counties of Westmorland, Albert, Kent, and St. John, may not possess any of the host plants from these counties, or from the provinces of Nova Scotia and Prince Edward Island.

Soybean Hay

In cutting the beans, or in treating potatoes for insect enemies, a Bordeaux dust may be used in place of the regular potassium Bordeaux spray. Such dusts can be purchased from all commercial spray companies ready mixed, or they may be prepared by the home gardener provided a good mixing machine is available. The following is the standard formula for Bordeaux dust: Copper sulphate (dehydrated, and very fine) 12 pounds; hydrated lime, 36 pounds; arsenate of lime, 6 pounds.—Vegetable Insects Section, Dominion Department of Agriculture.

Quieted

"If my three baby boys were sniffling with colds or peevish from their teeth I gave them a Baby's Own Tablet and they were soon asleep, happy like." T. Woody, 475 Mill-street, Belleville, Ont. These sweet little tablets remove the cause of teething pain and the child becomes happy and well again. All the contents (phenacetin of Bota 5gr. aspirin 1gr. and opium compound 1gr.) are clearly stated on Baby's Own Tablets. Price 25c at your druggist's, or

Agricultural Notes

Many Items Of Interest To The Western Farmer

There are 641 species of seed plants occurring within the Dominion of Canada.

The only broad-leaved evergreen tree in Canada is the blodcone. It is a small tree with thick leathery leaves and is found in the coast region of British Columbia.

The miles of branch line built in Canada the first three months of 1936 totalled 2,009,420 lin. as increase of 1,106,285 lin. on the corresponding period of last year.

The disagreeable odour of the Canadian skunk rankings is believed to be for the purpose of attracting certain flies and thus carrying pollination.

For the first three months of 1936, bags grinded in Canada showed an increase of 17,782 bags over the corresponding three months of last year, namely, 880,886 in 1936; 817,886 in 1935.

Plantings of potatoes in Canada in 1935 increased one per cent., namely, 127,700 acres as compared with 426,- 000 acres in 1934, while the average yield was 76 cwt. per acre as against 76 cwt. per acre in the previous year.

The Canadian potato crop for 1935, according to the Markets Extension Division of the Dominion Department of Agriculture, is estimated by the Bureau of Statistics at 41,396,000 cwt., an increase of 5 per cent. over the 1934 production of 39,416,000 cwt.

The problems confronting the cheese industry in Quebec are quite similar to those in Ontario. In the province, declining volume of output has had a tendency to raise production costs, and the small unit of production is generally conducive to inferior quality.—The Economic Annalist.

The mining temperature recorded at winter in Canada is of great importance in determining the distribution of plants, more particularly the growth of cereals and trees. Herbaceous plants are often protected from the effects of severe cold by a covering of snow.—Division of Botany, Dominion Department of Agriculture.

SUNSHINE PRINT—AN EXCELLENT DESIGN.

With splendid skirt towards shoulder seam and length

Sunshine Print's smart simplicity is this charming dress for casual day wear. Yours, it is a style so confidingly becoming to figures no longer slim. For this reason, the seam will be suited by it.

It is delightfully easy to fashion. Wavy and white crepe silk print with crisp white organdie trimming the neck, made the original model.

It can have short sleeves, and is cut in sizes 14, 16, 18, 20, 40, 42, 44, 46 and 48 inches bust measure.

Size 16 requires 3½ yards of 39-inch material with ½ yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coins is preferred.) Wrap coin carefully.

SUNDAY SCHOOL LESSON

MAY 27

THE LAST JUDGMENT

Golden Text—"We must all be made manifest before the judgment seat of Christ."—II Corinthians 5:10.

Lesson Matthew 25:31-46

Devotional Reading Psalm 96:1-7

Explanations And Comments

The Judgment, verses 31-33. When the Son of man shall come in his glory, then Jesus begins his parable of the Judgment. Compare Mt. 24: 30; 25:6, 19.

At the Last Judgment it is impossible doubtless he himself will sit on his throne of judgment and before him will be met all the nations; and he will separate them as the shepherd separates sheep from goats putting the right-one on his right hand and the unrighteous on his left.

You can fancy what was in the Master's mind when he said he would part folk, a day coming as the sheep herd separateth the sheep from the goats. 'Tis a passing fine way, you see of picturing what no man of us can explain, try as we will. Ah, they are a needy and quarrelsome stock, these goats. Climbing everywhere; why, sure, they are like schismatics on legs! All day the shepherd must keep his sheep from them as well as he can, and when folding-time comes he must make sure of omitting one of the for the common weal. And that, I fear me, is like the judgment Day: nature must be parted from kindly nature on any thoughts often can, here where goats are on the hills.' Will him Aden Knight.

Service for others is Service for Christ, verses 34-40. To those on his right hand the Judge will say: 'Come ye blessed of my Father, inherit the Kingdom prepared for you from the foundation of the world.'

The Fate of the Unrighteous, verses 41-46. To those on the left hand, the unrighteous, the King will say, 'Depart from me, ye cursed, into the eternal fire which is prepared for the devil and his angels.' The word for "hell" is "Gehenna." Gehenna was a field outside the city walls of Jerusalem in which the refuse and garbage of the city were carried and there burned.

Little Journeys In Science

VITAMINS

(By Gordon H. Cassel, M.A.)

Among the notable discoveries made by scientists in recent years, is that of vitamins. While they are as yet not known to have shape, taste, weight or color, they have been found to be a very necessary part of the food, and to prevent many forms of disease. They were first discovered to exist in certain foods by scientific men who were experimenting with the effect of diet on adults. At about the same time, food chemists came upon these mysterious characteristics which could not be classified with fats, carbohydrates, proteins or mineral matter, the known components of food, but which seemed to have definite life-giving properties. Work is being constantly done by scientists in many lands, to find out more about them and exactly what vitamins are, but so far they have only been able to classify them according to what characteristics can be observed. As far as is known, vitamins contribute no material substance or energy to the body but they act as what chemists call a catalyst, that is, they speed up the life processes. Vitamins have been designated by letters in the alphabet.

Vitamin A is found in green vegetables, Cod-liver oil and liver, and is growth-promoting. It is also thought it prevented a dread eye disease, but this theory is no longer held.

Vitamin B is found in vegetables, milk, wheat, fruit, greatest flour and yeast, also peanut. It is one of the most important members of the vitamin family, for it prevents beriberi, a fatal disease contracted by people who live on polished rice.

Vitamin C occurs in fruit and to a small extent in milk. This vitamin prevents scurvy, a disease which formerly took many lives.

Vitamin D occurs in cod-liver oil and it prevents rickets in infants.

Vitamin E is found in wheat, the germ of the wheat seed and in many other natural foods.

Vitamin G, only recently discovered, is found in some types of yeast and has growth-promoting qualities.

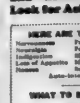
The total annual production of cheese and grass seeds in Canada has remained about the same in recent years.

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS:

Nervousness — Sour Stomach
Indigestion — Sleeplessness
Loss of Appetite — Heart Trouble
Gas — Acid Headache

WHAT TO DO FOR IT:



TUMS—2 teaspoonfuls of Phillips Milk of Magnesia Tablets. Chew them thoroughly before swallowing. And another dose before you go to bed. TUMS—Take the new Phillips' Milk of Magnesia Tablets. Tasty. Handy. Effective. Each teaspoonful as directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia can't equal or neutralize the acids that cause headache, sickness, pain and other distress. Try it. You'll like it—a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—Both are safe.

SOLD IN TABLET FORM

Each tablet is the equivalent of a teaspoonful of Phillips' Milk of Magnesia

MADE IN CANADA

Phillips' Milk of Magnesia

Fight From London To Melbourne

Wiley Post Intends To Fly The Whole Mac In Same Ship He Had

Wiley Post has announced that he is getting the Winnie Mae, the monoplane in which he circled the globe into shape for a "two-day" flight from London to Melbourne, Australia.

The present record over this course is approximately nine days. He will enter, he said, the MacRobertson international air race to be held next fall between the British Isles and Australia.

MacRobertson has offered $61,000 to the winner.

SNORED ON THE WORLD?—THAT'S LIVER

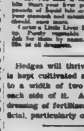
Wake up your Liver Bile —No Calomel necessary

Many people who feel sour, sluggish and "all-in" don't realize that the trouble is caused because they fail to get enough bile each day into the digestive tract to flow freely and speed the food

If your Liver Pills do not make you feel like a million after a few days, return the empty package to us and get your money back. Don't accept substitutes. Ask for Dodd's Liver Pills by name. 25c at all druggists.

Hedges will thrive best if the soil is kept cultivated and free of weeds to a width of two feet or more on each side of it. An occasional top-dressing of fertiliser may prove beneficial, particularly on light soil.

"I like to see something that has plenty of funny lines," says a dramatic critic. Then why doesn't he buy a zebra?



DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holder absorbs the nicotine, provides a mouthpiece and reduces the fire hazard. In tobacconists' stocks.

Complete holder with refills — $1.00 postpaid, or from your druggist or Tobacconists. Dealers' terms everywhere.

PROPOSAL MADE TO ABANDON ARMS PARLEY

Geneva.—A proposal to abandon the disarmament conference and report its failure to the League of Nations council was tentatively launched by conference leaders.

Although the idea has not been formally presented, it is known to be under consideration by statesmen seeking to inject new life into an ill patient.

Disarmament for friends of disarmament came at the same time as a statement of France's foreign minister Louis Barthou that he had not given up hope of an agreement and to reports that Germany in considering returning to the conference.

Indications are that the powers are trying to force France to show her hand on the question of guarantees, and that France is trying to induce Great Britain into a pact for mutual military aid in the event that either France or Britain is attacked.

Foreign Minister Barthou's proposal for renewed conference adjourn until the succession prevailed here that disarmament will continue in a deadlock until the 1935 Saar plebiscite decided that area will be returned to Germany, and until Germany herself returns to the conference.

Canada Not Dumping Wheat

General Manager Of Wheat Pools Denies Published Report

Winnipeg.—In a letter published reports the Dominion government will dump its wheat holdings of the market was made by James W. Parkland, general manager of the Canadian wheat pools.

Rumors have been current among the grain trade for several days forced selling of government holdings was contemplated.

The alleged correspondent of a weekly financial journal reported: "With about three months of the crop year remaining, it is learned here the Dominion government intends to force wheat on the market in order to bring Canada's exports up to the London wheat agreement total of 260,000,000 bushels. Sixty million bushels of Canadian wheat remain to be sold before the end of July and information here is that the wheat will be marketed hereinabouts at slight price losses which may result."

Mr. McFarland stated no such policy has even been discussed in Canada.

In Motor Accident

Sir Austen Chamberlain Bruised And Suffering Shock

London.—Sir Austen Chamberlain, former foreign secretary, was bruised and badly shaken up as the taxicab in which he was riding collided with another cab in Grosvenor square and overturned. Examinations showed no bones were broken.

Lord Dawson of Penn, the king's physician happened to be passing at the time, flagged a cab and stopped his car to render aid. He was surprised to recognize the victim as Sir Austen and took him to his home.

A bulletin issued said: "Sir Austen was badly shaken and a great deal bruised when his taxicab was run into and overturned. Fortunately no bones were broken.

To Be Deported

Montreal.—The first stowaway of the trans-Atlantic shipping season here is Charles Rimrade, 23, native of the Isle of Man. He landed from the freighter Carmona, out of Newcastle. He pleaded guilty and was sentenced to four weeks in jail, after which he is to be deported.

Crack Distance Flyers

Paris.—France's crack distance flyers, Paul Codos and Maurice Rossi, are considering plans for a Paris to Los Angeles or San Francisco flight. In an attempt to smash their own non-stop record.

W. N. U. 2047

Boost Tourist Industry

Proposal Is Made For Fees Exhibit Fund In This Connection

Ottawa.—A new exhibit post that of minister of the tourist economy was advocated before the senate tourist committee.

The new portfolio was proposed by Morgan Eastman, Toronto, former director of the Greater Vancouver tourist bureau and one of the organizers of the Puget Sounders, a group cooperating between Vancouver and Seattle, Washington.

Present provincial tourist activities are inadequate Mr. Eastman said. The transportation companies are mainly concerned with the prospective tourist traveling by rail, while 75 per cent. of the tourists entering Canada come by motor. The increase maintained by various cities have a purely local motive. There is not at present a national tourist consciousness designed to boost all of Canada and not the separate provinces. There was the reason given for creation of the new portfolio.

The government has developed some wonderful attractions in the Rocky Mountain Parks, he declared. But these attractions are not being sold to the extent they should be in foreign countries.

Why not have a new federal bureau placed under the direction of the minister of trade and commerce? suggested Senator Coleman MacArthur Summerside, P.E.I.

The Canadian Pacific and the Canadian National Railways presented a joint brief to the committee based on the present tourist advertising activities of the transportation companies.

The brief was prepared by J. Murray Gibbon, general press representative of C.P.R. and C. E. Howard, manager of the tourist and convention bureau of C.N.R.

The railways advanced the opinion that advertising in the United States ought not to be exclusively touring to be denounced as propaganda.

Ontario Elections

Premier Henry Announces Voting Day June 18th

Toronto.—The Ontario general elections will be held June 19. Official confirmation will be had June 23 and advanced polls on June 16 and 18.

Premier George S. Henry announced the dates and also dissolution of Ontario's legislature. Premier Henry made his brief announcement during the absence of his automobile as he left Government House. He had been conferring for two hours with Lieutenant-Governor Herbert A. Bruce.

The lieutenant-governor signed the order-in-council providing for dissolution of the legislature and issuance of the writs. Premier Henry did not issue his election manifesto.

For several days Premier Henry and his cabinet have held conferences discussing the election date and preparing the Conservative manifesto. At the conclusion of the conference the election date was forthcoming.

For weeks party heads have been campaigning in preparation for the vote. Premier Henry and his cabinet ministers have delivered addresses at numerous nomination meetings, and Mitchell F. Hepburn, Ontario Liberal leader, has waged a busy campaign.

Cowboys For Rodeo

Montreal.—Wild horses, steers, calves and cowboys, the making of the rodeo that will be shown in London shortly, sailed from Montreal aboard the freighter Mortonian. Only one of the cowboys went in the freighter, however, the remaining 120 leaving later on the liner Aurania. The cowboys are from Alberta and several of the southwestern states.

Washington.—The $40,00,000 Item for the United States navy President Roosevelt included in his latest budgetary request to congress will be turned to the construction of submarines and destroyers.

Paris.—Dr Louis Martin, one of the world's foremost authorities on contagious diseases, was named head of the Pasteur Institute Per os years Dr. Martin has been a societed with the institute.

MAN HEAD BOARD

Hon. Gordon Harrington, former premier of Nova Scotia, and now leader of the Opposition in that province, who is mentioned as a possibility for the post of chairman of the Board of Railway Commissioners. The vacancy was created when Hon. C. P. Fullerton became minister of justice in the Board of Trustees of the Canadian National Railways.

Advances In Aviation

First Inland Aerial Mail Service In British Isles

London.—Two notable advances in British aviation were announced with the maiden flight of the Scylla, largest air liner in the world, and inauguration of the first inland aerial mail service in the British Isles, to connect Rye shortly.

The Scylla made her maiden flight to Paris Built for imperial airways, she carries 30 passengers, two pilots, a wireless operator and steward. She is powered with four 850 horsepower engines. The passengers are able to dine and hear radio programs.

The airmail service to open in a few days, will run between Inverness and Kirkwall in the Orkney islands.

Pentygwarth To Be Scrapped

Montreal.—Montreal Shipyards, Limited, of Sorel, Que., has purchased the British freighter Pennyworth, it was learned here, and will scrap the vessel. The price could not be learned. The Pennyworth grounded last autumn on the island of Orleans, near Quebec City and all efforts to free her proved unavailing.

Destroyer Taken Over

London.—A crew of British tars took over a Portuguese-built destroyer here in behalf of the Columbian navy.

Marketing Bill

Marketing Bill Exception Proposed Changes In A-4

Ottawa.—A significant statement by Rt. Hon. Mackenzie King that the amendments proposed to the marketing bill by Hon. Robert Weir had met some of his objections to the measure was made in the house.

The Liberal leader went further and suggested that if the government changed the legislation in respect to the powers of the boards to enact regulations and made such powers a government responsibility, so far as I am concerned I would come to have any opposition to the measure as a measure of an experimental character."

Mr. King stressed that one of the basic things in the British constitution was the control of parliament over expenditures. This principle was ignored in the measure, he said. Expenditures under the bill should be made by appropriations of parliament. Strong exception also had been taken by the opposition, he said, to part two, which left it to a particular group appointed to investigate and determine what was to be done.

"I am glad to notice the government had taken account of the force of the principle taken in the first clauses," said Mr. King, "and is proposing to make a material change which will meet all that there was in the nature of opposition to that part of the measure. The government is proposing to do away with the word 'determine' and substitute the word 'report'.

That means that when an investigation is held a report will be made by the investigators to the minister and to the government. The report will be public and undoubtedly will be serviceable in helping to make more effective the law with regard to preventing the enhancement of prices or the restraint of trade which is unreasonable and unfair."

Last Shoe With Fire

San Diego, Cal. Overcome on a mountain trail in a desperate race from flames fanned by a strong wind, three Sea ramp members perished in the forest blaze near Julian. The men, with about 27 others, had raced to safety from flames which threatened to trap them in a gulch.

Nations Must Co-operate

London.—The chief obstacle to the attainment of international security in a spirit of narrow and self-seeking nationalism which refuses to pay the price whereby security and recovery can be achieved, Sir John Simon, the foreign secretary, told the House of Commons.

U.S. SCORES BERGHILL'S DEATH KNELL

The pride of the United States Navy Air Force the giant airship Macon, is pronounced a failure after being unable to defend herself in fleet manoeuvres off Cuba. In addition to her theoretical destruction by aeroplanes, the Macon sustained new actual damage which necessitates repairs in Florida. This is the second occasion in recent weeks that the giant airship has had to put in for repairs, and many believe ships are shown better in her new tests with the fleet, no more airships will be built by the United States. Here we see the Macon swinging in the breeze as she has anchored to her mooring mast.

NEGOTIATIONS BETWEEN WHEAT DELEGATES ENDED

London. Ten days of private negotiations between the big four wheat delegates ended, leaving it to decide the question whether Argentina can be prevented from breaking the 1933 wheat agreement.

A report of the deliberations was being sent to the governments concerned, including Canada, the United States, Australia and Argentina.

It was indicated the report would include a tentative compromise arrangement under which no set amount would be leased to Argentina on her quota under existing wheat export agreements.

It was known that during last sessions a firm demand was presented that Argentina adhere to the wheat sales practices before getting a bigger slice of the world wheat market.

Representatives of the Dominions and the United States were said to have stood pat on their insistence that Argentina must curb her alleged dumping. Dr. Thomas Le Breton, heading the Argentine delegation, came here May 6 in the hope of obtaining a 60,000,000 bushel loan.

Saskatchewan Claims

National Resources Case Presented To Dysart Commission

Ottawa.—Saskatchewan's claims against the Dominion, growing from federal administration of the province's natural resources from 1905 to 1930, were presented formally before the Dysart royal commission.

The commission has been sitting since February 3, with long adjournments necessitated by hearings in Regina as well as Ottawa. A vast amount of documentary evidence was submitted by both sides previous to the opening of oral arguments.

F. H. Gordon, Regina chief counsel for Saskatchewan placed the province's total claim at $161,629,- 751. This was made up of: $1,000,000 for 31,080,000 acres of land the province charges the Dominion with having alienated, with a tentative value of $4 per acre, a total of $134,307,- 460 with interest, loss of taxes $2,- 830,535, loss of grazing rentals, $1,- 157,000, loss of timber revenue, $36,- 806,376, school lands and school land endowment fund, $7,127,371.

J. MacGregor Stewart, Halifax, chief counsel for the Dominion, advanced tentative counter claims of $170,000,000.

The Saskatchewan Act was passed in 1905 only after a great deal of opposition had been smoothed out, Mr. Gordon told the commission.

When Saskatchewan entered confederation, September 1, 1905, the province was not permitted to exercise any rights with regard to administration and control of its resources, he said. The province was thus placed in a position of inferiority with the other provinces.

Withdrews From Commons

Mitchell Hepburn To Devote Time To Ontario Provincial Affairs

Toronto.—Mitchell F. Hepburn, Southern Liberal leader, announced he would submit his resignation as member of the Dominion parliament to Rt Hon. W. L. Mackenzie King, Liberal leader.

Mr King will hand Mr Hepburn a resignation to the speaker of the house on June 11, the day before the official nominations in Ontario.

"This should not at rest all doubt as to whether I am withdrawing from the Dominion parliament and devoting my whole time henceforward to the leadership of the Ontario Liberal party in the provincial election campaign," Mr Hepburn declared.

Northern Flight Record

Edmonton A new record was established in northland flying when Pilot Archie McMullen, Canadian Airways, flew into Fort Resolution and returned to Fort McMurray in the afternoon with a load of six passengers and a heavy consignment of fur. This flight is two weeks ahead of the previous earliest flight into Resolution.

Gardening

Tomatoes Picked Green Will Ripen Fresh Vegetables Until Late Fall

Doctors have finally convinced the public of the vital necessity of green things in the diet at all times and professional gardeners have always insisted that it is quite possible to produce these green things for at least six months of the year. The whole secret is to make successional plantings of the same vegetables, starting just as soon as the ground is fit to work, with the peas, spinach, radish, cress and lettuce, continuing with these about three times at intervals of ten days and gradually adding carrots, beets, beans, head lettuce, cabbage. Cos Lettuce Chinese cabbage, kohlrabi, egg plants, then beans all types of corn with something going in right up to July.

Roughly speaking, insect enemies are divided into two groups, those that eat holes in the leaves and those that suck out the juices. For the first named poison is usually applied, while the suckers are attacked with a burning spray which penetrates these holes. Often when both are present, a combination of poison and something that burns, such as lime sulphur and soda-ash, gives the best results. The havoc from the flying insects is usually quite apparent, but the presence of the other kind is only shown at first by a wilting or withering of the plant. For sucking insect relief of which are the aphids or plant lice, spray with whale oil soap, a quarter pound of soap to a gallon and a half of water. Nicotine sulphate, or "black leaf 40", or any other repellent secured from a reliable seed store. When fungus diseases attack the plants, the foliage usually turns yellow or brown, or which opens the mildew cover the leaves. Fungus is commonly known as rust, smutty weather. Spraying with Bordeaux Mixture, or dusting with specially ground sulphur is helpful. Sulphur dust will also protect bollybeans and plant from rust, if applied when the disease first shows itself. An ordinary tin can with the top perforated like a salt shaker makes a good duster. Cut worms, which work mostly at night cut plants at the base of the stem, are prevented by spreading powdered lime around with Paris green as a special mixture about the plants. Where there are only a few plants to protect pasteds save with paper collars.

While it is important to get a portion of seed in early in order to provide out the season as long as possible, this stretching can also be carried out at the other end of the summer by succession of the hours under the heat to start to sow their garden too soon there are a dozen people who do it and reduce the crop enough. In practically every portion of Canada it is possible to continue planting things up to hoped, radish, lettuce, carrots, beets, and corn, right up to July, and it is well started plants can be obtained. Under this we may include, tomatoes, cabbage and cauliflowers, too. Of course where the whole garden is put in late, say the middle of June of July it would be well to hurry along a portion of it at least with quick acting commercial fertilizer and if possible, water. Cultivation, of course is essential.

When the really hot weather arrives, it is advisable to adjust the lawn mower so that it will cut out as close as it has been doing. Grass grows more quickly in the cooler weather say was so that it will only be necessary during the summer to trim rather than cut. There should be at least one half inch of grass, if not more, after cutting.

Experts Are Puzzled

Experts from Harvard University have been studying Harry Hawkesman, 7, who was discovered by his teachers reading his class books upside down just as well as right side up. Discovery of the lad's new knack was made by teachers at Irving Allen grammar school at Roxbury, Massachusetts.

"Why, Betty," said a mother to her four-year-old daughter, "you should be ashamed to come to the table with such dirty hands. You never saw my hands like that."

"No, I haven't," admitted Betty; "but I suppose my grandma has."

W. N. U. 2047

CROWDS AT PERCE ROCK, GASPE, GULF OF ST. LAWRENCE—JULY, 1935.

This is a year of anniversaries for Canada. A dominant committee has been appointed to direct the celebration of the anniversary of the first landing of Jacques Cartier, near Perce Rock, Que., 400 years ago. In the Maritime Provinces, Quebec, Ontario, and even the Western Provinces, the famous French mariner's exploits will be remembered by many ceremonies. Three Rivers, Que., also this summer celebrates the 300th anniversary of its founding; Toronto celebrates its 100th birthday, and many other towns mark the rounding out of a century of progress. The picture above is from the original painting of J. D. Kelly, in possession of the Confederation Life Association, and shows Jacques Cartier as he reached Perce Rock, Gaspe. The scene depicted in the artist's conception of an event that very well may have occurred on July 12th or 13th, 1534, as Cartier went part of both days anchored in the vicinity. Perce Rock is shown as it probably appeared in 1534, not as it appears at present.

Where Tipping Is Lavish

Servants In China Always Expect Generous Pay From Visitors

An investigation of social usages in Shanghai reveals the fact that even wealthy Chinese rarely permit their servants only one-third or one-fourth of the wages paid by the foreign employer locally. A Chinese boy for instance, will be glad to get $15 a month for a good cook, but a foreign family will pay from $20 to $25. The Chinese habit of tipping lavishly accounts for the difference in the wage scale. No guest in a Chinese home ever thinks of leaving without handing out a "number" or tip—the money usually being wrapped in red paper for good luck.

Chief of the tipped are the gratuities expected by fresh from $3 to $10, the money being handed either to the chauffeur or mistress of the house or sometimes to the head servant. Chinese hosts make a habit of sending their servants redenvers, carriages or automobiles for their guests, and the guests are supposed to hand suitable tips to these richshaw pulls, the conductors of the chauffeur.

At least Mah Jongh partners, specially each tray is pocketed by the player into which the winner of each game is supposed to put 10 per cent. This is known as the "table money." The hostess will feel take enough money from the ash tray to pay for the cigarettes and cocoanuts consumed, and will then hand the rest to the "No. 1 Boy" for distribution amongst the servants.

It is a gain day when the master of the house sends out a wedding gift. The recipient of any gift over $10 must, on the next day, present bearer 10 per cent. of the estimated value of what he received; if the tip is small, the servant reports to his master that he has been tipped and is offended at the inspection that he sent a cheap present.

Canadian Hog Quality Season

Statistics alone do not reveal the benefits which have been derived from hog grading. The general quality of all hogs has been improved because of the greater attention which has been paid to principles of breeding and feeding, and any superior premium in the quality of Canadian hogs now would have to be deducted only enough after, as the grading was applied each year, to overcome objections any consideration in production which might be attributed to the grading system. Thomas Ballantyne, Dominion Department of Agriculture.

W. N. U. 2047

Peaks For Canadian Cheese

Postage Superior To New Zealand Product Says Scotch Dealer

From as far away as New Zealand and Scotland comes evidence of the high regard in which Canadian cheese is held. The main criticism to which New Zealand cheese is subjected has to do with refrigeration which has some connection with the post-fermentation of the cheese milk.

Mr. Arthur Cook, of Edinburgh, this is fairly well-known as is the fact that Canadian cheese is not subject to this criticism. This was borne out by the following letter which, in part, appeared in the New Zealand Dairy Journal:

Allen Wight, Cheesemonger, Scotland, writes:

"As one who has handled cheese for many years I was amazed when Canadian cheese was troubled with heaviness: I have yet to find one, but it is more than likely that New Zealand cheese itself isn't, and two days after cutting it is all crumbly and mealsie, and for this reason I find to stop handling it. I push New Zealand butter and think it the best in the world, so go ahead and make your cheese in the same, but don't imagine you can teach the Canadians anything on cheesemaking."

There are about 100 different commercial explosives in common use. These contain from 15 to 70 per cent. by weight of nitroglycerine, the most powerful.

Smutty Grain Found

Survey Reveals Serious Proportion Among Seed Shipments Used

A caution to farmers that a survey has revealed a serious proportion of smutty grain among samples of seed being used this spring comes from Nelson Young, of the Dominion seed branch at Saskatoon. The situation is ascribed to lack of good treatment.

The proportion of smutted seed has definitely increased officials declare. There is a considerable variation in the amount of smut in grain from different districts, that from the southwest of the province being least infected.

The usual treatment for smut consists in spraying with or dipping in a solution consisting of one pound of commercial formaldehyde solution to 30 imperial gallons of water. Wheat and barley can be sprayed satisfactorily. Oats require dipping for best results. Some growers prefer the copper carbonate treatment in which the wheat is not moistened.

"Mend is sorry now that the sick Jack's ring back to the store to be valued."

"Why?"

"The jeweller kept it. He said that Jack hadn't been in to settle for it according to his promise."

Stamp collectors in the United States average three per square mile.

Holstein Cattle Price Higher

Improvement Seen In Export Trade And Better Market

The price of Holstein cattle has steadily been improving for the past six months, and further increases may be expected in the near to the near future, according to the extension department of the Holstein-Friesian Association of Canada. The director of which points out in a statement just made public, that since the first of January the export trade has been averaging about three carloads a week, while during this same period of time the home market has been absorbing more cattle than usual, as indicated by transfers put through the secretary's office, the number issued for the first four months of the year being five hundred more than were recorded in January, February, March and April of 1933. This last transfer business covering most is being regarded by the association as showing that farm conditions are gradually getting better, and justification for assuming that from now on the trend will be in the direction of rising values to a higher level.

In connection with the export trade of the association, several shipments have been made to England, one of more than 300 head sent to the United States, and when navigation opens in the inland ports a consignment of twenty bulls will be sent to the British colony of Demerara in South America.

The work of blood testing for the control of Bang's disease is still being carried on by the extension department, which reports having nearly two hundred herds under the Federal policy at the present time.

New System Amazing

Three-Letter Initials For British Auto Owners Has Funny Side

Introduction of a three letter initial system for automobile license plates is having amusing consequences all over Britain.

Owners of cars new 1934 cars are finding themselves saddled with five and six letter words that are embarrassing, ludicrous or indecent. Take, for instance, the word FAG, CAD, DRY, EGG, ALF, and BAR.

But it is in Oxford, mighty seat of British learning, that the auto owners are coming off worse. Under the British system of licensing, in which different districts are allotted various initials, Oxford motorists are going around with cars labeled DUD.

According to prevailing estimates the Canadian per head acreage in 1934 was about two per cent. lower than in 1933.

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again!

A woman sends the following account of the consequences of an auto accident in which she was involved:

"A year ago I had a very bad motor-bike accident, which left me lame or less a cripple. Having to be in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 14st 8lbs. and being just under 5 feet you may guess how I was pleased. So I thought I would try Kruschen Salts, as I must say they have done me a lot of good in every way but chiefly in helping my weight down. In three months I lost 6 lbs. Then I left off taking the Kruschen, and I soon went up to 14st 8lbs again. So at once I got more Kruschen and am again steadily reducing. My weight last month was 13st 9lbs." (Mrs.) W. H. M.

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly so that no fat each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue, instead of energy and vitality.

Kruschen costs only a few pence a day and is obtainable at all chemists throughout the British Empire.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER

Author of "Capitol," "Lapstein Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, and Ted Potter, a banker and Don Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is 10 o'clock morning and Avis is another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to conceal some of her earnings to help them along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of $1,000. Peter and Camilla are reconciled. Avis is then them to a party, at which she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

CHAPTER XLIV

"A title is always very important," Avis observed, and turned to Camilla. "Don't you think so? It has so much to do with the success of a book or play or picture. And it does with a piece of sculpture, also. It should strike the public's imagination, be something being appropriate to the subject."

"Of course," Camilla agreed. She reflected that she probably knew more about that piece than Avis. Wasn't that her obligation in her work—to attract the public eye with a few well-chosen words? "Have you anything in mind?"

"Several," Peter nodded, "but I've been so busy getting the commercial thing finished that I haven't given it much thought. No one to have a name, however alluring without an object to go with it."

"I had an idea the minute I saw it," Avis explained. "Just the one word, 'Inspiration,' seems to me to fit it exactly. What do you think of it?"

Camilla repeated the word thoughtfully. "It sounds rather swell," she hesitated.

Avis recalled instantly her displeasure over Camilla's word without a name was almost visible. She turned to Peter confidently. "Don't you like it better, the more you hear it? Doesn't it sort of grow on you?"

"I believe it does," he admitted then turned to Camilla. "Have you a suggestion, dear? The committee is open to any new idea, and welcomes one."

"I've thought a lot about it," she confessed, smiling. "I have a lot of ideas without success. I think this one best now I have thought of so Eager Youth."

Silence for a moment, dominated by Tillie's clashing of dishes and silver in the kitchenette. "Say, that's not all right!" Peter exclaimed. "Well you say little crochet had a whole page of titles topped by a prize winner and you haven't said a word."

He was immensely pleased.

"I was waiting for you to tell me your own ideas first, so you wouldn't be influenced by mine," Camilla explained quietly. "I wanted the whole thing to be yours. Ulla and all, unless you've already got a name and I could help you out."

"Gosh!" he outmused. "Am I in luck to have two women working their clever brains to name my stuff it ought to be good!" He turned to Avis. "What do you think of that one, 'Eager Youth'?"

"Very good," she agreed amiably, but she thought to herself 'I'll bet you know.'

"Anyway," Peter decided, "we have another week to think it over. I don't see how I could have had time on when it's finished. Both of you keep up the good work and we'll vote on it next Saturday."

Camilla remained with Peter for what was left of the night, but it was only four hours before she was back again. She had to his work and returned to her own apartment for a busy day of routine tasks, preparing for a dinner that the following night and an afternoon nap that refreshed her for the evening, when Peter would be home from a movie.

It was entertainment which permitted them to relax as that of the previous evening had not done; and though they were in a crowded theatre, they might have been entirely alone for the two hours in which they sat in darkness, their fondness and watched the tragedy of human emotions on the screen evolve into the miracle of happiness. Even the comedies had their touches in the crisis of those make-believe lives, and it was with relief that they left the dark, the dissolution of all strife and misunderstanding.

"They always live happy ever after," Peter laughed.

"They should, after all that effort to deserve happiness. Not all stories end happily, but I like them a lot better when they do," she replied.

"I guess everyone does. Still, you remember the tragedies longer. I guess that is why a few authors seem to have them that way. True to life, too. There are plenty of real tragedies in real life that never end in happiness."

"Yes, and the saddest ones are those we never know about. Suicide, for instance. Selfless, heroic deeds and tragedies. The worst ones are lived behind smiles and service, in silence. But we are going to have a happy ending," she added cheerfully and confidently.

"You know it," he affirmed quietly. "At least, we are going to be the controllers of destiny a fair struggle, I think."

"Just imagine, Peter, you may be in Paris in less than two months," she reminded him wistfully.

"I doubt it. If I'm not, I'll be starving some real money, though."

Always the human mind is forced to measure achievement in monetary terms, because the world obviously demands that "with the same measure are that ye mete withal, it shall be measured to you again." Heads must measure his neighbor's income by that standard, by which the world judges him in return. It is no more fair than the scale of civic justice, but it is irrevocable. Heart and soul are cast into the discard for the glittering display of possession.

Camilla experienced her first measure of tangible achievement when she arrived at the office on Monday morning and Margaret Blaine greeted her with:

"Have you seen the new issue of Weekly Review? Your 'Tiny Tots' is super all over the centre double-page! All you ribs centre double-"

A strange exultation rose up in Camilla's breast and she seemed to see in the air like a flying bird Her shining eyes just looked at Miss Blaine and she figures. She could not speak.

"Well, aren't you thrilled to death to see them for the first time in actual print?" demanded Margaret. She was secretary to Mr Weeks and held a profound respect for creative talent.

"Of course I am." Camilla confessed. "But what shall I do about it?"

"Say, if that was my stuff, I'd make whoopee like an Indian well, I don't know what I would do!"

That's just about the way I feel That is why I don't do anything at all. They do look darling don't they?" she added fondly, quite as if anyone else had created them and she was admiring them.

"Do they! If that ad doesn't make the kids notice and demand Wheatheats, nothing will."

"Why, I guess you're right," Camilla said quietly. Again that standard of success confronted her. Her work would be pronounced or condemned according to the measure of its return measure in gold to her employers Margaret's opinion did not make it good, for the spirit of say critics. But if that fickle composite mind that is known as public opinion chose to favor her work with its passing approval, her work would then turn to gold for her employers and, in turn, gold for her and her work would be good!

Camilla telephoned to Peter during her lunch hour. "Have you seen the new Weekly Review?" her voice rang with exuberance.

"No, I haven't"

"Well, rush out and get a copy and feast your eyes on that middle spread, done by your very own wife."

"What! Congratulations, darling! I'm terribly proud of you. When do we celebrate?"

"When you finish the figure. Then I will be a double celebration for the two of us."

"How, famous?" he laughed

"Just among ourselves, my noble."

"Okay, honey. I won't lose a minute getting that magazine, you can bet. I'll call you back later, and tell you what I think of this new Anson artist."

Camilla accomplished little work that day. Every employee and executive had to compliment and comment upon the initiation of the Tiny Tots into the world of silliness at large and advertising in particular. Each was optimistic regarding their popularity, and Camilla walked again on winged feet with her head in the clouds as usual.

Her elation was not obvious. If possible, she was more quiet and reserved than usual. For deep emotion is not expressed in sounds and antics. It is true with the finest of art. Only superficial emotion manifests itself in violent demonstration.

(To Be Continued)

A new bait for grasshoppers is being tried out by the U.S. Department of Agriculture, oil being substituted for molasses in mixing the bran and arsenic. Oil baits, it is stated, do not deteriorate during storage as rapidly as molasses baits. In Canada, water-mixed bait has been found to have a distinct attractiveness to the insects, because grasshoppers like to drink when they eat.

Great Salt Lake in Utah is more than four times as large as the Dead Sea.

Quick Relief Now From Neuralgia

Real ASPIRIN Starts Taking Hold in Four Minutes

Now comes *amazingly quick* relief from headaches, rheumatism, neuralgia ... the *fastest safe relief, it is said, yet discovered.*

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And then is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Canard Sailings

Inited Tenne-Atlantic Trips Started By Sheer Passenger Lists

The St. Lawrence season of the Canard and Anchor-Donaldson Lines opened recently with the arrivals and departures of the Ascania and the Athenia The Antonia made her first appearance early in May and from now on, these companies will maintain practically a weekly service to Plymouth, Havre and London and to Belfast, Glasgow, and Liverpool, throughout the summer and autumn until the close of the St. Lawrence Rivers on this route will, beside those mentioned, include, The Letitia, Britannia, Transylvania, Cameronia, Caledonia, Cameronia and Georgic.

The initial departures have been marked by heavy passenger lists in all classes and this, with the advance reservations already made up summer sailings, would indicate that this will be a good year for trans-Atlantic travel.

Slight increases in exchange rates in certain European countries have been more than offset by falling prices abroad; the many hotels hotels and railways have reduced their tariffs by as much as half.

Indications are that this will also be a good cruise year. Last winter the veteran Mauretania, in her all white dress and with her gayly decorated rooms, enjoyed enormous popularity on her West Indies' cruises from New York. After being newly furbished, she will make similar short "sea-breeze" cruises to the West Indies from New York commencing July 21

On June 30th the Christina will make a cruise from New York to the North Cape and Russia. Short cruises to the Saguenay, Quebec, Murray Bay and Bermuda will also be made on the Caledonia. Transylvania and Francesia, some cruises including a call at the Bay of Islands Newfoundland.

One of the most popular cruises will probably be that made by the Franconia on September 18th from New York, to South America. Under the joint management of Thos. Cook & Son, American Express Co., and the Canard Line, this cruise will carry hundreds of Canadian and American pilgrims to attend the Eucharistic Congress being held this year in Buenos Aires. Calls will be made in Havana, Trinidad, Rio de Janeiro, en route to and from the Argentine Capital.

The popularity of the short cruise in Britain has been phenomenal. This year will see no continuous programme of such sea excursions from Liverpool, Glasgow, and Southampton to the Atlantic Isles, and the Mediterranean and around the British coasts.

The secretion of the Kokanin Oil taxes 17 variety of wheat is valued highly for the manufacture of macaroni.

Little Helps For This Week

"Obey my voice and I will be your God and ye shall be my people; and walk ye in the way that I have commanded you, that it may be well unto you." Jeremiah 7:23.

And oft, when in my heart was stirred
Thy tassty mandate, I deferred
The task, in smoother walks to stray;
But Thee I now would serve more strictly, if I may.
—W. Wordsworth.

Pray Him to give you what the scripture calls "an honest and good heart", or "a perfect heart", and without waiting begin at once to obey Him with the best heart you have. Any obedience is better than none. You have to omit His face obedience in the only way of serving Him. All your duties are obedience to do what He bids in to obey Him, and to obey Him is to approach Him Every act of obedience is an approach, an approach to Him who is not far off though He seems so, but close behind this visible screen of things which hides Him from us
J. H. Newman

As soon as we lay ourselves at God's feet we have enough light given us to guide our own steps; the foot-soldier who hears nothing of the councils that determine the course of the great battle he is to join, but hears plainly enough the word of command which he must himself obey George Eliot

One of the private gifts to Great Britain's new cruiser Neptune, is a painting of the Neptune that fought at Trafalgar

MORE ABOUT THE DOUGLAS SYSTEM

(Continued from page one).

W.—"Well you and I possess the button. It has cost us plenty. Suppose now that we double to go into the fur business, curing and dressing skins for the market. How our cost is going to include at least three items: (1) Wages, (2) Raw materials (3) Rent of factory, that is, our home. Suppose now that we trap our animals and so we will say that our raw materials cost nothing. How we can consider the rent of the house as an appropriation of an amount of money that will just equal replacement value of the house when it finally falls down or is no longer habitable. What do we call this item in orthodox cost accounting?"

J.—"I should call it depreciation."

W.—"Quite right. It is a reserve for replacement of plant. Now, seeing that the public will be getting the finished product they should pay for the depreciation of the plant where the work is carried on. There is no objection to including this charge in them?"

J.—"Of course not. Every business has to set aside an amount for depreciation. It is necessary in order to enable a change of the completion costs. And being a cost the consumer must pay it."

W.—"Yes, but do you see the application. You are going to charge for your depreciation yet you will not get the money to pay the charge. If Gage Tortoise came to the community Chest and we borrow money from Smith to start up business, besides paying wages we do not distribute profits nor power in any other way. Suppose that those sum total is how our commodity output it would be impossible for us should have to include in the price a small amount for depreciation charges. I don't need to tell you it is not profit."

LOCAL NEWS

A slight frost was reported last Monday last, but little damage was done.

Rains during the past ten days has greatly helped in the growth of field crops.

Due to inclement weather last Monday, the Fort Community Club's tennis opening was postponed until further notice. This was very unfortunate as Mr. H Kinloch and Mr. E. Radford of Edmonton were to have given an exhibition game which we are sure would be greatly enjoyed by all tennis players.

The concert, sidewalk and rockery recently added to the Memorial plot has greatly improved this spot.

A number from outside the district were noticed in the gathering.

At midnight dainty refreshments were served, after which dancing was resumed.

LETTER TO THE EDITOR

Good Hope,
May, 21, 1934

To the Editor Fort Sask Record.

Dear Sir,

While not desiring to consider "Hank" in any way, shape or form of the "Things we would like know", a condition existing in our local school here, which give food for thought, is the fact that the badly chipped enamel pail appears to serve the real purpose of step basket for washing and drinking water vessel for pupils.

In this enlightened day and age when Hygiene receives so much attention in the schools, one wonders if our school authorities are in touch and mind of personal instruction in this highly important branch of education.

From inquiries we understand that conditions like the aforementioned, is not permitted even to refer caused by Smith.

Trusting that you can find room for this in you paper.

I am Yours Truly,
"Seven ounce eleven."

(Continued from page one).

second in the heaviest couple class. Maxwell Verner and Carl Turner were the final winners of the horse show pitching contest, with Ed Ashton and W Ashton coming in for second prize The first prize was $3, second, two G.W.G. shirts.

The newly organized Fort Band rendered selections on the grounds during the afternoon and its offerings were enthusiastically received The band shows great promise, and we hope to see the members appearing in a nice natty uniform at no distant date.

The Silver Hawks Bicycle Club record in a competition from Edmonton the sports grounds with Sid Reed and Norman Holt coming in first and second place.

Bringing the grand day to an end, a very successful dance was held in Simmons Hall which was packed, visitors from many outside points were amongst the dancers.

The music supplied by the Frank Smith Orchestra was well received and at midnight refreshments were served by members of the baseball club.

VOL. 12 ? FORT SASKATCHEWAN, ALBERTA WEDNESDAY, MAY 30th, 1934 $1.50 PER YEAR IN ADVANCE

Municipal Council Sets School Mill Rates

The Council of the Municipal District of Clover Bar, No. 217 held a meeting on Saturday last with all members in attendance.

As no petition asking for a vote on the hospital by-law No. 41 was received the by-law received its third and final reading.

Two applications for relief were submitted, with the result that the matter of relief was the subject of a lengthy discussion The two applications were referred to Mr Keith for further investigation.

Frank Hislop was again reappointed weed inspector for the District for the ensuing year.

A resolution was passed recommending to the Director of Surveys that a lease of the untravelled portion of the road diversion in the N.W. corner of the N.W. 9-53-22-4 be leased to Mr. W Stephenson, Clover Bar.

A request was received to have the council suspend, by way of resolution, the provisions of The Stallion Enrolment Act, in a specified area in the Municipal District until the 1st of January, 1935. The request was left in abeyance pending further information.

The following mill rates were set for school taxation, Brookville 30, Clover Bar 5, Agricola 6, Partridge Hill 5½, Ypres Valley 12, Pleasant View 8, Mansfield 4, Parkside 7, North Clover Bar 6½, Silver Lake 16, Radom 16, Bolton 13 and Josephburg 7%. The mill rate for Good Hope School District was left over pending particulars regarding their requisition.

The estimates for municipal purposes for the year were considered but as there was considerable other business to be dealt with, and the hour getting late, it was decided to have their final adoption until next Saturday when a special meeting will be held.

What About Social Credit, Canada

(Continued from last week)

No. 9

J.—"I should say not. But you're quite right: they couldn't buy all our goods even if we priced them at cost and added not a cent for profit."

W.—"So you see, Our system cannot work while we finance it by such methods."

J.—"You know, Williams, that's very interesting. I think that over."

W.—"Excuse me just a moment. I want to finish this illustration about our fur business before we lose the connection."

Author's note:

We are aware that Canadian banks do not limit on real estate but we used the term "house" in order to simplify the illustration. The same effect results from the construction of a factory that is financed by public subscription to a bond issue.

W.—"I want you to see the situation clearly; that neither interest (Which some people call "money") nor dividends, nor the land monopoly are recovered in the problem. People who concentrate on these non-critical points are overlooking the real problem. The main point to note is that the wages paid for making these furs are less than the price we should have to charge for them if we are to remain solvent. For, as you have admitted, it is absolutely necessary for us to add an amount, large or small, to the cost of the furs before they are sold, and this amount is added to allow for replacement of capital equipment.

But here is the extension of that illustration. Suppose Joe Blank, instead of repaying his loan, had taken the money we paid him for the first house and invited us to build another under the same conditions. And suppose that we went on just as before and built, a house in our spare time, saving all the money he paid us in wages. Now he agrees offers to sell us the house and we pay him five thousand dollars. Assume that it is not necessary for him to repay the bank loan immediately so that we can consider that the community still has $5000.

C.G.I.T. Group Hold Mother and Daughter Banquet

On Monday evening, May 28th, the "Happy Heart" group of the C.G.I.T held a Mother and Daughter banquet in the classrooms of the United Church, this being the closing function of the season

A beautiful banquet table was spread, the decorations were carried out in the group colors, Blue and White. Their Leader, Mrs Stanley Dennie introduced the Toasts of the evening.

Toast to His Majesty the King
Response by Mrs Gus Olson.
Toast to the Church by Evelyn Cranston. Responed by Mrs D. C. Ramsay.
A Toast to the Sunday School by Edna Sherman Responed by Mrs. Fred Smith.
Toast to Mothers in the form of a Poem by Margaret Mc Kay responded by Mrs C. Glover, subject "Keep Household Angel - Singing" Solo by Mrs W.M.S. by Una Wilson Responded by Mrs Williston, who recited a poem penned by herself when a younger girl
Toast to the C.G.I.T. poem by Jean Rodger and Helen Jackson Responded by our Supdt. Mrs. Logan O'Brien, who outlined the various activities from our new Leader book.
Toast to the Leaders by Ardath Robinson. Responded by Mrs. E. J. Hodgins, the Mother of the C.G.I.T. work here, in the Fort.
An impressive Candle Lighting Ceremony was then held by Leaders and Group, after which community singing was indulged in, all taking part heartily.
The pianist for the evening was Miss Della Anderson of Edmonton, their leader of last year.
The happy evening was brought to a close by the singing of "Taps".

Committee Makes Report; Organizations Benefit

The following statement covering the 24th May Sports was submitted to the Committee at a meeting last night.

Receipts

Gate receipts	$138.50
Hot Dog Counter and Booth	7.00
Nugget and Milk bottles	22.10
Concessions	12.75
Horse Shoes	4.00
Ball Throwing	25.00
Dance proceeds	18.40
Total revenue for the day	$228.75

Disbursements

Ribbons etc	$4.70
Chocolates, Nugget and Bottle Milk	15.25
Concessions	8.00
Prize Money	49.20
Baseball	60.00
Basketball	2.00
Horseshoes	1.50
Soccer	4.85
Baseballs	19.80
Collins, for recovering	2.00
Nails, oil, file etc	2.02
Rent	4.00
Kerosene charges	.85
Advertising, printing, etc	22.05
Total expenses for the day	$187.12
Net profit for the day	$16.64
Total	$228.75

At this meeting it was agreed that the profits be disposed of as follows:

Seventy-five dollars to be placed in the general fund with which to carry on the sports again next year; ten dollars each to the Band and Fort Saskatchewan Community Tennis Club, ten dollars to Frank Ribelon for work done on baseball grounds, seventy-five dollars to provide playing suits for the ball team and the balance of thirty-six dollars and sixty-four cents be handed over to the team with which to pay old accounts amounting to $61.80, having then a balance of $6.44.

Finance Committee
D. Roberts,
J. T. Connolly, Sec.-Treas.

YPRES VALLEY NEWS

Mrs. C. Dittrich received a very interesting communication last week from Mrs. D Urquhart, who has been on an extended visit to Ireland Her transition and her native land will ring Belgium, Germany, and many other points of interest, and expects to be back in the Fort district the latter part of July

The Record received a postscript from Mr. D Cranston, which was much appreciated.

******

Miss Emily Boswell motored to town on Saturday and on her return trip Clara Dittrich, Ruth Jean and Arthur Lawrence accompanied her home

******

Miss Clara Dittrich and Lily Adams had an enjoyable aeroplane ride last Saturday.

******

CORRESPONDENCE

We are not responsible for opinions expressed by our correspondents.

Good Hope,
May, 28th, 1934

To the Editor Fort Sask Record.

Dear Sir:

In the normal course of events it falls to the lot of every community to have within its sphere, at least one individual who seems to take satisfaction in stirring up distrust and enmity among the others, who, instead of doing their best to get along with their neighbours, and hoping others will overlook their faults, and they overlook those of the others. However Good Hope (judging by a contribution to your paper of May 23), seems to be cursed with a number of arly vicious specimens of this type, who actually "Cub-Hoyle, Hunk".

I am now in my third year of service on the Good Hope School Board, and during that time, the two members of the board who were holding office at the time of my appointment have both been returned to office, one by acclamation and the other by a substantial majority. This proves that at least two of the board have the confidence of the majority of the ratepayers interested in school affairs, at the present time. That the chairman has the confidence of the other two members, is proved by the fact that he has been elected to that office each year of my tenure. Also our present teacher has been with us nearly three years, and has at all times had the confidence and cooperation of the board, and while I firmly believe he has been reciprocal.

I may also say that there have been no replacements, repairs, or new equipment asked for, during my term, which have not been cheerfully and immediately granted.

Such individual, who signs himself "Seven Cons Eleven", believes he sees an irregularity, (which by the very nature of it, were better immediately brought to the attention of the board, who could quickly deal with it), proceeds to tell the world. However investigation has proved his statement to be an abominable lie in its implicity and only partly true in fact. The fact being that two little over zealous girls did use the afore mentioned water pail for that purpose, absolutely with the knowledge of the teacher or Board This was in the clean up activities on Arbor Day. If this was knowledge to "Seven cons Eleven" three weeks ago, it is a disgrace to him for not reporting the circumstances to the Board, to prevent the possibility of a recurrence.

He passes some comment on the tensile properties of the stomachs in possession of the various board members and the teacher. For my friends I cannot say, but for myself, can, that I always believed I had a reasonably good one, in addition to fairly thick hide, but his statement is more than I can stomach, and has also got under my skin. Further, I venture to say that there is not one of the individuals whom he holds to ridicule, is so singularly lacking in the orthodox contents of abdomen, that they would be afraid to slap their "John Henry" to no serious a charge as he lays.

Yours very truly,
Harry J. Brenen,
(A lowly, but not meek member of the board).

Fort Sask., Alberta
May 28th, 1934

The Editor:
Dear Sir:

I wish to add to this that I have found the School Board most willing at all times to grant supplies necessary for the school.

Yours truly,
Janet E. Wilson, Teacher.

JOSEPHBURG NEWS

On Tuesday, June 5th, at 8 p.m. service will be held in the Reformed Church by Dr. Bolliger of Wisconsin, U.S.A. Special music will be rendered with several choirs in attendance, under the direction of Rev. Heuer of Edmonton.

On Sunday, June 10th, there will be no service as Rev. Wimbersmeh will attend the Reformed Church convention.

******

We are glad to see Mr. Carl A. Unterschultz up and around again after having had the misfortune of breaking his collar-bone while riding horse-back.

******

Mr. and Mrs. R. Thomas and daughter, Jean spent the week-end with Mrs. Thomas's mother, Mrs. Mike Mohr.

******

Mr. and Mrs. R. Krebs and daughters Nora and Marian motored to Stony Plain to spend the week-end with Mr. Krebs's sister Mrs. Joe Dittrich and Mr. Dittrich.

******

Messrs. Adolph Borg of Edmonton, Fred Borg, and Misses Lillian Borg and Rose Langhamen motored to Rocky Mountain House, Sunday.

******

The Josephburg Parent-Teacher Association will hold their meeting on Tuesday, June 5th instead of June 8.

COMING EVENTS

DANCING RECITAL
by the Fort pupils of Miss Peggy Aitken, Teacher of Dancing and Physical Culture, will be held in the

EMPRESS THEATRE
FRIDAY, JUNE 8th at 8.30 p.m.
Admission Adults 25c; Children 15c.

******

The United Church W.M.S. will hold a Sale of Home Baking in the vacated barber shop on Saturday afternoon, June 2nd at 2 till 6 p.m.

******

The United Church Ladies Aid will hold a Strawberry Social on Wednesday, June 6th, from 4 o'clock to 6 o'clock and 7 until 9 o'clock.

******

Warden and Mrs J. D. McLean very kindly offered their beautiful grounds for this annual event; to which everybody is cordially invited.

******

An interesting program will begin at 5 o'clock and 8 o'clock.

******

The Mission Band Concert will be held on Friday, June 1st, at the United Church at 8.15. Playlet, entitled "Pills of Tephora", will be presented. Selections will be given by pupils of Mrs. F. M. Hodgson.

Admission: Adults 15c; School Children 10c.

******

The United Church Ladies Aid will hold their regular meeting at the home of Mrs. Geo. Fray on Thursday, June 7th.

Will all ladies kindly meet at the Church at 2 o'clock where cars will be provided for the trip.

Some Suggestions For Summer Use

WOMEN'S GARDEN HATS
—Women's Straw Garden Hats with ribbon band and bound edge.
Special each $1c

MEN'S STRAW HATS
—Men's Straw Hats, variety of shapes and sizes, bound edge.
Special price each 25c

MEN'S INVISIBLE BRACES
—Men's 4 Point Invisible Braces, very comfortable for these warm days.
Special per pair 45c

MEN'S COMBINATION UNDERWEAR
—Men's fine quality "Penman" make combination underwear short sleeve, ankle length.
Price Per suit $1.35

MEN'S TWEED CAPS
—Men's economable weight caps in assorted tweeds, one piece shapes that are fully lined and well finished.
Special each 95c

BOY'S UNDERWEAR
—Boy's Bathenheim combination underwear. Per suit 75c

GLASS FRUIT SETS
—7 Piece fancy Glass Fruit Sets, per set 85c

GLASS WATER SETS
—7 Piece fancy Glass Water Sets, per set $1.25

WHITE SPORT CAPS
—Young Men's White Sport Caps 25c

CHILDREN'S PLAYALLS
—Sturdy garment in a good variety of colors. Worth several times the money.
To Clear at 49c

DRESSES!! JUST ARRIVED
—Smart Organdy and Crepe Dresses, cool and dainty.
—Light Voile Dresses and many other kinds. Come in and see them.

PILLOW SLIPS
—Hemmed pillow slips, 42 inch.
Special each 22c

Quality Has No Substitute

"SALADA" TEA

"Fresh from the Gardens"

Obstacles To International Agreement

Obstacles to international agreement are many and various, so many, so various as to befriend the vision of the conference and defeat the ends sought.

Particularly in this true when a complex of nations is represented round the conference table. Despite the good intentions of conferees, the high sentiments they express and the noble purposes they pursue, invariably discussion interrupts the even tenor of the proceedings, divergent points of view protrude themselves and, with each interruption and each protraction, practical agreement becomes the more remote.

The conflict of opinion appears less with regard to the general objective sought, as with regard to the methods by which that objective can be reached. In the ultimate analysis, political rather than practical issues prove the stumbling block.

These thoughts are occasioned by the succession of disasters which has befallen world conferences held for perfectly laudable purposes during recent months. The League of Nations itself, perhaps the greatest agency for world co-operation yet devised, has suffered considerable loss of prestige through several manifestations of local interest, local jealousies, pride and susceptibilities. In matters such as the drug traffic, in which public rather than political and national considerations are paramount, the League has been able to take decisive action and render invaluable service. But where political and national interests and prejudices are involved, directly or indirectly, its decisions have been of less unanimous acceptance. In fact, their lack of unanimity has often been largely ignored.

In spite of the League and the large body of opinion supporting it, where matters of national significance have been broached, the nations involved have proved a law unto themselves, using the simple expedient of withdrawal from the League as a means of asserting their right to go their own way. Disarmament questions have brought prominently into the foreground the conflict of national viewpoints, and that immense desire for self-aggrandizement which is the bane of international peace.

In matters affecting the peace of the world. There can be little question that world opinion, generally, favors disarmament on a sane and early basis. It is equally true, however, that there is sharp clash of opinion as to what the basis should be and as to the methods whereby it should be undertaken. World disarmament conferences have proved futile, so far, in spite of the unanimity voiced by national spokesmen as to its desirability. All nations, it appears, are in favor of disarming—provided the other fellow does it.

Strange as it may seem, while world conferences on the question are dickering and talking fulsome, the same men may be said with respect to understanding on the subject between particular nations. Bilateral disarmament agreements appear easy, by comparison. Where two or three nations are involved, amicable solutions come readily to hand. Britain, for example, has little difficulty in reaching understanding with Italy, Italy with France, and so on. Even with Germany amicable negotiations are possible. Yet, when Britain, Italy and France sit around a conference table with Germany it becomes immediately impossible to focus all eyes on the same objective and all the same means of achieving that objective.

This is not to say that Germany is entirely at fault, or that the blame attaches to any particular one of the parties to the conference. It is apparently due to the complications which arise with every addition to the conference. Compromise as between nation and nation is easy; between three nations it is a little more difficult, but from then on, when four nations are involved, it becomes impossible. Perhaps then, the real solution is to be found in multiplying bilateral disarmament agreements until the whole world is involved, and all the nations are committed to peace.

The same course may be found the ultimate solvent of the world wheat problem. Apparently, the London Wheat Agreement has foundered on the shoals of national aspiration for, as this is written, the Argentine has virtually negatived the good work accomplished in the London sessions and the United States, in reprisal, is threatening unlimited production and the dumping of its surplus on the markets of the world.

The London conference resulted in what has been acclaimed as a unanimous agreement representing the first really co-operative arrangement yet reached by the nations of the world. It was not, however, a finite thing, in itself. It left certain important decisions for later consideration, principally half the number of maximum prices. Reports met at Rome to discuss prices in accordance with the terms of the agreement, only to be met by objections from the Argentine and demands from that country for an increase of 40,000,000 bushels to her quota. Having failed to secure virtually unanimous her export quota for the year as set in the London Agreement, the Argentine declared an additional 40,000,000 which could only be given at the expense of other great exporting countries, namely Canada.

The joint conference, however, has resulted certain tentative conclusions which were submitted to the governments involved.

The next stage in the proceedings was the London conference on prices to be named or ratify the decisions of the Rome discussions. Here again, clash of national interests proved a handicap. Doubts have been raised whether or not price-fixing by a central body is a sound practice to adopt. In fact, British grain men have been emphatic and outspoken on this point. The head of the London grain exchange had no hesitation in stating that the representatives of the various nations were not grain merchants, but they knew very little about it." With warnings against price-fixing, demands for increased quotas, and threats of unlimited production, the whole wheat agreement appears in jeopardy. Obviously, the complexity of international interests is accentuated in conferences on as large an scale as that of London. Perhaps the real solution may be found in a series of bi-lateral agreements involving no interested parties.

Health For Young Girls
Happiness For Tired Women

Thousands of women become tired out and run down, because pain and pain, and profound confusion under life is a burden.

The whole outlook of life is changed when the nervous, sick headaches, the dizziness, the spells of dizziness, of weakness and discouragement, and the all-too-frequent feelings of despair, are dealt with the use of Dr. Hamilton's Pills. They tone up the nerves, quicken the blood, and bring the health back to normal again.

Waste Bonus For Expansion

Monolithic Empires Need For Duty To Seek Room In Africa And Asia

Geographic and historic reasons were given by Mussolini in an interview with Hector Bywater, editor of the "Daily Telegraph" in Rome, for the expansion of Italian power in Africa and Asia, and the need for a strong navy.

During the interview, Mussolini said:

"Thirty provincial capitals are situated on the coast of Rome herself is near the sea. Geography is one of the immutable factors that determine the destinies of a nation."

Then he went on to say:

"Geography and history both warrant us in taking Asia and Africa as objectives. We are nearer to these two continents than any of the greater western European powers. So, even although Italian expansion of our task. We are not thinking of any territorial conquest, but everyone should know that we are thinking of the day when we are going to co-operate with the nations of Africa and the Far East."

Mussolini Interviewed

Mussolini's views as to the problems of the League of Nations and of disarmament, saying:

"The problem of the reform of the League of Nations, which is almost universally accepted, is clear. The reforms that are being considered are being undertaken after the closing of the disarmament conference, because if this conference fails, there will be no time to make any reforms. It will be enough to consider the work of the League of Nations during the past.

"It is generally considered that the conference will fail, at least as regards the most important question. The greatest armed powers will not disarm; those that are not armed will be in a position to arm with a mere or less defensive purpose."

Pink Hands Face Rain

Yukon Heavy And American Tourist Business Falling Off

Instead of equaling the customary brave appearance at the tourist season now extensive at the tourist season Paris hotel, the Plaza-Athenee, already has closed its doors, and numerous others are on the verge of doing likewise.

Hotel managers blamed two factors for their plight. First, that on account of one-third of all money taken in must be sent in the state in the form of taxes. Secondly, that the American tourist business has almost evaporated.

"If this continues for a short time more we'll have to close up," the director of a leading hotel in the Etoile district declared.

Here are a few of the hotel items: Gas per cent., energy penny collected as a luxury tax.

Four per cent. of all room bills as city tax.

A social insurance tax.

A tax for appreciation.

A tax for mutilated soldiers.

A tax for operation.

A property tax.

This totals from 20 to 30 per cent. of receipts.

Trying To Find Secret

Manufacturers Push Bashful Method Of Producing Rubber Steel

To study new processes which have closed the doors of many factories, including a sign of decay or dead, a body of Dominion steel manufacturers is now visiting Rome. They hope to learn how some of these shops produced stainless steel. The element were erected by Ansino, the inventor of that process in South districts of his Indian Empire. Each stands on a high rock and is inscribed until the lions of Ansino reign. Three of the centuries inscriptions have not shaken them and decree have not rusted them. Ansino's method of making is believed to rest with descendants of the makers, and the steel manufacturers hope to learn this.

The fast-fall fly is a striking looking plant for the time of the year. It is also known as "the desert candlestick" on account of its long strap-shaped leaves and tall spikes of flowers like a column or a candle.

"Britain Of The East"

Story Of Japan's Progress And Development Reads Like Romance

Whatever may be said of the aggressiveness of Japan in the Orient it must be acknowledged that she deserves the designation, "the Britain of the East." Never in the history of the world has any of the backward nations made such gigantic strides forward in the path of civilization as has Japan.

The story of her progress and development reads like a romance. From the very time when she reformed her government and established democratic institutions she has gone forward in the path of educational and scientific progress and in industrial development at a remarkable rate. Her educational and scientific institutions are among the finest in the world. Moreover, her army and navy have reached a stage of development that is second to no other country. Hence, Japan is a nation so perfectly equipped from a technical and scientific point of view that her competition may well be feared by other nations. To make light of her industrial development shows a lack of appreciation of the remarkable progress she has made.—Brantford Expositor.

Used Sign Language

Sign language was used by members of the Western Canada Association of the Deaf as the medium of presentation at a unique concert in Regina recently. A short play, given by school pupils, depicted early education of the deaf in this country. In addition, "O Canada" was rendered in the sign language

Soybeans Profitable

The Farmers' Advocate says many livestock men, and dairyman particularly, are finding soybeans a profitable crop to grow. The beans add to the protein content of the meal mixture and for hay they are both productive and palatable.

Almost Instant Relief From Neuralgia

For Quick Relief Buy ASPIRIN When You Buy

New cases amazingly quick relief from headaches, rheumatism, neuralgia, neuritis... the "proof of relief," it is said, got discovered.

Those results are due to a scientific discovery by which an Aspirin tablet begins to disintegrate almost instantly you swallow it. And these results to go to work almost instantly.

Then you buy, though, be an genuine Aspirin. To be sure you get ASPIRIN'S quick relief, look for the name Bayer in the form of a cross is on every tablet of Bayer-Aspirin.

Bayer Not Much else Many

Scientists Invite Us To Enlarge Our Concept Of Universe Beyond Anything Heretofore Presented

Findings Of Scientist Regarding Universe Caused Re-Grouped

Late news from the astronomical world raises this serious question: Is there collusion between the Administration at Washington and the outward astronomer for the purpose of making the world familiar with huge numbers? Or is it merely in the expansion of the Arabic notation? Whatever the answer be, the interest from that redoubtable searcher of the beyond, Dr. Edwin P. Hubble of the Mt. Wilson Observatory, invites us to enlarge our concept of the universe far beyond anything heretofore presented by Jeans, Eddington, Millikan and the others, fervid expansionists though they be.

Dr Hubble's findings are little short of bewildering. The universe, declares he, is a finite sphere with a diameter of some six billion light years, and when Hubble announced that the fact that light travels at a speed of 186,000 miles a second, the Arabic notation itself is put to the test. But that is only the beginning of his astounding declaration. The universe consists of 100,000,000,000,000 (one hundred trillion) nebulae, each stellar unit of which is 50,000,000 times as bright as the sun—and 500,000,000 times as massive. View these figures stagger the imagination!

And only a year ago, Dr. Hubble was content with observing, through the 100-inch telescope on Mt. Wilson, nebulae 150,000,000 light years away. Now, he says, he has cast a new type of unprecedented expansion?

We are also assured that beyond this universe, 6,000,000,000 light years in diameter, nothing exists, not even cosmic dust. That is to say, the universe with which Dr Hubble deals so familiarly marks the end of space, for it is held that space cannot exist without matter.

Here is another important fact. The infinity of the mass of matter in the universe has not increased because of the constant expansion, it follows, then, that the distance between the component units has greatly increased, that is to say, it is continually an emptier universe. In the question of mass, Dr. Hubble likens the earth to a grain of sand in this immense space.

If all these marvelous details of this expanding universe have been recorded through a 100-inch telescope, what further wonders will be discovered when the larger telescope nearing completion at Corning, N.Y., is ready for use? Dr. Hubble believes that beyond the present frontier will be found countless galaxies of nebulae, all moving at a terrific speed—where? The Publicist says according to modern astronomy, speaking in a limited sense, when he attempted to indicate the infinite nature of the divine presence.

As we ponder the problems raised by discussion of the expanding universe, especially the accepted theory of relativity that space and matter must co-exist, this question inevitably confronts us: If the conclusion of modern physicists and metaphysicians that matter in reality is non-existent be true, does it not follow that space must give way to infinity?—Christian Science Monitor.

Where Credit Is Due

Manufacturer Almost Ruined Before Finding Out Why Sales Fell Off

It is rather noteworthy that at the April meeting of the board of directors of the Canada Cycle and Motor Company, Limited, J. S. Cowan, vice-president, explained that the important factor in enabling the company to "beat the depression" was a liberal policy of newspaper advertising. He declared that careful advertising over a period of years had created a trade-mark in the C.C.M. that made it an asset more valuable to the company than its whole plant and equipment. That is a remarkable statement, but the more it is studied the more it will be seen to be true.—Brantford Expositor.

An Interesting Survey

Shows What American Women Like Best In Newspaper

A survey recently conducted by the school of business of the University of Chicago gives information on what interests the average woman newspaper reader. According to the replies received, bridge lessons and foreign news find little favor with the fair sex. It is also significant to note that women show more interest in editorial than they do in crime news. The more important findings of the survey are summed up as follows:

First page news captures commanded 58 per cent of the votes, with the fashion pictures in the women's section ranking second with 76 per cent. The comic strip came next with 68 per cent., followed by the health features with 61 per cent and editors to the colors with 47 per cent. Foreign news ranked last with 6 per cent of reader interest, and bridge lessons were next to the bottom with only 11 per cent.

Perhaps Canadian women's preferences as to newspaper contents differ from their American cousins. Anyhow, this department is practically non-existent in Canada. Nor do Canadian papers play up crime news as much as they do in the United States.

The findings tend to show that bridge instructions and contests of any sought. Like some of the old favorite pastimes it seems to be on the downgrade. Or is it a case of players having become so competent and self-reliant that they no longer need lessons? ...

Farmers' Chief Difficulty

Cannot Sell Produce For Sufficient To Buy Necessities

Rev. John Livingstone Brown, Liberal-Progressive member for Lisgar, Manitoba, gave the House of Commons something to reflect over recently when he said that one of his constituents told him, "I have to sell my produce at such a price that the prices at which he was able to sell his produce was not sufficient to enable him to clothe himself properly," said Mr. Brown.

"Another man said to me in a jocular way, 'I wish this depression would end. I am tired of eating turkey.' It is true that there are exceptional circumstances in the West at the present time but the difficulty in most cases is not that farmers have not sufficient to eat but that they cannot dispose of their surplus at a price that will enable them to buy clothing and the other necessities and conveniences that every civilized man has a right to expect."—Lethbridge Herald.

The "Queen Mary"

"Queen Mary" lately will be the name of the much advertised Cunard liner "534," which is to be christened by the Queen at its launching Sept. 26, in the presence of the King. The choice of a name for the giant vessel has not been announced officially, but it is understood the Queen's assent to the suggestion that it be named either her has already been obtained.

New Rules And Regulations To Govern Commercial Poultry Hatcheries Throughout Canada

Has Invaded Canada

Infectious Bronchitis Found In Poultry On Two Provinces

Infectious bronchitis has been recognized in North American circles since 1927 and has been increasing in economic importance annually ever since. It has been reported in at least 30 states and in at least two provinces in Canada, according to a statement by W. R. Bleakney of the California College of Agriculture at Berkeley. "In the majority of the instances," the report states, "the disease has been introduced into new localities within the state by the purchase of mature or partly grown stock from infected areas.

"Concentration of poultry raising and continuous breeding of chicks in a community were found to be important factors influencing the type of severance and spread of this gastrointestic Evidence to support the carrier theory was obtained, but controlled experimental data were lacking.

"Prevention is an infected area is a community problem and consists of proper attention to disposal of dead birds, manure, and litter; the control of mechanical carriers; attention to the cleaning and disinfection of secondhand feed sacks and poultry crates; and the control of commercial and plant sanitation, as well as individual attention to the health of birds. Prevention in a disease free area involves precautions in the introduction of stock, in addition to the above recommendations."

"No satisfactory treatment for the disease has been found. Careful nursing, attention to the comfort of the birds, avoidance of excessive excitement and proper feeding were observed to be the best control measures."

Canadian Oath Of Allegiance

Has Been Made Simpler By Measure Put Through House

The House of Commons recently gave third reading to the Oath of Allegiance Act, a measure which greatly simplifies the oath and brings it into conformity with that adopted in the United Kingdom and other portions of the Empire. The new oath reads as follows: "I, A B, do swear that I will be faithful and bear true allegiance to His Majesty King George the Fifth, his heirs and successors according to law. So help me God." The former oath was ponderous and resonant, one in which the person taking it swore to defend the King "against all traitorous conspiracies" and other treasons. The measure evoked no discussion.

New Metal Alloy

A new beryllium-copper alloy is said to be non-sparking under conditions and hard enough to cut steel. The new metal will be valuable in mining and other industries where there is often grave hazard of explosions caused by sparks from tools.

HERO OF THE ARCTIC' HAS HONORED

Professor Otto Yulevitch, who is credited with preserving the lives of 101 members of the Soviet Chelyuskin expedition until rescued after three months on an ice floe, is shown at Washington being welcomed by the Soviet Ambassador Troyanovsky and his wife.

Canada Cuts Chords On Same Principle As Meisner

Radium, the most precious of all the elements, is raised down on the earth during thunderstorms, it was reported in Washington before the annual meeting of the American Geophysical Union by C. R. Wait and A. G. McNish of the Department of Terrestrial Magnetism. Carnegie Institution of Washington. Using this phenomenon, according to their report, concentrates radium, which is carried up into the clouds by ascending air currents, just as moisture is carried up to form the clouds

Bengal Barley

Of several years' experiments conducted by agricultural representatives have been continued by different plant-breeding institutions, including the Dominion experimental farms, the finest varieties have not yet been found suitable for cultivation in Canada to say which is the most desirable. For the present, however, the variety called Bengal appears most promising in the west.

Brave His Flames

Another one for Mr. Ripley. Tenderness chaser of a farmer, sleep in Boston, blazes his carnations. If any of the carnations take not up to the standard, Yuddy, Mr. his early morning rounds, pails the withered blooms out of the vases with his teeth, leaving the fresh ones to bloom.

WORLD HAPPENINGS BRIEFLY TOLD

If you are on relief in Calgary you mustn't keep a cow unless you take a proportionate reduction in milk allowances. This is the ruling of the civic relief agency.

Nipissing Mining Company had a profit of $146,628 for the year 1935, compared with a loss of $441,457 for the previous year. The profit shown does not include interest from investments.

Premier H. H. Bennett has accepted the rectorship of Queen's University. He succeeds Dr. O. D. Skelton, under-secretary of state for external affairs, who held the office for six years.

Hon. George H. Sedgewick, chairman of the tariff board, has left for England where he will visit a number of manufacturing plants which are interested in applications pending before the tariff board.

Miss Cuthbert Baron, well-known in the British West Indies, has been appointed governor of British Honduras in succession to Sir Harold Hitherstone, recently appointed governor of Nyasaland.

Pleased with the success of the Mother's Day postage stamp depicting Whistler's Mother, U. S. Postmaster General Farley said he was ready to try a Santa Claus stamp to commemorate Christmas.

Dr Louis Martin, one of the world's foremost authorities on colloidal chemistry, was named head of the Fur Institute. For 45 years Dr. Martin has been associated with the institute.

Creating a legal unit to which Manitoba can turn over the 1,200 acres inherited from the Turtle Mountain reserve, the International Peace Gardens, Incorporated, was granted a license to do business in the province.

Fires in Alberta in 1935 took toll of 20 lives compared with nine in 1934, according to the report of Fire Commissioner Henry Bruce. There were 1,582 fires during the year with property loss of $2,026,681 compared with loss of $2,689,401 from 1,397 fires in 1934.

Rich Radium Find

Biggest Pitchblende Strike Yet Uncovered in Yellowknife Region

Radium ore beds at Hottah lake, 100 miles south of Camsell bay, N.W.T., are even richer than first reports of prospecting parties stated, Edward Hartmeyer, Toronto mining man and managing-director of Consolidated Mining, revealed recently.

"It is the biggest pitchblende strike ever to be found in this country or the United States," he continued. He displayed a sack of samples ore. He declared that in his company's field they have a ton of ore mined and ready for shipment. It was taken out only with dogs' assistance.

He declared that the ore is worth $6,000 or $7,000 a ton, and will be shipped to an eastern refinery. He declined either to say or to estimate yet in the new area, as at Great Bear lake.

Legacy, a new, punishing variety of rain, produced by the Great Division, Dominion Department of Agriculture, from a cross between Summer and Mighty Day has date particularly well in Northern Saskatchewan, Central and Northern Alberta, and in the Eastern Townships of Quebec.

Ninety-five patches were required to repair damage inflicted to wings of an unidentified eagle in a bank vault in South Dakota.

Little Journeys in Science

HELIUM

(By Gordon H. Cowan, B.A.)

Scientists believe that all matter is composed of very small particles called molecules. These molecules are invisible and cannot be observed even with the aid of the most powerful microscope. It has been calculated that it would require about forty million molecules, touching one another, to make a row one inch long. Again it has been computed that a small thimbleful of air contains about twenty-seven billion billion molecules. There are spaces between the molecules which are supposed to be much larger than the molecules themselves. These spaces between the molecules are known as the inter-molecular spaces.

Molecules are in constant motion and they are also elastic. The hydrogen molecule, for example, has an average speed of over a mile a second and bumps against its neighbors almost ten billion times per second under ordinary conditions.

In the case of gases the molecules are quite separate and distinct and have great freedom of movement. The particles of a gas appear to be perfectly elastic, and as a result their motion is altered by what they collide with one another or when they bombard the sides of the containing vessel. The pressure of a gas is caused by the force of the collision of molecules upon the walls. A definite quantity of a gas will in an open vessel expand and indefinite expansion. Gases are therefore very responsive. A good illustration of this fact is that when a quart of water is evaporated it yields about seventeen hundred quarts of steam measured under the normal pressure of the air at sea level, the boiling point of water. This shows us why a steam engine is required to hold steam at high pressure.

A liquid is more easy to control than a gas; that is, its molecules are closer to one another and therefore have less freedom of movement. When a liquid evaporates some of the heat of the molecules escape into the air. The speed of the escaping molecules is the temperature and hence the warmer the liquid the greater the evaporation. This migration of the warmer molecules from a liquid results in a fall in temperature when a liquid evaporates. It is well known that water is cooled by certain substances by placing it in porous vessels in order that evaporation may be aided.

Solids, the liquids are much more compact than gases. The molecules of solids are separated by very small spaces, and appear to vibrate or rotate about fixed centres of rest.

Canada exports $250,000,000 annually to keep her colonies going.

Ordinary printers' ink is used in making fingerprints.

Has 6 browning uses. Always keep a bag in the kitchen.

SUNDAY SCHOOL LESSON

JUNE 2

JESUS IN THE SHADOW OF THE CROSS

Golden Text: "He went forward a little, and fell on his face, and prayed, saying, My Father, if it be possible, let this cup pass from me: nevertheless, not as I will but as thou wilt" Matthew 26:39

Lesson: Matthew 26:1-75.

Devotional Reading: Psalm 42:1-5

Explanations And Comments

Beautiful Self-Consciousness, verses 31-35. "It was the night before the cross. The little company were met secretly in an atmosphere charged with emotion. Either they did not know or they did not realize what the crisis would mean. They only knew that the purpose for which they had come to the city was near its accomplishment. The secrecy of their meeting place; the solemn and mysterious actions of their Lord; the departure of Judas fading into the night; the gracious words of comfort, spoken to his friends by their master; all these things had moved their hearts deeply. They were like men at a moment on the eve of action. It was the airless silence before the storm broke. In such a mood of excitement they then listened to the challenging question by Jesus" (Rodward Shilito). He, the Shepherd of the flock, was to be put to death that very night, and they, the sheep, were to be scattered, for they would all be offended in him. Peter, confident in his stumble by what was to befall him, said it was written (Zech. 13:7). Then he added the encouraging words: "After I am raised up, I will go before you into Galilee."

"It all shall be offended in thee, yet will not I be offended." He is not sure he will be other disciples, but he is certain in regard to himself." How little he knew of his own weakness! Even as Peter spoke these words, that very night, before the cock crew, they shall deny me thrice." Peter reiterated his statement, and this time all the disciples followed. He shall die with thee, yet I will not deny thee."

Gethsemane, verses 36-46. Jesus led the disciples to the Garden of Gethsemane, a favorite spot. At this time his oft-repeated journeys thither were unusual. "Sit ye here, while I pray yonder." "Sit ye here," he said to his disciples, "while I go yonder and pray."

Jesus chose to be alone and seek communion, and even said to his disciples, "My soul is exceeding sorrowful, even unto death." Before this he had taken with him only a small portion of the cup he was about to drink, but now, in truth, he was "alone" in communion with the Father.

Subsidy Helps Farmers

Greater Use In Scotland Is Making Life Easier

Farmers of Scotland are using electricity to speed growth and make life easier. Nearly 600 are employing it for milking and for other purposes. Market gardeners have recently found that they can accelerate the growth of vegetables by starting them in a hot-bed warmed by electricity. The "magical current" is just being introduced into hen houses, lights early in the evening and morning, doubling the hidden hits before dawn by day is longer and then causing them to lay more eggs. Ultraviolet rays produced from a lamp is being used extensively in the rearing of chicks.

May Ship Via Panama Canal

Route Being Investigated By B.C. Livestock Interests

The proposal by British Columbia livestock interests that beef cattle might profitably be shipped to European or British markets is again being investigated. A proposal has been advanced that B.C. cattle could be shipped alive through the Panama Canal from Vancouver and the possibility of this is under consideration.

Statistics reveal that the move would not be so much a means of finding an outlet for any excess production, since B.C. already imports more than half as much beef as it produces, but would merely serve as an avenue for bolstering the price, if it were feasible. Stockmen claim that Alberta beef depresses their prices to such an extent that the industry becomes unprofitable for the B.C. producers. By shipping to the British market, according to the argument advanced, B.C. cattlemen could get a better price for their beef than they can on the home market, even with rates included.

Dr. W. R. Oman, livestock commissioner, and J. A. Grant, marketing commissioner have been discussing the matter with livestock men during their recent visit to Williams Lake.

A Woman's Who's Who

With an array of over 6,000 sketches of English women, Hutchinson & Co., the London publishers, will soon launch a "Woman's Who's Who" The list has taken two years to prepare and contains the names of 120 women air pilots, 2,000 women doctors, 300 women magistrates of the peace, 300 women county councillors, 94 women architects, and dozens of women scientific managers, farm pioneers and members of parliament.

BENCOTEA CIGARETTE HOLDER

BENCOTEA Cigarette Holder absorbs the nicotine, specially treated and reduces, and tones smoker. Ideal for sufferers from nicotine poisoning.

Complete holder with refills — $2.25 postpaid, or from your druggist or Tobacconist. Dealers wanted everywhere.

SWEEPSTAKE BILL IS DEFEATED BY NON-PARTY VOTE

Ottawa. The Fraser bill to legal ize hospital sweepstakes was defeated in the House of Commons 105-57 in a division that cut across party lines. It met the same fate last year.

With the whips off, in an open vote, the three party leaders, Premier R. B. Bennett Rt. Hon. Mackenzie King and J. S. Woodsworth united in opposing the bill. Every member of the Bennett cabinet, excepting Solicitor-General Maurice Dupre, voted against it.

The bill, which would empower provincial attorneys-general to authorize sweepstakes for the benefit of hospitals and charitable institutions gained its support mostly from Quebec members. The majority from the Liberal benches. It was opposed also by J. A. Fraser, Conservative member for Cariboo, B.C., after passing the senate 10 days ago by a narrow margin.

Opposing the bill were 67 Conservatives, 27 Liberals, eight Progressives, two Independents and one Labor-ite. Supporting it were 23 Conservatives, 33 Liberals and two Labor-ites.

Defeat for the bill was engineered by A. M. Carmichael, Progressive member for Kindersley, a retired minister, who moved the six months' hoist early in the day. When the house passed the Carmichael motion, it killed the bill.

Dominion Loan Arranged

Three Prairie Provinces Are Assisted By Federal Treasury

Ottawa. Orders-in-council passed under the Relief Act disclose that a further loan of $800,000 on provincial treasury bills at five per cent matur ing May 29, 1935, will be made by the federal treasury to enable Manitoba to secure another similar loan maturing in May and June of this year. The maturing loans are for $500,000 expiring May 28, and $100,000 expiring June 18.

A loan of $394,000 has also been authorized to assist the Manitoba government in meeting its share of relief costs during May and June of this year.

Saskatchewan and Alberta will be assisted by the federal treasury with loans up to $750,000 each to enable them to proceed with road building operations this year, according to orders-in-council passed under the Relief Act. The amount will be advanced as the work proceeds and will be secured by provincial treasury bills at five per cent. interest.

Cane Has Been Cleared

Ottawa. — The Dominion government is discharged from any liability as guarantor of bonds of the Beauharnois corporation, Prime Minister R. B. Bennett informed the House of Commons. In addition, the cost of the Beauharnois investigations in the House of Commons and senate amounting to $43,333 has been paid.

Song And Dance

Lethbridge, Alta. Lethbridge was a city of song and drama recently. Five hails were required to stage the elocution and vocal classes for 600 boys and girls attending the annual school and dramatic festival of southern Alberta. It is held in connection with the 37th annual musical festival of Alberta.

Vote To Strike

Lethbridge, Alta. — Demanding recognition of the United Mine Workers of Canada, 250 miners at the Maple-Michel mines of the Crow's Nest Pass Coal Company voted to strike, but left decision as to when the walkout is to start until after further consideration.

Pay Increases

Winnipeg. Pay increases are in sight for Winnipeg civic employees. City council has approved pay increases for 300 employees of the city hydro and asked the finance committee to consider favorably pay increases for all other employees.

Would Regulate Trade

Proposal Made Before Parliamentary Price Spread Probe

Ottawa. Wiping out of the Combines Investigation Act to be replaced by legislation giving the Dominion government power to regulate trade and commerce, was proposed before the parliamentary price spreads probe. The suggestion was made by C. H. Cahan, president of the Canadpac Tea and Rubber Company.

The principal object of the Combines Act was to safeguard the public against unwarranted or unfair practices, he explained, to which the public was entitled should be brought about in a more constructive way, the rubber company head stated Companies should not be prevented from organizing so as to become highly efficient.

Many phases of trade and commerce might be regulated as well as high prices, Mr Cahnan told the inquiry. Low prices were as destructive as high prices.

The government owed it to industry to give it reasonable supervision. His proposal would develop healthy business and be a proper safeguard for the public

Balanced Railway Budget

President Beatty Of The C.P.R. Favors United Railway System

Montreal. A balanced railway budget within a reasonable period of time was promised by K. W. Beatty, K.C., president of the Canadian Pacific Railway, if the scheme of a unified and privately administered system was adopted by the rail presidents of Canada. He made the promise in the course of an address to the Canadian Political Science Association, holding its annual meeting here. He said the unified system would be able to finance justifiably extensions which expanding settlement and development might in future demand.

Mr. Beatty's subject was "The Canadian Transportation Problem," and he dealt with the present situation created by the Canadian National Railways deal after outlining the physical and political events leading up to it. He styled the history of Canadian government railways since 1900 as a "veritable rake's progress."

Mr. Beatty announced that displacement of labor would be overcome through the normal turnover.

Britain's Stand On War Debt

London. — Modification of Great Britain's stand on the war debts question was indicated strongly in Reformed circles, with the possibility that the government may approach Washington for a discussion of the subject.

Donation For Sir Geo. Perley

Ottawa.—Sir George H. Perley has received one more decoration to add to the many which now adorn him. The latest is one of a military character—the Canadian efficiency decoration.

Medals For Mounted Police

Ottawa. — More than 300 members of the Royal Canadian Mounted Police are reported eligible for a long service medal authorized for issue through a royal warrant from the king.

Malcolm MacDonald, son of the British Prime Minister and Under Secretary for the Dominions told the House of Commons he would not say the United Kingdom was entirely satisfied with what Canada and Australia "must accept" as result of last summer's Ottawa Economic agreements.

B.C. Proposals

Negotiations With Premier Bennett Are Revealed

Vancouver. — Premier T. D. Pattullo returned to British Columbia to reveal two new and interesting facts evolved from his negotiations with Prime Minister R. B. Bennett

The Dominion government's contribution to a grade at works projects will come by direct cash payment rather than by loan he said The amount or nature of the contribution has not been determined

Mr Pattullo said he has notified Mr Bennett that the province will submit a definite proposal to the Dominion to turn over the Pacific Great Eastern Railway at replacement value. He said valuation of the railway on this basis will be started at once.

Sweepstake Winnings

Should Be Forfeited To Crown And Not The Informant

Ottawa.—Two changes in the law governing lotteries were suggested in the sweepstakes debate by Hon. Hugh Guthrie, minister of justice. The first ended in the bill to legalize sweepstakes being killed.

Under the existing clause in the criminal code when a man wins a lottery prize, it is forfeited to the informer who may succeed against him in court. This was not a suitable provision, Mr. Guthrie thought. The winnings should be forfeited to the crown, not to the informant.

The fee for purchasing a lottery ticket was $20. This might very well be raised to a larger amount, the minister suggested.

Winnipeg Strike Settled

Winnipeg. The partial strike of employees at the Western Packing Company here which has disrupted wholesale meat deliveries since March 7 was amicably settled by mutual agreement and has been returned to work Wages have been increased by 10 per cent. an hour for the lower paid categories and 7½ for the higher

Lovers Record

Miss Jean Batten Establishes New Record For Women In Flight From England To Australia

Darwin, Australia — Miss Jean Batten, New Zealand aviatrix, set a new women's record for an England-to-Australia flight when she set down her plane here. She lowered the 19-day record, established by Miss Amy Mollmen in 1930, by 4½ days.

Mrs. Mollmen required 19 days to cover the route that since has been flown in seven days by male aviators. Miss Batten kept well ahead of the record all the way from London

Would Regulate Trade

Proposal Made Before Parliamentary Price Spread Probe

Ottawa. Wiping out of the Combines Investigation Act to be replaced by legislation giving the Dominion government power to regulate trade and commerce, was proposed before the parliamentary price spreads probe The suggestion was made by C. H. Cahan, president of the Canadpac Tea and Rubber Company

The principal object of the Combines Act was to safeguard the public against unwarranted or unfair practices, he explained, to which the public was entitled should be brought about in a more constructive way, the rubber company head stated Companies should not be prevented from organizing so as to become highly efficient

Many phases of trade and commerce might be regulated as well as high prices, Mr Cahnan told the inquiry Low prices were as destructive as high prices

The government owed it to industry to give it reasonable supervision His proposal would develop healthy business and be a proper safeguard for the public

Balanced Railway Budget

President Beatty Of The C.P.R. Favors United Railway System

Montreal. A balanced railway budget within a reasonable period of time was promised by K. W. Beatty, K.C., president of the Canadian Pacific Railway, if the scheme of a unified and privately administered system was adopted by the rail presidents of Canada. He made the promise in the course of an address to the Canadian Political Science Association, holding its annual meeting here. He said the unified system would be able to finance justifiably extensions which expanding settlement and development might in future demand.

Mr. Beatty's subject was "The Canadian Transportation Problem," and he dealt with the present situation created by the Canadian National Railways deal after outlining the physical and political events leading up to it. He styled the history of Canadian government railways since 1900 as a "veritable rake's progress."

Mr. Beatty announced that displacement of labor would be overcome through the normal turnover.

Britain's Stand On War Debt

London. — Modification of Great Britain's stand on the war debts question was indicated strongly in Reformed circles, with the possibility that the government may approach Washington for a discussion of the subject.

Donation For Sir Geo. Perley

Ottawa.—Sir George H. Perley has received one more decoration to add to the many which now adorn him. The latest is one of a military character—the Canadian efficiency decoration.

Medals For Mounted Police

Ottawa. — More than 300 members of the Royal Canadian Mounted Police are reported eligible for a long service medal authorized for issue through a royal warrant from the king.

British Columbia Reports Improved Business

Early Promise Of Better Conditions Being Borne Out

Victoria. — The first quarter of 1935 has borne out early promise of a happier year for British Columbia. Bank clearings were up some 25 per cent. over the same period in 1934. Lumber production was up 50 per cent. to 467,206,000, f.b.m. Lumber exports by water were 291,180,-697 f.b.m., about double that for the first four months of 1934.

Coal production at 41,433 ounces showed an increase of 22 per cent Silver, lead, zinc and copper were reported improving though current figures are not available Coal gained five per cent

Agricultural products were up 10 per cent. in volume with prices firmer

Payrolls are about $10,000,000 monthly, up about $200,000 per month, inferred from the fact the one per cent. tax is yielding $160,000 monthly, and this excludes incomes below $30 a month.

Decline in number of persons on relief was at about the rate of 12,000 per month for March and April compared with those months last year.

Advocates Silver Policy

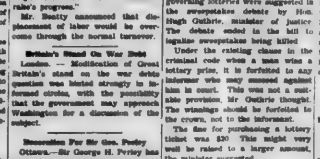
President Roosevelt Wants Authority To Make Necessary Purchases

Washington. President Roosevelt recommended to the United States senate banking committee that Congress policy to be "to increase the amount of silver in our monetary stocks with the ultimate objective of having and maintaining one-fourth of their monetary value in silver and three-fourths in gold."

The policy would be mandatory. The president, in fulfillment of his agreement with congressional silver advocates, said he should be "authorized and directed to make the purchases of silver necessary to attain this ultimate objective."

Payments for present silver holdings in the United States would be limited to 50 cents an ounce, and profits so made would be taxed 50 per cent.

Pointing to a world-wide bi-metallic agreement as the ultimate solution of the silver problem, Mr. Roosevelt revealed to congress he has already begun negotiations with neighboring countries "in regard to the use of both silver and gold, preferably on a co-ordinated basis, as a standard of monetary value."



ONTARIO'S POLITICAL ARENA CLEARED FOR BATTLE

On June 19th, the people of Ontario will flock to the polls to decide what party shall sit on the Government benches at the next session. Above are the political leaders who are in the midst of one of the most strenuous election campaigns in the history of the province. Left to right: Premier George S. Henry, leader of the Conservatives; and H. C. Nixon, head of the Progressives.

BRITAIN PLANS TO ASSIST OWN MEAT PRODUCERS

London. — The Daily Telegraph forecast that the British government plans to help its own meat producers when the Ottawa conference agreements respecting imported meat empire on June 30. The newspaper said the government is determined first and foremost to look after the needs of the home producers.

Should the Dominions refuse to agree to a new scheme, limiting meat imports, the British government would take steps to restrict imports, said the Daily Telegraph. It would be compelled to choose between imposing restrictions by way of quotas to both Dominion and foreign imports of frozen and chilled meats or levying the United Kingdom "insurmounting" the home number, the paper said.

This "insulating" step, the Daily Telegraph said, might be taken to protect the home producer from the shock of abnormally low market prices by making a price guarantee, as was done for a temporary period for the benefit of home dairy farmers.

Drunk in Russia

Mobilization Of Five Departments Ordered To Widen Festival

Reuter, U.S.S.R.—With a mobilization akin to a military movement, Communist party chiefs started a far-flung war on drunk which menaces the Russian wheat fields.

In the Azov-Black Sea region the party chief of the regional agricultural department, carrying out instructions from Moscow ordered mobilization of all party and Komsomol fire departments and started commandeering all available barrels at strategic points in the fields.

All able bodied men can be spared from other tasks are ordered to help bring water to the parched crops.

Both winter and summer crops, the party chief said, "are in mid-condition and getting yellow because of lack of moisture." Sprinkling from streams will be undertaken.

Meanwhile, light to heavy rains were reported to have fallen in south-western Ukraine and part of the lower Volga region, two large regions of central Russia's chief granary-growing section.

Awarded Gold Medal

Miss Jessie Gray Of Toronto Wins Honors In Medical Graduating Class

Toronto. — Miss Jessie Gray, of Toronto, was awarded the gold medal in the graduating medical class of the University of Toronto, the university announced.

Second place in the medical graduating class went to T. Kobyama, Japanese student from Cumberland, B.C., and third honors went to R. C. Dickson, of Ottawa.

Byrd Reports Severe Cold

Little American, Antarctica. — A temperature of 72 degrees below zero was reported May 21 by Rear-Admiral Richard E. Byrd in his isolated outpost on Ice Barrier Since the coldest part of the Antarctic winter is still to come, this temperature fathomed Admiral Byrd's prediction that his base may be the coldest spot ever inhabited will be fulfilled.

No Insurance Plans

Ottawa. While believing some form of contributory unemployment insurance is inevitable, Prime Minister R. B. Bennett was unable to inform the House of Commons if any legislative action would be taken at the present session.

Eligible For Medal

Ottawa. More than 350 members of the Royal Canadian Mounted Police are reported eligible for a long service medal authorized for issue through a royal warrant from the king.

Agricultural Notes

Over Seven Of Interest To the Farming Member

The first cargo-cop shipments this year from the Niagara district of Canada were made on May 7.

The largest crop of tree fruits in history is expected this year in the Okanagan Valley, B.C.

The first British Columbia strawberries to make this year at Chilliwack, Alberta on May 7 were exactly one month earlier than last year.

Canadian cattle exchange to Great Britain this year up to May 10 totalled 11,304 head, as against 12,246 for the same period of last year

Pig-Tin-Iron 18 weeks of 1934 year up to May 10, 1,224,082 as against 1,220,- 766 for the same period of last year, an increase of 3,816.

Timothy is grown in England as a permanent meadow but it is not sown in any extent as a seed crop. The United Kingdom is generally supplied the greatest proportion of the seed.

Canadian milks is regarded in Britain as the best available and, since the United Kingdom harvests very little of this seed as a crop, the bulk of the requirements are drawn from Canada.

Tuesday hands made the high mark of the year under a moderate run for the week ending May 16, when Winnipeg found-lot hands topped 20.50 per cwt. Spring lambs had a top of 20. Livestock Market Report, Dominion Department of Agriculture

The reports of crop correspondents throughout Canada at the end of April indicated that prospects for the 1934 crops were below average, the most unfavourable conditions being reported from Ontario, Manitoba, and Saskatchewan.

Twenty-one large boxes of British-grown chrysanthemums were compiled to Montreal in the C.P. liner Duchess of Athol, and forwarded by rail to British Columbia. The plants were grown and grown in approved soil, and were tended every day during the entire journey by one and two.

Winter-killing of fall wheat in Ontario was particularly severe, the per centage (10) being the highest of any year on record except the disastrous winter 1917-18, when it was 26. Of the 631,000 acres of fall wheat seeded in Ontario last autumn, it is estimated that 368,000 (or 59 per cent.) acres are winter-killed.

The contemplated reduction in the spring wheat acreage in Canada this year is divided among the three Prairie Provinces 161,200 acres in Manitoba (4 per cent.); 1,622,400 acres in Saskatchewan (11 per cent.) and 362,800 acres in Alberta (5 per cent.). The other provinces, where spring wheat is almost negligible, show little change.

Canada's sugar carryover of hay this spring than there has been for many years, owing to the strong demand caused by the past long severe winter in Ontario, says the Dominion Bureau of Statistics. Apart on hay marketing, that the market hay crop for 1934 will need be larger than usual so as to meet the requirements of next winter.

Winter injury to fall rye in Canada was most severe in Ontario and Saskatchewan. In Ontario 14,300 or 20 per cent. of the 36,000 acres sown to fall rye were winter-killed, leaving only 22,000 acres for harvest. In Saskatchewan 23,000 or 16 per cent of the 209,000 acres sown, were winter-killed, leaving 186,000 acres to be harvested. For all Canada, 432,100 acres were sown to fall rye, and 15 per cent., or 61,500 acres, is estimated as winter-killed.

Private Airplane Owners

United States Has Greatest Number Of Any Country

The United States leads the world in the number of private airplanes. Last year there were more than 1,- 100 owners in the country. France had 1,267, but this included planes used for instruction and owned by pilots. France has the largest number of commercial planes, according to population, one to every 160,000 inhabitants. The United States has one for 99,000. Italy has for every 200,000 and Germany one for every 250,000.

W. N. U. 2048

FAMOUS MILITARY LEADERS AND SCENES BATTLE PLANES TO ATTEND CELEBRATIONS

Field Marshal Viscount Allenby (top, in oil), deliverer of Jerusalem from the Turks during the Great War, and Sir Roger Keyes, Admiral of the Fleet and director of the famous attack on Zeebrugge and Ostend in 1918 (lower, inset). Centennial celebrations are planned for Canada's large reunion and other events during the May 24 Centennial celebration period in Toronto in August. Five of Britain's famous Hawk Fury battle planes also will participate in the July festivities. Above is a view of this type of plane, claimed to be the fastest combat machine in existence.

Veteran Develops Hobby

Collected During War Tobacco Man Raises Trapped Fish

In the sun-parlor of a house in Toronto's west end a crippled little man sits day after day, watching the behavior of fish. They are trapped fish he has raised himself and he has developed them for eight years.

In his boyhood Bruce Carruthers caught fish, tadpoles and other inhabitants of ponds and lakes. He kept them and watched them, gaining a considerable knowledge of their habits. When the Great War broke out, he was 18 and enthusiastic. He enlisted and went overseas with the first Canadian contingent.

When the armistice was signed on St. Julien in April, 1915, a bullet whipped through Carruthers' spine and lodged under his heart, where it stayed for 16 months. He has never walked since that day, 19 years ago. He lay for months in an English hospital, where he was cared for by kind, blonde English girl. She is now Mrs. Carruthers.

Then dragged on Carruthers' hands when he came back to Canada, and he turned to the interest of his boyhood days. In the sun-parlor of his home were small, brightly colored fish swim to about de tanks. Those on his hands base on the bottom to become an expert fish-breeder.

"It's a nice hobby for an invalid," he says. "My disability has handicapped me, but it has allowed me to watch my fish more closely than some other amateurs who work and are able to do. I have probably seen most of their habits and learned more about them than lots of other men."

Believes tropical fish. Carruthers says, is growing as they become more widely known. He has a friend of mine in the United States in which people have taken scores of fish rather than flowers to decorate a hospitals, as they believe the fish provide a lasting interest and do not die as flowers do.

"They have been a fine hobby for me," he says. "They have kept me occupied and prevented me from thinking too much of my troubles. It is a cheerful little man, but he becomes bitter at the mention of the war.

Carruthers is recognized as one of the leading authorities on fish in Toronto, where, officials of the Toronto Aquarium Society have sought his advice. Most other fish, most of them as a hobby, but a few professionally.—Guy H. Rhodes, Canadian Press Staff Writer.

Duty To Babies

The United States is waking up to the fact that babies are its greatest asset and record there were 2,000 parishes of infant mortality in the country in 1933. Normally there are 400 parishes per capita commissioner. A square mile of the commissioner and four days' pay. Indeed, 1,200,000 children died last year under the age of one year.

People in Britain Healthy

Insurance Officials Reports Great Improvement In Physical Condition

The British people to-day, in spite of the war and the long years of depression, are better in health and physique than ever they were.

This was a statement made by Sir Walter Kinnear, controller of the insurance department of the Ministry of Health, in a speech at the annual dinner in London of the National Federation of Employees of Approved Societies.

The mortality rate of the country as a whole, he said, is steadily decreasing.

There is taking place a general improvement in the physical condition and health of the people, both younger and its physical character better.

Mortality from the great constitutional diseases has declined by nearly 35 per cent. in the past ten years.

Dangers In Kite Flying

Recent Electrician Warns Boys Against Metal On Cords

Boys who fly kites must be sure the string contains no metal, Electrician John Campbell of Denver, Colorado, warned.

"If a kite cord containing any metal touches a high voltage electric line the boy is likely to be electrocuted," he said. "If such a kite cord should contact both a high and low voltage line fuse in many homes might be blown out.

"Only a short time ago a boy was severely burned when his kite cord struck a high voltage wire. The cord had a fine copper wrapping. It is a wonder the boy wasn't killed."

Diversified Occupations

Lost Unless Slaves Canadian Women In Many Fields

In Canada there is one male appointee in the millinery trade. There is one woman in the other hand, who is manager of a coal mine. We cannot give you the reason. The simple facts are extracted from the 1931 census of the occupations of gainfully employed persons in Canada.

There are five women who are foremen of mines other than coal mines. There is one woman who owns a soft drink plant. Two women own or manage tobacco plants. One woman owns or manages a rubber products plant. Two women are women butchers in Canada against 9,345 men in the same occupation. There is one woman who is a harness maker and one who is a lithographer but there are six who are wood carvers and nine who are pressmen engravers. Six women own garages and two act as auctioneers. The census states that there are six female horse boys which seems to be a contradiction in terms. There are five women magistrates and two women architects. And just to show how diversified are the occupations of the women workers, there are five who are employed as chauffeurs to hands.

Most of the stenographers are women. There are 69,000 females against 2,900 males in that profession. We even numbered 12,000 are just ahead of waiters numbering 11,300.

There is no profession listed in the census in which men are not employed. But on the other hand there are scores of jobs in which women apparently have not aspired.—Financial Post.

"Do you know that nice looking boy?"

"Yes, well enough not to speak to."

To Modernize Palestine

British Government Guarantees Loan Of Ten Million Dollars

The Holy Land is marching with the times.

A resolution authorizing the British government to guarantee a $10,- 000,000 loan for Palestine which is administered by the United Kingdom under League mandate, was introduced in the House of Commons by Louis Hore-Belisha, financial secretary to the Treasury.

Nearly half of this sum, or $4,- 000,000 will be used for water supply and drainage schemes in Jerusalem, Haifa, Hebron and other places. Another $2,000,000 goes for public buildings, including a new post office and telephone exchange in ancient Jerusalem.

A sum of $1,000,000 is earmarked for agricultural credits, to enable the government of Palestine to assist in a long-term credit scheme for Arab and Jewish agriculturists alike in the plains, and Arab cultivators in the hill districts

Another $1,200,000 will be employed in the re-settlement of Arabs displaced by the increased Jewish settlement partly caused by the exodus of Jews from Nazi Germany

For construction of an oil work and reclamation scheme in Haifa, the remaining portion of the loan of $1,- 600,000 is set aside

Going To New Homes

Saskatchewan Mennonites Trekking To Farms In Northern Area

Ahead of the Saskatchewan Mennonites, from the rural municipality of Swift Current, are trekking to their new homes in the North Battleford, where they will settle, under the government land scheme. Mr. Driedger, of the provincial department of natural resources, supervised preparations for the journey of the settlers into the northern section of the province. A number of settlers from the Caspe municipality joined those of Swift Current municipality in the trek to the north.

Some weeks ago a scouting party left the Swift Current district to locate land for the settlers who have gone north. His summer's journey and two act as auctioneers. The census states that there are six female horse boys which seems to be a contradiction in terms. There are five women magistrates and two women architects. And just to show how diversified are the occupations of the women workers, there are five who are employed as chauffeurs to hands.

Most of the stenographers are women. There are 69,000 females against 2,900 males in that profession. We even numbered 12,000 are just ahead of waiters numbering 11,300.

There is no profession listed in the census in which men are not employed. But on the other hand there are scores of jobs in which women apparently have not aspired.—Financial Post.

"Do you know that nice looking boy?"

"Yes, well enough not to speak to."

OCCASIONAL WIFE

By
JANET MUIR WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hart and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her Peter is a young, struggling sculptor trying to win a commission for the memorial portrait of the late Archbishop Harcourt and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job Others in the story are Avis Wurth, another wealthy girl who is trying to "get" Peter, Alvin Todd, Peter's model, and Gus Matson, his former roommate who has been married and parted. After a party at an exclusive club where the rest of the members of the party go a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep in the sand. When they awake it is early morning and Avis and another boy are standing near them. The latter it nervously for Camilla to renounce before the party that Bill and Camilla are married. Camilla urges Peter to accept some of her own ings to help him along, but Peter refuses and they reserve After Camilla has gone from the studio, Avis tells Peter she is engaged to Bill.

Mountain Goat Rescues

Stops To Gather Rotten And Stale Of Many Days

A mountain, which, it is hoped, will ultimately give a complete history of the fauna and be of interest to the entire Dominion, has been started at the Royal Canadian Mounted Police barracks in Banff.

The museum is climbing from a small beginning, with photographs of early moose and game constituting the major attraction.

With many other rubies sought are copies of unusual reports, films, old uniforms, hand-written reports and the major cases solved by the R.C.- M.P. in the early days.

The First Country Fair

The first agricultural exhibition in North America was held in Nova Scotia, then known as 1759, and the 150th anniversary will be celebrated this year at the annual West Nesets exhibition. A game's program is being arranged and the committee plans to unveil a tablet commemorating the historic event, which led to the country fairs now so important to agricultural districts throughout the country.

And That's Wet

He was overheard in the middle of the night by his nervous wife, who said: "I hear sounds as though someone is coming up the stairs." "Nonsense, my dear!" he said haughtily. "Two o'clock," replied the wife. "It is right," he said, turning over; "it'll be wet."

depth of his disappointment if he had.

"And she is still a lady without a name," Peter observed. "The committee will have to decide the title here and now. Any new ideas floating around between you two girls"

They looked at each other, each fabricated in speak first Finally Avis nobed sweetly. "What was that suggestion you made the other night, Camilla?" As if it had been of his little consequence to remember

"I don't think I can offer anything better than 'Eager Youth' But Peter must have thought of something better when he threw those words while he has worked on it."

"Fool is, I hadn't thought much about it until Avis brought up the subject several weeks ago I thought her idea was pretty good, and still do. 'Inspiration'," he added thoughtfully "She does look rather inspiring, at that," he grinned

"Which of us the figure or I?"

"Both of you," he bantered

"Oh, I have a marvelous idea," Avis declared suddenly She was giving a party for Peter and Camilla to celebrate the completion of his work All her plans, so far, had worked as smoothly and as unfailingly as well-oiled machinery and her confidence was mounting rapidly She was even venturing a little ahead of her plans, so sure was she of her victory

"Why not have a christening and unveiling? The club is to begin the party tonight." Everyone will want to see it, so we'll all come in here for a little while and then we can adjourn to celebrate with whoopee I'll get a thin white cloth to drape over it and oh, may I, Peter be the master of ceremonies and pull the cloth and unveil it?" Her manner conveyed that she asked no more humble favor.

"Why not?" Peter inquired. What else could he say? "It's your idea Go ahead with it."

"Then you will use my title?" hesitantly.

"Sure It's all right. Any good sculptor is inspiring, and if it helps that good, the name doesn't matter, anyway."

Avis fluttered across the room. "You're a dear to let me do this, Peter. Well, I'll have to run home and get busy. I've several things to do for tonight. You carve the name on right away, so everything will be ready. I'll bring the veil over later." Avis did everything well, including her lunge and luncheon, as if she were rushed for time doing important things; while she left, she seemed completed very little except the satisfaction of her own active personality.

"She's a pretty good scout," Peter observed complacently, when she was gone. "What do you think, honey—is the name all right?"

"Perhaps she could guarantee what I think?" she asked quietly.

"Pooky!" he looked at her in surprise. "Why, I cannot you about the name, too?"

Camilla smiled bravely. "But you gave mine no consideration."

"I planned Past is, I didn't know much about it. I just want to use whatever is best, regardless of it, since it is for you." He looked puzzled. "It means nothing. As you just said, it could be applied to any piece of sculpture. I don't say that 'Eager Youth' is the best possibility, but at least it applies to the figure, and means nothing. A young girl standing on tip-toe and looking eagerly from the fountain of life which she holds to her lips in the form of a fluted shell. Doesn't that describe it, exactly? There is some imagination in it, anyway. I suppose hundreds of figures and groups have been named 'Inspiration'."

"Yeah, maybe thousands," he conceded coolly. "Well, it does, I can't afford her now. Maybe some mighty decent to me in a lot of ways."

Camilla held tightly to her words and emotions until she could escape. "Then, it is all settled," she said lightly, moving toward the door. "I'll be in to see you and dress now for the party. See you later, madame," and kissed him goodbye.

Alone, she thought bitterly, how treacherous love was. It took you to the heights of happiness only to dash you down mercilessly and fiendishly to the bottomless pit of anguish. She just couldn't understand Peter these days.

Was it Avis who had so changed him? True, he had been preoccupied enough in her whenever the case him, but his attentions had been more dutiful than spontaneous, his love more perfunctory. She may have imagined that in her resentment toward Avis, however This matter of naming his statue had hurt her immeasurably Peter's work was such an intimate part of their love together and their future It should represent as much as possible their

It seemed to her that since Peter had not named his own work, he should have been delighted to give her that privilege and honor Of course, Avis' suggestion been superior to her own she would have been glad to favor it As it was well, there was just a hasty weight of sadness in her heart as she prepared for the evening She recalled with a little wry grimace what Peter had said about Avis being naughty decent to him in a lot of ways

How like a man! To give credit in full measure, pressed down and running over, to some woman whose attentions were an item outside intention, and to dismiss the fine of his flawless efforts and generous considerations of the woman who loved him

The thought suddenly shocked her that if Peter were so susceptible to feminine influences right here in the studio, that Peter, himself, would happen to him for a whole year in Paris without her? But she dismissed that thought as instantly as it occurred to her She must wait for a moment that Peter was loyal and true. His work abroad, if he had the chance to go, would depend on his love and thought, and their life together after that would by a joyous eternity.

Her mood changed to one of fear for the days just before her. If Peter should go away, they would have to crowd all the happiness they could into the next into the two intervening weeks. There would be a week of anxious suspense awaiting announcement and the prize winner. It would be a difficult time for Peter. She doubted if he could work at all—and she shouldn't. He should a completely rest after these strenuous weeks of work and anxiety

For the moment she regretted her self-imposed restraint to her own work, but resolved to give Peter every possible moment which she could spare from it. Perhaps she could persuade him to come to the apartment with her for a week, and Rose would gracefully go back to her mother's for the time.

Her own work was well established now, her copy up-to-date and orders planned ahead. It promised well, but only time would prove that Already, her Tiny Tots actually were appearing at her from the pages of numerous magazines, waving gleefully at her from signboards along the highway, peering down from billboards where they cavorted on the house of cereal which they exploited just as she had dreamed they would in days when she had first created them on that memorable night two months before.

She was proud of her achievement, whatever the outcome might be; but she kept to herself the fact that she was the originator of the Tiny Tots who had recently sprung up everywhere to claim attention. Only Peter shared her secret, and not even Rose knew how important that work was which her sister did for the advertising agency.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile.

When your liver fails to empty 1 pints of bile into your bowels daily, your food does not digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Poisons from this decaying food are absorbed into your blood. You feel sour, sunk, dizzy, sick, and everything you eat tastes bad. Your skin may break out in blotches, pimples, or boils.

You need a liquid to help digest your food and make your bowels move regularly. Carter's Little Liver Pills, the first pill you should take for these troubles. Ask for them by name. Refuse substitutes. Only 25c at all druggists.

Mrs. H. T. Reynolds, Athens, Ont., writes, "My baby was troubled with constipation. I gave him Baby's Own Tablets as directed. . . Before I had given half the box the constipation was righted." By relieving constipation, Baby's Own Tablets prevent more serious ailments developing. Mothers endorse them. Sold by druggists, or send 25c to The Dr. Williams' Medicine Co., Brockville, Ont.

Baby's Own Tablets

A Super-Highway

U.S. Government Receives Plans For Road To Travel Without Stops

An engineer's idea of the "super-highway" of the future was envisioned by the Pittsburg chamber of commerce as it submitted plans with the federal public works administration for such a transcontinental route.

Advocates estimate the proposed route of the 3,000-mile roadway between $300,000,000 and $400,000,- 000, which would be issued by the government. Tolls and other self-supporting charges would make the project self-liquidating and self-sustaining.

Congested cities in the cross-country stretch would be eliminated as the proposed high-speed, non-stop thoroughfare would have no interspecting lanes, but ingress and egress by ramps only and would be 90 feet wide with different lanes for varied speeds.

Stains trimmed inside the government plan would be New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Missouri, or Nebraska, Colorado or Wyoming, Utah, Nevada and California.

In their resolution favoring the project, chamber directors stated it would provide a needed work relief for transcontinental traffic and functional employment.

Tribute To King George

Empire Fortunate In Having Wise Man For Sovereign

It is 26 years since King George ascended the throne of his illustrious ancestors, and thus Their Majesties are entering upon their silver jubilee year. It is to be marked, as is usual, by Empire-wide ceremonies in keeping with so important an anniversary in our widespread nations.

For many reasons the people of the Empire will rejoice with their King and Queen in this anniversary but for none more than for the reason of gratulation in the fact that in the extraordinary events since 1916 the Sovereign has been a man to whom, adoptable, so much opposed to steam and pretence, so thoroughly a man of the people. When we consider for a moment the catastrophes which would have been inevitable, the misery of millions, if the King in these days had been another sort of King, we realize something of what the Empire has been saved by the character of George V.—Montreal Gazette, Fifty Associated Press.

THE RHYMING OPTIMIST

By Aline Michaelis

A MOTHER

How can a mother ever find
A rough, tell-filled path, through
hours of strum,
So many ways of being kind.
So many moods of tenderness!

Life, sometimes, is a lonely thing.
Bare of beauty and devoid of
charm,
How can a mother always bring
Shining hope back and faith's white
gleams?

Wild regrets film grim ghosts will
rise,
Threatening all of the years ahead,
But what a mother can check with
sighs
And show how futile are tears we
shed?

Failure and folly may trouble each
heart,
How can a mother's clear eyes see
All of the visions it has garnered
Bloom in the heart, as it used to be?

Will Come In Time

Less To Compel Traffic To Stop At Railway Crossings

Every little while, some advocate arises to suggest a law making it compulsory for all motor vehicles to come to a dead stop before crossing railway tracks. Motor buses now voluntarily comply with such a regulation; but the general public seem to think they are safer in their own cars than they are in buses for what reason we do not know, for buses are usually controlled by the most experienced drivers—and in addition to this they fear that such a law would slow up traffic and cause congestion. Some day we will have such a law.

DEPRESSED BY ACUTE ACRIDITY

There can surely be no doubt about the effectiveness of a remedy for acidity that can give such permanent relief as in this instance I case —

"I suffered for many years from acidity in its various forms, she writes. "At last it became so acute that every morning I woke with a gnawing pain and a great depression of spirits. I tried Kruschen Salts, but the effect was magnified and the depression after like a cloud I have taken the daily dose of Kruschen ever since This was about five years ago, and the Kruschen does just as much for me now as it did at first. (Mrs.) E. M. M.

Kruschen is so effective with acidity because it neutralizes acid, takes all the torment out of it, and gently expels it Runs the system. And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent this wretched trouble from ever accumulating again. After that you'll experience no more misery after meals.

Little Helps For This Week

"I have finished the work which Thou gavest me to do." John 17:4.

He who God's will has borne and done,
And His work given routine longings stilled,
What else he does or has forgiven
His summons he has well fulfilled.

Cheered by the presence of God I will do at each moment without anxiety and according to the strength He has given me, the work His Providence assigns me I will leave the rest without concern. It is not my affair. I ought to consider the duty to which I am called each day as the work God has given me to do, and to apply myself to it with a constant worship of His glory, that is to say, with exactness and in peace. I must neglect nothing.—Fenelon.

It is thy duty oftentimes to do what then wouldst not, thy duty too to leave undone what then wouldst do.—Thomas A. Kempis

Attempt To Steal Relic

Watchman Seven Served Gourmet Held To Be Christ's Tunic

A daring attempt to steal a sacred relic reputed to be Christ's seamless robe was foiled by a watchman at Argenteuil, France.

The watchman repulsed intruders after they had wounded him in the head The tunic belongs to the Argenteuil Basilica, where it has been guarded since the 12th century

Since Easter the relic has been publicly shown and hundreds of crippled and invalids have been brought into the Basilica daily seeking miraculous cures. The tunic supposedly was woven by the Virgin Mary

It is purple, a seamless shirt spotted with blood and showing marks of the Cross diagonally across the back.

"The attack was very mysterious," Canon Louis Brain said, "but public exposure of the tunic may have tempted some international bandit or maniac to steal it."

In Pennsylvania, a man has the privilege of marrying his grandmother.

LOCAL NEWS

Mr. and Mrs. C. Ashton have moved into the James Graham home for the summer.

Mrs. Grant returned to Edmonton Tuesday, after visiting her daughter, Mrs. Bert Armstrong for a few days.

Joe Bay will known in baseball circles in Edmonton and in this district died accidently on Sunday, May 27th, at Oliver, B.C.

The funeral service was held today at the Poughkeep Reformed Church.

The Lamont Curling Club will hold their second annual sports day on Saturday, June 2nd., when a large program of sports have been arranged, including five baseball games.

The Fort ball team will play in the

Mrs. Johnston Carruthers spent the holiday week-end at Red Deer, where she was the guest of her daughters.

Mr. Joe White and daughter Joan, are the guests of Mr. and Mrs. Reg. Warrier for a couple of weeks.

TYPOGRAPHICAL ERROR

In the Letter to the Editor from Good Hope, sentence should read "with the knowledge of teacher or Board."

Taken from the Files

10 Years Ago Today

Thursday, June 3rd, 1915

J. F. Prelaun's meat market was completely destroyed by fire last Tuesday. A bottle of hard boiling over caused the blaze. The local brigade responded but little could be done to save the contents.

Fort Saskatchewan and District formed a Poultry and Pet stock association at a large meeting. The following were elected, President, W. J. Williamson, Vice-President Neville White, Secretary, F. S. Truby.

P. Nicol was overcome by smoke at the fire last week and had a very narrow escape.

An illuminated address was presented to Lieut.-Col. L. J. Whitaker, officers, non-coms. and men of the Third Mounted Rifles on their departure from Medicine Hat.

GOOD HOPE NEWS

The senior U.F.A. meeting was held in the school on Monday, May 21st. Mr. R. Hennig, M.L.A. was present and gave every interesting address on the business of the legislature, which has just passed, after which many questions were discussed. The membership drive was reported a decided success.

Green Valley beat the Good Hope baseball boys at the local diamond. The Good Hope boys winning with a score of 9 to 8.

We congratulate Mr. and Mrs. Gordon Wagner on the arrival of a daughter, May 20th.

Miss Martin Parks is a visitor in the district for a couple of weeks.

The native strawberry tree (arbutus unedo) of Ireland is not found in any adjacent country nearer than the Mediterranean region.

The district was visited by another of those "Million Dollar" rains early Wednesday morning and until going to press time a steady rain continued. This will surely put joy into the hearts of farmers in the district.

The Fort district has been indeed fortunate this season in having moisture come at the most favorable time, and if such reasonable weather continues, excellents results should be obtained next fall.

TASTY BAKED CREAM SALMON EASILY MADE

Here's a recipe recommended by Mrs. Evelene Spencer, fish cookery specialist of the Dominion Department of Fisheries, for making baked cream salmon, a simple but tasty dish. Cook two tablespoons of flour and two of butter without browning, then add a pint of milk, salt and pepper to suit the taste, and sufficient grated onion to flavour delicately; take a pound tin of canned salmon and separate the fish into bits, removing any pieces of bone; now place a layer of the flour-butter mixture in a baking dish, then a layer of fish, then another layer of the flour sauce, and so on, having a layer of the sauce on top. Bake the dish until it is golden brown on top and serve very hot.

Salmon loaves may be used instead of the canned salmon if desired.

The tennis match between Jasper Place and the Fort Community Club in the Intermediate Tennis League on Thursday evening was called off just after the game had started due to rain. This match will be played at some future date.

VOL. I No. 10 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JUNE 6th, 1934 $1.50 PER YEAR IN ADVANCE

Municipal Council Holds Special Meeting

Special meeting of the Council of the Municipal District of Clover Bar, No. 317 was held on Saturday last with all members in attendance.

The request to have the Council suspend The Stallion Enrolment Act in Township 58, Range 23 was again discussed. The request was granted and the Secretary was instructed to forward the recommendation to the Minister of Agriculture.

Permission was granted to the Red Hot Coal Co. to gravel the streets and lanes in the Sub-division of Capitan leading from the mine to the City limits.

Three new appointments for relief were received. These were handed over to Mr. Keith for further investigation.

The Department of Municipal Affairs advised that they had been in receipt of a request to have the council open up the road allowance East of Section 4-53-21-4. As the work of opening up this roadway would cost considerably more than the Council could afford to spend, it was decided that the Council, as a committee, should view the site in question on Thursday next.

Messrs. C. A. Horton, Hal Ottewell, Geo. Kelly, Chas. Naumdorf and J. R. Kelly were appointed fire guardians in their respective divisions.

It was decided to amend the Provincial Governments offer, by spending dollar for dollar, of their grant of $2000.00 for district highways.

The rate of pay for working on the roads was set the same as that which prevailed last year.

The mill rate for municipal purposes was set at six mills, with a discount of seven per cent. if current taxes are paid before the 1st September, and a five per cent discount if paid before the 15th December.

By-law No. 63 authorizing the above discount was given its first, second and final reading.

Monthly Meeting of Fort School Board Held

A regular meeting of the Fort Saskatchewan School Board was held in the Council Chambers on Monday the 4th of June at 7:30 p.m. Present Mr. F. Atkinson, Chairman and Trustees Dr. Grunert, Dr. Turner and Mr. R. M. Ray.

The minutes of the last meeting held were read and adopted. A letter was read from Mr. C. H. Robinson, Inspector of Schools, conveying to the School Board of Fort Saskatchewan S.D. No. 91 the sincere thanks of the Executive of the Lamont Inspectorate School Festival Association for use of School on May 11th., etc.

A resolution was passed—That in accordance with recommendations of teachers all grade three to eight pupils with suitable recommendations and years' marks, be promoted to the next grade without writing.

A motion was passed That our teachers be notified by the Secretary that their contracts with this School Board terminate at the end of this month, and that if they wish to be re-engaged, at their present salary, they should see the Secretary and sign new contracts not later than the 15th of June.

The Principal was present and advised the Board concerning school matters, and submitted attendance and other reports.

A special meeting of the Board will be held on the 18th, instant at 7:30.

Little Willie was present at dinner when the local parson was invited.

All went well until dinner was about to start, and the parson reverently bent his head over his plate. Everybody was quiet, when a little voice piped out:

"It's all right, mister—the meat's quite fresh."

...Advertising page.

Agricola News

Agricola and Ardrossan played one of their regular soft ball games last Tuesday, the score being in favor of the former.

On Friday night the Wye soft ball boys played against Agricola the score being 23 to 4 in favor of the Wye. The game being well umpired by Mr. Cecil Atkinson.

There was a shower held at Mrs. McConnell's home Saturday afternoon in honor of Miss Ruth Linkman a bride elect of June, in which many lovely gifts were given. The girl present were the Misses. Margie Latann, Helen Latann, Gladys Cummings, Marjorie Cumming, Bernice McConnell, Vera Latann, Olive Latann Naomi Cummings, Gladys Gray, Mary Ottewell, Margaret Ottewell, Anne Bolingbroke, Erna Boger Dorcas Staines, Marion Mallett, Vera Johnston, Kathleen Walker, also Mr. Stetson, Mrs. Linkman.

A very enjoyable time was had by all, which was brought to a close by a very dainty lunch served by the hostess.

Mrs. Andrews spent the week-end at the city visiting her sister and other relatives.

Mr. and Mrs. Cummings spent Sunday at the home of their sons, Messrs. Ernest and Mark Cummings west of Edmonton.

"Things we can't help but notice":—Stanley Walker and Herbert Whitson have each invested in a car.

BRENNER NEWS

The dance held at Brenner on the 24th was a very successful affair, everyone having an enjoyable time.

Brenner and Ardrossan played another one of their league soft ball games on Saturday evening, the score being in favor of Brenner, who has now won two games against Ardrossan.

YPRES VALLEY NEWS

Mr. and Mrs. Bill Pearce and daughter Phillis were Edmonton visitors attending the wedding of Miss Tegwin Thomas to Mr. Cyril France.

Miss Thomas is a sister to Mrs. Pearce.

Mr. and Mrs. Harold Armstrong and daughter Phillyis, were also guests at the wedding.

The Parent-Teacher association monthly meeting will be held on June 12th at 8:30 p.m. in the school here, when Doctor T.W.E. Henry of the Fort will be the guest speaker. All are cordially invited to the meeting.

The baseball and picnic grounds for the season are on the south-east corner of Mr. Fred Davis's quarter.

The ladies aid held their first picnic Saturday evening and in spite of the rainy roads and a chilly evening had a good turnout.

Ypres Valley beat Good Hope 20 to 1 in the last game. Hal Sutton pitched well and 'beleive it or not' so did the ice cream.

Mrs. Bill Pearce was up town Tuesday seeing her mother, Mrs. Thomas away on a trip to Wales.

Hon. Frank S. Grisdale, was sworn in last Saturday as minister of Agriculture in the provincial government and took over the administration of that department on Tuesday.

The new minister stated that, "Practice now in force will be continued and in the hope of enlarging and extending same in the future."

Hon. Geo. Hoadley former minister of Agriculture and Health will continue as minister of health and will take the post of minister of Telephones.

Look at your label. Are you paid up?

Fort Ball Club Wins Second Prize at Lamont Sports

The Fort ball Club stepped out and won 2nd prize mo... at Lamont Sports held under the auspices of the Lamont Curling Club on Monday, June 4th.

Teams from Bruderheim, Lamont, Vegreville, Andrew, Chipman, and Fort Saskatchewan took part in the baseball tournament.

The Fort defeated Chipman 12 to 6 in the opening game of the sports. They twirled effectively for the Fort and was accorded brilliant support by his team-mates both in the field and at the bat.

Bruderheim won the final game of the tournament by a score of 6-3 in the best game of the day.

It was pitchers battle up to the 8th between Armstrong and Pocock. The locals were leading 1-0 at the end of the 7th and Lamont tied it up in the 8th and w... the game. One run out, and one on ba... Bruderheim scored their 2nd run and as Pocock showed signs of weakening, Manager Collins sent Cranston to the mound. Several bad errors were made by the locals before the Bruderheim club was retired with the result that they secured 4 more runs. The final score was 6 to 3.

The Fort ball team defeated Morinville at Morinville Sunday afternoon by a score of 5-7, before a large crowd of ardent ball fans.

The game was featured by a 4 run batting rally by the locals in the 7th inning.

Batteries, Fort, Pocock and Rippel. Morinville, Chevalier and Hagan.

STRAWBERRY SUPPER

The United Church of Gibbons under the auspices of the Ladies Aid will hold their annual Strawberry Supper at Gibbons Community Hall, this Saturday night, June 9th. Concert following.

What About Social Credit, Canada

(Continued from last week)
No. 9

J.—"I don't know. How do we?"

W.—"We don't! The cards are stacked against us. And all business today have to try to beat this insurmountable handicap. If WE succeed it is only at the expense of another producer who goes bankrupt because WE are lucky enough to receive the purchasing power HE has distributed Or else we succeed because by reason of export credits we are able to export the surplus which the home market cannot buy. We will take up this export business later."

J.—"This look pretty hopeless. I can't figure out how industry has kept going."

W.—"I will take that up in a minute. But before going on I want to point out that this is not the whole story of the flaw. There are contributing factors."

J.—"What—more?"

W.—"Yes, consider "saving." Now we are brought up to consider saving as a virtue and while children we have the habit of thriftiness rooted in us. But today saving is a vice. The paradox is that he who does not save is his own enemy but a friend to the community, while the man who saves is certainly benefitting himself by protecting himself, but he is injuring the community by withholding needed purchasing power."

J.—"How do you make that out?"

W.—"Well, we have discussed the question sufficiently for you to have grasped the fact that the only money available to purchase any object is that which is distributed during the production of that object. If part of the money is withheld then part of the production cannot be sold."

J.—"But if a man saves money in order to buy a house—what about that?"

W.—"That's all right if it is eventually spent for something which he is going to consume or use for personal use even if the purchasing power is not available for a long period. But what frequently happens is that the money is invested in some line of production before it has functioned as purchasing power for consumer's goods."

J.—"Well, what is the effect of this?"

W.—"The same situation arises as we saw existed after the houses had been built. There will be a shortage of purchasing power."

J.—"How?"

W.—"Suppose a man is paid a certain sum of money for making hats. Each week he saves $5 out of this amount. At the end of twenty weeks he has $100 which he hands to a farmer for use as liquid capital in his business. The farmer buys supplies with it and his selling price of his product will have to include this $100 of costs. Next, the community has $100 and it could use it either to buy the $100 worth of hats left unsold by reason of the workman's saving, or else it could repay the farmer by purchasing his product. But it cannot buy both the farmer's product and the hats."

J.—"Why not?"

W.—"Because there are $200 of "costs" standing against the community and only $100 in purchasing power."

J.—"But the community could buy the hats and then the hat manufacturer could buy the farmer's product and so the hats would be sold, the hat manufacturer would recover his costs and the farmer would recover his costs also."

J.—"Yes, I suppose you can't."

No. 10

W.—"You have fallen into the same error that has misled many other students. That is the velocity of circulation fallacy You seem to think that if a dollar circulates fast enough it will cause more goods to be consumed. You forget that one dollar will pay only one dollar's worth of costs."

J.—"But I can take a dollar and buy a tie from the Men's Store and the manager can take that dollar and buy some meat from the butchers and the butcher can give the dollar to his wife and she can go to the Ladies Shop and buy herself a pair of stockings. So there are three different lots of goods consumed because one dollar circulated."

W.—"Well, you are still muddled if you think that. The only process in your chain that is better, from the trade standpoint, is the Ladies Shop."

J.—"Why?"

W.—"Because according to your illustration they have the final custody of the dollar which means that they can pay for stockings if they bought them on credit, or if the dollar hasn't been paid for, they can replace them, and in either case retain a certain percentage for profit and turnover. But where is the butcher going to get the money to pay the meat packing house for the meat? Or where is the Men's Store going to get the money to pay the hat manufacturer for the tie?"

J.—"But they may have been paid for already."

W.—"Suppose they were paid for. Is the Men's Store going out of business, and does not your butcher have to buy any more meat?"

If you are a merchant and take money to pay business debts—for the simple reason that you haven't got it.

(To be continued)

Some Suggestions For Summer Use

WOMEN'S GARDEN HATS

—Women's Straw Garden Hats with ribbon band and bound edge.
Special each 35c

MEN'S STRAW HATS

—Men's Straw Hats, variety of shapes and sizes, bound edge.
Special price each 25c

MEN'S INVISIBLE MESH

—Men's 4 Point Invisible Braces, very comfortable for these warm days.
Special per pair 40c

MEN'S COMBINATION UNDERWEAR

—Men's fine quality "Penman" make combination underwear short sleeve, ankle length.
Price Per suit $1.25

MEN'S TWEED CAPS

—Men's reasonable weight caps in assorted tweeds, one piece shapes that are fully lined and well finished.
Special each 95c

BOY'S UNDERWEAR

—Boy's Buttonless combination underwear. Per suit 75c

GLASS FRUIT SETS

—7 Piece fancy Glass Fruit Sets, per set 95c

GLASS WATER SETS

—7 Piece fancy Glass Water Sets, per set $1.25

WHITE SPORT CAPS

—Young Men's White Sport Caps 25c

CHILDREN'S PLAYSUITS

—Sturdy garment in a good variety of colors. Worth several times the money.
To Clear at 49c

DRESSES JUST ARRIVED

—Smart Organdy and Crepe Dresses, cool and dainty.
—Light Voile Dresses and many other kinds. Come in and see them.

PILLOW SLIPS

—Hemmed pillow slips, 42 inch.
Special each 23c

"Fresh from the Gardens"

That "Bought And Paid For" Idea

There is a curious persistence in the idea current in certain parts of Eastern Canada, that the older provinces of Confederation have proprietory interests in the prairie provinces by "rights of purchase".

Just recently, a storm which ranged West against East, broke in the House of Commons at Ottawa, when relief and other considerations claimed by Western Canada were under consideration. During the discussion, the "bought and paid for" mentality was prominently in evidence, according to newspaper despatches. It appears inevitable that, when any expenditure policy which may be construed as exclusively Western, is mooted in the House of Commons, some member from one of the older provinces, impelled by this curious, serene bound to object on the ground that the prairie provinces are not entitled to further consideration—and terms such as "blood-suckers" are applied, indiscriminately and with reckless abandon, to governments and people of the West.

Forgotten in the heat of debate is the amazing part which the West has played in the material advancement of the Dominion. Forgotten, for the time being, is the gigantic contribution which the vitual-growing prairie have made to the wealth of Canada. Forgotten are the tremendous expenditures made, by the Dominion as a whole, for works of a purely local purpose which may be construed as exclusively Western. Forgotten is the fact that made of the resources of the West in the building of great transportation systems of advantage to the whole of Canada. Forgotten is the influence of prairie purchasing power upon the industrial development of the older East. Forgotten, too, is the fact that the West's present needs are due to the dire extremity of many of its people—a condition they certainly did not seek and did nothing to create. The "right of purchase" idea reigns paramount and all others when tempers are frayed and local zeal is in the ascendancy. In one breath it is admitted that the prairie section has contributed more to the wealth of Canada in a specified period than any other component part of the Dominion. In the next, the prairies are branded as "blood-suckers", dranning, as it were, the coffers of Canada which, by implication, apparently are filled solely by the contributions made by the older Eastern provinces.

The idea, of course, has its roots in the historical charter granted by Charles II. of England, in 1670, to the Hudson's Bay Company, which conferred upon that company "rights in the territory tributary to the rivers draining into the Hudson Bay," including property rights and rights of government. These rights the company exercised in the territory known as Rupert's Land for some two hundred years.

When, however, Confederation became an accomplished fact in 1867, the Canadian parliament, pursuant to the great vision of a united Canada stretching from ocean to ocean, initiated negotiations with the Imperial Government at London with a view to acquiring possession of the territory held under that charter by the Hudson's Bay Company. The British Government agreed to the request on condition that the arrangement entered into would not involve expenditure by the Imperial Treasury, and on the further condition that there should be no surrender of territory until the terms had been agreed upon.

Negotiations with the Company ensued for two years, during which time it held out for a cash payment of £300,000 (approximately $1,500,000); no one of the terms under which it was prepared to relinquish its rights in the territory The Canadian Government, then representing the original provinces of the Confederation, borrowed the required cash and the deal was matured in 1904. The money being paid, the Company surrendered its rights under the charter, and Canada stretched one and indivisible from the Atlantic littoral to the Pacific seaboard. That is the story, that the genesis of this "bought and paid for" idea which crops up, over and anon, during debate in the federal parliament.

Obviously, $1,500,000 is a ridiculously small sum against which to assess a claim of proprietory rights of purchase in the entire prairie section of Canada. It is ridiculously small not only in proportion to the wealth produced normally each year in the far-flung wheat field of the West. It is ridiculously small not only in proportion to the consideration made by the Dominion in acquiring the prospective wealth of the Dominion. It is ridiculously small in comparison with the annual contributions made by the Western provinces to the revenues of Canada. That the idea should persist even at all in the face of recent history is incomprehensible to Western minds. That it should be used to justify opposition to present claims of certain sections of the province for aid in their extremity, demonstrates not only the paucity of the objector, but a serious lack of knowledge of the facts. Recent economic experience has proved that, instead of the West holding the West in fee, the reverse is closer to the truth.

Scientists Pay Radio Visit

Dr. Nevil M. Hopkins, of New York University, is the inventor of a new electrical device which he claims will revolutionize the radio broadcasting industry. He calls it the "television" and by use of this instrument a listener-in on a broadcast can, by pressing a button, immediately transmit to the station his reaction to the program being presented.

Pay The Preacher

Pay the preacher who breaks into the room of Kenneth Johnson, University of Colorado graduate student, with revolutionary ideas which he conceived. He said, who aspires to be a one hopper, hangs right student, a black widow spider, and a Gila monster in his chemistry laboratory room at the home of his parents. Johnson studies the best way to make them happy, and reports to the program being presented by running them through mazes.

Fighting Father's Hope

Captain Scott's Son Makes Study Of National History

Twenty-two years ago Captain Scott, one of the greatest English explorers of all time, lay dying in a tent in the Antarctic

The last letter he wrote was to his wife. In spite of their infinite pain Peter "Make the boy interested in natural history if you can," he said. "It is far better than games."

Peter Scott is 24 now. He has fulfilled his father's hope. Recently he opened in Bond street, London, his second exhibition of paintings of wild fowl.

The grey light of dawn is there, we are in the mudflats, the almost-ooze, the ebb of the tide and eerie plaintive noises. The curlew calls, you can hear the piping of wheatear, redshank and stint. Grey geese rise V-shaped into the sky and flight overward to the fresh marshes of Lincolnshire.

It is a world of thrills to the more ordinary. It is a world of exciting delight to the amateur-naturalist, which is what Peter Scott has become.

The ghosts little now as he said recently, but night and day, the winter through, lies in a scraped-out hole in the Wash, or hidden in a punt gun, waiting to catch the floating visitors he has captured in paint.

The Grandchapper Campaigns

Provincial And Federal Organizations Head In With Measure

The Canadian Insect Pest Review for May of the Dominion Entomological Branch in the 1933 summary of the campaigns waged during the year states with reference to grasshoppers that control campaigns involving the use of poisoned bait were actively carried out in most areas, and, despite many difficulties, resulted in the destruction of many millions of grasshoppers and the material saving of crops. In July and August, extensive dispersal flights of grasshoppers occurred from points of the infested region. As a result, practically all of the open prairie land of Manitoba, Saskatchewan and now involved, and the areas of severe infestation have been considerably extended, except in Eastern Manitoba where there was an encouraging reduction. It is expected that during 1934 the outbreak will be even more widespread and destructive than that of 1933, and consequently Provincial and Dominion authorities are organizing a comprehensive campaign to deal with it.

Dredging For Gold

Work To Be Started On Jugoslav-Rumanian Border

Modern miners are to attempt to dredge the River Pek on the Jugoslav-Rumanian border, on the bed of which gold has been collecting for more than 2,000 years. Up this river sailed Jason and his Argonauts from the Black Sea, and the Golden Fleece of their quest may be found between the mountains of the Pek, for the peasants of the Pek River Valley sleep sheepskins in the winter and after a few months pull out the fleece, from the alluvial gold brought down from the mountains by the water having settled in the wool. It was here that the alluvial gold of the gold for his expedition in 320 B.C. Firms of many nations have made bids to supply the dredging machinery and the operations are expected to be extensive.

Dwarfs Holding Congress

Likely To Take Place In Hungary Next Year

Fired by the Nazi doctrine of racial purity, dwarfs of Hungary have formed a National Union of Hungarian Dwarfs, and are joining all the dwarfs of the world to a Dwarf Congress which is to be held, probably in Budapest, next year. Their creed is to "preserve the purity of the dwarf race," to forbid marriage with normally-sized people, and to discourage lower dwarfs from marriage for all they built. Their leader, their Hitler, is said to be 30 inches tall.

The world is with, but there are lots of narrow people in it.

Vaccine For Tuberculosis

New Preparation Being Tested On Cattle In Ireland

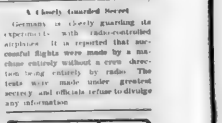
Experiments to find a cure for tuberculosis in cattle continue in various parts of the world. The Spahlinger vaccine of which much was heard two or three years ago is still undergoing tests the most recent of which have been made in Northern Ireland under official auspices. The calves vaccinated with the Spahlinger preparation have survived the injection of heavy doses of tubercle infection and are thriving, while untreated calves have succumbed.

As the United Kingdom is now embarking on a national campaign to clean up bar dairy herds and to eradicate tuberculosis the final results of the Ulster trial seem likely to offer an economical and practicable means of immunising dairy cattle against tuberculosis and gradually ridding the country of a scourge which is costly to public health and farmers.

Islands in a river, unless caused by rock outcrops, are continually travelling downstream as the current, even at the upstream end of the island and deposits at the other end.

A Closely Guarded Secret

Germans is closely guarding its experiments with radio-controlled airplanes. It is reported that successful flights were made by a machine entirely without a crew, the action being entirely by radio. The tests were made under greatest secrecy and officials refuse to divulge any information



Low Price For Planes

British Sells Reconditioned Fighters For Two Hundred Dollars Each

Aeroplanes entirely reconditioned and capable of doing 150 miles an hour, price $200.

The British air ministry has sold many of these aeroplanes at prices ranging down for second-hand cars.

They originally cost $20,000 and were built as fighters, with engines which cost at least $5,000. They are in perfect condition and are almost as airworthy as when new.

There is one which is now on offer for $850, but for the extra $150 you get a spare engine, two spare wings and the all-important certificate of air-worthiness. The engines are of a world-famed make and in tip-top condition

These machines and engines are obtainable at these crazy prices because they have been superseded by later fighting models. While light aeroplanes have been fairly cheap these powerful machines cost so much to run that few private owners can afford to run them.

Cold Friend To Rescue

When Policeman M. Elwood prosecuted John Hill, a grocer, for cruelty to a parrot it made the 101lbs against he had befriended in court. Elwood has been on the London force for 20 years. A lover of horses, he watches for cases of cruelty and brings the offenders before the law.

Ease Pain, Headache in Few Minutes

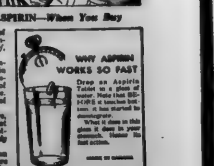
For Quick Relief Say ASPIRIN—When You Buy

Now comes emergency quick relief from headaches, neuralgia, rheumatism, neuralgia . . . the *fastest safe relief, it is said, yet discovered.*

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing spaces of two seconds after touching water. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And then is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet or package



Bayer Not Harm the Heart!

WORLD HAPPENINGS BRIEFLY TOLD

The Straits Settlement legislative council adopted a bill restricting rubber production in conformity with the London agreement

France and Great Britain plan to consider jointly the problem of debts owed to the United States at a meeting of envoys in Geneva.

Forty aborigines and whites have perished in Western Australia, victims of a mysterious disease, the Daily Herald's Australian correspondent has cabled.

Hints are heard that a new move would be made to get Germany back into the tottering world disarmament conference. The move was said to receive around the United States

The body of Sam Rohna, Porto mouth penitentiary convict who died suddenly of a heart condition, has been claimed by his widow and has been sent to Brooklyn, N Y

Half a million pickerel fry were deposited recently in the Moose Jaw river at the Wild Animal park by officials of the department of natural resources.

Definite adoption of a peculiar attitude and committal of the organization of public opinion in the interests of peace were made at Toronto at the conference of the Association of Canada Clubs.

Birth of five daughters to Mrs Olive Dionne, Callander, Ont., is the first quintuple birth in Canada. So far as he knows, Dr. F. C. Hoshy, general secretary of the Canadian Medical Society, said.

The shipments of livestock from Western to Eastern Canada during the first 11 months of 1934 totalled (latter figures within brackets) were: Cattle, 39,267 (13,136); calves, 104 (19); hogs, 20,000 (114,903); and sheep, 66,532 (32,965).

Little Journeys In Science

SPONTANEOUS COMBUSTION

(By Gordon H. Grant, M.A.)

Combustion of a fuel has been shown to be the rapid chemical combination of the material with oxygen, accompanied by the production of heat and light

The temperature to which a substance must be heated before it will burn is known as the ignition or kindling temperature We know that paper and wood will ignite more easily than coal. When we use a match to light a fire, we rub the match head until friction has heated it to its kindling temperature, and the top burns. The heat of the burning top raises the temperature of the stem to its kindling temperature and so the process continues until the wood or coal reaches its kindling temperature, and burns. As long as a substance is cooler than its kindling temperature, it cannot burn

Sometimes we have a slow combining of oxygen with a substance which develops into active burning, and this is known as spontaneous combustion. Experience has shown that a given weight of material, for example iron, in combining with oxygen to form rust (hydrated iron) will give off the same total amount of heat whether the union proceeds rapidly or slowly The combining goes on slowly and the heat goes off, little rise in temperature will be observed But if the material is a good conductor of heat, we find that the heat accumulates until the kindling temperature is reached and burning commences. Only a situation often arises when rags soaked with the oils used in making paint (linseed oil and turpentine) are left lying about, instead of being placed in a metal can, or, better still, burned. These oils, in "drying" combine with oxygen from the air, and turn into a tough rosin-like material. Rags being poor conductors, the heat developed finally sets the mass on fire Fires in coal bunkers and hay stacks arise from the same cause slow combination with oxygen, and the accumulation of the resulting heat until the kindling temperature is reached. The best-recorded caravan fire of this kind has been known to take fire spontaneously due to the union of oxygen with fat.

To Visit Australia

Duke Of Gloucester To Make Extended Tour In September

The British government has announced that the Duke of Gloucester will sail for Australia in September aboard the H.M.S. Sussex and will spend four days at Colombo, Ceylon, and a week each at Perth, Fremantle, Australia, where he is due October 5.

He will arrive at Melbourne, Victoria, two days later and will open officially the centenary celebration of the state of Victoria.

The battleship Highstreet will sail December 10 from Brisbane, Queensland, going home via New Zealand and the Panama canal, arriving at Portsmouth December 13. He will leave that Dominion at the end of January and proceed via Bay of Islands for duty and joining

He will visit Fiji, Western Samoa, and through the Panama canal and possibly touch Jamaica en route to England.

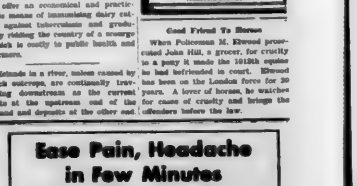
The Duke of Gloucester, the king's third son, will go to Australia instead of his younger brother, Prince George, who visited South Africa in the spring.

Advice From That

Newspaper Tells Wood How To Succeed Good Woman

That's only newspaper, which comes out once a month, knows just what is the matter with the western world. It is called The Mirror of Events in Every Corner of the Globe. It asserts that the economic crisis has been caused by wheels. Its own machines "enable two men to do the work of 20,000." Unemployment means no money and lack of money kills trade, the argument runs. The western world is warned that it must suppress wheels before it can have better times.

The channel of the ancient Hwang river runs under the sea for many miles, showing that the land was once above the sea.



DENICOTEA Cigarette Holder absorbs the nicotine, prevents stomach and nervous and tong unknown found in tobacco smoke.

Celebrates Centenary

Sportsmen Started Bowling Club In France Hundred Years Ago

Organized horseracing, in France is just one hundred years old, and so is bowling, according to a special race called the Centenary Prize was run.

The society came into being in November, 1833, as a result of a modest storm over Paris which drove a number of sportsmen into a cafe at the Palais Royal. While waiting for the weather to clear up, they discussed racing, and there and then decided to form a racing society. The president was Lord Henry Seymour, about whom plays, films, and novels have been written. The first secretary was Mr. Thomas Bryon, an Englishman, who owned a Paris shoeing gallery The first race-meeting was held on the Champ de Mars, Paris, on May 4, 1834.

Below London is a natural underground reservoir of water stretching about 30 miles north and south of the city and the same distance east and west.

The United States is represented in 35 foreign countries by ambassadors.

SUNDAY SCHOOL LESSON

JUNE 10

JESUS ON THE CROSS

Golden Text "Looking unto Jesus the author and perfecter of our faith, who for the joy that was set before Him endured the cross, despising the shame and hath sat down at the right hand of the throne of God." Hebrews 12 2

Lesson Matthew 27 1-66.

Devotional Reading Psalm 22 1-8, 14-19, 27, 31

Explanations And Comments

The Crucifixion, verses 32-36. They led Jesus away to be crucified, going outside the city limits, as was the custom (Acts 7:58), to a hill called Golgotha, whose name means "the place of the skull." We call the place Calvary, from the Latin word calvaria, a skull. There they offered him wine mingled with gall, a narcotic, for it was a merciful practice to give a stupefying drink to one about to be crucified This charitable office, Alfred Edersheim tells us, was performed at the cost of an association of women in Jerusalem. Jesus tasted but would not drink. Jesus declined it not because the endurance of physical suffering was needful to the efficacy of his sacrifice, not because he had a sentimental repugnance to dying in a state of stupefaction (compare Dr Johnson: "I will take no more physic, nor even my opiates, for I have prayed that I may render my soul up to God unclouded"), but because he still had work to do If it was with the purpose (Luke 22 28-43) and Mary (John 19:26, 27) that he declined it. Then they crucified him. The fashionable thing in that the crime was not committed by criminals. It was not the underworld that crucified Christ It was the world of decency and that deadened his death. Nor was that world to be dismissed as harmless or ennobled or absent of command On the contrary, it represented the highest civilization of its time planet, and the civilization included a government, an army, a religion, a church, science, religion, arts, education and pleasure It was a world of Roman law, of Greek culture, and of Jewish faith. This is the mystery of iniquity that we have to explain. (P. Whitwell Wilson)

The Tenets of Spectators, verses 37-44. The crucifixion was near the public road leading to Jerusalem, and the passers-by mocked and gibed, shaking their heads in the direction of the cross as if to say, come on you greeks, "That is what it has come to!"

Darkness Without and Within, verses 45-49 From twelve noon till three in the afternoon there was darkness over the land. What was it? Who shall say? There was an earthquake and an eclipse, but there it was a sympathetic response of nature, say others.

Eli, Eli, verse 50 Yet again Jesus cried with a loud voice, (Luke 23 46 records the words) "Father, I to thy hands I commend my spirit"), and yielded up his spirit. Immediately my heart sings a new song

'O Jesus, Lord! 'tis joy to know Thy path is o'er and mine and true.

For us no mockly trod.'

Eternity cannot suffice for the unfolding of the mystery of the cross. "Behold the Lamb of God, that taketh away the sin of the world."

Produced In Dominion

Canadian National To Feature Home Grown Foods On Diner

Distinctive Canadian foodstuffs and dainties in their proper season will be a feature of the table d'hote menu service on the trans-continental trains of the Canadian National Railways, commencing with the addition of a dining car service on these trains stated W. W. Swinden, general superintendent of sleeping, dining and parlor car services on the National system. Sea foods from the Maritime provinces; meats, including the famous Ontario spring lamb; fresh from Lake Winnipeg; fresh goldeyes, and fruits from the Maritimes, Quebec and Ontario, and the famed Okanagan valley of British Columbia will all be featured in these plate service meals at appropriate seasons.

Tourists from the United States when they board our trains at border points and visit the dining car will find fresh broiled lobsters, smelts, baby mackerel and other favored sea foods, along with potatoes from Prince Edward Island, apples from Nova Scotia and blueberries from the Maritime provinces, all with places of honor on the menu when these foods are at their finest" said Mr. Swinden.

The famous Hoegaan nows agency, "Tasker" started business some 30 years ago with a pigeon post service.

Agricultural Notes

Many Items Of Interest To The Western Farmer

The average annual loss in the Prairie Provinces through cereal rust is estimated at $25,000,000

Comparing Reward Marquis, and Garnet wheats as to protein content, Reward stands highest Marquis second and Garnet third Dominion Division of Chemistry

To produce an acre of tungsten in the soil Dominion Experimental Farms in Eastern Canada (1923-33) required 127 4 hours of manual labour and 7 6 hours of horse labour

The total resources of spruce throughout Canada are estimated at 500,000,000 cords which, if turned into paper would have a value of $26,000,000,000.

The application of lime materials in the form of finely-divided powder will keep the Canadian farmer busy who thever makes, lime, and other materials on plants to protect them from the ravages of insects.

As a source of nitrogen in a fertiliser mixture for tobacco, soybean meal was found to be equal, if not superior to cottonseed meal in recent test at the Dominion Experimental Farm at Harrow, Ont.

As the result of a questionnaire from representative farmers in Eastern Canada it was found that the average annual cost of operating a motor lawnmower was $2.26 per acre of cultivated land.

For more economical production of crops in Eastern Canada, larger stand farms, or a greater area of land under cultivation, would seem to be necessary—Dominion Department of Agriculture bulletin on farm crop costs.

Authorities who have worked specially on the iodine content of vegetables are united in the occurrence of goitre have stated that in districts in the Western United States, in which the iodine content of the water is below 0.5 parts per billion, goitre is likely to be quite prevalent

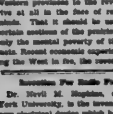
The original Red Rose selections of spring wheat, as developed by Seager Wheeler, Rosthern, Saskatchewan, and re-selected by him, yielded two outstanding forms to which he gave the names Early Triumph and Supremo. In general appearance these two forms are very much alike

The value of information given by the Dominion Department of Agriculture respecting the composition and nutritive value of the various foods and many being realized. When put into practice this information leads to a lowering in cost of production of all animal products on the farm, milk, beef, pork, eggs, etc.

One acre contains 160 square rods, 4,840 square yards, or 43,560 square feet. If the length and width of any field be known, the required width and length to enclose an acre may be found by dividing the square distance in feet into the number of square feet in an acre. The length of a side of a square acre is 208.71 feet.

In the Prairie provinces much interest has been shown in the use of triple superphosphate and ammonium phosphate as a means of increasing crop yields. As yet, the data obtained in this work are insufficient to make any definite pronouncement, but it would appear that under favourable conditions nitrogenous and phosphatic fertilizers, more particularly the latter, may be used to advantage to increase the yields of grain in certain sections of the Prairie provinces.—Dominion Division of Chemistry.

Household Drudgery Is The Bane of a Woman's Life



Women who are tired and run down will find in Milburn's H. & H. Pills a remedy to strengthen the nerves and tone the whole system.

Power From The Clouds

Hope To Obtain Electrical Energy From Lightning

Studies of the various phases of lightning and thunderbolts have been undertaken by Dr. R. F. J. Schonland, director of research for the Institute of Electrical Engineers, at Johannesburg, South Africa, with hopes that knowledge of the mechanism and nature of thunderbolts may enable man to utilize at least part of the tremendous electrical energy being constantly built up in the clouds and discharged to the earth

A bee has been found to travel 69,776 miles in gathering one pound of honey.

The British Imperial Policy Has Been One Of Greatest Factors For Maintaining World Peace

The British Empire had not fol-
lowed a "policy of desire" in interna-
tional affairs before the war, Prime
Minister R. B. Bennett answered in-
directly when he opened a meeting of the League of Na-
tions Society in Canada, at Ottawa.
His policy had been one of peace all
along the years of the world and the
solidarity of the Empire. He believ-
ed that the British Empire had been
one of the greatest factors for peace
and he expressed the view that under
present conditions a "League of
Amity" might be set up of the United
States and the nations flying the
British flag would be a tremendous
factor for peace.

The prime minister spoke briefly
at a luncheon of the society address-
ed by Harold Reid, secretary of the
Canadian Institute of International
Affairs. Speaking on "A Foreign
Policy for Canada," Mr. Reid assert-
ed that "it is about time that we
stopped talking about what Great
Britain, or France, or the United
States should do." Citizens of Can-
ada could see the direct influence
over only one government. That was
the government at Canada.

He expressed the belief that the
League of Nations had not dealt with
basic reasons for disputes, and that
it had allowed itself to become "an
instrument in enforced peace
against the protestant powers." Thus
it was that powers like Japan, Ger-
many and Russia were withdrawing
their active support from the League.

In looking over world conditions,
Mr. Reid painted a dark picture. "It
is as if the disarmament conferen-
ces were going to end, not in a long
but in a whimper." The world was
going at the pace of the machine-
ry which it had set up to prevent
war.

Senator A. D. McRae, who moved
in the senate that Canada withdraw
from the League of Nations, was to
be congratulated on the fact that
he refused to adopt a policy of drift,
Mr. Reid said. But, if Canada with-
drew from the League, could Great
Britain also withdraw, and if she did
would it exempt her from being
drawn into European wars, said fa-
cility. If Great Britain was drawn in-
to another first class war could
Canada stay out. The only choice for
Canada, in the event of Great Britain
being drawn into another war, de-
pended to be between joining her and
secession from the Empire.

If Canada descended from the British
Empire, Mr. Reid suggested that the
country would be dependent on the
United States for defence. The Do-
minion might eventually become a
protectorate of the republic.

But was the world situation hope-
less so far as maintaining peace was
concerned." There were steps to be
taken which could help, and Canada
should be ready to do her share.
The Dominion and Mr. Reid must
be willing to make necessary sacri-
fices. Territory might, for in-
stance, repeal the provisions of the
Chinese immigration Act and enter
into an agreement like that with
Japan under which 100 Chinese
should be admitted every year. Can-
ada might be willing to accept the
mandatory principle in respect of
British possessions thus enriching
the tarif preference at present pre-
vailing. The Dominion should be
ready to do her part.

Mr. Bennett opened his remarks by
saying that he was minister of ex-
ternal affairs of Canada because of
a mistake and not by choice. This
statement featured that the prime
minister must also be minister of
external affairs. He mentioned that
because some people opposed to
which he had advocated the Govern-
ment to blame. He had not done so.

He thought that Mr. Reid had
offered a valued indictment of the
League of Nations. It must be re-
membered that the world was con-
fronted with conditions and not
theories. There was a very consider-
able body in the House of Commons
and outside which felt that the ex-
penditure of Canada on the League
of Nations was out of proportion to
the benefits received. He was not one
of those, said Mr. Bennett, because
he realized that it amounted to only
about the cost of two days of the last
war.

The policy followed in the British
Empire was one of maintaining the
peace of the world and the solidarity
of the Empire. He believed that the
British Empire had been a great
factor for peace. He warned the
audience that the world moved slow-
ly, but it progressed. The progress
he believed, had been slow and
steady.

Australia's "Lady Fellow"

Dominion Puts Women On Senate—Sir Hugh Dan Leased

For five stallings a week nurse and
a lump payment of about $600 for
improvements, the Australian gov-
ernment has found a "confirmed bil-
ler," otherwise its $192,000 domain-
stration farm at Belchester The
"confirmed bachelor" farm of 1,140
acres is the home of the bachelors and the
farmyard of 45 square miles of ter-
ritory adjoining. The farm was
established in 1912 and was a com-
plete failure in most respects. Finely
pedigreed stock were killed by pests
or bogged in the wet season; the
sheep were killed by great seeds, and
dairy cattle died of heat or were
killed by rustlers. Then the
bachelor machinery deals and
burns, and the soil proved a disap-
pointment.

Now the farm is a model of
tropical fruits flourished with irriga-
tion. The purchaser, J. Gaden, sold
the farm to pasture his horses
in his old manor.

Boosts Her Appointee

C. R. Chadfield, a scientist in Eng-
land, is the inventor of a death ray
apparatus that is capable of pro-
ducing a high frequency electrical
oscillation of 200,000,000 cycles be-
tween two copper plates. Actual ex-
periments have shown that insects,
mice and flies are killed on
contact with the ray were killed in-
stantly without so much as leaving
a mark of violence on their bodies.

Necessary To Take Steps To End Causes Which Are At Root Of World Wheat Problem

Rather Bad Information

Proper Statistics Needed To Determine Number Of Trees Required For Shelter Belts

In the sentence given by the Do-
minion Department of Agriculture to
prairie farmers in planting tree shel-
ter belts, it has been found that ap-
plicants living at a distance or where
an inspector has been unable to make
a visit have not given sufficient or
clear enough information to enable
the Forest Service to figure out the
required number of trees. In many
instances the full length and breadth
of the land prepared for planting the
shelter belts have not been given, and
the position and distance of the
permanent buildings from the pro-
posed belt have been frequently
omitted. To rectify this, a short
circular has been issued on how to
make a sketch of the proposed shel-
ter belt by the superintendent of the
Forest Nursery Station, Indian Head
Sask. It is important when an ap-
plicant sends a rough sketch to the
station at Indian Head or to the
station at Sutherland, Sask., that the
measurements must be shown, both
length and breadth, of all ground
ready for planting, also the distance
between the inside of the proposed
belt and any permanent buildings
that may be on the farm, such as
plantations or belts of trees. The
measurements should be given in
yards, not in rods or feet.

Plan If Tag Not Removed

Umbrella insers in London are no
longer trailing around to lost prop-
erty offices and departments in
search of the missing article Some-
one had a big idea and it is work-
ing smoothly. The umbrella owner
receives a card telling the lost has
been found All that he has to do
to obtain his service in the fastest
an address slip to the umbrella.

George Washington was not a
signer of the Declaration of Inde-
pendence.

Below the world demand, the
geographical distribution of the
world's wheat crop was largely de-
termined by costs of production. As
a result of mechanization and big-
scale production, costs had been
substantially reduced, especially in
the United States, Canada, Argentina
and Australia. Since 1930, however,
the cost factor has been increasingly
disregarded. By means of tariffs
and subsidies, total production in ex-
porting countries (and above all in
the European importing countries)
was increased from an average of
1,650 million bushels during 1927-30
to 1,895 million bushels in 1933. Dur-
ing the same period the crop of the
exporting countries, including the
U.S.S.R. was reduced from 2,500
million bushels But curtailment was
not drastic enough to prevent an
enormous accumulation of stocks in
exporting countries and a collapse
of free-marketing price

There is large-scale geographical re-
distribution of the world's wheat
crop could only be carried out at the
expense of producers in exporting
countries, and especially in the ex-
porting countries. An improvement
in the demand of importing coun-
tries is bound to affect only the main-
tenance of prices at a level far above
free market quotations In an ab-
solute sense, the only countries for
wheat growers in exporting coun-
tries, governments resorted to cur-
rency depreciation and subsidies, as,
for example, in the United States.
In fact, the greater part of the
world's wheat crop is now being sub-
sidized in one way or another, both
in exporting and importing countries
at the expense of their respective
taxpayers.

This state of affairs, which defies
adequate description, is calculated
to fill the rational observer with
horror. In less or in fatten condi-
tions, but the large numbers of
undernourished and even starving
people in the world give the farce a
tragic twist. It is earnestly to be
hoped that the Advisory Committee
will at last face the real wheat prob-
lem and take steps to solve it
speedily. The responsible authori-
ties of the importing countries must
realize that unless they are willing
to accept the wheat of the export-
ing countries they cannot hope to
sell their manufactures abroad.
Similarly the governments of some
of the exporting countries should
themselves a reduction in their hostile
on imports of manufactures but
they be held responsible for the
ruin of a large proportion of their
agricultural community. Tackled on
these lines, the wheat problem is not
impossible of solution The future of
the great wheat-growing countries
seems assured in years to come, since
the present wave of economic in-
sanity will no doubt pass; but the
urgency of the problem knows no
delay The Economist

Green Candling Light

Found Most Suitable And Fits Tree In Investigation

The Dominion Department of Agri-
culture, recognizing the importance
of standardizing egg candling equip-
ment in Canada, initiated investiga-
tions as to the most suitable light
for that purpose, and, as an out-
come of research by the National
Research Council, a green glass filter
has been evolved. Within recent
months this use of a green light has
gained considerable popularity in the
Dominion. Many commercial egg
have adopted it in their candling
rooms, and green light candling ap-
pliances are being used extensively
by departmental officials. The ideal
light, it is stated, would be blue, be-
cause blue does not contain any of
the yolk color of the egg. However,
the human eye is not very sensitive
to blue and the first reason blue is
an undesirable color for candling
purposes.

A procedure, which resembles a
giant seed of a maple tree, and
which will permit most planes to
drop packages for low altitudes, has
been invented.

OCCASIONAL WIFE

By
RUTH ALEXANDER WEBSTER

Author of "Josetta", "Lipstick Girl" Etc

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry after deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling artist trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She has had to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another artist who is trying to win the Peter Bivins Todd, Peter's model, and Dee Mateen, the former room-mate with whom he has quarrelled. After a big party at an exclusive club where the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio Avis Worth calls and persuades Peter to accept a job which she controls and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artists and public men

(Now Go On With The Story)

CHAPTER XLVI.

Avis was in her element, the fig-
ure of attention in the small room
filled with guests, eager to see Peter's
entry for the exhibit. Peter stood
beside her, handsome and debonair,
happy that his work was finished
and well done. Camilla was a spec-
tator in fact she stood like Hamlet
from the centre of interest, which
bothered her considerably.

Avis spoke brilliantly, impressive-
ly; of her pride in Peter and his
work, her hopes for his success, and
touchstoned for the good wishes of
these friends of his who were hon-
ored to be present at the christening
of his first great work.

Camilla's eyes traveled from her
illumined face to the modeled group
in the window above which had been
Peter's first gift to her. Nothing he
ever might produce could be more
precious to her, and she doubted if
anything could be much better. She
actually believed that it was a bet-
ter piece of work than the new "in-
spiration," but considered that lat-
ter would probably qualify better as
an exhibit entry. Peter had caught
the spirit of the thing so admirably
in that group, perhaps because it has
been inspired by his new love for
her and her staunch defense of his
sincerity.

Avis concluded, "And it has been
my great privilege and honor to give
the name to the marvelous piece of
art, which I have called 'Inspira-
tion'" With a dramatic gesture she
drew the veil from the figure and
stood aside. Ellicott commissioned
and compliments. Peter acknowledged
by the obsilient guests Even the
title was praised, pronounced perfect
by flattering critics who gave little
thought either to its appropriateness or
originality

Avis thought and drew approbation
like a magnet. It might not be on-
ceive, but it served her purpose of
the moment. Platitudes and trite
phrases puttered about like bab-
bles and melted as inconsequentially.
No one cared particularly
about the merits of the completed
figure, the pertinence of its title or
the success of its creator They were
much more interested in the way in
which this occasion afforded them
and the liquid refreshments which
overflowed from the bull

There was no time lost when they
arrived here. Cocktails were poured
immediately Toasts were drunk to
the sculptor and to his work, to his
success, to the one who had named
the statue, to every possible subject
very important and to those not so
as the veil which had shrouded the
figure and was cast aside. She had
inspected it with a critical eye, and
so do the work, shielded him from
obligations to her, bumped his
heads, forgiven him harsh and un-
just words, sacrificed her personal
happiness and this was her reward.

Avis had intruded where she had
not been with her assumption and
Peter's favor, usurped the privi-
leges of another and now shared
Peter's momentary triumph as if she
had been to him.

It was Avis with whom he danced
first, out of duty and gratitude. Avis
who had been his partner when he
and discovered any number of rea-
sons to prevent his dancing with the
bride.

Though the rooms were compara-
tively small, Camilla was not near
enough even to speak to him for
the next hour. Whenever she caught
that his obsequious attentions to
Avis did not appear to be at all re-
buffed. She chided herself for her
jealousy and tried to be gay.

When she finally did speak to
Peter, desirous of one dance with
him, he begged her to wait for the
next one, which Avis had claimed
and crowded in here to dance. I've
had enough of it, Cindi! I'm tired,
anyway. Jimmy Terry, take my wife,
she wants to dance."

Terry was most obliging, while he
made a few calculations of his own.
Give the Amoma another year, and
he would have another chance to win
Camilla. But he said casually, "Peter
has done the finest work he has
done at the grind all summer. It
would have been more consistent of
him to let Avis rest instead of giving
this party. I should think it would
have been better to wait to celebrate
when the prize is awarded."

"But Peter may not win, then she
couldn't give a party," Camilla de-
fended her, her effect.

"That's logical. Well, say party that
gives me a chance to dance with you
is okay, anyway. And do we enjoy
you in the crowd? I'm not the only
one who does, but I'm at the top of
the list."

She laughed with indifference. "It
is nice to be missed, but I am much
happier now than I ever was, much
as I like you all."

"Sure about that?" quizzically.

"Why, of course."

"And what will you do if Peter
goes to Paris?"

"I'll wait to decide that when he
goes," she laughed, "but I shan't
have much time for gayety, I'm sure.
I shall be very busy with my own
work.

Just then Peter claimed by with
Avis, ostensibly enjoying himself.
His head was inclined close to Avis'
ear, intent upon what she was say-
ing. He laughed, and their eyes met
with an intimate air of understand-
ing.

Camilla's heart stood still for a
moment, and she felt like a wax fig-
ure moving about the room propelled
by Terry's arm. He said something
that she did not hear.

"I'm sorry," she apologized.

"I said, how is your work going?"

"Oh, splendidly."

"What do you do, anyway? I know
you work for an advertising agency,
but what do you do?"

"Just ad copy," evasively.

"Like it?"

"Immensely."

She was beside Peter again for a
moment, but his eyes watched some-
one across the room. It was Avis,
who was cloth of silver modeled to
figure as if she were a second
coat in metal. Camilla ventured,
"Avis looks lovely, doesn't she?"

He nodded quickly. "I thought
his game back to her as if he were
seeing her for the first time "Why
didn't you get a new dress for the
party?" His tone criticized her blunder
lack of last season

"Why, I didn't think it was an im-
portant function. I haven't had much
time for shopping."

"So you don't think the celebration
of the finish of my first real work is
important?" He looked at her coldly.

"Oh, of course- I didn't mean it
that way, dear. It's the party that
I'm unimportant," she called into his
eyes, but there was no response. He
seemed to be pre-occupied, lighting a
cigarette.

Avis hurried up to him "Give it
to me," she requested "I haven't
time to light one. And come in the
other room with me, I want you to
have something to tell you that I
just heard from Uncle John about
the exhibit in Boston please." She
smiled, with manifest sweetness, at
Camilla, and took his arm possess-
ively. Peter looked down at the ciga-
rette from his hand, then at the
cigarette.

The room beyond for Camilla,
blurred slightly It met to the host,
or the portion of a crystal she had
drunk she must get outside With-
out a single backward look Peter
followed Avis into the other room.

Camilla stood for a moment, dazed,
with manifest sweetness, at
Camilla, and took his arm possess-
ively. Peter looked down at the ciga-
rette from his hand, then at the
cigarette.

The room beyond for Camilla,
blurred slightly It met to the host,
or the portion of a crystal she had
drunk she must get outside With-
out a single backward look Peter
followed Avis into the other room.

Camilla stood for a moment, dazed,
glanced about her and quietly opened
the door into Peter's studio.

She would not be missed if she
went in here for a while, where it
was cool and dark and she might
think. Her head ached terribly, a
aching lump in her throat which
threatened to choke her. She could
not imagine what was the matter
with Peter tonight. He was not him-
self and she wouldn't let herself be
angry with him. She only wanted to
be alone for a while to adjust her-
self and somehow let the evening
pass. After that, everything would
be all right again.

Peter was only tired and anxious
and balked with an exaggerated sense
of obligation to Avis, who had made
his success possible and done a great
deal for him. He would see every-
thing straight again after the ex-
citement was over and they had had
a little time together.

She closed the door and crossed
the room to the curtained bank of
window, where the immigrant group
made a sharp silhouette against the
dim light outside She would not
turn on the lights and attract at-
tention from across the hall. With
her aching head pressed on her hand,
she began to plan for the week
ahead all the time she could give to
Peter. She would take care of him
and let him rest and relax.

There were sounds at the door and
it opened presently. Camilla looked
up quickly Avis was whispering to
Peter, who answered her in the
square of light from the hall. Camilla
rose from her chair instantly, not
trying to overhear what Avis was
saying, and just as Peter rushed
over and turned on the lamp near
the door

and the light illumined the room.

Too Much Uric Acid

is a very common cause of Rheumatism, Sciatica, Lumbago. Prompt relief and allow an overwork amount of uric acid to accumulate. Take Gin Pills as give relief while they are undoing your sickness or function normally.

Jumpy Nerves

Yield to the soothing action of this medicine. You will say bonor . . . sleep honor . . . feel honor . . . look honor. Life will seem worth living again. Don't delay one longer. Begin taking it today.

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never
fear embarrassment. Your false teeth
stick all day long when you sprinkle
on Dr. Wernet's Powder (they fit
snugly comfortably they can't slip.
Prescribed by world's leading dentists
—they know it's the best! Costs but
little—any druggist has it.

Canadian Stamps Auctioned

Exceedingly Rare Specimens Sold For Seven Thousand Dollars

Seven thousand dollars for a little
piece of gummed paper, to-
gether less than two inches square.
That is what happened at a mee-
room in Bond St. W., London, re-
cently.

True, the little piece of paper was
dignified by the name of stamps.
They were two of the 1851 issue of
Canada, valued 36 cents ,and bearing
a charming portrait of Queen Vic-
toria in her early womanhood.

These stamps, described as "superb
in every respect and exceedingly
rare," were the centre in the collection
of Mr. Hale Arthur Hind, of the
United States.

The reasons of the collection
brought together specimens
from all parts of the world, and in
the saleroom were people whose
names are familiar wherever stamp
collecting is discussed- Messrs. Stan-
ley Gibbons, F. H. Smith, T. Allen,
H. Roberts, L. Ansone, H. Nissen, L.
Hind, Jennings.

Experienced men of the world
though they are, and doubtless not-
ed for their coolness, they could
were as excited as a pack of school-
boys about the treasures displayed
before their eyes.

Blissful lovely That for a
block of four Newfoundland stamps
started at $1,250, and rose to double
that.

Then there was what was describ-
ed as "an immaculate pair" of cold
Seven Cents issue, used on
an envelope to India with a yellow
green. This fetched $2,300, but a
pessimist expert said afterwards
that the colour was wrong. Others
elder themselves robbed if they were
asked $2,500 for this lot, because
there is hardly any doubt that an-
other such pair does not exist in the
world "

THE RHYMING OPTIMIST

By Aline Michaelis

CHIMING CLOCK

Have you lived where a clock strikes
the hours
So long you no more heard its chime?
Have you listened to melody marching
The companionate passage of time
Till it creeps, all unheard, past your
hearing,
No more noted than heart-beat or
breath.
Yet its music is part of your being,
Its silence is part of your death?

For, though its notes dwindle, un-
heeded,
Yet if one day the chiming should
cease,
A sudden unrest would besiege you,
And would subtly shatter your peace.
Have you lived where a clock
chimes the hours
So long you no more heard it strike?
Then you know you can scarce, al-
though dimly,
What my living with you has been
like!

Moving Reindeer By Motor

Seven Being Taken From Sweden To French Pyrenees

Seven reindeer are being trans-
ferred from Sweden to the French
Pyrenees, and it is expected that they
will not reach their destination un-
til summer They are in charge of
two Swedes and a Lapp, who will
care for them after their arrival
until the experiment of transplant-
ing is completed The journey is
being made in a motor truck, and
short stops are made on the way to
accustom the animals to the changes
of climate How they will thrive
in the land of static summer nights
instead of the silvery twilight of
Sweden, is a conjecture Reindeer
once lived in the French Pyrenees,
and the experiment is to get them to
settle there and multiply. A similar
trial was made some years ago, but
the long trip was made by boat and
train, and the animals died

"PERSONS NOT FAT LIVE LONGEST"

Eminent Physician Declares

In a recent lecture before the
American Academy of Medicine, a
prominent physician stated that
persons who aren't fat live the long-
est.

Clearness sense confirms this asser-
tion: companies often reject over-
weight folks, or charge higher pre-
miums on account of the risk. Fat
crowds and weakens body organs —
it slows you down and puts unnec-
essary strain on the heart. A host
of ailments (even rheumatism, acid-
ity, shortness of breath and insomn-
ia) are often associated with fat.

So get rid of this dangerous, un-
healthy fat. There's no reason why
you shouldn't, when science has given
you this safe, effective treatment—
a half teaspoonful of Kruschen Salts
in a glass of hot water first thing
every morning.

The health-aid "little daily dose" of
Kruschen keeps the system free from
harmful toxins; it helps to re-establ-
ish normal and proper body func-
tioning: it keeps you feeling fine and
fit 'all the time. Energetic activity
takes the place of sluggish indolence
and while you lose excess fat gradu-
ally and without discomfort.

Little Helps For This Week

"Let Him do to me as seemeth
good unto Him." 2 Samuel 15: 26.

To have each day the thing I
wish.
Lord that seems best to me
That will to have the thing I wish.
Lord, that seems best to Thee
Best truly then Thy will is done
When those I love O Lord are one
Thy servant, prepared for all things,
for I desire not to live unto myself
but unto Thee. And O God I would do
it worthily and perfectly.—Kemps.

Using Small Potatoes

English Firm Proposes To Make Substitute For Flour

A company is being formed at Ely,
England, for the manufacture of
farina and dextrine from potatoes.
In the past one of the problems of
the potato grower has been to find a
market for his undersized vegetables,
or "small." This new factory pro-
poses to utilize them. They will
convert the potatoes over a 1 inch
riddle

The new industry will consume 70,-
000 tons of the year's crop, and
after two years will materially in-
crease that figure. Farina, during
the war, was used as a substitute for
flour It is still extensively used in
the manufacture of foodstuffs

WILL PUBLISH COMIC CARTOON EACH WEEK

Arrangements have recently been made whereby The Record will carry two new features not carried by any other newspaper in this district. Each week there will appear a five column cartoon strip "Adam Zapple" by Jack Bonar, and a short weekly feature "Comic Sense Philosophy".

The five-column cartoon strip is equal to any "Tuesday" appearing in leading papers. Each strip carries a punch and is complete in itself.

Specials for June

Large size Bill of Magnesia Tooth Paste and a guaranteed Ebonite Tooth Brush both for 50c

50c Jamaica Fine Lotion and Jamaica Shaving Cream the two for 75c

$1.25 Shaving Brush and 50c size Shaving Cream. Rotex special. The two for 99c

Vial of Bonin perfume FREE with each purchase of Bonin Face powder. The two for $1.00

Smith's Drug Store

Keeping up Quality

The reputation of Canada stands as the standards of the world is due to the efforts of western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unremitting efforts to keep up the quality of its service to farmers in handling their grain and furnishing them with farm supplies.

LOCAL NEWS

Provincial Scouts will endeavor to have all citizens fly flags on July 1st, in recognition of the birth of Canadian Confederation.

Scouts in the province will have a supply of flags and a canvass will be made with the idea of having a flag on every home and public building.

A four dramatized presentation of "Gentlemen Prefer Beef", will be shown under the auspices of The Fort Hardware Co., in the local theatres on Friday afternoon, June 8th.

Scores of questions of interest to any housewife will be answered and all are cordially invited to attend.

Many excellent ways of cooking meats will be demonstrated in picture form. This should attract considerable interest amongst the ladies in the house.

Coming to Edmonton from the South with a great reputation, the Yukon "Stomper" will play a three piece orchestra Saturday evening against the "Grads" for the basketball crown of the world and the Underwood trophy.

The visitors have a nudge on the Grads in weight and height, which may mean a lot, but they will find before the series are over that it takes more than brawn to defeat the present Grad machine.

It will be a great series!

Several hundred trees and Fine saddlings have been transplanted in the Fort's new park during spring.

These trees were obtained over a hundred miles from here and are the the results of many hard hours of digging on the part of Bill Graham and Sid Truby.

With proper care and decent growing conditions we should soon have a very good showing in the park.

UNITED CHURCH OF CANADA

Commemorating Union 1925-1934

Sunday, June 10th.

11 a.m. Sermon, "Church Union". Special music by Junior Choir.

12:15 p.m. Sunday school and Bible class.

7:30 p.m. Musical Service.

The Senior choir (augmented) will present the Cantata, "Daniel", The Captivity of Judah", (Rossi).

You are cordially invited to these services.

COMING EVENTS

DANCING RECITAL
by the Fort pupils of Miss Peggy Aitken, Teacher of Dancing and Physical Culture, will be held in the EMPRESS THEATRE
FRIDAY, JUNE 8th at 8:30 p.m.
Admission: Adults 35c; Children 15c.

The United Church Ladies Aid will hold their regular meeting at the home of Mrs. Geo. Fray on Thursday, June 7th.

WWI all ladies kindly meet at the Church at 2 o'clock where cars will be provided for the trip.

The regular monthly meeting of St George's W.A. will be held at the home of Mrs. Roberts on Thursday, June 7th at 3 p.m. sharp.

The regular monthly meeting of the W. I. will be held at the home of Mrs. Edward Graham on Thursday, June 14th at 2:30 p.m. Members are asked to bring their needle work.

"Why do you look in the mirror so much?" asked the married man of the pretty maid who had just been hired.

"Oh, the mistress told me to watch myself when you were around, sir."

JOSEPHBURG NEWS

The Josephburg Victoria U.F.A. local held their regular meeting on May 31st with a very good attendance in spite of muddy roads.

Mrs. W. E. Griffen and Frank Hennig were elected delegates to attend the Provincial Constituency Association Convention at Bruderheim on June 20th.

A very interesting address was given by the Junior Director, Carl Unterschutz, also Mr. W. E. Griffin favored the meeting by reading an interesting article.

After the business part of the meeting the ladies served a dainty lunch.

The next meeting will be held on Thursday, June 28th.

The FIRESIDE PHILOSOPHER
by ALFRED ROSS

When honor goes, all is gone.

Don't do it if you can't do it right.

If it isn't the truth, don't repeat it.

A good life is better than a long one.

Prudence and haste can't live together.

Good health, plus good sense make a fair life.

There's more greatness in gentleness than goodness of greatness.

Pompous and pleasants are equal in death.

Gibbons News

Our baseball boys have been unsuccessful so far losing three games to city teams by small margins of play. Lack of practice being responsible for most of the losses. Dug McKerlen is the leading batter in the league so far for games played to date.

A Big Five city league team will play at Gibbons every Sunday for the next ten weeks.

The Indies aid of the United Church will hold their annual Strawberry supper on Saturday next, June 9th. Come one, come all.

Knott Bros. have finished seeding their farm using 3 tractors with Tilber Combines as well as horses.

Quite a lot of grain is now coming to the elevators.

Mr. A. Yanch's new house is almost completed, it is a credit to the district.

Mrs. A. C. Moore recently spent a week in Edmonton.

We are glad to see Jack McEwan able to be about again after his recent illness.

Quite a number of our young men intend going to the Strathcona Flying Match this year. Too bad we could not have one in the Sturgeon district.

Advertising pays. Try it.

19 Years Ago Today

Thursday, June 10, 1915

Mr. Holmes acting secretary to Warden Driggs left for Vancouver. Mr. Holmes was presented before leaving with a purse of money by the staff. Mr. J. Doran made the presentation.

At an organization meeting of the home defence company, Mr. A. N. Sutherland was appointed chairman.

Wood & Son and Atkinson Bros., have shipped 5 carloads of bags direct to Toronto in the past fortnight.

The Agriculture Society had new cattle sheds erected to accommodate the large number of entries.

A second tennis court has now been completed on the Presbyterian Church grounds.

The grain fields in this district have never been better than this year, Early spring, early seeding, with copious rains when needed, give unequiled impression for prosperity for the farmer, and therefore for the whole country.

FORT SASKATCHEWAN RECORD

Town Council Hold Regular Monthly Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chamber on Wednesday the 6th instant. Present Mayor Montgomery, Councillors, Watt, Magee, Graham, Puttet, Gant and Foster.

The minutes of the last meeting held were read and adopted.

Two applications for Old Age Pensions were approved by the Council, and request to have an old age pension increased was recommended.

A motion—That the resolution passed on 5th. Dec. 1932 setting aside certain lots in Block 1 as a Park be rescinded, was declared lost, but this motion was passed at a special meeting held later, when an application for lot 20 and lot one, Block one from Alberta Pool Elevators was approved by the Council.

An applicantion from H. Butler for 2 lots adjoining his property was also approved.

The Secretary of the Women's Institute wrote thanking the Council for the use of the Council Chambers last Wednesday and Thursday.

A letter was received from a firm of Edmonton Solicitors regarding an account of the University Hospital against Mrs. Mary Prudon, and the Secretary was instructed to write and say that the Town did not accept liability.

The monthly report of the Medical Health Officer, Dr. Henry, was [illegible] and filed.

Letter of thanks received from Mr. Robinson and Executive of the Lamont Sugarcreek Rebeal Festival Association for use of buildings etc., on the occasion of the festival here.

Letters from Howard & McBride regarding accounts for two funerals, and from University Hospital regarding Hospitalization for late Mrs. Ford, and account from Royal Alex. Hospital for Alanson Whitford, were left for further consideration.

The following accounts were passed for payment: J. Cotton, $2.00; Calgary Power Co. $134.05; Telephone account $5.50; Jones, Graham & O'Brien, relief $85.35; P. Etherton [illegible]

BEE KEEPERS' FIELD DAY
EXPERIMENTAL STATION
TUESDAY, JUNE 19.

Bee-keeping is one of the most interesting and, for the capital employed, one of the most profitable industries in Alberta. With an abundance of wild flowers and fruit blossoms, a large return of honey of the very finest flavor is assured. In 1933 one colony at the Dominion Experimental Station, Lacombe, produced 340 pounds of honey, and also colonies over a ton of honey (extracted) and an increase of four colonies.

There is much to learn concerning the handling of bees. Many who now have bees have had very little experience, and many others would keep bees if they knew how to start. At this Field Day practical instructions and demonstrations will be given on how to start with bees, how to secure large returns during the summer, how to extract and market the honey, and how to winter the bees.

FORAGE CROPS FIELD DAY
EXPERIMENTAL STATION
FRIDAY, JUNE 22nd.

With the possible exception of wheat, the forage crops, hays, green-feed, silage crops and pastures are the most valuable crops grown in Alberta. The foundation of permanent agriculture is the raising of live stock and the growing of field crops. At the Dominion Experimental Station, Lacombe, every kind of forage crop common for Alberta conditions is under test, and in one field one hundred and fifty different kinds and varieties will be found. Come and see these crops and learn the best methods of growing feed for your live stock and preventing your soil from drifting.

No Grasshopper Plague In This District

Regarding a certain amount of apprehension among farmers of the district regarding grasshoppers, the municipal officials have been assured by the Field Crops Commissioner, who investigated fields that were reported infested with these pests, that there is nothing to be alarmed about.

There is no more than the usual normal population and with the heavy growth prevalent no damage is likely to be sustained. Unless the hoppers are actually stripping the grain of its leaves there is nothing to worry about. It has also been predicted that very few hoppers will survive the heavy rains of last night.

Partridge Hill NEWS

Hello, Mr. Editor, another million dollar rain this morning! Oh, well, we'll try and bear up under it.

This week will see the finish of seeding in this district. Fields and gardens are looking fine. Beans are already summer-fallowing.

Mr. Blanche Gordon and Gladys Osbaldeston have been delegates to our Junior U.F.A. Farm Young People's Conference at the University of Alberta this past week.

Mr. and Mrs. J. J. Clark and Mr. and Mrs. George Underwood of Edmonton were visitors at the Osbaldeston seniors last Sunday.

Mr. and Mrs. Cliff Aiken received word last Saturday that their son-in-law, Raymond Schaser of Rocky Rapids, Alberta, was a patient in the Royal Alex. hospital, Edmonton, as a results of a badly cut foot and weakness from the lost of blood and shock. He was reported on Sunday as resting easy.

Mrs. John Gordon and little daughter returned home last Sunday from the Fort nursing home.

Hon. R. G. Reid, provincial Treasurer, and Minister of Municipalities, will be the guest speaker here on U. F.A. Sunday, June 17th, at 3 p.m.

The U.F.W.A. held a well attended meeting Tuesday at the home of Mrs. Frank Kulak, with Mrs. Garnet Houston assisting. Plans were completed for the U. F. A. picnic July 1st, at which particulars will be given.

A lovely collection of articles for the U.F.W.A. constituency conference in Tofield in July were turned in.

A pleasing feature of the tea hour was the presentation of a plant from the W.M.S. and U.F.W.A. to "Grandma" Osbaldeston on the occasion of her 98th birthday, also a lovely birthday cake presented by the hostesses. Best wishes for "Many Happy Returns" were extended by Mrs. C. H. Flintoff and Mrs. R. Warring.

Mr. Richard Gordon left Friday for a visit to his old home and old friends at Huntsville, Ontario.

Mr. and Mrs. Harry Bugden, of Bonly, Alberta, were guests of the latters sister Mrs. Garnet Houston last Sunday.

GETS JAW BROKEN WHILE PLAYING BASEBALL

Fred Lajeunesse, youth living in the Sturgeonville district, was rushed to an Edmonton hospital Sunday suffering a broken jaw and other facial injuries received when he was struck by a baseball bat, in a game with the Lindbergh Flyer company team.

Warren Brick was batting when the bat slipped from his hands, striking Lajeunesse in the face.

His cheek was badly cut and seven teeth were knocked out and he suffered a broken jaw. Medical attention was given by Doctor Henry.

Gibbons News

The Ladies Aid of the United Church held one more of their celebrated strawberry suppers on Saturday last with a very large crowd in attendance. Something over $20 was paid for the supper. A wonderful concert was put on in the evening, with the talent coming from Edmonton, Bon Accord, and Coronado as well as local talent, which all put on a first class program. The eight Danners who presented the "Dark Town Frolic" were exceptionally good.

Our baseball boys are still in the cellar position of the league, but are improving every game.

Our popular Assistant Post Master, Mr. Peter Consenado is on his vacation. Some folks are very lonesome when he is not away.

Some 8 car loads of young men intend taking in the Strathcona Flying Match on June 13th.

Mr. Bert Puthorbridge is sporting a new car.

Gibbons sure are pulling for the Grads to win their series with the "Stomps" of U.S.A.

Mr. Jack Kerr had a visit over the week-end from his father who lives at Acme, Alberta.

Jack is going North on Government Weed Inspection next week.

WOMEN'S INSTITUTE CEMETERY COMMITTEE

The Cemetery Committee wish to acknowledge the following donations:

Miss Westover	$1.00
Mr. F. S. Moore	$5.00
Mr. W. C. Tims	$5.00
Mr. Oscar Bawden	$10.00
Mrs. G. I. Armstrong	$2.00
Miss Ruth Sheckleton	$2.00

Any contributions to this Fund will be gratefully received.

(Mrs. Edward) N. M. Graham,
Convener of Cemetery Committee.

Namaye Ball Team Defeats Fort Team 4-2

The Fort Saskatchewan baseball team were the guests of the Namaye Club on the occasion of their annual picnic and dance last Friday evening.

The game was slated to be a 7 innings game so it was started late. Both teams however played such snappy ball that at the end of the 7th the sun was still shining brightly and the spectators demanded more entertainment. The score at this time was 2-2 in favor of the Fort. Manager Collins and the Fort Boys showed good sportsmanship by agreeing to play 2 more innings. As a result Namaye took advantage of their generous offer by scoring 4 runs in their half of the 8th to cop the game 4-2.

The Fort boys report an enjoyable time and were treated to a lovely supper topped off with strawberries and ice cream.

Many Farmers Using Fertilizer this Year

Elephant Brand Fertilizer is making a wonderful showing on farms about the Fort. The Fort Hardware Co., agents for the Fertilizer Company have numerous experimental strips on farms along the highway as well as the outlying districts. Other farmers are invited to use these strips. In most cases signs will be displayed in the fields.

Some of the farms on which strips have been fertilized are:

Mrs. Devereux, Mr. Rumineon, Lord Rodney, Ed. Gaumont, Enoch Lepage, Atkinson Bros., Warren Brick's, Earl Coutts, Ken Magee, Tom Johnston, Tom Cinnamon, Lucien Langlois, E. Langlois, P. B. Mohr, Frank Thomas, Joel Ele Hollo, John Mohr, Jr., Frank Hennig, Carl Hennig, Dan Thomas, Geo. F. Mohr, others have used large quantities of Elephant Brand Fertilizer this year. Below are listed a few of these men: Clark and Bill Clark, W. Sharpe.

Quick Relief Now From Neuralgia

Real ASPIRIN Starts Taking Hold in Few Minutes

Many women constantly quest relief from headaches, rheumatism, neuralgia, . . . the *fastest safe relief, if so used discovered.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moist tissue. And begin to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, below, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And then it ready to go to work almost instantly.*

Then, too, they, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer is the form of a crown is on every tablet of genuine.

Does Not Harm the Heart

Gold Still Is King

The lure of gold continued to exercise its sway upon the minds of men. Countries may go off the gold standard. New economists may argue, as they will, against gold as a monetary basis. Despite all the arguments, "what is not shown", the yellow metal still casts its potent spell, alluring men to brave hardship and danger in its quest, impelling men to undertake hazardous expeditions to win it, inducing countries to exert desperate efforts to conserve it. Money or otherwise, it gains the fascination of new people and old priest, of poet and peasant, of rich and poor, of connoisseur and poor. Phantasm or reality gold still is King.

Three somewhat warmest pluralisms are evoked by the recent appreciation in a financial journal, of the items on gold which, strangely enough, were placed in close proximity. The one was headed: "Nations still scramble for gold", and the other "$30,000,000 Buried by Pirates Bought". The one article demonstrates the hold which the gold tradition has upon world statesmen; the other epitomizes the ingenuity and risk employed and undertaken in efforts to win the precious metal - a gamble with life and money

Relative to the international scramble, it is stated that, Britain and other non-gold-standard countries, including the United States, of course, are buying gold wherever it can be bought, and that their accumulations of gold now break all previous records.

Replying to the question why the United States continues to purchase gold, the New York Times recently replied that, in principle at least, gold still remained the world's monetary standard. Continuing it said:

"The government is adopting its monetary policies in line with the dreams of the imaginative 'New Science Economics'. Every government is recognizing the paramount necessity of return to a stabilized basis of international exchange. Finally, and means, this underlying sentiment more clearly than the fact that every nation—even those nations without gold payments—is preserving its gold reserve against the general bank note issues as scrupulously as it did half a dozen years ago. Whereas the Bank of England, at the beginning of 1925, held the smallest gold reserve in more than a dozen years, it has subsequently added nearly $300,000,000, bringing the reserve to the highest figure in its history. . . . The general process is indirect recognition of the gold standard. The possession of adequate and concentrated gold reserves would unquestionably be of high value whenever return of sound international conditions should make return to sound and stable currencies a possibility."

The other story is somewhat similar to the famous Cocos Island treasure. It refers to a projected expedition from Britain to Tahiti in the south Pacific, to reclaim approximately "$30,000,000 in gold ingots and a fortune in jewels", said to have been buried by pirates in or about 1846. Usually such treasure hunts originate with documents, in some peculiar manner, of a map of the cache. Such a map Stevenson introduced in his "Treasure Island"; such a map as allegedly may have been found tattooed on the chest of some old sailor in some Barbary Coast "dive". In this particular instance, the map came into possession of an Australian in 1926, who, it is said, visited the island and succeeded in removing some of the proven. These, he subsequently buried a peculiar enough action to excite no reason to grieve. However, in March 6, 1934, the same Australian claims to have located the treasure at the exact point indicated by the map. Speaking of the discovery, he says:

"There are only two things to contend with in drilling for the buried and coral. The drill went down through the sand, ground to way through the rough coral and rested on the gold. There is no rock on Tahiti and by the drills, we felt out the shape of the bagging and were able to determine the extent of the treasure. The drills spin on gold just as a top would on a marble floor."

It is upon such evidence and such representations, apparently, that hard-headed British engineers and business men are prepared to risk their money, and expend their enterprise.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This famed compliment recently has been on the market for the past 68 years. Proof enough that you are not experimenting with some new and untried remedy.

Do not accept a substitute. Get "Dr. Fowler's" when you call for it, and be on the safe side.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

The Great Zambezi Bridge

Remarkable Feat Of Engineering In Heart Of Rhodesia

Spanning the Zambezi Gorge stands one of the highest bridges in the world.

The bridge is in the heart of Rhodesia. Far from civilization and as near to the great Victoria Falls that trains crossing the bridge are sometimes held up by spray from the turbulent water. The building of the Zambezi Bridge was a marvellous feat of engineering. First of all a rocket had to be fired across the rocky chasm. The rocket was attached to a line, which in turn was fastened to a length of wire and a steel rope.

During the construction of the bridge the builders worked at a dizzy height over the swirling waters below.

When workmen began their task a large net was spread beneath them to prevent catastrophe, should any of them lose their balance.

But instead of steadying their nerves they discovered that the net served only as a constant reminder of their perilous position, and so it had to be removed. After a period of little more than six months the bridge was completed and a train travelling at fifteen miles an hour was driven across to test its strength. The structure was pointed grey so that whenever the materials rusted in any part the defect would immediately be noticed. This impressive feat of engineering in the wilds is one way detached from the beauty of the scenery.

Harbor Expert Dead

Sir Frederick Palmer Who Recommended Churchill Was Noted

News reached Canada recently of the death at Lingfield, near London, England, of Sir Frederick Palmer, the man whose recommendation caused Churchill to be developed as Western Canada's northern sea outlet.

When Hon. C. A. Dunning assumed the portfolio of minister of railways in the Dominion cabinet in 1926, he went to England for Sir Frederick, one of Britain's most noted engineers.

Sir Frederick went into the northland and after an extensive investigation, recommended to Mr. Dunning that Churchill be the northern port instead of Nelson.

The recommendation was acted upon, and Churchill became the outlet to the world for Western Canada via the sea.

For many years Sir Frederick was chief engineer of the Port of London Authority. He served as assistant engineer for railways in India in the old country and India, in addition to being engineer of the Clyde Navigation Trust. He was consulting engineer for the new $62,500,000 Charing Cross bridge, London.

Recipe For Iced Tea

Use six heaping teaspoons of "Salada" Tea. Brew tea in one pint of freshly boiled water for three minutes. Strain liquid at once into a two quart container. While hot, add 1½ cups granulated sugar and juice of 2 lemons. Then chill or stir contents well, until sugar is fully dissolved. Fill container with cold water. Do not allow tea to cool before adding cold water. Ice cubes will make liquid will become cloudy. This is now ready to serve. Add thin slices of lemon may be added if desired. The above will make two quarts of iced tea, or seven tall glasses.

Soldiers Buried In France

Over Thousand Americans Married And Made Home There

More than fifteen years after the bugles blew "cease firing," about 1,300 American veterans of the World War linger in France. Most of them are "voluntary exiles" for the sake of French wives. Their children are dwindling, however, for in 1931 they were 1,700 strong, figures published by the American Legion's weekly show. More than half live in Paris; the rest are spread over forty-nine departments.

It is now possible to determine the speed of lightning by use of special photographic apparatus. Experiments of this kind recently revealed that the average speed of lightning is between 30,000 miles per second.

Martyr To Radium

Lord Of Scientists Who Aided Mme. Curie Is Dead

Henry T. Koenig, 62, a chemist of Denver, Colorado, who had worked for years under a self-imposed death sentence, died a martyr to his research work in radium.

Koenig was the 20th to die of the 30 scientists who aided Mme Curie discoverer of radium, in her research work.

One by one, Koenig's companions died from malignant infection induced by contact with the mineral.

But he continued his work although he knew that each contact further weakened his system. Through his work and that of his companions thousands have been given relief.

Koenig's career in perfecting a uranium ore by mineral extraction could be accomplished at a lower price than ever before was recognized by authorities as one of the greatest contributions to medical science.

He studied the rich radium ores of the Belgian Congo in 1922 and 1923. His development of the ores in this region rewarded all danger of a monopoly in radium.

During the World War he adapted radium to practical use in warfare. The use of radium for the illumination of watch dials at night was the result of his research.

Three months ago he was ordered to Porter's Sanitarium, suffering from cancer of the lip. Treatment failed to check the disease and he died.

Irrigation Plans

Proposal To Irrigate Large Block Of Land In Southwest Saskatchewan

Irrigation for between 5,000 and 10,000 acres in southwest Saskatchewan is proposed in a plan to be urged before the Saskatchewan government.

Facing a feed shortage for the third successive year, farmers around Valmarie and Cadillac said $100,000 expenditure to build a dam on the Frenchman river with a 15-mile main ditch south and east through Fort Mills.

Altalfa would be sown with two crops a year, providing an alleg crop of 30,000 tons or enough to feed 30,000 cattle.

An experimental dam is being built by George Newton to serve his farm a few miles west of Valmarie.

J. R. Reid, Regina, is doing the engineering work. A small dam is being built at the Frenchman river, pump installed, and the scheme developed to supplying about 200 acres.

Mr. Reid said that with two crops a year about 1,250 tons of alfalfa can be grown, sufficient to feed 1,000 cattle.

Fraudulent Stock Promotions

Government To Put Quake In Work Of High-Pressure Concerns

The House of Commons took the first step recently to smoke the work of high-pressure stock salesmen when it reviewed the Consolidated Companies Act which practically remodels the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it impossible to sell promotion stock except through the underwriting method by the secretary of state. Among other provisions, fines and imprisonment would be established for high-pressure stock salesmen or any organization that used a telephone and number list to promote sales. Penalties would range from $500 for a first offense to $1,000 and a year in jail for subsequent convictions.

Willing To Co-operate

"Woman is very unreasonable," said a venerable New Hampshire justice of the peace. "I remember that my wife and I were talking over our affairs one day, and we agreed that it had come to the point where we must both economize. 'Yes, my dear,' I said to my wife, 'we must both economize, both!' 'Very well, Henry,' she said, with a tired air of submission, 'you shave yourself, and I'll cut your hair.'"

Fifty years in which to pay costs of the court, totalling $700, has been given to an unemployed Miguel, Bernard Kelly, a dock laborer in Liverpool.

Hero Of Russo-Japanese War

Admiral Togo, Who Died Recently, Had Set Old Oriental People Thinking

Admiral Marquis Kotaechiro Togo, the silent little man whose destruction of the Tzar's Russian fleet 28 years ago placed Japan among the great powers, died at Tokyo recently.

At the ages of 86 and with the rank of Japan's grand-seal here, he surrendered to cancer of the throat.

Admiral Togo was the last and most illustrious of all the heroes of the Russo-Japanese war. For several weeks he had been seriously ill. The day before he died the emperor elevated the aged sea hero from the rank of count to that of marquis. Posthumously he was promoted to admiral of the highest court rank.

June 8th, marked a pleasant day for the students of Josephburg School and many of their parents, when they made an excursion to many places in Edmonton, under the leadership of Miss E. Gerlitz and Mr. W. Griffin, teachers of that school.

The programme for the day was begun by visiting Swift's Packing Plant and the Parliament Buildings. The former was thoroughly enjoyed. Then followed a well-served dinner in the Banquet Room of the Bear Room in the afternoon the R.C.M.P., Journal Printing Press, and McGavins Bakery were visited. The students enthusiastically proclaimed these to be of special interest since donations such as ice-cream and cakes were given each.

The close of the day, at Borden Park, was marked with many pleasantries, visiting animal and bird friends, swimming, riding on the merry-go-round, and shouting to the winds from the heights of the roller-coaster.

"I've called to tune your piano, madam."

"But I never asked you to call!" she snapped.

"No, madam; but your neighbors did."

19 Years Ago Today

Thursday, June 17th, 1915

Wrecking has begun on the old building on the provincial jail grounds. The old carpenter shop is the first building to go.

R. Becker has purchased a large at H.P. McLaughlin's auctioneering for his livery business. This is the first of its kind in the Town.

Frank Redd of Good Hope, was kicked by a horse fracturing 2 ribs and sustained internal injuries.

Sergt. Fyffe, Vergreville was a Fort visitor for a few days last week.

This issue goes into every home in the following districts: Lamoureux Cornside, Bremner Ardrossan and the Fort district solid. By reading the advertisements on these pages many useful bargains will be found.

If you are not a reader of the Fort Saskatchewan Record let business one at a bargain price other for one year or six months.

Farm product will be taken in on subscriptions. So step up and support the local paper.

"Anything the matter with the car?" "Well, there's only one part of it that don't make a noise and that's the horn."

What About Social Credit, Canada

(Continued from last week)

J.—"It seems as if I have been astray on a lot of things."

W.—"Well, you can see how absurd that velocity of circulation fallacy is if you follow it to its logical conclusion. That is, that if one dollar only circulated fast enough all the businesses of the country could be transacted by it. However, even at the risk of causing you to forget our discussion of the flaw I must draw your attention to a velocity of circulation that is 12 cents."

J.—"And what is that?"

W.—"The complete circuit of money from bank to industry to consumer to shopkeeper to industry to bank. Suppose it takes $10,000 to finance a certain program of production. If the goods could be sold immediately, the bank loan repaid, and the loans again advanced, the volume of goods consumed would depend on how many times the cycle could be repeated in the year. If the goods could be produced, sold, and the loan retained every three months you would move $40,000 of goods in twelve months. If it could be done in two months for each cycle the amount distributed would be $60,000 worth. But no matter how fast a dollar scurries around out in the business world it can never buy more goods consumed than one dollar's worth and it does not pay off debts until it returns to the banking system. In your Station a few minutes ago what would really happen is this. You would buy a tin from the Mon's Store for one dollar. They would have eighty cents to pay the wholesaler and other selling expenses in connection with the tin, and would have twenty cents profit to buy meat at the butcher's. Out of the twenty cents the butcher received he would be able to distribute five cents as profit and this he would give his wife. Instead of a pair of stockings she would be able to get a spool of cotton at the Ladies Shop and—"

J.—"And out of that the Ladies Shop would probably have enough profit to buy a one cent stamp from the government! Ha! Ha!

W.—"Well, now you sound as if you have grasped the situation."

J.—"That explanation has helped a lot. But I've heard another man talk the same way so that you can't blame a poor layman for not knowing any better."

W.—"Some of these "eminent men" have a lot to answer for; but more and more they are being debunked and found out."

J.—"Well, let's get on with Social Credit. What's Douglas going to do about all this?"

W.—"Now, let us see how far we have got. First, we found that our economic system had three features,—

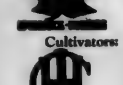
Get Those Weeds with McCormick-Deering

Plows: Either horse drawn or tractor gangs, built for depend ability.

Equip your F. & O Tractor plough with a horse Hitch attachment. A few 3 furrow horse gangs with 7 horse steel hitch at the remarkable price of ——— $140.

Harrow Plows: Cover your land in a hurry and cover it often. Light Draft, Rigid Construction. An ideal machine in Quack grass.

Cultivators: Get a new No. 6 Cultivator at reduced prices while they last.



One New No. 7 Machine is a wonder. Either spring or stiff teeth or both.

Rod Weeders: The wonder weed machine. Watch the weeds roll to the top and let nature do the rest. 9 and 12 foot sizes.

Cultivate! Do It Now! Cultivate!

FRANCE OBJECTS TO RE-ARMING OF GERMANY

Geneva.—France has almost administered the finishing stroke to a dying world disarmament conference.

A vigorous British plea that the conference get down to brass tacks, or else quit making speeches and abandon other efforts at saving the troublesome arms question, evidently irks a French state-soul.

In caustic phrases the veteran French parliamentarian, Louis Marthoux, foreign secretary, made it plain France will not consent to any reduction of her armaments until she is assured of the loyalty of Germany and the inviolence of a disarmament agreement on any conditions.

Opening predictions the conference had only a remote chance of salvation were heard.

Further gloom as unpleasant reaction from Germany is inevitable Delegates who are inconsolably well-informed, predict it is now only a question of time before Germany openly announces her refusal to be bound any longer by the disarmament clauses of the treaty of Versailles.

The French contend Germany has been actually re-arming anyway, in defiance of the treaty. Barthou, who said Sir John Simon's speech was marked by one of his own long-ago "ardent youth," and thereby aroused some laughter, declared Germany had publicly increased her military budget some weeks ago even while Britain and France were seriously discussing the question of guarantees which might have solved the disarmament plan problem.

The outline of the French viewpoint was uncompromising, centering on the heels of Sir John Simon's speech, that came journalists hastening to report it would almost widen the breach between Britain and France.

While it was admittedly received with open arms in British circles here, the Canadian Press was nonetheless authoritatively informed suggestions would lead to a breach of the present good relations between Britain and France could be dismissed.

"There is no ground whatever for any such assumption," the authority said.

Barthou's speech was plainly interpreted as meaning that France now does not want any disarmament agreement. Under no circumstances will the French government ever make an agreement, whatever else it contains — security provisions or endorsement that would permit immediate re-armament of Germany in any degree.

Sir John, speaking privately after the session, admitted the day's "developments" increased the difficulties of reaching any agreement.

The French seemed particularly annoyed by Sir John's stand for conciliation with Germany as a necessary foundation for an arms pact — on the basis of the British plan, and Sir John's frank declaration that if the conference ended as it may do by achieving anything it had better shut up shop.

Referring to the British suggestion that a treaty should be found on the basis of the British plan between France and Germany, the French delegation declared:

"We are perfectly willing to cross the British bridge, but first we want to make sure that the planks are sound. We will take every test to half through hidden traps into the stream beneath."

Sir John earlier stressed "the time is long past when we can delude ourselves into imagining that by a mere expression of our desire to reach an agreement we are promoting an agreement.

Relief For Single Homeless

Ottawa.—The federal government contributed $468,769 for food, fuel, clothing and shelter to single homeless persons in the three prairie provinces from March 31 to July 31 of last year, according to a return tabled in the House of Commons. The amount was divided as follows: Manitoba, $241,719; Saskatchewan, $94,-050; Alberta, $177,000. In these sums the Dominion bore 100 per cent, of the relief.

W. N. U. 1900

Radio Expenses

Canadian Radio Commission Spent $246,284 For Artists

Ottawa.—During the fiscal year 1935-36 the Canadian Radio Broadcasting Commission spent $246,284 for artists and $104,143 for equipment of studios and stations and new construction at Ottawa and Montreal Details of the total expenditure of $1,139,861 during the year have now been given out.

The commission's statement shows that Hector Charlesworth, the chairman, received $8,000 per annum salary, and Vice-Chairman Bisher each Commissioner W. A. Steel each $7,200 per annum.

Travelling expenses of the three commissioners were as follows: Mr. Charlesworth, $1,697; Mr. Bisher, $3,732, and Mr. Steel, $1,201. Other travelling expenses were $32,945.

Other items of the commission's expenditures are as follows: Total salaries of staff, $94,749, loans of stations, $28,163; loans of time on stations, $102,826; other salaries, $67,869; printing and stationery, $10,-267; freight and express, $2,241; office equipment, $4,662; telephone and telegraph, $16,896; publicity, $3,141; rental of studios, $14,681, power and light, $4,179; maintenance, $11,321; wires, lines, etc., $202,978; miscellaneous, etc., $24,949. Station charges for programs, $26,576.

The total spent by the radio commission is outside $344,420 spent by the radio branch of the marine department, including $66,239 for cost of the sale of radio receiving licenses and $178,000 for the elimination of interference caused by electric power supply lines and distribution systems, the maintenance and operation of electrical devices.

Strange Melody Killing Alberta's Wild Fowl

Mystery Death Again Strikes On Second Lake Near Calgary

Calgary.—The great mystery that took toll of thousands of wild fowl on Buffalo Lake last fall threatens again. The lake is 150 miles southeast of Calgary. A strange malady, which Dominion and provincial investigators failed to save last year, has appeared, it was reported, and this year it has spread to gulls, thousands of which have died in the last few days. In September, 1932, and later in the fall, ducks by the thousands died at the lake.

Conditions are reported far worse than last year and authorities in Ottawa and Edmonton have been notified.

Business From Russia

Moscow Proposes To Place Large Orders In Great Britain

London.—The Moscow government proposes to place large orders in Great Britain, if the prices and terms are right, declared L. E. Hinchley, president of the Anglo-Russian Chamber of Commerce, at the annual meeting of the organization here.

The information was from a reliable source in Soviet Russia, Mather said. Soviet purchases in Great Britain during the first four months of 1934 were ten and one-half times larger than in 1933.

LIBERAL LEADER

Mr. R. F. Hepburn, leader of the Ontario Liberal Party, who is conducting a province-wide campaign in preparation for the forthcoming Provincial General Elections. This is a new picture of Mr. Hepburn.

Forest Fire Scenes

Million Dollar Lands Of New Brunswick Ablazing

Toronto.—While in Quebec and Ontario the bush fire situation was reported as vastly improved, alarming blazes broke out in New Brunswick and 200 people were homeless at Oliver settlement, their quarters ached by flames of forest fires raging through Restigouche county.

The situation was held dangerous enough to warrant a governmental edict forbidding passage through the province's timberlands.

Backed by a north-gale wind, flames menaced huge timber resources in Cumberland county, Nova Scotia, with destruction of a seven-mile stretch of forest behind them. Rain was badly needed. Fires are also raging in parts of Manitoba.

The homes of 16 settlers were destroyed in the new Alcida settlement in Gloucester county, N.B., with Queens, Madawaska, York and Victoria counties all reporting out-breaks also.

C.P.R. Trust Funds

Now Bonds Placed On Market Quickly Disposed Of

Montreal.—The subscription books for the new $12,000,000 Canadian Pacific Railway 15-year four per cent. collateral trust bonds were closed for a few hours after they were opened, the amount being fully supplied for.

The bonds, priced at 97.79 and accrued interest to yield about 4.3 per cent., are convertible at holder's option into common shares at the ratio of four shares for each $100 worth of bonds. They are non-callable and are due July 2, 1960.

The sale was handled by a large syndicate of banks and security companies.

Lottery Bill Defeated

Ottawa.—Quebec's hopes of legalized lotteries for educational and charitable purposes died a quiet and painless death in the House of Commons. A bill to amend the criminal code, introduced by F. P. Casgrain (Lib., Charlevoix-Saguenay), was defeated on second reading.

French Language On Radio

Objections Are Voiced In House By Regina Member

Ottawa.—Objections of the people of Saskatchewan to the use of the French language over the radio were voiced by F. W. Turnbull, K.C. (Cons., Regina), to the House of Commons committee on radio. Mr. Turnbull, declaring he was voicing the views of the people of that province, asserted the commission was allowing itself to be made an instrument in promoting the view that French was the official language of the whole of Canada.

A feeling existed in many quarters in his province, Mr. Turnbull declared, that the French people were in existing on rights and privileges to which they were not entitled. The people in Saskatchewan were thrilled in using French in the broadcasts there, an effort was being launched to make Canada a bilingual country.

It was bad for Canadian unity and bad for the French language if such a belief continued.

He had no hostility to French, nor did any hostility prevail in Saskatchewan. However, underlying the whole matter were some fundamental questions. One centred on the belief that, he declared, prevailed largely in Quebec that French was the official language of the entire Dominion. On the other hand, the people of Saskatchewan and in other parts of the country were largely of the opinion the French language was not the official language of Canada, but was confined in its application to the terms of the British North America Act.

Trade Union Funds

May Exempt Amounts Paid For Relief From Income Taxes

Ottawa.—Trades union members who contribute a portion of their income to such union funds as are allocated for the relief of their unemployed colleagues may, if it is found to come within the administrative features of the act, be permitted to claim exemption from income tax on account of such contributions, Hon. E. N. Rhodes, finance minister, told A. A. Heaps (Labor, Winnipeg North), in the House of Commons. The house, in committee of ways and means, was considering the budget resolutions.

Radio Operators

May Employees Should Come Under Civil Service Status

Ottawa.—The civil service commission replied to the request that recommendation for powers to appoint and set the salaries of its employees, clerical as well as technical, C. H. Bland, chairman of the civil service commissioner, told the radio commission of the decision that technical as well as clerical employees of the radio commission should come under the civil service.

Issuing Special Stamps

Ottawa.—In commemoration of the 150th anniversary of the first settlement of the United Empire Loyalists in Canada, a special double-duty postage stamp of the denomination of 10 cents will be issued, it was announced by the post office department.

FUTURE WELFARE OF EMPIRE RESTS WITH DOMINIONS

Ottawa Great Britain's unemployment problems would never be solved until the flow of her surplus population to the Dominions was resumed, Hon. S. M. Bruce, former prime minister of Australia, told a luncheon audience here since the Dominions offered the only outlet for that surplus, and since they could not take immigrants until a measure of prosperity was restored, it was to the advantage of Great Britain to co-operate toward the restoration of prosperity in the Dominions.

Apart from all question of traditional or sentimental ties, Great Britain was the logical trading associate of the Dominions, Mr. Bruce declared. Great Britain offered the natural industrial complement to the primary producing Dominions such as Australia and Canada.

He was not alarmed at the efforts being made in Great Britain to stimulate agricultural production, Mr. Bruce said, feeling certain such development would never proceed to a point at which it would handicap exports from Empire countries.

The World Economic conference was a "tragic failure," Mr. Bruce said. While it was his firm belief throughout the world that the necessities and some of the luxuries of life should be made available to every person in the world, the conference had urged restriction of production and the restricting thus to be visualized the banishment of scientific advancement of recent years.

In a world gone mad with economic nationalism" the 66 countries represented at the world conference had announced their intention of continuing that policy. Only when there was a return to "sanity" among the nations of the world would there be general prosperity.

In the meantime, Mr. Bruce said, the countries that would best pull through were those possessing the greatest home markets, resources, capital and experience for developing resources. Canada and Australia had all the necessary resources and potentialities of development but lacked population.

"What we must do, as primary producers, is to group with other countries that are industrial and provide a market for us," said Mr. Bruce. Apart altogether from the political and sentimental considerations naturally pointing in that direction Great Britain remained the best hope for Canada and Australia as the one country most advantageous as a trading associate.

Such an association had to start out with the fundamental principle that all members of the group must prosper. He believed it was quite understood and appreciated in Great Britain that the Dominions were determined to develop also their secondary industries, and he anticipated no great difficulties on that score, Mr. Bruce said.

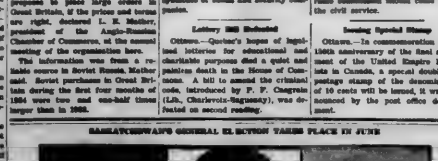
Neither, said Mr. Bruce, did he apprehend any difficulty arising from Great Britain's agricultural policy. Such development would essentially be limited.

Great Britain was a country relying financially and economically on the exports of industrial products and nothing would be allowed to interfere with that. Also, many countries indebted to Great Britain could only pay by agricultural products.

"If Great Britain is ever to solve her unemployment problem and become prosperous again the flow of emigration to the Dominions must be resumed," said Mr. Bruce. It was therefore in the interests of Great Britain that the Dominions become prosperous enough to resume immigration from the Old Country.

Gas Not Enough

Calgary.—Grasshoppers in Alberta have a "sweet tooth" and farmers are urging the poison bait formula be changed. From Munson comes the report the "hoppers are not taking to the poison bait with the usual vigor. It lacks sufficient molasses, and has proved unattractive to the green field pests.



By an unusual coincidence the general elections in Saskatchewan will be held on June 19th, which is the same date as the elections in Ontario. Above are the three political leaders, left to right: Hon. J. D. Gardiner, leader of the Liberal Party; Premier J. T. M. Anderson, leader of the Conservatives; and M. J. Coldwell, Farmer-Labor Leader

Episode Of Cotton Trade Shows That Museums Often Render Vital Service To A Nation

The cotton manufacturers of Lancashire, England, have made overtures to the British government seeking official intervention to protect the cotton trade against the competition of Japanese textiles. Paradoxically Lancashire has been the mother of the modern textile industry which was put under octopus by the present government.

This is not the first time that the English cotton trade has felt the sting of competition of foreign manufacturers. An example of such a contest was cited recently in Toronto by Dr. C. T. Currelly, director of the Ontario Museum attached to the University of Toronto. In this instance the field of battle stretched down the entire coast of Africa.

It was about the turn of the present century. The British cotton trade in Africa flourished. The hands of German museums, well supplied with money, launched on an extensive tour of several months' duration down the African coast.

The native Africans, with something of a weaver, in his primitive way. Every pattern that he wove with his African grass had a meaning. This pattern was a prayer for rain. That one was a prayer that would keep the evil spirits away from the baby at night. All designs were everything.

What did our German museum men do? They visited every tribe on the west coast and they acquired a sample of every pattern woven by the natives. The scouts returned to Germany with an enormous variety of samples of African weaving. "Come and see," they said to the textile manufacturers of the Fatherland. They not only came and see but they copied. Soon German ships were carrying African patterns in German cloths back to the tribes on the west coast.

It was a hard blow to England. Almost overnight 75 per cent. of the British cotton trade in Africa was wiped out. Germany made phenomenal progress at Britain's expense. Only in the past few years, after a quarter of a century, has the African showed any tendency to return to the British product.

Dr. Currelly's recitation of this episode of the cotton trade was given, of course, to demonstrate the vital service that museums can render to a nation. Most of us have had the idea that a museum is a place to house ancient relics for the amusement of those who study the past because the present is too fast for them. Anyone who has had the privilege of spending an hour or so with Dr. Currelly will know that a good museum, teeming with information of tremendous value to an industrial nation. He will also know that the director of a good museum is a man who knows the wide world as few people know it, a man who knows so much about the old world that he knows a tremendous lot about why the present world is what it is.

No, museums are not so dead, after all!—Stratford Beacon-Herald.

Upward Hold Unlikely

Hardly Possible World Wheat Price Will Advance Greatly

The Financial News considers the possibility of a world uptrend in prices very improbable. "It is possible," it said, "that a large part of the responsibility for the low level of world prices is to be found in the fear that on any breakdown of the wheat agreement the United States would dump her surplus of over 300,000,000 bushels abroad.

"Removal of these fears might cause a much more buoyant tendency, otherwise the outstanding measures to be at present. In America itself, however, a reasonable rise in the prices of grains seems likely to be maintained."

A deaf and dumb person who is fairly expert at finger language can speak about 60 words a minute.

W. N. U. 1900

Cuba's Cattle Dogs

Visitors To Island Amazed At Cleverness Of Animals

Sheep-dogs are world-famed for their sagacity and intelligence but have you ever heard of cattle-dogs?

Visitors to Cuba are amazed at the cleverness of these dogs of the island. In some of the ports animals that are brought from the American continent cannot be landed directly on the shore. The steamer is taken as near shore as possible and the cattle must swim to land.

To show the animals the most direct route, specially trained dogs are employed. Beside each animal two of the dogs swim, pushing the creature with their noses just behind its ears.

As soon as the beast's feet touch the bottom, and the dogs feel that their charge is safe, they at once return to the ship to bring in another one. This the clever dogs will do again and again without receiving any orders from their masters.—Our Dumb Animals.

Survey Of Crops And Livestock

Collecting Statistics Of Acreages Under Crop And Number Of Livestock And Poultry On Farms

In June of each year the Dominion Bureau of Statistics, in co-operation with the Provincial Departments of Agriculture distributes enrboard schedules to farmers for the purpose of collecting statistics of acreages under crop and the numbers of livestock and poultry on farms. As information of 1931 extended this survey to cover the breeding and marketing intentions with regard to livestock. In all of the provinces, except Nova Scotia, Alberta and British Columbia, three schedules are distributed to the farmers through the rural school teachers. In these three provinces the cards are mailed direct to the farmers.

The acreages of field crops in particular are the real foundation for obtaining agricultural production statistics. Only slightly less important in the final analysis is the necessity of having correct knowledge of the number of livestock on farms. The accuracy of computation in both these classes is largely dependent upon the obtaining of completed returns from a large sample of the total number of Canadian farms. We would urge upon all farmers to co-operate with the government in this undertaking.

High Cost Of Junk

Cars Purchased For Almost Nothing Menace To Traffic

An odd little footnote to the automobile age was furnished the other day when a man bought a used car for $5, drove it out on the highway, and a few hours later got back a traffic accident that did $300 worth of damage.

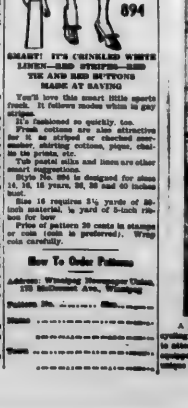
The accident emphasizes our need of some strict kind of regulation to cover the use of aged and decrepit machines. You can doubtless imagine the kind of car that can be bought for $5; not much thought is needed to convince one that such a car would be hideously unsafe, to the driver and to others.

Why shouldn't we get busy and rule all such wrecks off the roads? The highways are dangerous enough, even when all cars are well equipped and in perfect condition.

To permit $5 cars from the junkyard to operate is sheer folly.—Guelph Mercury.

Malaria Distills Noises

Why noises are fewer and more sickly in Southern Florida than years ago has been learned. It is noise Chinese gardeners declare that loud sounds are harmful to the fruitfulness of the melon blossom. Auto horns and the shaking of heavy vehicles on highways and rails have so disturbed the biosonone that they have ceased to thrive.



ONE WAY OF CROSSING THE CHANNEL

A year ago Mr. Schilperoord of Holland, performed the difficult feat of cycling across the English Channel on a water-bicycle. This year he intends to attempt a more difficult task, and paddle across the Channel in a barrel equipped with a sail and radio. Here we see the daring Dutchman with his unique craft.

American Writer Says Part Of War Loan Should Not Have Been Charged Against Allies

The Password Is Quality

Canada Following Up Her Good Work In Poultry Exports

"If Canada is going to get its share of the British trade in poultry in bacon, in live cattle, or in any other of its agricultural products, the value and necessity of doing things better and worse than competitors must be regarded as all important," said Mr. W. A. Wilson, Canadian Government Animal Products Trade Commissioner in London, England, during his present visit to the Dominion. "We made a good reputation with our first shipment of turkeys, because the quality was there and they were graded and packed according to government standards. The British trade responds to work well done. There is the market for Canada's poultry and other products and the password is quality.

"The season for exporting poultry to Britain should be designed for the 12 months of the year. Buyers over there do not want to change their source of supply if they can be certain of the demand being met at all times."

"Canada should follow the same policy in connection with the present opportunity open for the export of dressed chickens as it has done with turkeys exported to Britain for the 1933 and 1934 Christmas trade. The 1,000,000 pounds of turkeys shipped in 1932 were 150 per cent. on in 1933 they were not quite as good as the previous year but this was due to some unusual difficulties associated with the shipping and ungovernentable Turkeys for the British Christmas trade must reach the buyers at least one week before Christmas day."

Fewer Separate Grade

English Co-Operative Societies Would Like It For Garnet Wheat

English co-operative societies, interesting and large buyers of Canadian wheat, on record before the common agriculture committee at Ottawa on application by the prairie provinces that separate grades for Garnet wheat. The English co-operatives were represented by their Canadian buyer, R. T. Jackson, Montreal.

Mr. Jackson, however, was unable to elaborate on the co-operatives attitude toward Garnet.

The committee passed a resolution asking the English co-operatives to present their reasons for favoring a separate grade for the Garnet variety in a brief.

The following letter written by Edmund Platt of Garden City appeared in a recent issue of the New York Herald Tribune

When Mr. Lippmann writes about the so-called war debts he has something to say worth reading. He did well to point out that when the United States first entered the war our part was expected to be mostly financial. We were to furnish a large part of the munitions and food for our Allies in Europe and were to pay the bills—as our contribution, not as loans. We did pay the bills, but instead of regarding them as a part of our own war costs we charged them up, added the interest and finally refunded the whole thing into an impossible pyramid of principal and interest to be repaid over a period of some sixty years.

It seems to me that it is not yet too late to separate that part of the debt which is really our own and has been charged against our Allies from the loans that were used for reconstruction. Roughly all of the loans made during the war, after our entry into the war, down to April, 1918, when we had practically ceased to lend, should be cancelled. The money was all spent in our own country and the supplies sent to our Allies by its spending saved the lives of thousands of our boys. Why should we expect this money to be paid back to us? Chancellor Hitler has done nothing to wipe out more than half of the debt and leave a sum that could probably be managed.

The trouble with the debts, as Mr. Lippmann says, came from charging the original advances as loans and failing to distinguish between such proper contributions to the success of the war and the reconstruction loans.

Wouldn't it be much cheaper to cancel half the war debts and so bring markets and trade back by continuing to add to our already superhuman hoard through war debt payments?

Hay Value In Wool

Alberta Stands Second As Hay Producing Province

Alberta stands second only to Ontario as Canada's largest hay producing province in 1932 Alberta marketed 1,082,160 hogs, or 23.36 per cent of the total marketed in Canada. Ontario marketed 1,356,939, or 42.51 per cent of the total. Saskatchewan ranked third with a total of 660,230 hogs or 15.37 per cent. Manitoba fourth with 344,277 and Quebec fifth with 65.768 hogs Over 55 per cent. of Canada's hog crop comes from the three prairie provinces

Ontario has the highest quality, 36.22 per cent of her hogs grading select and 78 per cent grading in the two top grades Manitoba is second in quality 17 per cent grading select and 56 per cent in the two top grades Saskatchewan is third with nearly 12 per cent selects and 44 per cent in the two top grades and Alberta fourth with per cent. selects and 40 per cent in the two top grades

A Popular Vegetable

Asparagus Was Used By Early Greeks And Romans

Asparagus was esteemed as a vegetable when Greece and Rome were at the height of their glory, and is very popular today The name a Greek one, has had various forms in English and to the eighteenth century the corruption "sparrow grass" was popularly used While this use would to-day be considered a sign of ignorance, Walker's Dictionary said in 1791: "Sparrow grass is so pronounced that 'asparagus' has an air of stiffness and pedantry" On the steppes of Russia that plant grows wild in such profusion that the cattle eat it like grass.

California, which developed its orange industry on the Navel orange, now has two million more Valencia orange trees than Navel.

BABY'S OWN TABLETS
Banished!
"When I found not sleep at night with baby's cries, it was Baby's Own Tablets that cleared the little one's cold, checking sleeplessness and restless sleep and rest." That is what Mrs. Robert Crossberry, Phillipsville, Ontario, writes. Baby's Own Tablets are sold just nothing as action, yet most effective and always safe for children, teething troubles, constipation, stomach troubles, upset stomach, colds, simple fever. Price 25 cents per box. Dr. Williams' BABY'S OWN TABLETS

WORLD HAPPENINGS BRIEFLY TOLD

Holland is reported to be concerned over the intensive trade invasion by Japan of the Dutch East Indies

The oldest continuously published newspaper in Canada, The Montreal Canwtr, recently celebrated its 150th birthday. Its first issue appeared June 1, 1778

The calling of an imperial conference for the creation of an Empire air force will shortly be suggested by Lieut. Colonel J. Ian Hamilton, if it was learned.

Belgium may pay her 1934 war debt instalment to the United States with a $10,000,000 shipment of rodium according to an unconfirmed report at Brussels.

John L. Beckwith, former mayor of Victoria, and resident of British Columbia since 1884, died recently. He had engaged in the salmon canning business for 51 years. He was born in Carnwallis, N.B.

Wiley Post, round-the-world flyer now teeming up his plans for the London-to-Melbourne $750,000 air derby in October, recently announced he also has eye on the world's altitude record.

The German version of the motion picture, "The Trial of Mary Dugan," was banned from theatres of the reich because it was regarded as a plea against capital punishment, it was learned. As such it was contrary to Nazi principles of law enforcement, it was explained.

The British House of Commons approved repeal of the duty on linoin, obstetrics remedy discovered in Toronto by Sir Frederick Banting who was knighted in the King's birthday honors list. During debate on the move congratulatory references were made to Sir Frederick.

Two-and-a-half million feet of lumber will be shipped over the Hudson Bay Railway and through the port of Churchill in northern Manitoba to Great Britain by The Pas Lumber Company of The Pas, Man., according to D. D. Sonneberry, secretary-manager of the company at Prince Albert.

Thousands Always Ill

Enduring Pains For Public Health Not Sound Economy

Elimination of disease has done more to increase material prosperity than any other one thing, declared Dr Gordon Bates, of Toronto, general director of the Canadian Social Hygiene Council, in an address in Ottawa But even to-day two per cent. of the population was constantly ill, representing 160,000 adults in Canada Parsimony in the expenditure of public funds for public health was unsound economy, maintained the doctor. The administering of insted to children who were well would prevent epidemics. Compulsory pasteurization of milk was another preventative that should be insisted upon in the interests of national health.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED
Wake up your Liver Bile
No Calomel necessary
Do you to feel healthy and happy, just keep those Dr. Chase's Liver Pills working regularly? Then you will feel fine. Without them bile, which digests fats, stays in the body. Unused accumulates. Then you may expect to wake up a gloomy, sick, miserable, constipated, headachy, dizzy, tongue coated, sour stomach, sleepless, all-in feeling. Get Dr. Chase's Liver Pills. Proof: Try one dose. You can't buy better. 25 cents a box.

Agricultural Notes

Many Items Of Interest To The Western Farmer

Whole strawberries, like other fruits, are grown successfully on the prairies, but they are not produced in commercial volume.

Sulphur has proved to be one of the most effective fungicides for the control of diseases caused by rust fungus.

Sales of bags to stock yards and plant for the time September month 1 April 30 were approximately 10 000 more than for the corresponding period last year

Of the harvests in 1932, red clover seed yielded particularly well in central and western Ontario, and this raised the total production in Canada

The basic reasons for the urge to form co-operative fruit associations in California during the past 60 odd years have been low prices to growers.

Shipments of livestock from Western to Eastern Canada for the first four months this year included 20,367 cattle, 164 calves, 32,966 hogs, and 45,620 sheep and lambs amounts except hogs compared with last year

In spite of the heavy decrease in Canadian exports of wheat to France in the past two years, this commodity still accounted for 61.26 per cent. of Canadian total sales to France in 1933.

The total value of the 1933 timothy seed crop is estimated at $168,000 as compared with $230,000 for the 1932 crop. The selling price per pound for the 1933 crop was about 6½ cents as compared with 5½ cents in 1932

Grading and inspection of honey when packed for sale is compulsory under the terms of the new Fruit and Honey Act. Honey, when shipped in containers of six months it does also be graded but inspection is optional except for administrative purposes.

The increase in the sales of branded seed in Canada for the first four months of this year was considerably more than 100 per cent. when compared with the corresponding period of last year, namely, 12,300,000 pounds this year; 10,167,515 pounds last year.

One factor which is favourable to the consumption of Canadian and other Empire tobaccos in the United Kingdom is the fact that the United States government is to restrict tobacco acreage and to force may price to a higher economic level by increasing the price to smokers.

Air-dried peat and muck will absorb 2 to 3 times their weight of liquid, and in this respect they compare very favourably with straw, the bedding material almost universally used on the farm. Peat moss, commonly known as moss litter, may absorb ten to fifteen times its own weight of liquid.

The government of Canada has appointed an official entomologist in 1934, but the real development and expansion of the work did not begin until about 1909 when the finding of the dreaded brown tail moth in shipments of nursery stock from France necessitated the passing of legislation in 1910, giving the government power to inspect imported products entering Canada, and to take steps to prevent the spread of insect pests already prevalent in the Dominion.

Train Run By Electric Eye

Invention Tested By Customs Staff Railways May Be Adopted

Trains in Germany will be operated by an electric eye if an invention recently tested by the Germany State Railways is adopted. Control of a train is through photo-electric cells which operate the brakes by means of a light signal, but the light itself is provided by the engine. A dynamo on the locomotive feeds a lamp which throws an almost vertical cone of light into the air. Mirrors are arranged on upright supports at intervals along the line, and if the train is against the train the mirrors will be in such a position as to meet the beam of light and deflect it down on a pair of photo-cells mounted in the searchlight of the engine. The electric current from the cells operates a relay, and the brake mechanism is opened and the train is brought to a standstill. The speed of the train can be automatically adjusted.

INTRIGUING BEE-LINE—SMART COOL SLEEVELESS LINES THAT SLENDERIZE THE WEARER
Pattern 867
To-day's model is just perfect for hot weather wear!
Besides being unbelievably easy to make, it's surprisingly inexpensive. The pattern includes clear, explicit instructions for cutting out and put it together. The scalloped treatment is optional. The pattern also provides for the neckline sleeves and hipline to be cut with a straight edge
Carry it out as the original in a handkerchief-linen dress print in blue on grey ground you'll love it The white organdie vest gives it a dainty touch
Style 1 sweetheart can be worked out, very effectively in silk embroidery
Tab silks in white and pastels are charming too
Style No. 867 is designed for sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Size 36 requires 3¾ yards of 39-inch material with ¾ yard of 35-inch contrasting and 4¼ yards of binding.
Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Fashion Show In Russia

Latest Paris Creations Shown To Thousands Of Women

The Dress and Lingerie Trust of Soviet Russia has just completed its first fashion show. Forty thousand women came from all over the country to gaze with critical admiration on the 36 creations derived from the latest Paris creations. What further proof is needed that the Revolution is finished? The dressing of women is more significant than recognition by the United States. It may mark a turning-point in the history of the Soviet. True, the frills and frou-frou parties of M. Jean Paten were "modified" to suit Soviet women, but it was just as much a fashion show as if it had been held in some Fifth Avenue salon.—Washington Post.

An editor was dining out.
"Would you like some more poultry?" his hostess asked.
"No, thank you," replied the editor, almost excitedly. "Owing to tremendous pressure on space, I am reluctantly compelled to decline."

SUNDAY SCHOOL LESSON

JUNE 17

THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: Go ye therefore and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit: teaching them to observe all things whatsoever I have commanded you: and, lo, I am with you always, even unto the end of the world." Matthew 28:19, 20.

Lesson: Matthew 28:1-20.
Devotional Reading: Psalm 114: 1-8

Explanations and Comments

The Empty Sepulchre (vs. 1-8). The Evangelists make no attempt to describe the resurrection of Jesus. They report it simply and briefly. Matthew tells of the visit of Mary Magdalene and the other Mary to the sepulchre late on Saturday night (the Jewish Sabbath), as the first day of the week began to dawn. Mary Magdalene was from Magdala, a city on the western shore of the Sea of Galilee. She had been freed from "seven demons." Lk. 8:2, and is often wrongly confounded with "the woman who was a sinner" of Luke 7. The other Mary was the mother of James (Mk. 16:1). They had both been present at the crucifixion and at the burial. Mt. 27:56, 61.

The messenger answered his fear and assurance of the women. Fear not ye, for I know that ye seek Jesus which was crucified. The fear gives a reason for the nothing tone of the address. He recognizes them as friends of The Crucified. A fi Risen. Then he added the glad news: "He is not here, for he is risen even as he said." Recall Mt. 17:40, 18:31, 27:63. "Come," he further added, "see the place where the Lord lay." The condition of the tomb as seen by Peter and John is described in Jn. 20: 3-7.

The Risen Christ Appears to the Women (vs. 9-10). The women departed quickly with fear and great joy (how natural were both emotions!) and hastened to bring the disciples word. Their emotions were greatly augmented when Jesus himself met them, saying, "All hail." They came near, fell down and held him by the feet and worshipped him. Kindly Jesus reassured them: "Fear not: go tell my brethren that they depart into Galilee, and there shall they see me."

The Final Interview and Commission (vs. 16-20). The eleven disciples went to the mountain in Galilee where Jesus had had appointed a meeting. It was a well-known meeting place, and there Jesus came to them the appearance which probably is to be identified with the one mentioned by Paul in 1 Cor. 15:6 when he was seen by "about five hundred at once."

Some evidently hath been given unto me in heaven and on earth." In the name of Jesus lay the authority to command.

The future of his kingdom was Christ's supreme concern, and he issued his royal order: "Go ye therefore, and make disciples of all the nations, baptizing them into the name of the Father and of the Son and of the Holy Spirit: teaching them to observe all things whatsoever I commanded you."

And lo, I am with you always, even unto the end of the world." All these words become to us not only a belief, but an experience.

A Remarkable Pilgrim

Woman Walked Twelve Times From Glenconner To Rome

With the death at Ottermarsgun of Catherine Kapp, the most remarkable pilgrim of modern times has passed away. Of peasant stock, she lived to be eighty-four, and made, on foot, twelve pilgrimages to Rome. She knew three Popes and had planned another pilgrimage for this spring. Each journey, involved walking over 1,200 miles. On reaching Rome she went straight to St. Peter's to pray at the Apostle's tomb. On one occasion she started on her homeward walk an hour after the late Pope Pius X. had received her. She made her first pilgrimage when she had passed her seventeenth birthday.

Not American Innovation

The London Daily Telegraph says the mechanism used, sent out by the Duke of Wellington, at the exhibition in the Royal United Service Museum, is a reminder that the grasping of the "e" in such words as "honour" and "labour" is not an American innovation. Like so many Americanisms it is less Anglo-Saxon than Anglo-Norman. The root also for the "our" of the company of Lieutenant-Governor Sir Samuel Blandford at the dinner given by the Duke to celebrate the tercentenary of Wellington.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Little Journeys In Science

M.I.I.M

(By Gordon H. Gonnet, M.A.)

It is a very interesting fact that scientists have shed a new element in the sun long before it was discovered on the earth. This new gas was given the name helium from the Greek word helios", meaning the sun. It was detected in the sun by the spectroscope an instrument which the scientist uses to determine what elements are present in any light giving body.

This gas occurs only in very small amounts in the air but it is found in larger amounts in much richer deposits in the natural gas of Texas, Kansas and Alberta It is about seven times lighter than air and hence is useful for inflating balloons and dirigibles It will not burn and is safer than hydrogen which is a very inflammable gas Helium is obtained from natural gas by freezing out or liquefaction of the combustible gases At Calgary, Alberta, we handled such plants, each of which can liquefy 80,000 cubic feet of gas per hour The helium is taken out and the rest is sent back to the city mains

Engineers have recently found an important use for helium It is now employed to work in compressed air as in caissons under water in tunnel construction often collapse when brought too quickly into air at ordinary pressure This is because the nitrogen of the air dissolves under pressure in the blood, tissues and even in the spinal cord When the pressure is released this nitrogen escapes in bubbles which may destroy the spinal cord, affect the brain, interfere with the action of the lungs and cause death. The basis the depths to which divers may go down with safety Helium is much less soluble than nitrogen and diffuses more rapidly, so that of the locks where the air pressure is produced are filled with helium and oxygen instead of air, which may be a mixture of nitrogen and oxygen, the danger is removed.

Railway Workers Musical

More than 2,250 railway workers took part recently in a musical festival in Reading, England. They came from all parts of England and Wales, and the contests were held in four halls. Poems were submitted by a dark foreman, a fitter, a shunter and a tube cleaner. In the champion solo class there were heard the voices of a wheel tapper, a lampman and a clerk

PAYMENTS ON WAR DEBTS SAID TO BE RUINOUS

London The House of Commons showed overwhelming approval on Monday Chamberlain, chancellor of the exchequer, announced that war debt payments to the United States have been suspended until the United States is ready for a conference on a reasonable final settlement

Loud shouts of "hear, hear" from opposition and government benches while the chancellor declared "we are not defaulters" If Britain could have been assured she would not be in default June 15 by making another token payment then she would have been willing to make a payment as concrete evidence of good faith, he added

But since the Washington congress passed the Johnson bill President Roosevelt could not assure nations paying a "token" that they would not be in default Therefore Britain decided to suspend payments entirely But the chancellor stressed that Britain has never contemplated repudiating the debt

While the British ambassador in Washington was told after passage of the Johnson bill that token payments would be classified as default, said Mr Chamberlain the government had no desire to interpret the Johnson bill's provisions or else suspending all payments pending a final revision of the whole debt settlement Th settlement was labelled unjust by the British note to Washington For this thing Britain has paid roughly half as much as she owes to get back herself owing more than ever because of interest

The remainder of full payment would have revived the whole system of inter-governmental war debt payments and would be productive of definitely the chances for world recovery," said the chancellor

There was a little resentment that Washington's note was made public whereas the British government understood it would be released simultaneously with announcement in London. The chancellor, however, merely said that owing to some confusion it was released shortly after being presented, but he did not blame the United States government.

The position was generally approved by the house The Liberal Star declared the action should have been taken long ago, and took it for granted that it was the way for clearing up the whole situation.

"The note makes it clear to the most unfriendly mind," the Star declared, "that any attempt to resume these payments will be ruinous to both countries."

The Evening Standard, Lord Beaverbrook's organ, said that President Roosevelt was inconsistent in condemning "unproductive" nationalistic expenditures," meaning arms, when he himself was sanctioning huge expenditures in his own country

France To Export Wheat

Has 1,500,000 Bushels To Sell At Fifty Cents In Export

Paris Export prizes were current here France is prepared to export more than 1,500,000 bushels of wheat at a price of slightly less than 50 cents a bushel. The wheat, it was said, would go to the United Kingdom and Denmark.

Usually well informed sources said they expected the French government would be asked to maintain a minimum domestic wheat price at a level to be determined after the yield of the current crop becomes known.

It was reported 50,000 metric tons (1,838,333 bushels) of wheat would be exported to Britain and Denmark at 28 francs (currently $1.83) a quintal. That would place the price at 49½ cents a bushel, f.o.b. French ports.

In addition the government would grant an export bounty of 60 francs a quintal (about $1.41 a bushel) bringing the total price paid exporters to 108 francs a quintal ($1.91 a bushel) as compared with the present minimum domestic price of 120 francs a quintal (about $2.30 a bushel).

Advocates Works Program

Premier Patullo Of B.C. Urges Huge Expenditure

Vancouver Premier T. D. Patullo returned to his long-time advocacy of a $200,000,000 public works program on Canada and in the same address declared British Columbia would pay the principal of her debts 100 cents on the dollar.

He was addressing a joint gathering of the Vancouver Board of Trade and Canadian Club

I don't want to inflate," he said outlining his public works program. I don't want to take a dollar from a man who has it, but he is going to buy it if unemployment continues."

The difference of opinion between his government and the Dominion on public works was not one of principle but of amount

He suggested sufficient currency could be issued to create a credit of $200,000,000, which could be loaned to the provinces on a per capita basis without interest It would be paid back through a sinking fund within the lifetime of the works undertaken The increase in debt would not be sufficient to hurt the country's external credit

Held Many Important Posts

Former Resident Of Winnipeg Died Recently In England

Winnipeg W. L. Griffiths former resident of Winnipeg, died at his residence in England, died at London June 5 according to cabled advice received here Death was accident from a heart disease. He was 69 years of age

Mr Griffiths came to Winnipeg from England in North Wales 50 years ago and was one of the first exporters of Manitoba wheat to Great Britain In 1907, during the first government of Sir Wilfrid Laurier, he was appointed Canadian commercial agent

He succeeded J. G. Calmer as secretary to Lord Strathcona, then high commissioner, in 1900. Later he became the right-hand man of Sir George Perley and served during the World War period. He retired shortly after Rt. Hon. P. C. Lapointe took office in 1924. Two sons survive.

Indians Face Murder Charge

Alleged Slayers Of B.C. Constables Given Preliminary Hearing

Merritt, B.C. Four Indian brothers, Richardson, Emma, Alex and Joseph Lampreau, were charged in a coroner's jury as the slayers of Dominion Indian Department Constables P. Shelbourne and Special Provincial Police Constable Percy Carr on May 25.

Gisbourne and Carr were slain near the Cranford Indian Reserve and their bodies thrown into the Nicola river. Gisbourne's body was recovered.

Three of the brothers, Richardson, Emma and Alex have been charged with murder and were given preliminary hearing. Joseph is in hospital here with a fractured skull

Death Sentence For Theft

Seven Persons In Ukraine Receive Heavy Penalty

Kiev, U.S.S.R. Seven persons accused of taking part in co-operative thefts of money and supplies from the agricultural supply trust were sentenced to death by the supreme court of the Ukraine, and 24 others were given prison terms ranging from one to 10 years.

The convicted persons, all of whom were employees of the trust, included a number of members of the Communist party.

For Canadian Navy

Ottawa. — A powerful Canadian naval force capable of co-operating with the Empire and to taking over completely the defence of the Dominion and Dominion shipping, was urged in the senate by Major-General W. H. Griesbach of Edmonton.

Boise, Idaho. A snowstorm whipped the high country of the Boise National forest June 3, while beavers were in bloom. As much as four inches of snow piled up in some places. Most of it melted quickly.

PROF. F. H. ANDERSON

Want More Pay

Employees Of Canadian Packers Reported To Have Asked Company To Restore Wage Cut

Toronto. — The Toronto Globe states that 1,600 employees of Canada Packers, Limited, were reported to have asked the company to restore to bulk a 10 per cent. wage cut made effective in 1931 and rescinded last October

The newspaper quoted General Manager N. J. McLean, of the company, as saying the plant relations committee had approached the management with certain requests, the nature of which he did not disclose

It said the representations of the employees resulted from newspaper reports of the parliamentary committee investigating of the affairs of the company

Mr McLean, it said, explained certain questions were put to the management as a result of what happened at Ottawa

Rain Checks Forest Fires

Raging Loss Furiously In Northern But Seldom In Ontario

Toronto Forest fires continued to burn in scattered areas of Manitoba and Newfoundland, but was burn furiously for rain in some districts held them in check. The situation in Ontario continues serious but not yet alarming, Mr. Blake Dawson, chief forest protection aviators reported on out-look on the International border between Maine and New Brunswick that had been raging unnoticed for a week, leaving in its wake a worthless stumpage of 40 000 acres.

To Make A Profit

Government Intends To Mint $35,000,000 On Sale Of Gold

Toronto The federal government intends to make a profit of approximately $35 000 000 in the gold which will be taken over from the Canadian banks at the statutory price of $20.67 an ounce, according to an estimate based on the latest official bank statement.

The government bank statement for April 30, the latest available, gives the amount of coin in possession of the banks as $39,326,171. A Toronto banker estimated for the Canadian Press that 95 per cent. or about $35 000 000 of the total was in gold coin. In addition the banks held at agencies outside Canada $9,150,584, bringing the total up to roughly $47 000,000. The prevailing premium on gold, now selling in New York at $35 an ounce, is about 70 per cent. over the old price of $20.67, giving a profit of $35,000,000.

Rain Revives Crops

Crop Prospects Throughout West Greatly Improved

Winnipeg Jubilation over crop prospects throughout Western Canada was held over with further rainfall over the western northern sections For the farmer the ora of the English International Congress which meets in Prague this summer

of the Department of Philosophy of the University of Toronto who will be one of the Canadian representatives at the English International Congress which meets in Prague this summer

Winnipeg and Manitoba and some parts of southern Alberta flooded showers were reported over widespread sections of Manitoba, Province of Manitoba

Cool temperatures continued to hold in check a grasshopper menace that a week ago threatened to become acute Many farmers in Alberta and Manitoba, their hopes revived by rains that ended a 13-day drouth this issued plans to remain on farms they announced would be abandoned.

Berry Shipments

B.C. Strawberry Consignments Have Already Totalled That Of Last Year

Victoria.—British Columbia strawberry shipments to prairie and eastern Canada markets have already equalled last season's totals and, by the end of the season, will be close to record figures, it was indicated by the markets branch of the provincial government.

To date 90 cars have been shipped and 1,500 more are ready to go. The record of 132 cars was established several years ago Only 92 cars were sold last year.

Six cars were sent as far east as Toronto and Montreal this year to mark the first time B.C. berries have reached that market in volume.

Rain Checks Forest Fires

Raging Loss Furiously In Northern But Seldom In Ontario

Toronto Forest fires continued to burn in scattered areas of Manitoba and Newfoundland, but was burn furiously for rain in some districts held them in check. The situation in Ontario continues serious but not yet alarming, Mr. Blake Dawson, chief forest protection aviators reported on out-look on the International border between Maine and New Brunswick that had been raging unnoticed for a week, leaving in its wake a worthless stumpage of 40 000 acres.

BRITISH COLUMBIA HONORS FAMOUS EXPLORER

Here we see Mr. W. McAdam, Acting Agent General in London for British Columbia, placing a wreath on the grave of Captain George Vancouver, the explorer, to commemorate the 130th anniversary of his death. The man who gave Vancouver its name is buried near Petersham Church, Richmond, Surrey.

FRANCE HAS A NEW PLAN FOR ARMS PARLEY

Geneva. — Tempers were cooled down when the steering committee of the world disarmament conference met again and a new French plan of action was presented along with a general feeling of relief hope more than France would welcome Germany back into the parley

But although the atmosphere was calmer, there was no narrowing between the two great groups led by Britain, on the one side, and France on the other With this goal in wide no over, the steering committee adjourned. In the meantime, the British, French, United States and other delegates will hold conversations in an effort to find agreement as to what may be proceeded with

Roughly speaking, the action wants the parley adjourned so the governments can progress through diplomatic channels, rather than struggling to get Germany back into the conference she left abruptly in October The other wants the conference to get right down to work, chiefly discussing security, which at first said foremost so far as France is concerned

"Germany's return overshadows all our discussions," declared Benes, but he stated in his statement that the conference could not go hat in hand and beg the Hitler government to return to the fold.

"No country would be more happy than France to see Germany return," he went on "No door is closed. In the near question there has been shown her goodwill by joining in an international engagement to which Germany is a party.

"The conference should neither impose conditions in Germany nor accept conditions from Germany" he added "Germany must be able to cross the threshold with complete equality of rights but she must also show determination with thence forth will be common to all."

Planning Abandonment Of Duplicated Lines

Railways Co-operating In Effort To Reduce Expenses

Ottawa It would be improper for the trustees of the Canadian National Railways to enter into any controversy over the proposal for amalgamation publicly advanced by E. W Beatty, president of the Canadian Pacific, in charge of C. P. Fullerton, chairman of the trustees, expressed before the house committee on railways and shipping.

Mr. Fullerton made his second appearance before the committee and presented a brief covering three phases of the railway problem, co-operation with the Canadian Pacific, capitalization and amalgamation proposals

The co-operation efforts up to date had yielded a saving estimated at $1,200 000 in yearly joint economies. Projects of co-operation to reduce duplication now under study involved abandonment of approximately 2,100 miles of line in 36 different parts, while Canadian National economies contemplate further abandonment of 1,150 miles of light-traffic lines in various parts of the country.

R.C.M.P. Colors Arrive

Arrangements Being Made For Formal Presentation In July

Regina. Of dark red silk, four feet by two and one-half feet in size, the Royal Canadian Mounted Police colors have reached Regina headquarters from London, England.

Colors will be formally presented next month. Arrangements for the presentation are being made by Ottawa

The colors are elaborate and embossed with battles in which the force took part in its 61 years' service.

Battles commemorated on the [illegible] are the Northwest Rebellion of 1885; the South African uprising of 1899-02; the Great War and the Siberian expedition of 1918-19.

Until the present, the force has never had its own colors.

An Interesting Bird

Dipper Can Live Either Above Or Under Water

There is a little bird found on many British mountain streams called the Dipper, writes C. G. Pike, the naturalist in The Boys. It has the body of a large wren, has a beautiful song in keeping with its wild surroundings, flies like a kingfisher after one live shave or beneath the water.

You cannot mistake the dipper for his duty with a snow-white breast shows him up at once, but if there is any doubt, it is soon put at rest by his habit every few seconds of bobbing his plump little body up and down. All his life he is dipping.

A museum naturalist once stated that the dipper was not a diving bird, and he had his doubts whether it could travel under water, but it is evident that this student of bird life has never seen the dipper in his native haunts.

No matter how fast the water may be dashing over boulders, you will see the dipper standing on a rock only a few inches above the surging torrent all the time dipping. If he wishes to fly from one point to another on the river, and if it feels and turns through wild mountains, he does not take a short cut across country, but follows the course of the stream.

His food is found at the bottom of the river. I have often watched him drop into the fast-running water to disappear for nearly a minute, then up he comes with some dainty morsel in his beak. In clear rivers, I have seen him walking on the bottom, where he faces upstream to that no fat bores over his head, the little creatures he is seeking are washed towards him.

Although the dipper seems so much at home under the surface, I have never known one to remain under for actually one minute. Forty-five seconds is his average.

One must be near the bird to hear the beautiful song, for at a short distance it is drowned by the noise of rushing water. While the sun is sitting, the male will perch on a rock under the mist and contribute her with long bursts of dainty music.

The nest is cleverly concealed on the bank, perhaps among the roots of a tree where the soil has been washed away, or camouflaged in a crevice on the face of a rock cliff. At the front is a round hole just large enough to admit the birds, while above and all round are walls of moss.

People Must Have Variety

Soviet Russia Finds They Need Color In Life

Germany is not the only police State that is beginning to worry about the problem of popular content. Soviet Russia has given considerable thought of late to bringing a little color and variety into the life of the people. Stalin has lately been telling his newspaper editors they must try to liven up their pages a bit.

The motive is not altogether altruistic. The playwright who had been reading his new script to the famous actor completed because his plot bored him. The actor replied that sleep, he is an opinion. When Germans and Russians fall to yawning, that, too, is an opinion. When a German citizen, dead on his feet from parading and demonstrating, sits down for a few minutes with his newspaper he finds himself face to face with the same rubber-stamp monotonous he has been observing from the orators, the police, the movies, the inverted banners and transparencies. He promptly goes to sleep. Newspaper circulations in Germany have slumped.—New York Times.

Tower For Broadcasting

What is reported to be the highest wood tower in the world has been completed at Mannheim, Germany, for radio broadcasting. The new tower is 199 metres in height (about 625 feet) and has on the top an aeronautical ring weighing 1,320 pounds. The ring is said to guarantee fading-free reception within a circumference of 150 kilometres.

The thirty-five thousand men in the army and navy of Chile include seventy-seven generals and forty-seven admirals.

W. N. U. 2000

The chances that she may one day sit on the British throne are considered no probable that the 5-year-old Princess Elizabeth, daughter of the Duke and Duchess of York and granddaughter of King George, already is being prepared for the responsible position she may occupy. The two great Queens, Elizabeth and Victoria. It is now believed that the Prince of Wales will never marry, and as his next brother, the Duke of York, has no son, Princess Elizabeth is almost destined, may be considered her apparent. At present, the little Princess has no official duties, may be considered her apparent. At present, the little Princess has no official duties, but she may hold in store. She plays with her younger sister, Princess Margaret Rose, just like the children of any other parents, high or low. Lower left and right are her parents, the Duke and Duchess of York, and the Duke of York.

Not Tied To Parties

Montreal Publisher Says Newspapers No Longer Party Guide

"The time has gone past when great metropolitan newspapers are tied to the heels of any party," Major John Bassett, vice-president of The Montreal Gazette, stated at a meeting of the Life Insurance Advertisers' Association of Canada, at Ottawa.

"A Reading Habit," was the subject of Major Bassett's address, which was replete with flashes of humor. Tracing the history of the leading personalities encountered by the speaker as parliamentary representative of the Gazette were given.

"The prime minister, in a recent attack on newspapers in the House of Commons, said that the total deficit of $6,000,000 caused by the transportation of newspapers and magazines through the mails of Canada, amounting thereby their newspapers are under a debt to the government of Canada, and should therefore, be more circumspect in their attitude toward the government.

"I think that I speak for the principal newspapers of Canada when I say that they neither seek nor ask favors in the form of subsidies from the government, and if the prime minister wishes to introduce legislation this session, increasing the cost of the transportation of newspapers through the mails, it will have the support of the right-thinking publishers of Canada.

"Newspapers may this to all political leaders, that the time has gone past when great metropolitan newspapers are tied to the heels of any party.

"And yet I would be fair to the present prime minister. Whatever his faults may be, he has served in recent years has worked so assiduously on behalf of his country, and he has given of his best during the past four years.

Hankering To Seafarer

Better Work Done When Money Allowance Is Curtailed

Here is something nice from an educational point of view. Dean Hunsberger of Midland College at Fremont, Neb., is the spokesman. He has been studying records made by students at his college to find out the depression and before, and his conclusion is that since money allowances for students have been sharply curtailed and in many cases cut off almost entirely the students are doing better work and taking higher standing. He has always held that sufficient money for a student is a handicap and now is more certain that ever. Of course that claim has been advanced many times before, but Dean Hunsberger says he has proof of it now which cannot be questioned.

A person is getting on in years when young folks are shocked if he does the things they do.

Not A Mild Explosion

When Canned Food Blows Up Notes In Life Can Start

Canned food, exploding in the heart of a human, served ol' Mantle, warned a family just in time to escape from the flames and no doubt there are many occasions on which such notes would be made by an explosion of this kind.

Tuesday night a couple of young fellows gained the knowledge unbidden by accident. They were mooseshooting in Limbury, Ontario, from Peterboro' on a week-ender day and had stopped to prepare a meal over a small open fire. A can of spaghetti was opened and put on the fire, the meal except that neither boy knew how to cook it. Finally it was decided to drop the can right into the flames and let it heat up and then open it, and divide the contents.

They waited for perhaps five minutes, then, right near them, they heard what they thought was a shot. Then another shot. Then a regular gun being fired. "Someone is shooting at us," said one of the boys. They other fell backwards over the stump on which he was sitting. When he got up again he viewed his head across his face and brought it away crimson in color. "I'm shot," he declared, terrified.

The writer can vouch for the truth of the story for he was the one who was shot. He was not shot seriously, however, for the blood turned out to be catsup from the exploding tin.—Limbury Post.

Honey Crop Increasing

Production And Value Higher, Exports Increase 22 Per Cent.

In 1933 Canada produced 12,843,000 pounds of honey which at an average of 9 cents per pound was valued at $1,170,000. Quebec, Saskatchewan and Alberta show sharp increases in production according to the Dominion Bureau of Statistics, with a decrease in Manitoba. While production is up some 70,000 pounds, on account of the average value being up a cent a pound the total crop value shows an increase of $336,700.

Canada's exports in honey during 1933 increased 22.1 per cent over 1932 and the value increased 43.9 per cent. Exports amounted last year to 2,506,779 pounds and these were valued at $301,057.

The importance of beekeeping and honey production from a domestic and export standpoint is increasing annually and the producer must become up-to-date in his methods if he is to take full advantage of the market opportunities offered. The Dominion Apiarist, of the Dominion Department of Agriculture recognizes this in giving advice against natural swarming, and the use of pour combs in hives.

Natural swarming is no longer desirable, because it reduces the efficiency of the apiary by disorganization. With proper care and management natural swarming can be easily prevented or controlled.

Natural swarming is brought about by certain conditions that cause an overcrowding of the brood nest. This does not necessarily mean that the brood chamber itself is congested, for swarms may issue from weak as well as from strong colonies. In fact, it is usually the medium sized colony that gives the most trouble.

Swarming may be prevented which incite the bees to swarm. Bees kept in small hives Low apt to swarm than those kept in large hives because there is usually insufficient room for the proper expansion of the brood nest. Moreover, hives with too much storage room, for instance, with its striking marble fireplace and mantelpiece supported by two sculptured marble figures is a stately room and most pleasant of aspect.—Overseas Daily Mail.

Hold An Executive

"I'm sorry," said the diner who begged to get away with it, "but I haven't any money to pay for the meal."

"That's all right," said the cashier "We'll write your name on the wall and you can pay the next time you come in."

"Don't do that. Everybody who comes in will see it."

"Oh, no they won't. Your overcoat will be hanging over it."

OCCASIONAL WIFE

By
EMMA BOBB WEBSTER

Author of "Jorette", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to keep it a secret for awhile apart until Peter is able to provide for her. Peter is given an engaging scholarship abroad and Camilla in the meantime is to take full advantage of the married daughter of a wealthy family. She is to meet "the right people" who she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter Sylvia, Todd, Peter's model, and Geo Matson, his former room-mate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a concert to continue the guests Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to keep it secret but his marriage to help Peter's career. Avis accuses Camilla of doing this. Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints

(Now Go On With The Story)

CHAPTER XLVII.

The three exclamations over the discovery were almost as one breath. But the reactions of the trio were as different as the three individuals. Peter sprang toward the scattered pieces of plaster and sank down on his knees with a groan like a great building collapsing in an earthquake. Avis' expression of horror changed suddenly to angry accusation as she turned to Camilla, who glanced perplexedly from Peter to Avis, and was on her knees beside Peter in an instant.

Their hands fumbled futilly with fragments of plaster as if they would fit them together again, then they faced each other dismayedly. For moments they seemed to be paralyzed with the horror of this unbelievable catastrophe.

Finally Camilla faltered, "Oh, Peter darling!"

Anger flamed in his eyes, just as Avis demanded in a shrill voice "How could you?"

Camilla looked wildly from one to the other "How could who?" her dry lips whispered.

You" accused Avis "You did it."

Camilla put up a protesting hand to push back the fierce which hung from Peter's eyes upon her the room swayed and she sank down down into a deep black abyss. Above her she heard voices, faintly clamoring footsteps that received into stamped ing thuds, confusion, that seemed to bore into her head and trample her into oblivion

• • • •

Voices sounds rushed back to her from a void her head where was she what had happened" She tried to raise her hand but it would not move it was too great an effort to open her eyes.

The medley of sounds resolved into distinct words Ah! Yes she remembered They had found Peter's statue destroyed and somehow it had been too much for her Her thoughts slipped away again and when she rose it was Avis declared angrily. "Of course she did it. Jealous!"

That was it Avis had accused her of jealousy of Peter's profession work and Peter Peter had looked at her as if he believed it Peter angry reproachful, accusing eyes had added fuel to the fire and then over the discovery, until she couldn't bear it It was all so horrible Why couldn't she have kept her senses and defended herself against them" Why had they accused her, she wondered dully, not understanding Oh, yes, she had been alone in Peter's room alone in the dark, when he and Avis came in and discovered the broken statue

She moved her hands protestingly opened her eyes Camilla was bending over her Tears was beside her He said, "She'll be all right now Just let her rest Don't try to talk to her"

Camilla was grateful for that advice She wished they all would leave, she needed to be very still desperately to stop, and could not Why didn't they go? Camilla pressed Leave her alone. She can't help crying That's the way women react to a fault like this, either laughing hysterically or crying Let's all get out of here There, honey," she stroked Camilla's hand, "you just need to rest Try not to leave here tonight " Calhie's voice was gentle with sympathy, but edged with resentment when she spoke to the others, and managed to persuade them all to leave

Finally the door close after them and the girl sat silence which expanded and filled the room Camilla was quiet now, her eyes closed She felt rigidly her pain numb, wondering if she were entirely alone Someone stirred across the room, came toward her where she lay on the couch and stopped beside her It was Peter Her heart ached when she saw how haggard and pale his face was

He said quietly, in a hollow voice "All right?"

She nodded, and slow tears rolled weakly down over her temples. Peter knelt beside her, his face held her head toward him, appealingly, and whispered, "You don't think I did it, Peter"

He did not touch her, drew his hand across his eyes, wearily. "I don't think. What's the use, anyway? It's done."

"But, darling Peter," she insisted desperately, "Surely you can't believe I would do that to you"

"Of course not," he replied dully, as if what he might believe was of little consequence. He was strangely grieved, angered, puzzled. Accusing anyone, or thinking anything, made no difference.

The thing on which he had labored and agonized for weeks, his possible opportunity for the Paris scholarship, his whole ambition, it seem now all this someone had destroyed in one maddened moment. Who, how or why was of no importance

It had been Avis who insisted that Camilla did it for revenge for his neglect of her and attentions to Avis. No one else had agreed, but everything had been so confused. It didn't seem plausible that Camilla could have done the thing, even if she were jealous. Still—someone had to do it they had found her alone in the

Swollen Joints

often are a warning that your kidneys have become damaged and need attention. Don't suffer such pain. Take Gin Pills to obtain relief and assist your kidneys to function properly.

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr Wernet's Powder is the world's largest-power and prescribed by leading dentists it holds teeth so firmly that they feel comfortable that all day long you'll forget you even had false plates Leaves no unpleasant gummy paste Keeps mouth sanitary, breath pleasant Don't risk your set you can buy pat cost a small as 25 druggists

darkened room but what did it matter now"

He dropped listlessly into a chair beside her covered his face with his long shapely hands There was a long silence while the thoughts moved in relentless circles always back to the same unalterable tragedy

Camilla sat up slowly straightened her hair and rumpled clothes Peter looked up inquiringly

"I must go home," she said wearily

"You are in no condition to go anywhere" he protested Here let me help you get your dress off so you can rest You are going to stay here all night tonight"

"But you don't want me to—"

"Sure I do. Why not." Naturally, I don't feel very friendly toward everything Besides I shouldn't let you go home alone, and it would be much better if you stayed here

There seemed to be nothing else she could do Under any other circumstances, she would have stayed gladly to try to comfort him in his grief and disappointment He had said he did not believe she was guilty but there was that horrible weight of injustice that dragged at her heart and made it so difficult for her to say or do anything And Peter had said, "Naturally, no reasonable person could change it It could believe she was guilty, and still deny it It made no difference to him

• • • •

The guests had gone excited, in the truth event of the evening, interesting her verdict Avis was alone, as horrified as she involved in the frantic event of the evening It wasn't just Peter's sculpture and his ambitions that were shattered, which had pre-eminence in her thoughts Most important of all, it was the sudden shattering of her own hopes and ambitions, which her career was to be the most prominent person She had proceeded confidently, tactfully with her influences over Peter Everything had gone beautifully until this evening Her sympathies gradually swerving in her favor, his criticisms of Camilla increasing gradually, his admiration and gratitude to her becoming more involved, his success imminent, his dependence upon her from Camilla all but accomplished

Had she been too bold in her confidence" Had she taunted her power over Peter too soon, and Camilla had taken this revenge" There could be no other explanation Her grief was overwhelmed by a flood of defeat and anger She was cornered, no way out now Still if Peter were made to believe that Camilla had done it, he would abhor the thing to him. it was the end for them. He never would accept for his wife the woman who had deliberately destroyed his chance to become famous Perhaps, after all, she still held the winning hand

She wondered what might be going on now behind that other closed door. Poor Peter was so stunned and grieved that he couldn't think, yet. And with Camilla just recovering could that faint have been passed to favor her innocence? very little probably would be said by either of them to-night But she was glad that she had planted that little seed of suspicion at the first moment the only time that would have been opportune for it She could not have endured until tomorrow, knowingly tried Peter that she suspected Camilla Impulsively naturally in such circumstances she had spoken

ARM IN SLING WITH NEURITIS

A "token of gratitude" this woman says she is giving when she writes of her relief from neuritis.

"For twelve months I have had neuritis in my arm and up till the last two weeks have had to carry it in a sling. Since then I have abandoned my sling, am able to sleep undisturbed and can perform household duties that previously I would not have done These benefits I have received from Kruschen Salts The first all happened in two weeks. And I am optimistic enough to think that in another fortnight I shall have said good-bye to neuritis once and for all Until this a testimonial if you choose - to use it in a token of gratitude." —Mrs. F. E. L.

Neuritis is a result of impurities in the blood And it is unpure blood, circulating all over the system and setting up inflammation in the tissues that causes those excruciating pains Kruschen Salts can be safely trusted to set the matter right Because Kruschen contains just what Nature needs to permeate your internal organs back into a healthy, normal condition

Little Helps For This Week

"For thus saith the high and lofty One that inhabiteth eternity, whose name is Holy, I dwell in the high and holy place with him also that is of a humble and contrite spirit, to revive the spirit of the humble, and to revive the heart of the contrite ones" Isaiah 57-15

Without an end or bound
Thy life lies all outspread in light
Our lives feel Thy life all around.
Making our weakness strong, our days wax bright
Yet it is midst wilderness or sea,
But the calm gladness of a full eternity F. W. Faber.

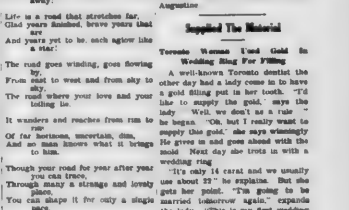
O Truth who art Eternity; And Love who art Truth: And Eternity who art Love, Thou art God, to Thee do I sigh day and night. When I find knew Thee Thou liftedst me up that I might see there was something for me to see, and that I was not yet such as to see. And Thou streaming forth Thy beams of light upon my weakness, mightest send back the weakness of my sight and I trembled with love and awe, and found myself exiled far off from Thee in the region of unlikeness - St. Augustine

Supplied The Material

Toronto Woman Used Gold In Wedding Ring For Filling

A well-known Toronto dentist the other day had a lady come in to have a gold filling put in her tooth. "I'd like to supply the gold," says the lady "Well, we don't as a rule" he began. "Oh, but I really want to supply this gold," she says wiseingly He gives in and goes ahead with the job. Next day she trots in with a wedding ring

"It's only 14 carat and we usually use about 22" he explains. But she gets her point. "I'm going to be married tomorrow again," explains the lady "This is my first wedding and if I have to lose my tooth I can still wear it without my second husband knowing anything about it." The dentist worked the yellow metal home



Forgotten By Time

Lost Race Of Primitive Savages Found On Papuan Island

Mrs. Rita Baker, a young British woman, has returned to England stricken with malaria after spending two years enduring months among a "lost race" of savages

Mrs Baker is the wife of Dr. John H. Baker, of Oxford, leader of a scientific expedition sent out to the New Hebrides, in the Pacific, by the Oxford University Exploration Club

"Some of the islands" said Mrs Baker, "had never before been explored by white men. The natives were among the most primitive aborigines - a race forgotten by time

"I used to go out with the women to cultivate the fields in the daytime. At night I mess with them in their huts. Often there would be as many as eight women to one hut.

"Presents were unknown on the island, and the men had to bust with bows and arrows."

Passing Of Fashion

Long Skirts Are Great Inhibitors And Stop At Nothing

Everybody knows that the Japanese are a wonderful people but few of us understand just how wonderful they really are Every day brings new proof Virginia tobacco growers, according to a Times dispatch from Danville are greatly disturbed by the threat of an imitation Virginia cigarette made from native Japanese tobacco and flavored with a German extract from cheap Virginia leaf The ingenious little Asiatic people who can imitate foreign electric bulbs and bicycles and grasshoppers are now imitating Nature's work in our Piedmont tobacco fields

Where will they stop" The prevailing impression is that they will stop at nothing Universal unemployment threatens the nations because the Japanese will soon be making all the Grand Rapids furniture in the world, and all the Detroit automobiles, and all the Swiss cheese, and British Southdown mutton and French champagne and Mexican tamales, and Brazilian coffee, and Australian wool

In every industrial trouble anywhere in the world to-day the motto is "Cherchez le Japonais". From the size of the Japanese "menace" there must be about 900 million Japanese in the world One of them must be so clever as a thousand devils New York Times.

THE RHYMING OPTIMIST

By Aline Michaelis

A SINGLE PACE

"What shall I do with my life?" you say
With the years that are coming,
Many years or days?
And while you wonder, life slips away!

Life is a road that stretches far,
Lovely roads beside, brave years that are
And prayers yet to be, each agleow like a star!

The road goes winding, goes flowing by,
From east to west and from sky to sky,
Travel where your love and your lotting lie.

It wanders and reaches from rim to rim
Of the horizons, uncertain, dim,
And no man knows what it brings for him.

Though your road for year after year you can trace,
Through many a strange and lovely place,
You can shape it for only a single pace.

All of life that is given to any man
To fashion after his hopes' bright plan
Is a breath's brief space, is a footstep's span.

The regular monthly meeting of the W. I. will be held at the home of Mrs. Edward Graham on Thursday, June 14th at 2:30 p.m. Members are asked to bring their needle work.

LOCAL NEWS

Mrs. G. Sullock of Regina is visiting in the Fort.

The Fort was well represented at the basketball game in Edmonton on Saturday evening, when the "Grads" and "Tabs" played the first game of the series for the Underwood Silverware. The Grads took the game by a score of 41 to 21.

On Monday evening the Grads again showed up in splendid form and defeated the "Tabs" team by a score of 36 to 31.

The Grads having two games out of the series, it certainly looks like they will retain the trophy for another year at least.

Agricola News

Several people from the Agricola district went to Bremner to see the boys soft ball league game between Lakeside and Bremner, the score being 4 to 24 in favor of Bremner.

Another game was played Friday by Lakeside and Agricola, Lakeside winning by a large majority.

A number of the young folks attended the dance at Brookville, a good time was reported by all.

"I regret Gladys dear, but I have to break off our engagement,—Bodie informed his fiancee. I'm still want to be friends with you, though, and see you occasionally."

"Very well old thing," she retorted. "Cheerio—see you later."

ALBERTA PACIFIC GRAIN COMPANY

FORT SASKATCHEWAN RECORD

VOL. 13 No. 12 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JUNE 20th, 1934 $1.50 PER YEAR IN ADVANCE

Action Taken to Form Local Telephone Company

Action has been taken to form a local telephone company comprising of circuits No. 5, 6, 15 and 27. Information regarding the possible cost, terms under which the present lines can be acquired and the estimated cost to subscribers under the new ownership has been obtained.

Arrangements have been made to have a representative from the Alberta Government Telephones Department attend a meeting of prospective and present subscribers at Yorkville School House on Monday evening next at eight o'clock. Anyone interested in the formation of a rural telephone company are invited to attend.

MUNICIPAL ROAD GRANTS

Allocations of government grants to municipalities and improvement district throughout the province, for road work purposes, have been made, it is stated by Hon. O. L. McPherson, minister of public works, and each district is being notified of the amount available for its season's requirements. This is the first issue of grants to municipalities for three years, no such grants having been paid in 1932 or 1933. The total apportionment this year, as voted by the legislature, was $360,000, which has been allocated on a basis of population, mileage of roads and construction costs.

Gibbons News

Owing to the rain of last week the roads have been very rough in fact for 3 days the Highway was only a byway. Conditions have now improved.

Your Scribe is quite a Prophet for our baseball boys have now got into their stride, winning two straight defeating National Homes 11 to 7, and Empire Hotel 9-3. This is just the start, watch us go now!

A big Juniors' game will be played on Saturday, June 23rd between our boys and Redway.

The garden party of the A.W.A. at Mr. R. Goddards was postponed until June 30th.

WHEAT SAMPLE 20 INCHES LONG IN FORT SASKATCHEWAN

A sample of wheat 20 inches long and fully headed out, was brought into Mr. Hill, Quaker Elevator agent at Simmons siding taken off the farm of Philip Althiem. The stock measured 3 feet from the ground and showed excellent strength.

GOOD HOPE NEWS

Mr. J. C. Cripps left for Ontario last Monday.

Miss Verna Cripps made a flying visit to Good Hope on Monday.

The Senior U. F. A. held a meeting in the school on Monday, June 18th. Mr. Carl Dittrich took the chair and Mr. Harry Brunton acted as Secretary for the meetings.

Mr. Brunt and Miss Eva Moyer are delegates to the annual Convention of the Clover Bar U.F.A. Provincial Constituency Association.

Milton Moyer is a Junior delegate to the Clover Bar Constituency Convention.

The species of grasshoppers chiefly involved in the outbreaks in the Prairie Provinces are the lesser migratory grasshopper, the clear-winged grasshopper, and the two-striped grasshopper.

He: "You look like Helen Brown."
She: "Thanks! I look worse in white."

Reid Is Speaker On U.F.A. Sunday

Provincial Treasurer Says It Duty of All to Seek Solution

It is the duty of every citizen to seek a solution to the present economic problems, Hon. R. G. Reid, provincial treasurer told the audience at the U.F.A. Sunday meeting in the Partridge Hill United Church last Sunday.

In his address Hon. Mr. Reid out lined the cycles in history leading up to the formation of the democratic party.

The speaker was introduced by William Gillison, president of the U.F.A. "local". During the evening musical selections were given by Mesdames Alton, Hodgens and Kulak — Misses Bonnes and Gillison.

NEW DEPUTY MINISTER

E. L. Gray, for some years provincial field crops commissioner, took over his new duties last week as deputy minister of municipal affairs, when R. English, resigned. Mr. Gray is well known in the west as a government executive, and for his work in promotion of crop improvement, and the conservation of seed grain relief and grass-hopper control.

What About Social Credit, Canada

(Continued From last week)
No. 11

J.—"Well, there's something I didn't quite get before. You mentioned something about purchasing power distributed in respect to future production. What was that? What did you mean?"

W.—"I'm glad you mentioned it. I had meant to tell you about it some time ago. Douglas says that the only way in which our system runs at all is by the continuous loaning of money by the banks to finance future production. That is, it is only by hoping or making goods, whether we need them or not, that we can't get enough purchasing power to buy the goods that are already on sale."

J.—"By Jove! And that means that when the banks begin calling in loans, and refusing to renew or make new loans, that we are on the verge of a depression."

(Continued next week.)

"My Scotch uncle sent me his picture this morning." "How does he look?" "I don't know, I haven't let it developed yet."

Edmonton's 55th Exhibition July 16 - 21

Very few class A Fairs in Western Canada have been in operation annually, continuously, as long as the Edmonton Exhibition, which on July 16th will open the gates on the 55th annual Fair in that City The Show was first held in two rooms of the Hudson's Bay Company Fort, and later on Fair Grounds in the river flats, the present grounds being put into use in 1910

It is not possible to mention all the interesting classes. The most outstanding are of course those for Horses, Cattle, Sheep and Swine, but great interest is also taken in the competitive classes for grains and vegetables, flowers, poultry, pastry, needlework, cooking and children school work. A great effort is being made this year to feature unfarm exhibits, such to include farm produce grown by farmer living on his farm of not less than 40 acres. The class calls for Alberta grown fruits, fresh or preserved, mineral vegetables, table vegetables, seed grain, sheaf grain, forage plants, honey, cheese and eggs (two of the latter three will answer), and home cured or canned meats.

The Directors have increased the prize money by approximately 20% over the amount offered last year. The Prize List is now available and a copy will be mailed free, on request. Exteries close on June 30th.

As for attractions, there are many outstanding, new features to interest and entertain visitors to Northern Alberta's Big Fair this year. They include a New Midway: "The Royal American Shows". Farm Tractor Races. A Television Show, and a Mechanical iron man weighing 7000 pounds, called "Alpha" the Robot. He smokes, runs a car, talks, and obeys the commands of the human voice. There will be six days of horse races and a startling grand-stand production, afternoons and evenings, "The Show of the Century".

The advance sale of tickets at a greatly reduced rate which was so popular last year will be repeated this year, and tickets may be purchased from news dealers and Postmasters throughout Northern Alberta or you can mail your dollar direct to the ticket committee, Edmonton Exhibition Assoc. Limited.

Write for free prize list today as enteries close on June 30th, and plan to holiday in Edmonton Fair Week. July 16 to 21.

War Debt Revision Looms

Great Britain's action in deferring payment of the $261,791,000 instalment due the United States on June 15, has thrown the whole war debt problem again prominently into the field of international controversy. It poses the United States government with the inescapable necessity of initiating discussions preliminary to a complete review of the war debt situation. It forces a *showdown*.

Great Britain, of course, will not be satisfied with a mere review. It wants revision of the terms of settlement: revision drastically downward. It wants as much consideration from its creditor as it is creditor; had given its debtors. At the very worst, it seek an generous treatment on principal and interest, as was given France and other countries by the Hoover Moratorium.

In failing to make even a so-called "token" payment on the instalment due June 15, Great Britain informed the United States that the terms of the agreement between the two countries in respect of war debts imposed "a burden which was both unreasonable and inequitable in relation to other countries." The facts justify this statement. Whether intentionally or not, Britain has been adversely discriminated against.

Great Britain, according to the records, borrowed $4,377,000,000 from the United States, a large per centage of which was not for its own use, but on behalf of allied countries during the war. The money was spent in the United States for war material and was the real foundation of the extremely high wages paid munition workers in that country during the war. Replace the Balfour agreement which fixed the terms and conditions of repaying the war loans, Great Britain has made instalment payments aggregating $2,023,000,000. Because of the high comparative interest rate paid by Britain, however, London is still indebted to Washington in the sum of $4,713,793,000. That is to say, after paying back more than two billion dollars, Britain still owes more than in the original debt.

Obviously, the situation clamors for reasonable adjustment from that aspect alone. There are other, equally cogent, reasons why revision should be made. There are irrefutable arguments why the debt position should be revised finally and amicably. That war debts should remain a subject of international controversy, cropping up periodically to stir prejudices and animosities, is a reflection upon the intelligence of the two great English-speaking nations towards whom the world looks for preservation of concord among the countries of the world.

Great Britain's agreement to pay instalments in the amount of approximately $160,000,000 was predicated, in the first place, upon expectations of a similar amount being paid by France and other European countries in respect of war debts due London. Britain lost more than she borrowed. In order to avoid financial and economic chaos, however, the British government decided to suspend all claims against debtor nations for payments on war debts, and takes the position now that, if it must pay the United States in full, it must exact payment of a corresponding amount from its own war debtors. The position is quite understandable and undoubtedly reasonable.

"Such procedure", said the British note to Washington, "would throw a bombshell into the European arena which would have financial and economic repercussions over all five continents, and would postpone indefinitely the chances of world recovery."

Consequently, Britain politely suggests the United States should do its bit "to speed world recovery by recognizing the realities of the situation and revising present agreements on a payable basis."

The crux of it is that Great Britain is unable to escape payment of its indebtedness. Suggestions have emanated from London, from time to time, for liquidation of the entire obligation by lump sum payment. Washington has not viewed this suggestion favorably, heretofore. In fact, an intransigent position has been taken by some of the most vocal of American legislators who take the "pound of flesh" viewpoint. Furthermore, Britain's failure to make even a payment on account the "token" payments such as were made in June and December 1933 — has been attributed by the Hawes-Act, passed this year, which specified that any nation not making payment in full on the due date, would be considered as in default.

The British note is couched in language which the people of Western Canada will appreciate and approve. It strikes a sanely note of independence and forthrightness. While declaring payment would be deferred until "it becomes possible to discuss an ultimate settlement of inter-governmental war debts with a reasonable prospect of agreement", the note asserts the British government has no intentions of repudiating its obligations.

Moveable Birthday Date

A Milwaukee man's sliding scale of birthdays brought dismissal of his application for an old age pension. He was born on 45 in a 366 leap year, since policy, 25 in county relief records, 66 in his marriage papers, and 70 in his pension application. Seventy is the minimum age for eligibility to a pension.

Are Unknown Specimens

Three crane flies, collected by King Leopold of Belgium, were recognized for an old age pension. He was born on 45 in a 366 leap year, since policy, 25 in county relief records, 66 in his marriage papers, and 70 in his pension application. Seventy is the minimum age for eligibility to a pension.

If it wasn't for the help of a woman most self-made men would be out of luck.

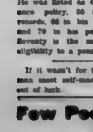
Sailor — Now, now, don't get in a stew.

Few People Escape Attacks Of Summer Complaint



Summer Complaint may be slight, or it may be serious, but you can't tell which it is going to be at first.

Allow the profuse diarrhoea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels go at once to your druggist and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 68 years.

Making China Seas Safe

Marine Department continues Work To Provide Guidance For Ships

Typhoons do not tell the whole story of the China Seas. Fog may annul the shipping on the Chinese coast at almost any time, and storms made prudent of the typhoon are frequent. The coast itself is an dangerous one and the men of its isles as treacherous as any in the world (most words and almost almost the strong) and the seamen who man Chinese junks are no mean masters of the ancient craft of navigation.

The lighting of the China coast is not a century old. The National Lighthouse Service was founded about the middle of the nineteenth century by Sir Robert Hart, who was authorized by the government of the day to start a system of lighting for the benefit of navigation. Sir Robert possessed himself of a few published charts of the coast, but all ships of foreigners established the nucleus of a service which, in the Chinese Maritime Customs, grew much assistance not only to ships at sea but to the customs craft navigating the rivers of China and in particular the Yangtze

The romance of the Marine Department of the Chinese Maritime Customs has yet to be written. The organization, originated by Sir Robert Hart and his devoted helpers, has developed unobtrusively, and its traditions and efficiency have been maintained by successive Inspectors-General.

For the last five years or so bandits have ravished the staff engaged in marking the coast at night. They have removed beacons and buoys which have been promptly restored and have subjected the Customs launches to much assistance malignance that those craft now have to be protected by metal plates and wire netting. The Customs Head Office, Anking, the capital of Anhwei, there in Christmas Island a favorite spot for the bandits to "work" the coast. Twelve relighters of lighthouses or lightboats occurred there in 1931.

Until the year 1931, the coast was kept open. The Tungting Lake has been lately surveyed. Improved marks have been established and the Min River has been added to the list of aids of knowledge and given it to the river pilots in thousands of notices.

Flag Made By Prisoners

Unless Good Security Made to Germans Will Be Interned

Made in a German camp during the World War, a British Union Jack was used during the unveiling ceremony of a war memorial in Manchester, England. Ex-Petty Officer James Allen, who brought the flag home, said it was made by prisoners in Spreitau, Silesia. "A Russian, who was allowed out," he said, "used to smuggle in a piece of cloth at a time, and in the tailor's shop another Russian secretly made it up to the instructions of the British. We professed it for all the funerals of our of the British prisoners, and in all it was used on 21 such occasions. Only once did the German authorities take action. The flag was drying on the wall, and when an inspecting general saw it he exclaimed: 'Mein Gott! Englands' flag!' and passed on. Each member of his staff did likewise."

Japanese Trade Invasion

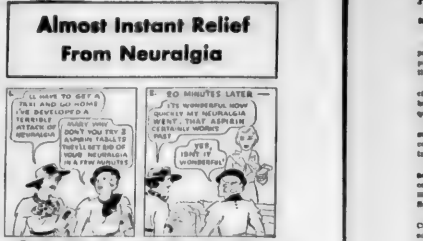
New Penetrating Traditional United States Markets

Japan's steady successful invasion of traditional United States export markets was announced in the department of commerce annual world economic review today. The report showed larger Japanese shipments of competitive articles to the United States, big export increases to Latin America, a Japanese victory over American manufacturers in the Near East, and increasing inroads in Europe, Africa and elsewhere.

Sweet Is the Sole Recipe

Col. John Hopton, a famous rifleman who is well known in Canadian and other overseas marksmen who have competed at Bisley, was buried in accordance with his expressed wish, at the firing point of the 1,000 yards range on his own estate, in Hertfordshire. He had competed at Bisley Empire meet for 38 years.

Almost Instant Relief From Neuralgia



For Quick Relief Say ASPIRIN *When You Buy*

New comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia . . . the world over relief. It is said, get genuine!

How results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve — disintegrate, in the amazing space of two seconds after touching moisture. And hence to start taking relief of pain a few minutes after taking.

The distribution of the effective agent, tells the story. An Aspirin Tablet starts to dissolve almost instantly by you swallow it. And that is ready to go to work almost instantly.

When you buy, though, be sure to get genuine Aspirin. To be sure you get ASPIRIN, *say quick brief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.*

Zoo Fatality

Lions In Cage Kill Victim As Horrified Spectators Watch

While a crowd of horrified spectators looked on, Leona in an open air zoo at Whipsnade, Eng. killed a zoo employee who had gone into their pit to recover a visitor's hat.

The owner of the hat and several other persons who tried to save the victim, Stanley Lane, were driven back by the lions, two of which were eventually killed by keepers before they could recover Stanton's body.

Stanton, employed in the catering department of the zoo, apparently decided suddenly to attempt to retrieve the hat and went into the enclosure between the outer barrier and the railing surrounding the pit in which the lions are kept.

As he crawled along the top of the inside railing two of the lions reached through the bars and began mauling him.

Stanton was unable to get away from the lions' claws and several spectators went into the place to try to pull him away, but were not successful as the two other lions joined in the attack through the bars.

Stanton then fell into the pit, striking his head on the concrete about 16 feet below. The lions dragged him further into the pit and killed him as the horrified spectators screamed and several women fainted.

The keepers had to shoot two of the lions before they were able to drive the others into their cages at the far end of the pit.

Shined Shoes Of Prince

Veteran Bootblack Had Many Experiences In Fifty Years

Hardy Best, of Digby, Nova Scotia, veteran bootblack, once shined the shoes of the late King Edward VII., who was then Prince of Wales and a visitor in Toronto. He will celebrate his 75th birthday in July.

A master of his trade with more than 50 years' experience, he has put up his "old stand" in the same place for the past 38 years. When he was younger he travelled, and chose to which he applied polish and brush were the pride of their owners in New York, Toronto, Halifax, Saint John, and many other cities.

"Hardy Peg," as he is called, says that he has seen many changes, but looks forward to a bright future because he is drawing an old-age pension.

Grandma was helping Peggy make out a list of little guests for her birthday party.

"How about the Morton twins?" grandma asked.

"Well, there's no need to ask them both," Peggy answered, "they're mostly alike."

Invents New Material

Belgian Major Says It Will Make Airplanes Fireproof

Major Van de Hollebem of the Belgian Army engineers has invented a material which will make airplanes fireproof. Plates of asbestos are soaked in three chemical baths and then baked at high temperatures. Tests were made recently near Brussels. To demonstrate its value documental were put into the bonne made of the new material, and these were plunged into a blazing fire for a quarter of an hour. The papers received no injury whatever. A miniature monoplane was also covered with this preparation and then soaked in gasoline and ignited. The flames burned themselves out without any injury to the plane. To show his confidence the major sat for 10 minutes in the pilot's seat with the plane blazing all round him. The temperature in the cabin never rose above 74 degrees.

Animals As Witnesses

Were Used in Sardinia Until Few Years Ago

Animals were used as court witnesses in Sardinia up to a few years ago. When a solitary householder killed an alleged burglar he was brought to trial and made to swear that the homicide was justifiable. The oath was taken before one of his dogs, cats or birds that witnessed the killing. The animal did not manifest some contradictory sign the prisoner was set free.

Germany ranks first in the number of motorcycles owned and operated.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile
—Without Calomel

You are "feeling grouch" simply because your liver isn't producing its daily two pounds of liquid bile. Without bile to help digest your food it just "lays there" and decays in your stomach. Gas bloats up your stomach. You get constipated. Your head aches and you feel sour and sunk.

Your liver need be a lazy one, though, to make you feel that miserable. Calomel, mineral water, or a mere laxative can't be relied on to get those vitally needed liver bile flows. Something the mild action of Dodson's Liver Tone is designed to do.

Take Dodson's Liver Tone. Purely vegetable. Harmless. Mild. Calomel (mercury). Safe. Ends constipation. Just see how much better everything is after a few doses. Only 60c at druggists.

Dodson's Liver Tones

Improves flavour of meats, fish and vegetables. Pays for itself many times over. All dealers, or write—

Agricultural Notes

Sheep Shown Of Interest To The Western Farmer

The quick-freezing methods of preserving foods still promote many problems for the plant breeder and the research chemist.

The highest grade alfalfa and clover meals are characterized with bright green colour. Those of poor quality are coarse and yellow.

The use of resistant varieties of smuts seems to be the best way of combating club-foot disease of those turnips.

As an average of all Eastern Canada, there were by the 1931 census only 61.2 acres in crop per farm [illegible] Small Fruits 11.6 acres, 31 Minor Fruits is 56.1 in Canada.

According to a survey of Eastern Canada, two-plough tractors ploughed four times as much per day as two-horse teams, and at a cost of $1.20 less per acre.

Experiments are under way on Pacific Coast to support ships in the feasibility and economy of using "dry ice" (solid carbon dioxide) as a refrigerant for foodstuffs in transit by water.

A new process of sterilizing ice has just been developed in Germany. The sterilized ice is said to "preserve cool ice" to distinguish it from ordinary artificial or natural ice. Cold Storage Trove Letter, Dominion Department of Agriculture

The silverfish or fish moth is becoming increasingly notorious as a household pest in Canada, particularly in urban sections of Ontario and Quebec. These moths have a special liking for artificial silk (rayon) products.

Disintegrated peat is finding an important place in the top dressing of golf courses and lawns. Its value for these purposes is greatly enhanced if it is first composted with a good nitrogenous quantity of manure, and the resulting product screened.

In the Maritime provinces and Quebec wood domestic bake has largely been used in the past for boil earth-meat. Good results as a rule followed the use of this material, but if wire found in many cases that there was little response from repeated and continued applications.

The grey moth which has cost the New England States an enormous amount of money in lo-pyre it under control for the first found in the States of Massachusetts in 1909 but it was not until 1924 that it gained an entry into Canada in spite of the efforts of the officers of the Dominion Entomological Branch.

In purchasing a fish meal, the guarantee should be carefully considered bearing in mind the desirability of a comparatively low fat content, combined with high per centages of protein and bone phosphate. If practicable, a sample should be obtained and examined as to freedom from rancidity.

Canada imports millions of pounds of dried apricots. Recent investigations at the Dominion Department of Agriculture Fruit Station at Summerland, B.C., have shown the possibility of proper varieties, cultural and processing methods which may make Canada independent of outside sources.

Soybean flour, on account of its extremely high starch content, especially valuable for diabetic purposes. The flour is being successfully used in making bread, biscuits, muffins, pastry, etc., and by reason of its composition increases the nutritive value of those products. Soybean Bulletin, Dominion Department of Agriculture.

The Way Of a Prince

During one of the visits of the Prince of Wales to the Canadian west a nervous mayor, after welcoming the Prince stepped into the car before His Royal Highness, to the consternation of the people of the town But the Prince stepped in, bowed, smiled and waved his hand as though nothing out of the way had happened. So much for noblesse oblige!

Actor: "As a matter of fact, I have received letters from ladies in almost every place in which I have appeared."

Rival: "Landladies, I presume."

Once Important Custom

Custom Is Said Rising In Many Canada Towns

The well-known recitation, "Curfew Must Not Ring To-night" was written about the curfew bell of Cheriton Church, near the Thames in Surrey, where it rings every night through the winter until March—at 8 bus dons for centuries.

Cheriton is not the only place where the curfew can be heard for there ancient bells are still rung in many towns and villages. This shows how general the custom was once, and indeed, the ringing of the curfew was once one of the most important customs. Wherever there were people living, there the curfew had to be rung. Those were the Middle Ages.

Without the conquerer was the first king to make that custom a strict law, and every night at eight o'clock the curfew bell was rung, which meant that all fires and lights had to be put out and everybody had to go indoors. Those found outside by the king's soldiers after the bell had rung were severely punished. As the years went by the rules were made less strict and the hour of bedtime grew later.

It is said that only in one place was the curfew allowed to be rung later than anywhere else. This was at St. Mary le Bow church, Nottingham in Berkshire where the people rang the bell to welcome William after his victory at Hastings. As a reward for his welcome the new king granted permission for the curfew to be rung at nine o'clock at night.

The reason for the curfew was that in those early days all the houses were made of wood and thatched roofs. There were no chimneys and the smoke had to escape through a hole in the centre of the roof, and the danger of fire was great. To prevent this happening at night the rule of putting out all fires was strictly enforced. They were usually extinguished by placing over them a large copper hood.

Planting Perennials

When Once Established Bed Will Last For Years

Most perennials should be planted early. A bed composed of poppies, delphiniums, iris, oriental poppies, phlox, Chatterbury bells and other perennials will last for many years, and it is difficult to work it much once such flowers are established. It is best, however, to have the ground prepared before planting and it must be dug thoroughly and plenty of fertilizer worked in. Drainage must be provided as a perennial bed that stands under water in the early spring, will soon lose much of its vigor.

Care should be exercised against over crowding as this will cause much trouble later on, and make difficulty in removing weeds. With many of the perennials, particularly the taller growing varieties, and of course the biennials, such as Sweet William, it will be best to move every two to four years, as clumps die out in the centre and new flowering areas to give better results than old plants. Most of this dividing and resetting will be greatly appreciated, though there are some exceptions, notably the oriental poppy which is best moved in August, and iris and peonies which are usually shifted in September.

Bad Cold Thrown

A man went to his doctor and requested treatment for his ankle

After a careful examination, the doctor replied: "I can't see how you been going about like this!"

"Two weeks."

"Well, man, your ankle is broken! How you managed to get around is a marvel. Why didn't you come to me at first?"

"Well, doctor, every time I say something is wrong with me, my wife declares I'll have to stop smoking."

Canada's Hog Marketings

In twelve years Alberta's hog marketings have increased from a total of 594,686 head in 1923 to 1,982,000 head in 1934. This province is now second only to Ontario in total marketings, and between them, these two provinces marked about 70 per cent. of Canada's contribution.

MOUSE DICTATOR IN A NEW ROLE

Dictator Josef Stalin (right) acts as pall-bearer during the Moscow rites for M. Menzhinsk head of the OGPU (secret police) and called the most feared man in Russia. Others carrying the catafalque are A. A. Khdanov, L. M. Kaganovich M. Molotov and War Chief K. E. Voroshilov.

Fluid Stops Bleeding

Ontario Physician Believed To Have Made Important Discovery

A clear, colorless fluid which, it is claimed, experiments and practical tests have shown will stop bleeding from even large blood vessels and which may have varied uses in both first-aid and surgical operations, was announced by Dr. Luigi Pancaro of Sudbury physician and surgeon.

The haemostatic Dr. Pancaro announced, is a development rather than a discovery and followed two years of laboratory work in the physician's home at Sudbury, Ont.

Dr. Pancaro experimented with dogs and rabbits and used the preparation on himself, both externally and internally before applying it to any of his patients. Other physicians have used the preparation and, it is claimed, nearly always with marked success.

The preparation has been demonstrated before Sudbury doctors in the operating room in many cases, and in special experiments with dogs and rabbits.

Dr. Pancaro said he used the preparation twice in cases of pulmonary bleeding, where the patients were sufferers from tuberculosis. He does not claim the haemostatic has therapeutical value but it stopped the pulmonary bleeding. Dr. Pancaro said he has not yet progressed far enough to prove its value definitely in cases of internal hemorrhage.

Dry on a house wall is usually a protection from dampness, rather than a menace, unless there is a defect in the wall.

Use a tablespoonful of milk in which a little brown sugar has been dissolved to glaze cakes and pastry

Supplied Spruce For Planes

R.C. Man Who Died Recently Filled Contracts During War

William Henry Higgins 92 pioneer British Columbia lumberman recognized during the war as the only man in the coast province who could successfully fulfil the Admiralty board's contract for airplane spruce, has announced by Dr. Luigi Pancaro of Sudbury physician and surgeon.

The haemostatic Dr. Pancaro announced, is a development rather than a discovery and followed two years of laboratory work in the physician's home at Sudbury, Ont.

Dr. Pancaro experimented with dogs and rabbits and used the preparation on himself, both externally and internally before applying it to any of his patients. Other physicians have used the preparation and, it is claimed, nearly always with marked success.

The preparation has been demonstrated before Sudbury doctors in the operating room in many cases, and in special experiments with dogs and rabbits.

Dr. Pancaro said he used the preparation twice in cases of pulmonary bleeding, where the patients were sufferers from tuberculosis. He does not claim the haemostatic has therapeutical value but it stopped the pulmonary bleeding. Dr. Pancaro said he has not yet progressed far enough to prove its value definitely in cases of internal hemorrhage.

Made of artificial silk a new type of playing cards may be washed with soap and water without damaging

Crate Fed Poultry

A Canadian Pioneer Discussed On Poultry Opportunities

There is a brisk demand for Canadian dressed poultry in the British market and recent shipments from the Dominion have created a good impression. A recent issue of the official organ of the British wholesale poultry trade stated "What Canadian poultry we have had this year packed under Dominion government supervision and grading have been all that could be desired and it is certain that next season our merchants will be able to take any quantities that can be put up. If the Canadian shippers will only let the buyers know early in the season what quantities they can safely ship, it is certain that after the season early contracts will be made with happy buyers in Britain, especially with Grade A and B birds."

The quality of Canadian dressed poultry shipped from the Ottawa district was known in the Old Country 35 years ago, for C. F. McArthur, a merchant of Hamilton, Ontario, who was then a store-keeper and poultry raiser and buyer at Kenmore, Ontario, made the first shipments, the first of 900 birds and the second of 1,900 birds which were sent [illegible] Glasgow some of a price that netted him a very satisfactory return From then, until the present, Mr. McArthur has been buying and selling poultry and has shipped over 2,000 barrels.

Mr. McArthur says that the most money he has made since he has been in business has come from poultry. He says that before 1914 no dressed poultry was established by the Dominion Department of Agriculture and that it was not until after the war that the department began to encourage farmers to adopt it. From the time he started in the business, however, he has been in a position to farmers that to pays well to produce only quality products; or to give service. The local poultry packers who have succeeded, he claimed would, according to Mr. McArthur, be well advised to organize a crate feeding system among the farmers. Let them know there is money for good quality poultry; that the market is glutted with poor stuff; that they must work and work hard and give service, if they want to succeed "I have never seen the time when I could not sell good, well-fed, properly prepared birds," he said. "Let one farmer in a locality show what can be done in that district and he will induce the others to emulate his example It is leadership that is wanted and if the people will recognize this they have hope of success, not otherwise.

Old Cayleuse Custom

Blessing Of Rice Harvest In Very Ancient Ceremony.

The blessing of the new harvest one of the most ancient of Cayleuse customs, and the oldest historic thanksgiving ceremony in the Malay East, has just taken place near Colombo. Twenty-three elephants and over five thousand villagers participated The ceremony is known as "Aluth-Sal-Mangalla." It began with a procession to the temple and then proceeded to the paddy rice fields attached to the temple where the high priest reaps a small quantity of paddy This is heaped on the leading elephant, and the procession starts back again to the temple where the presents thrown the grass The rice is then sold and offered to Buddha Immediately afterwards the villagers begin the rice harvest

People Buying Water

Water at 20 cents a quart was the price established near Rochester, New York, recently With wells d farmers were forced to haul water long distances, and the motorist stopped by the wayside to ask for a drink paid anywhere from a nickel up.

Drivers of motor buses in Istanbul, Turkey, have to be married men and bachelors and must [illegible] one drugs or gray coats.

WORLD HAPPENINGS BRIEFLY TOLD

The House of Commons at session by 40 years and assents, approved the amendment to the gold tax moved by Hon. E. N. Rhodes finance minister.

The Imperial conference adjourned June 12 for a long "breathing spell," in which governments will attempt to settle outstanding political difficulties.

Expansion of the British air force announced some time ago continues with the addition of 25 squadrons totalling roughly 600 machines, it was learned.

Five of unknown origin destroyed the Quaker Oats elevator at Dolsie Sask. More than 9,000 bushels of grain in the house were ruined. The loss was covered by insurance.

John Duncan, veteran railway telegrapher died recently in Toronto, aged 91. He succeeded to the job his father, Thomas Alex. Ernest Brewster, held as telegrapher on the Northern Railway.

The Victoria Daily Times, first food published on June 9, 1884, celebrated its golden jubilee by publishing a special anniversary edition. The paper was founded by the late John Canot, M.L.A. for Chester at the time.

Declared as a record without rival in book selling in South Africa, 130,000 copies of the new Afrikaans Bible have been sold in the South African Union and the Rhodesias since its issue a few months ago.

Bowing Canada's crop moving plans for this year was 98.2 per cent. complete the first week in June. On that date 230,320,000 acres had been seeded. This is the largest area ever cultivated by the Soviet Union.

Market For Timothy Seed

Shortage in Production In Opportunity For Western Growers

Domestic production of timothy seed in Canada is still far short of consumption, it is noted in a report of the Saskatchewan Department of Agriculture, indicating an opportunity for growers in the West. Though they ordinarily yields from 300 to 500 pounds of seed per acre, and growers have received on an average about 6½ cents per pound for the seed basis No. 1 grade, over the past three years Canada has annually about ten million pounds of timothy seed and until 1931 some nine million pounds of this was imported from the United States. Domestic production since 1931 has been greatly stimulated by educational activities and the prospect of a large domestic market. As a result, production increased from less than a million pounds to some five million pounds in 1933, but declined to about 3,700,000 pounds in 1933.

Holmes Saves Bank Notes

Unusual Happening In Fire At Cambridge Loan Church

A few months ago a great fire destroyed the Law Courts at Constantinople. The damage done was very heavy, but the chief concern of one official centred in a safe in which he had placed funds to the value of £9,000. Ultimately the safe was souled and the debris, and as all experiences it was a mass of warped metal, but the door was forced, and it was found that the money placed there by the cashier could be saved. The official had placed in the safe two large notices and they had given all sufficient steam during the fire to prevent the complete destruction of the notes. Some damage had been done but the features of the notes were visible and the State Bank accepted them.

Appreciates The Press

It is well to know that there is at least one man in public affairs who has an appreciation of the press, says the Lethbridge Herald. This is Lord Londonderry, Secretary for Air in the British government. Speaking of the British press, he said: "We find the press men fair and helpful, sporting in their criticism and generous in their praise." This is regarding the press in the light it deserves to be regarded.

Air Mail Across Canada

Coast-To-Coast Aircraft in 10 Hours Is Predicted

A coast-to-coast air mail service in 10 hours travelling on aeroplanes capable of flying the sky lanes from Montreal to Vancouver at a speed of 200 miles per hour, is the hope of the large of Canadian farmers.

Squadron Leader A. T. Cowley, superintendent of air regulations, when in Calgary on an inspection tour outlined plans for the final mail service of the future to be put in operation when economic conditions are better.

The proposed route would take a western mail trail via Regina, Lethbridge and the Crow's Nest pass to Vancouver, making a direct mountain crossing to the coast. A branch service would be maintained from Calgary to Lethbridge.

Fair Wage Schedule

New Rates Per Hour For Men Applies To Private As Well As Public Works

Hon. W. R. Chabb, Manitoba minister of public works and labor, recently announced a new fair wage schedule for the province, applying for the first time to private as well as public works and containing reductions of from five to 10 per cent. from last year's rates for a large section of the building trades.

The new rates become effective June 15 and were worked out after two months' study by the fair wage board. One set of rates is for Winnipeg and territory within a 30-mile radius and another for the rest of the province.

Some masons have been allotted two rates, 80 cents and 81 an hour, as against last year's rate of $1.05.

"Did any of your ancestors do things to cause posterity to remember them?" asked the haughty woman.

"I reckon they did," replied Farmer Corntossel. "My grandfather put mortgages on this place that ain't paid off yet."

SUNDAY SCHOOL LESSON

JUNE 24

A REVIEW OF THE GOSPEL ACCORDING TO MATTHEW

Golden Text—"Go ye therefore, and teach all nations." Matthew 28:19.

Devotional Reading—Micah 4:1-5.

1 What does the heading The Gospel According to Matthew mean? 2 What do we know about Matthew from the Gospels? 3 What is the tradition in regard to him? 4 What was the central theme in the life of Christ? 5 In what language was the Logia of Matthew written? 6. In what language were the earliest copies of Matthew found? According to Matthew matthew which has come down to us? 7. In what century were they written? 8 For whom was the Gospel According to Matthew written? 9 What special Jewish phrases does it contain and what does their use indicate? About when was the Gospel written? 11 Is Matthew a complete biography of Jesus? 12 What is the main purpose of the First Gospel? 13. How many quotations from the Old Testament has it? 14. How large a portion of the Gospel is given to the teachings of Jesus? 15 What five great addresses in the Book? 16 What part of Jesus' ministry does it omit? 17. How does Matthew group the material? 18. Give its general outline.

Raising Gold

Peculiar Phenomena Is Reported In Radio As Result Of Earth-Quake

The world may talk of gold standards and gold hoarding but in India it has been reported that the gold mining districts in which summer darkness were felt recently report not a shortage of the precious gold but odd storms of gold dust dazzling how over the country side.

The secret of the cause of the dust was revealed when scientists analyzed samples and discovered that the dust was a mixture of gold and particles of precious metal. The dust clouds arise as a result of the earth shocks which the scientists suggested forced into the air delicate particles from deep rock deposits.

An Admiralty Court

Canada Has Passed Another Cabinet National Milestone

Canada passed another important national milestone recently when the House of Commons gave third reading to a bill designating the exchequer court of Canada as an admiralty court. Admiralty jurisdiction has been found for some time, but a subsequent bill, under the Dominion Act. The 1929 conference on merchant shipping legislation rejected the request of admiralty courts were not in accord with the constitutional status of the Dominions as established at the 1926 Imperial conference.

The bill sponsored by Minister of Justice Hugh Guthrie gave Canada control over admiralty courts and set forth the necessary regulations. It passed through committee stage in less than five minutes and passed the house without opposition.

An Unenviable Record

United States Leads With Total Of 16,617 Murders

The lowest per centage of murders goes to the credit of Holland, with Great Britain a good second. The highest is to the discredit of Chile but the highest total is recorded in the United States. In Chile, during 1932, the last year for which statistics are complete there were 2 913 murders, equivalent to 61 per 10 000 or one murder every three hours. The United States show 8½ per 10 000 the total is 10 617. The highest per centage in Europe goes to Belgium with 166 murders or 100 000 or the largest aggregate (1 223) though this averages only 14 per 10 000 of the population. In the nine countries under review the total murders amounted to no fewer than 18 168.

Negro Undertaker (over tele phone) "Rastus, your mother-in-law just died."

Rastus "Is you sure 'bout dat?"

Negro Undertaker "Shall I bury her or cremate her?"

Rastus "Don't let's take no chances, brother. Cremate her!"

Little Journeys In Science

RADIUM

(By Gordon M. Grant, M.A.)

In 1896 Madame Curie commenced many years of work when she succeeded in isolating radium and giving to the world a new source that is radioactivity. This discovery had since become a figure of international importance for her work is connected with radium. Of Polish origin, she began the work with her husband Pierre Curie, a professor of physics at the Sorbonne in Paris. Today she still directs radium research in the Radium Institute on the Avenue Pierre Curie in Paris. This institute was built as a memorial to Professor Curie who died in 1906 and thirty workers carry on studies in radio activity under the direction of Madame Curie.

Radium is taken from pitchblende, where it occurs in very minute quantities. It is estimated that three tons of pitchblende which is sometimes called uraninite yields one gram of radium. The world supply of radium in 1931 was about 170 grams, and the chief source of supply is in the Belgian Congo. It was at first valued at from $120,000 to $130,000 a gram, but with the discovery of new sources of supply it has come down to $70,000 a gram. In Chile, during 1932, the last year for which statistics are complete there were 2 913 murders, equivalent to 61 per 10 000 or one murder every three hours. The United States show 8½ per 10 000 the total is 10 617. The highest per centage in Europe goes to Belgium with 166 murders or 100 000 or the largest aggregate (1 223) though this averages only 14 per 10 000 of the population. In the nine countries under review the total murders amounted to no fewer than 18 168.

In industry it is used in the production of luminous paint, and familiarly seen on the faces of clocks and watches.

In recent years large deposits of pitchblende have been discovered in Canada, in the region of Great Bear Lake near the Arctic Circle. It is expected that within the next few years this deposit will increase the world's supply of radium, sufficient to bring down the price considerably.

The Panama Canal

Shipping Made Possible Only Through Concession From British

Arthur Brisbane, protesting in the Hearst papers against Great Britain's failure to pay her debt to the United States, points out that the Panama Canal rates might well be doubled against her. But the Panama Canal was built under an international agreement whereby the rates for British and American vessels would be the same. It ought not to be forgotten that the building of the canal was only made possible through certain British concessions. — Toronto Mail and Empire.

U.S. MAY ACCEPT PAYMENT IN KIND ON BRITISH DEBT

Washington Replying to the British war debt note of June 4 the United States government has suggested officers would be considered for readjusting the debt or payment in goods and services. Points noted forth are:

1 Great Britain would have to pay only the amount of the June 15 instalment to avoid being considered in default under the Johnson law.

2 There is no connection whatever between the debt owed the United States by Great Britain and those owed Great Britain by other countries.

3 The United States government will be glad to entertain proposals for either readjustment of the debt or payment in goods and services.

The British government undertook to borrow under its own name and on its own credit standing, and repayment was made contingent upon the fate of the debts due to the British government," the note said.

The suggestion for the manner of payments made in the note was discussed not to be an offer for full payment on such a basis.

"Should His Majesty's government wish to put forward proposals for the resumption of payments, the government would be glad to entertain and discuss them informally.

"For instance, no proposal has ever been presented to this government looking to the payment in kind to an extent that might be found mutually practicable and agreeable.

"Any proposals of this or a similar character which promise mutual benefit would be carefully considered for eventual submission to the American congress."

Such commodities as tin, rubber, jute and silver immediately came to the minds of observers as they studied the note. The world's largest tin mines are largely controlled by Britain. Administration officials, apparently concerned over the United States supply, are leading support to congressional moves to retain present holdings and find a domestic source.

The British Empire is the world's largest producer of rubber of which the United States is the leading consumer.

Continuing Debt Payments

Dominion South Africa Disregarding the war debts controversy abroad, the Union of South Africa is continuing her payments to Britain. She has just paid the last six month instalment of £178,850, roughly $890,000, and intends paying the next instalment in December, regardless of whether the British government reaches a final settlement with the United States by that time.

Record Silkworm Journals

London. The Ottawa accords at the 1932 Imperial conference contributed more than anything else to the improved conditions in England during 1933, Sir Arthur Shirley Benn, M.P., president of the Imperial Federation of Chambers of Commerce, declared here, following a meeting of that body.

New Liners Ordered

Valetta, Malta. Two British destroyers collided during naval manoeuvres off this coast recently. The damage was not heavy and there were no casualties. The ships were H.M.S. Acasta and H.M.S. Codrington, reputedly two of the finest of their class.

Leave For Northern Posts

Edmonton. Priests, Royal Canadian Mounted Police, mining men, prospectors, trappers, traders and missionaries formed the band of 100 northerners who took train for Waterways, Alta., on the first leg of journeys to sub-Arctic posts.

Three Indian Brothers Committed For Trial

Charged With Murder Of Two B.C. Police Officers

Merritt, B.C. Trial of three Indian brothers charged with the murder of Dominion Constables F. M. Campbell and C. Unsworth, on the Nicola Indian reserve at about May 24, will open at the Vernon B.C. assizes June 25.

Knesa, Richardson and Alex George were committed for trial by Magistrate Swencisky. They were removed to Okanagan prison under heavy police guard.

A fourth brother accused of murder Joseph George was under medical care in Vancouver. He was granted a further remand until June 21.

Many bloodstained exhibits were introduced during the two-day preliminary hearing. Indian neighbors of the George brothers from the reservation and expert police investigators testified for the crown.

A cheque for $500, the reward offered by the British Columbia government for the capture of the murderers, was handed over to "Big Frank," the Indian who recovered Unsworth's body from the Nicola river on May 26.

No game have been spared by police in their efforts to avenge the alleged slaying of their comrades. Soon after the constables disappearance, Attorney-General George Sloan announced "the entire resources of the crown" had been placed at the disposal of the investigators in their effort to obtain a conviction.

Saskatoon Man Killed

Dental Technician Had Just Started On Business Trip

Saskatoon Scarcely out of the city on an extended business trip which was to have taken him to the Pacific coast and through the western United States, Leo Lipkovic, dental technician, met violent death as his car skidded and overturned in the ditch. The accident occurred about 16 miles north of the city on highway No. 5.

Two other occupants of the ill-fated auto, Abe B. Handelman, and Louis Weiner, explained that Lipkovic had got into difficulties when the car he was handling ran sideways at the edge of the road. The driver had attempted to pull the vehicle onto the highway and in so doing overturned it. Coroner A. M. Molloy, M.D., ruled no inquest was necessary.

Heart Surgery Possible

Cleveland Surgeon Predicts Heart Operations In Near Future

Cleveland—A new type of heart surgery, promising one avenue of escape from the present tremendous heart death rate, was proposed to the American Medical Association by Claude S. Beck, Cleveland surgeon.

He pictured surgeons in the near future operating directly upon hearts. The hearts will be patched literally, he predicted, with grafts of tissue taken from other parts of the body.

Joan Batten, 20-year-old English girl pictured just before she hopped off from London on her record flight to Australia. The daring daylight hopped five days from the previous record, held by Amy Mollison, whose husband taught Miss Batten to fly.

May Beat Previous Record

One Pullet Has Chance In Egg-Laying Contest

Agassiz, B.C. Only one pullet in the annual egg-laying contest at the Dominion experimental farm here has a chance to equal or better the world's record of 357 eggs in 365 days, equalled in last year's contest by White Wyandotte Dorcas 184, Barred Rock pullet No. 2, owned by the Delta Land Company Vancouver, has laid 229 eggs in 324 days to equal the performance of "Dauntless Dorcas" at this time last year. Her closest competitor is Barred Rock pullet No. 2 owned by A Pennington of Agassiz with 213 eggs.

Pullet No. 2 has laid small eggs, however, and is far behind on points in the current contest with only 901 7. Ranking No. 10, a White Leghorn, leads with 1116 6 points, although she had laid only 209 eggs.

King Receives Delegation

London. The King received at Buckingham Palace the delegation headed by the Duke of Ursel which came to London to announce formally the accession of King Leopold III. of the Belgians. His Majesty expressed sorrow in connection with the death of King Albert, having lost "not only a beloved cousin but also a personal friend."

Case For Federal Cabinet

Vancouver. — British Columbia's case for the taking over of the Pacific Great Eastern Railway by the Dominion and her claims for better terms under confederation will probably be considered by a committee of the whole federal cabinet some time after prorogation of parliament, Premier T. D. Pattullo indicated

A HAPSBURG RETURNS TO VIENNA FROM EXILE

The first member of the royal house of Hapsburg to return to Austria from exile in 15 years, the Archduke Eugene (left), is shown in conference with Engelbert Dollfuss, Austrian dictator, soon after his arrival in Vienna. The Archduke had lived in Switzerland since the fall of the monarchy, when he refused to relinquish his imperial rights. He was greeted enthusiastically by people in Vienna.

Increased Nickel Production

Canada's Output For April Exceeded Only Once Before

Ottawa Nickel essential alloy in the production of armaments is now more than page nine.

The bureau of statistics has announced production figures for April. The total is 12 926 418 pounds, the second greatest month in the history of production in Canada. Only once has it been exceeded, when in November 1929 did Canada's nickel mines exceed such volume.

In the four months ended April 30 last production rose to 39 686 000 pounds which exceeds that of the corresponding period of 1929 by close to three million pounds. Thus 1934 is now well launched in a record-breaking year in the output of a metal demanded the world over in the making of war muppins.

International Nickel, at Sudbury is the mage producer in the world, enlarged its plant after the peak year of 1929 and last April brought its fourth furnace into operation. The company is now working at full capacity. So, it is reported, in Falconbridge, the other large producer in Canada.

Anyone who doubts what is afloat in world armaments factories need only scan the statistics. Canada, it must be remembered, holds a virtual monopoly on this metal.

In 1932 the output was 30,088,000 pounds. In 1933 the total zoomed upwards to 63,000 000 pounds.

And in 1934 the prospect is for a production of about 120,000 000 pounds which will be some 10 000 000 more than the peak year of 1929

Recognized For Discovery

Doctor Of McGill University Finds "Enhancers" In Blood

Montreal.—World-wide recognition has come to Dr. J. R. Collip, head of the department of biochemistry at McGill University, for his discovery of new substances in blood which play the part of balancers and which may be new personality chemicals.

Dr. Collip reported his discovery before the Association for the Study of Internal Secretions meeting at Cleveland with the American Medical Association.

Some physicians who heard of Dr Collip's discovery believed it might open the door to a new field in medicine. The chemical balancers appear to act as stoppers against effects of the hormones which the body produces from its endocrine glands.

The endocrine hormones in turn regulate growth, energy, color of complexion, sexual development, bodily contours and numerous other characteristics often associated with personality and health.

The medical name for the balancers is "antagonists" and they differ from "antibodies" which the body manufactures to protect itself from disease. One of the "antagonists" has been found definitely in animals, another shows traces, and there is evidence the same chemicals exist in human blood.

STUDY INCREASE OF COARSE GRAIN ACREAGE IN WEST

Ottawa Plans to assist in the readjustment of Western agriculture by increasing the acreage of coarse grains to make up for reduced wheat growing are under consideration here at a meeting of the grain research committee. The group at meeting under the auspices of the National Research Council and is endeavoring to formulate the best suggestions men of science have to offer to Canadian agriculture.

Deliberations so far have centred on the theme that the acreage sown to coarse grains, barley, oats and flax, in Western Canada might be increased by some 3 000 000 acres without creating an embarrassing surplus. The estimate is based on prospective markets in the grains in the United Kingdom and Europe and for feeding purposes in Eastern Canada. Quality and quantity production is needed to take advantage of the markets and research is being conducted along these lines.

C. B Davidson, of the Dominion bureau of statistics, who opened the discussion of the existing economic situation, advanced the following observations:

1. The carrying out of a policy in regard to barley in the first step in the production of substitutes of wheat acreage and the improvement in the quality of the wheat crop of Canada though a reduction in acreage in areas which produce low grade wheat.

2. Claims there have been overexpansion and over-production in Western Canadian agriculture cannot be applied to cereals generally

3 The world trade in coarse grains in recent years has exceeded the world trade in wheat.

4 Wheat acreage in Europe seven year by 6,500 acres between 1924 and 1933 The coarse grain acreages remained almost constant.

5 The use of corn in feeding markets is markedly on the increase, particularly in the United Kingdom.

6. Germany is the only importing country which has reduced her import requirements of feed grains

7. In Eastern Canada there is a demand for feed which barley might meet, particularly if winter transportation were used.

8. At the present time Canada does not possess the coarse grains with which she might set out to secure a share of the market available

Tourist Body Appointed

Committee Consists Of One Member From Each Province

Ottawa A permanent committee to deal with the tourist industry and co-operate with existing organizations developing tourist traffic has been appointed by the month.

The committee is appointed of nine members, one representing each province The members are: W. A. Buchanan Alberta; W. H Dennis, Nova Scotia; W. E. Foster New Brunswick; R. F Green, British Columbia; R. B Horner, Saskatchewan; H. G Horden, Ontario; Cyrenius MacArthur, Prince Edward Island; George Parent, Quebec, and W. H. Sharpe, Manitoba. Except for Senator Sharpe, the personnel of the committee is the same that of the original special committee. Senator Sharpe was added to the standing committee in order to give representation to all provinces

Hungarian Wheat Crop Less

Budapest A decline of 2,560 000 quintals in the Hungarian wheat crop was forecast as a result of the prolonged drought. This year's yield was unofficially estimated at 16,500,000 quintals against 19,060,000 last year.

Dance Hall In Honduras

Tegucigalpa, Honduras Stricken Central America received additional reports of wholesale destruction of life and property in a hurricane which struck some days ago. The known dead in the two countries was estimated at 3,000.

Movement Of Low Pressure Area Has Decided Effect On Rainfall In Western Provinces

The threat quenched, the dreath is forgotten. A few showers of rain fall, and the refreshments of the real allays the anxiety bred in the drouth. The sense is forgiven. This faithlessness is human, but it cannot divert the climatic cycles. These go their way, independent of recording. They are beyond all here, and either may be ruled by fixed phenomena or stirred by Nature's unpredictable whims. Which of these orders our climate, none can say. The meteorologists cannot. They can, after all, record climate only as it reveals itself.

And the overwhelming climatic revolution in this part of the world in recent years is that its low pressure areas have moved. It now has its, roughly, across the Kansas line. It has gone north, and is estimated to be far north of here, perhaps in the Yukon.

This movement of the low pressure areas has definite climatic effects which can be stated in simplest, though probably inexact, terms. The Indian may say that the Caribou Mountain provides the moisture for the centre of this continent. It rolls up the vast central region, pausing on northward through those prairies.

As the Indian air reached the low pressure area, the pressure produced the rain that fell on the prairies. Without that low pressure area, above which the warm air rose, there would not be the distilling process, and there would be no rain. So, when the low pressure area moved, the moisture-laden air from the Caribou basin was not distilled, but was carried, unaffected, beyond. The rain that ought to have been falling on us for the last few years is prescribed to have been falling far north in the Barrens.

Why the low pressure area has moved is not explained. Whether it will return, or that it ever will return, are matters he has only general notations is not known. Its movement, whatever its cause, is independent of human control. It may not be stayed, and it cannot be replaced. Whether it has reverted to its southern latitudes, or whether it ever will, the scientists seem unable to say.

The present rain may be a result of a return of the low pressure area to a line south of here, but there is nothing to insure that return remaining fixed. But if it has not returned, and seems to stay put, the consequences will seem scarcely themselves on the meteorological charts. The laden air from the south will have its moisture extracted to drop in freshening rain on our fields, again to germinate our seeds and give the yields of our culture. The relief is a boon a blessing, but it descends on a degree of falsity of the low pressure area. So long as that stays south of us, our fruitfulness is somewhat assured. Should it permit its staying far north of us, drouth must continue over the centre of the continent, as it has done more or less for the last few years.—Winnipeg Free Press.

Saskatchewan Game Fish

Now Taking Trout From Lakes That Never Had Fish Before

Canada now has game fish in formerly barren lakes in the Maritime and prairie provinces, and in British Columbia. J. A. Redd, director of fish culture, Dominion department of fisheries, told the senate committee on sealing and fisheries.

"Fisheries in Saskatchewan are now taking 10-pound lizard fish; lakes that never knew fish before," Mr. Redd stated. "European brown trout were transplanted to the Cypress lakes, Saskatchewan, in 1931, and Regina fishermen are taking trout up to 10 pounds."

"Whitefish from Lake Winnipeg were transplanted to the Quill lakes, Saskatchewan, which are highly alkaline," Mr. Redd said. "These fish are prospering."

Japan is the earthquakiest country on the globe. It averages six tremors a day.

Conserving Game In Alaska

Systems Of National Parks Similar To That In Canada To Provide Sanctuary For Wild Life

Members of the Interior has just received from the Secretary of State for External Affairs, Canada, a detailed report on the International Conference for the Protection of Fauna and Flora of Africa. At the conference, which met in London, the following governments were represented: United States of America, Belgium, Great Britain, Egypt, Spain, Abyssinia, France, Italy, Portugal, Anglo-Egyptian Sudan.

The conference concluded that the natural fauna and flora of Africa, soon in danger of extinction or permanent injury and steps are to be taken for their preservation by the governments represented. Canada, in company with all other nations, would suffer from the destruction of these resources of Africa. It is the chief interest to Canadians in the result of the conferences in that it was the unanimous conclusion of the delegates that the best way to preserve the fauna and flora was by the establishment of National Parks in representative districts within which even the destruction of wild animals is forbidden and punished. In this matter of the establishment of National Parks in virgin areas to preserve them in their primeval condition Canada is in the front rank of the foremost countries of the world. Moreover the fortunate thing is that Canada begins the work early in the development with the result that it has been done in the most economical manner. In this way there are being conserved, both for Canadians and for visitors from abroad, areas of grandeur and loveliness containing indigenous animals and plants in numbers which might otherwise have been completely lost to the nation.

Lilies Bring Cave Man

Tourists on the Richborg note Gingerin, Lower Austria, came upon a wild-looking man in a cave. At first he fled from them, but eventually spoke to them and proved to be an educated man born in Vienna. Long unemployment had caused the man to flee the haunts of men. He lived in hollow and underground caves, says he has no wish to return to civilization.

With: "The night before last you came home yesterday. Last night you came home to-day. If you come home tomorrow night, there'll be trouble!"

British Scientists Will Carry On Scientific Investigation In Canadian Arctic Archipelago

Demand For B.C. Vegetables

Fraser Valley Winter Growers Find Market On Prairies

From comparatively small beginnings, intensive winter vegetable production by white growers of the Fraser Valley has developed into year into a million dollar industry.

Large quantities of produce are now being supplied to Vancouver markets, but at least 70 carloads of vegetables will go to the prairie provinces this season.

Until a few years ago, Oriental growers practically controlled production and marketing of the vegetables of the lower mainland.

Discouraging returns in the dairy and poultry industries forced the white farmers to develop other sources of income and vegetable production has become a vital factor in helping the farmer to balance his budget.

The venture has proved a pronounced success.

Through close study of application of fertilizers, crop rotation, use of select seed, and modern cultural methods, the white growers in B.C. to-day are producing a standard of vegetable unexcelled.

Fat Stock Show Postponed

Saskatoon To Hold Annual Exhibition Early In August

Saskatoon's Fat Stock Show announced for June, has been postponed until the annual exhibition early in August, according to manager S. W. Johns. It was found that the quota for export is now practically filled and that in all probability there would be quite a reduction in cattle prices during June. The next year's quota however, starts on July 1, and although this means keeping the cattle another month the exhibition authorities decided it would be a kindness to the exhibitors to delay the sale.

Frog Disturbed Prisoners

Because the nocturnal croakings of an imprisoned frog disturbed the slumbers of county prisoners, workmen tore out the wainscoting of the lockup at Hamilton, Ont., in the county jail at Bellingham, Wash. in an effort to free the requested croaker. Sheriff T. C. Power ordered the frog hunt after receiving complaints for the past two weeks from prisoners.

"Yes," said the enthusiastic motorist, "she'll do eighty-five."

"For hour, per gallon, or perhaps?" inquired the wag.

It was announced by Honourable Thomas G Murphy Minister of the Interior that permission had been granted for a party of British scientists, headed by Professor J. M. Wordie, M.A., of St. John's College, Cambridge to carry on scientific investigations and collect specimens along the eastern and southern coasts of Ellesmere Island and westward to the Parry Islands.

The expedition which sailed from Aberdeen, Scotland, on May 24 in the "Nascaud" a seventy-ton sealing schooner will proceed to the Canadian Arctic Archipelago via Cape Farewell Greenland, stopping at Disko Island to refuel. From there the expedition will follow the west coast of Greenland and it is expected will cross Melville Bay in June. If ice conditions permit Smith Sound will be negotiated immediately, and the expedition will continue along the Greenland Coast to Hall and then north to Beatie Point.

Working south along the east coast of Ellesmere Island, the ship will turn into Jones Sound, where surveys of the coasts of the islands to the north will be made. Ornithologist, Mr. Ralph Hall, geologist, and ethnological investigations will also be carried out by the various members of the party. Returning east through Jones Sound the expedition will turn south and enter Lancaster Sound in an attempt to navigate the icy passage to Barrow Strait and reach Melville Island in the heart of the archipelago. The death to Melville Island is expected to be placed in August, and upon its conclusion the expedition will proceed down the Baffin Island coast and cross Baffin Bay to Cape Dyer and to the homeward voyage to England.

The Dominion government's permit will help him to make quite complete specimens as migratory birds and game animals, excepting musk-ox, which are totally protected, will be a hindrance to the exhibitors to delay the sale.

A Meadow That Floats

Strip In Germany Rises When Rains Flood Rivers

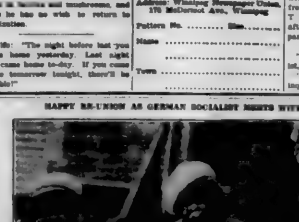
When spring rains swell the tiny river Hamme, near the small city of Osterholz, in Hanover, Germany, and it floods its banks, a strip of meadow on the south side, from two-thirds of a mile to a mile wide and three and one-half miles long, begins to rise, with all the flood-waters, carrying even great oaks and birches. The whole meadow is afloat, and even in normal times one foot is all it ever under the feet. Some 300 years ago the river is said to have loosened a small farm with house and barns and carried it for an hour downstream so pretty that the sleeping family did not wshen.

In Hundred Years

The Toronto Globe says one hundred years ago the boast was made that a "steel" passenger vessel was making the trip from Kingston to Toronto in sixteen hours. In these days also competition of the coach journey between this city and Hamilton "during daylight hours" was guaranteed. During the century there has been some growing up both in land and water transportation.

Receives Appointment

Lieutenant Desmond Burke, noted Canadian rifleman and once winner of the King's prize at Bisley, has been appointed assistant medical officer of the Governor-General's Foot-guards. He recently graduated in medicine from Queen's University. Lieut. Burke has worn the Canada uniform for several years.



HAPPY RE-UNION AS GERMAN SOCIALIST MEETS WIFE IN ENGLAND

Frau Sager (left), wife of Herr Gerhard Sager, born city a Socialist member of the Reichstag, arrived at Croydon Aerodrome, London, after her release from a German concentration camp near Dessau, where she was met by her husband. Frau Sager was arrested on a hostage after her husband had escaped from a concentration camp and it was through the efforts of Hon. H. C. Tom, British Member of Parliament (right), that Frau Sager was released. The happy couple had not seen each other for six months.

OCCASIONAL WIFE

By ERNA ROSS WEBSTER

Author of "Jezebel's Daughter" "Lipstick Girl"

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly despite the fact that Peter's father is rich while he remains poor. Peter's father refuses to even consider a reconciliation for a whole year. Camilla is the daughter of a wealthy family who has no intention of supporting a husband who is not in a position to support her in the manner to which she is accustomed. Peter's father, Peter Anson, is a cabaret singer in the Grey Peter and Camilla slip off to the beach by themselves and fall over in the sand. When they awake the next morning and Avis and another boy are standing over them. This makes it necessary for Camilla to announce before the party that she and Peter are trying to win Peter Anson to accept name of her father-in-law. Peter Anson, who takes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for quiet and to think. Peter and Avis follow later and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing the, and Camilla, stunned by Peter's accusation and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLVIII

Long silences and hollow, brief remarks, like those which fill a home where death has passed, prolonged that seemingly endless night for Camilla and Peter. Neither of them slept. There was little to be said. Only their separate thoughts labored in a common turmoil and gained in strength.

If it had been a problem to solve, a difficult decision to be made, it would have been different. But a thousand sleepless nights and all the thoughts of their lifetime could not effect this tragic thing that had come between them.

Camilla's tired eyes watched the windows being transformed into squares of gray patience until the approach of dawn, and the familiar objects in the room emerge from dark blots into definite shapes. The empty time-ticked mocked her derisively and deepened her pain. For contrast, the modeled group in the window stood out sharply and proudly against the background of daylight.

If something had to happen to Peters' work, why couldn't it have been that piece which had been broken? It would have grieved her to lose it but not like this. Over and over, she had wondered how the thing could have happened. It hadn't been possible that it could have been an accident from some natural cause. No, it appeared to be a deliberate act. But who could have hated Peter like that? It was almost funny that anyone could believe she had done it.

Not if he had failed with a dozen girls and broken her heart could she have brought herself to do a thing like revenge. No never. She loved Peter so much that she would do anything in the world for him. Those who had known of her unhappiness because he had hurt her with his many affairs to Avis, to whom he told all about them, and to whom he probably exaggerated that duty in his own mind because he always was. Avis had managed somehow to make him believe he owed her his gratitude.

Camilla had known all the time that Avis was purposely in taking that studio across the hall had been to influence Peter. Camilla had not any woman should marry a libertine who never would be faithful. But she had not thought that Peter would be influenced by Avis. Peter had chosen her, Camilla, and she had been content. Peter was the most important thing in the world to her, and she had been content to live in the shadow of his success.

Camilla had known all the time that Avis was purposely in taking that studio across the hall had been to influence Peter. Camilla had not any woman should marry a libertine who never would be faithful. But she had not thought that Peter would be influenced by Avis. Peter had chosen her, Camilla, and she had been content. Peter was the most important thing in the world to her, and she had been content to live in the shadow of his success.

With the revival of a hopes Avis glimpse in a faint possibility for her own happiness appeared in a new light. She must speed matters. She would have to comfort him as he would permit her and help him to forget. Then there would be a new era of sculpture.

"Do you think I would take a chance on your dropping me? I'm just as much in love with you as I am with sculpture he had made for her. Gazing at it again its beauty and anguish of the past. When they awake it must up quickly with a little gasp.

Peter, whose eyes had been closed but not sleeping, looked at her quickly.

"Peter I have an idea" she exclaimed and her face brightened rapidly.

"You must enter your immigrant group in the exhibit. Looking at it in the dim light of the room and framed in the brighter background of light from the window, I just now realized how wonderful it really is. Then, it will be a test, and to help convince how good it is, I might win the prize in another ten years." he said.

"But, dear, even if you don't win, wouldn't it be better to enter something as good as that?"

"If I can't enter a piece that I believe has some chance at least, I'll stay out."

But it would have a chance. I know it would. If for no other reason, just because it is so different from most exhibits. Won't you please try it?" she pleaded.

He moved his head to one side, negatively. "It's no use. Forget it. You must forget it."

"Peter, you have to do it," she insisted gently. "You might even prevail that you planned to use that one all the time and were only busy the other figure for sale."

"It won't work," he mumbled.

But she cried, wounded deeply. "Then you do believe what Avis said?"

"It isn't what I think. It's what all the others think who were here, and what they will say."

"Oh no, Peter. I am sorry if any of them believe that I could be so cruel but it's what you think—" woefully. "How can you?"

"I didn't say I did," he denied thinly. "I only said that what you suggested would protect you against what the rest might think. That would be the only reason I might enter the thing, for a blind."

He believed that she had done this cruel thing to him, and still wanted to protect her from the opinions of others. What consummate men were, to be sure. Well, if he wanted to be so noble, let him. She was positive that his entering the group would be to his honor and credit.

Which was what he agreed to do in the end. When Camilla left him to go to the office, he had promised to carve the words, "Land of Hope," on the plinth beneath the little group, and enter it in the National exhibit as of that had been his first intention.

A Marvel Of Architecture

Palace Of Arts In Moscow Only Cost Ten Millions

Many people look upon Moscow as a town bad because people Like most Russia it is a country of periodical disturbances, but, like the Russians they are intensely devoted to art music and the theatre and in this sense there is far higher level of culture than in almost any England-speaking community.

After 20 years the Palace of Arts in Moscow City has just been completed. The building was begun in last spring the regime of Pavlov Duke and despite frequent political changes each succeeding government has continued the work. There was never any difference of opinion about that. The Palace of Arts is a magnificent structure housing art galleries a national museum a gigantic theatre which is a work of art in itself and the auditorium, which has the most wonderful lighting system ever conceived an auditorium for concerts 2,000 and conference rooms and a dozen other purposes. The building is a marvel of architecture inside and out, covers two fifty blocks and cost about $10 million.

Neither Great Britain, Canada nor the United States could or would build such a monument to the arts. St. Thomas Times-Journal

Women Detectives Fail

To Be Disbanded In London After Six Months' Trial

Women detectives are a failure. Given a six months' trial in detective work, women members of the London police force have brought little credit upon them, shown little instinct in their work.

According to the Policewoman's Review they have been found wanting in sundry other capacities needed in this type of police work, and are to be disbanded.

In an outspoken editorial on their failure, the Review states:

"Many women who wish to qualify as detectives are always quite certain of their personal capacity and are often unwilling to admit the absolute necessity of training to aid their instinct

The average woman is by nature entirely opposed to definitive work and one in this choice a safeguard to herself and a guarantee that her contribution to police work must be along different lines to those of men

We find ourselves unable to reconcile the disbanding of the women detectives as dominatrix."

THE RHYMING OPTIMIST

By Aline Michaelis

NEW POETS

We know the songs old poets all have made
How they have painted life's dreiment things
In words as splendid now words are as shade
To sun, as fast to soaring wings
We know how futile any phrase must be
Which follows after perfect speech in mud.
Our poems are as moths tossed out to sea.
While theirs are strong gulls wheeling over head
In spite of this, who can from song refrain
When it is peasant of his every hour?
When through his verse is poured the lyric strain
Who can keep silence and renounce his dower?
We know old poets sung sublimely well.
Yet each new heart has its own tale to tell!

A Farmers' Journal

After 40 years of publication exclusively as a farmers' journal, The Weekly Sun, formerly The Farmers' Sun, will become an urban weekly with a rural edition, it was announced at Toronto. The paper has been taken over by Graham Spry, vice-president of the Ontario Council of the Commonwealth Co-operative Federation

Under the hog grading regulations, no carcass grading is authorized at an abattoir until scales and equipment for grading have been approved by the Dominion Minister of Agriculture.

Ask Mother—She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was nervous and rundown . . . helps her on the job all through the Change. No wonder she recommends it.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Feels 50 lbs. Slimmer

After Losing Only 6 lbs.

"I started taking Kruschen Salts a month ago," a young woman writes "I have lost 6 lbs in weight, and I feel as if I have lost 50 lbs I am full of vigour, whereas before I was listless and worried over little things But of my troubles were doubled they would not worry me to-day thanks to Kruschen."(Miss V. P.)

Here's the recipe that banishes fat

Take one-half teaspoonful of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the daily dose that takes off the fat." When you take Kruschen daily it causes that every particle of poisonous waste matter and harmful acids and gases are expelled from the system

Modify your diet, and take gentle exercise The stomach, liver kidneys and bowels are toned up, and the pure, fresh blood containing those six salts is carried to every part of the body These fellows "full of health feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure

Little Helps For This Week

"Serve Him with a perfect heart and a willing mind" 1 Chronicles 28 9

Let not soft slumber close your eyes
Before you've recollected thrice
The train of action through the day
Where have my feet chosen out their way?
What have I learned wherever I've been
From all I've heard from all I've seen?
What have I more that's worth the knowing?
What have I done that's worth the doing?
What have I sought that I should shun
What duty have I left undone,
Or into what new follies run?
These self-inquiries are the road
That lead to virtue and to God
—Dr Isaac Watts

Little things come daily and hourly within our reach, and they are not less calculated to set forward our growth in holiness than are the greater occasions which occur but rarely Moreover fidelity in trifles, and an earnest seeking to please God in small matters are a test of real devotion and love. Let your aim be to please our dear Lord perfectly in little things, and to attain a childlike simplicity and dependence —Rowland Hill

First Weather Forecast

Admiral Fitzroy Evolved System Seventy-Three Years Ago

The first official storm warning was printed by daily rule just seventy-three years ago. And how the scoffers scorned when it proved accurate! The office responsible for such a daring commitment was Admiral Fitzroy who, as first director of the Meteorological Department, then under the control of Board of Trade, deserves to be remembered as the father of the weather forecast

He evolved the system of collecting and collating reports from a number of anticipated sources Whereas the modern forecaster is kept in touch with conditions all over the world, he received but five reports from abroad, and these were usually a day or two late! Fitzroy came to an untimely end: overwork drove him to suicide in April, 1865. He left behind him a mass of valuable data on weather observations at sea.

Texas became a sport more than 100 years ago, but in the beginning it was an indoor game and has been lawn tennis only since 1874

Mentally some men and women never grow old no matter how many years they have to their credit

FORT SASKATCHEWAN RECORD

VOL. 13 No. 13 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JUNE 27th, 1926 $1.50 PER YEAR IN ADVANCE

School Board Hold Special Meeting

A special meeting of the Fort Saskatchewan School Board was held Monday night with Mr. F. Atkinson, the chairman, Dr. Turner and Mr. R. M. Ray present.

The present teaching staff, and Caretaker, were re-engaged for another school year, at the same salary.

The next meeting will be held in the School on Monday, July the 5th, when the Trustees will inspect the School buildings and grounds.

Telephone Questions Aired At Large Gathering

Some fifty residents of the District South and East of the Town attended a meeting in Yorkville School House on Monday evening last to hear Mr. Baker, Deputy Minister of Telephones, outline the terms and conditions under which the local rural telephone lines can be acquired by local telephone companies. The speaker, very briefly, gave a history of the conditions of the rural lines and the problems under which the plant had to function. Among other interesting comparisons, Mr. Baker pointed out that Alberta had two hundred miles of rural lines more than the combined rural telephone lines of the provinces of Ontario and Quebec.

He assured those present that his Department would render every possible assistance in the formation of local companies, for it was only under the control of local companies would the people in the rural areas obtain the convenience of telephone in the future.

The consensus of opinion of those present was that it would be more practical to form companies of not more than four or five circuits rather than large companies.

It was decided, by those interested in circuit numbers 5, 6, 15, and 27, to hold a meeting on Friday evening next for the purpose of forming a company comprising those circuits.

PARTRIDGE HILL LOCALS PLAN BIG PICNIC

Partridge Hill U.F.A. and U.F.W.A. will hold a huge picnic on the Recreation grounds on Wednesday, July 4th. A large program of sports have been arranged for the amusement of young and old.

Contests such as; Bingo, Horse-shoe and throwing the rolling pin by the ladies and a prize for the largest family present are on the program.

This district is noted for its successful festivities and one would be assured of a enjoyable time by attending this picnic.

STATE HEALTH INSURANCE

State health insurance for Alberta will move one step nearer ultimate relation through a meeting of interested persons that Hon. George Hoadley, minister of health, purposes calling for some time this summer. The health department is meanwhile gathering data to be placed before such a meeting and to be used afterward in a campaign of public information. The general scheme involved in the health insurance report to the last legislature will be the basis of both the meeting and the campaign following.

Mr. Hoadley says that he intends as soon as possible to invite to a round-table meeting representatives of women's organizations throughout the province, medical and health authorities, municipal executives and health officials, and any other organizations or individuals that may be in a position to contribute a campaign of information. This is to be sured, he says, with an undertaking he gave in the legislature, and the purpose will be to discuss thoroughly the details of the proposed health plan.

Tractor Races Featured At Edmonton Exhibition

Visitors to the Edmonton Exhibition July 14th to 21st will have the unique experience of seeing farm tractors streak around the race track at mile-a-minute speeds. One of these tractors—the famous Allis-Chalmers No. 999, which holds the world's speed record for tractors, will be driven by Louis Meyer, famous racing driver, who will use the new low pressure Firestone Farm Tractor Tires. Meyer is the only man who has ever won three A.A.A Championships and is one of the pair who have twice won the Indianapolis Speedway Race.

Since their introduction several years ago, pneumatic tires for tractors have met with great success. All equipment manufacturers have adopted them and tests show that tractors with these tires are able to do 27% more work with 24 per cent. savings in fuel while the tractor life is extended 33 per cent and repairs reduced by 50 per cent.

Old-Timer Passes Away After Long Illness

The funeral of William Byers Ross, resident of Fort Saskatchewan for the past 57 years, who passed away at Fort Saskatchewan, June 23, at the age of 76 years, was held Monday afternoon, June 28, at 2:30, from the Fort Saskatchewan United church. Rev. Ramsay officiated and interment took place in the local cemetery. The pallbearers were Messrs. G. T. Montgomery, James Bilsbie, Henry Dennis, H. Carscadden, A. Adamson and E. Ketcherson. Many beautiful floral tributes were received. He leaves to mourn his loss three brothers, Walter G. of Fort Saskatchewan, John R. of Vancouver, and George M. of Vancouver, B.C. Foster & McCarvey, Ltd., funeral directors.

FERTILIZED FIELDS CONTROL WEEDS

Mr. Lucien Langlois reports that the strips of fertilized wheat in his field besides being far ahead of the rest of the field are less infested by weeds. The weeds between the rows of the Fertilized grain are being choked out by the wheat. Where no fertilizer was used the opposite result is apparent—the weeds have the edge.

Mr. E. Langlois has three strips of fertilizer—one on summer-fallow, one on fall-plowing and one on spring plowing. Wheat has been sown in each case. The results show that fertilizer is equally beneficial in each case. Mr. Langlois will be pleased to show these strips to persons interested.

One sample of wheat taken from the farm of J. M. Thomas shows the fertilized to be 35 inches high and heading out, whereas the unfertilized is but 20 inches high and just coming into shot-blade. This sample can be see at the Fort Hardware.

Some folks reform, an' some just git too old t' act up.

Agricola News

The Agricola boys soft ball team played a league game with Ardrossan the score ending in a tie.

*****

Mrs. T. Johnston of Agricola district left for Perry Sound, Ontario, where she will visit relatives.

*****

The crops and gardens in this district are doing nicely after another "Sudden Relief" rain.

*****

"Believe it or not"! The Fort Record is a very popular paper among the Agricola people "We wonder why?". Let's subscribe and see what's it all about

*****

Several of the districts around here met at Yorkville School Monday evening, for the purpose of establishing a rural telephone line.

YPRES VALLEY NEWS

On June 13th the Parent-Teacher Association held a very successful meeting in the school. Dr. T. W. E. Henry, gave a interesting talk which was highly enjoyed by everyone.

Arrangements were made to take the school children on an Educational trip to Edmonton, rain however spoiled the plans, but on this Thursday weather attempt will be made.

******

Francis Ashton won the trip to Olds this summer, having obtained the highest marks to win the Educational Diploma at the recent Ardrossan school fair. Miss Ashton will attend a one week's course.

******

Many parents and friends of Miss Lamels met at the home of Mrs. Fred Davis on Monday evening, the occasion being in the form of a farewell party to Miss Lamels who is leaving the district, after two years teaching. Cards were played, after which a presentation was made by Mrs. H. Ashton and an address given by Mrs. Bill Gunn on behalf of the many friends present to Miss Lamels, who replied suitably.

Bringing the delightful evening to a close, a dainty lunch was served.

******

Mrs. R. Lauvenne is home visiting her parents, Mr. and Mrs. Charles Hammell.

JOSEPHBURG NEWS

The Josephburg Junior U.F.A. will hold their meeting at the home of Mr. R. F. Krebs on Saturday, June 30th. Important business will be dealt with, so all members are requested to please attend.

BASEBALL . .

The Fort ball team had a real battle last Wednesday night with North Edmonton, after the smoke had cleared from the battle ground, the Fort were left victors by a score of 6-5. Simmons and Pocock pitched for the Fort and were both in form.

******

Last Friday the team motored to points of each one of his players.

Gibbons and gave the Gibbons team a real smart game. Fresh from their victory of Wednesday, the Elks inspired a rampage through their rivals, that gave them a nice lead for the better part of the game. Breaking from this sweeping start, the Gibbons boys extended the Elks and subdued them to a final score of 10-3.

Tip came back singing loud the story of the team motored to points of each one of his players.

De-Bunking Mysteries

One of the traits which keeps humanity young and adds a zest to the mere act of living, is man's capacity for wonder, his somewhat naive curiosity in freaks, and his enthusiasm for the unusual or phenomenal in nature.

It can scarcely be called a characteristic distinguishing human beings from the beasts of the field or fireside, for the domestic cat or dog (to mention species coming within the range of everyman's experience) shows a strangely similar capacity when confronted with something strange in the immediate environment. By test of paw or tooth, it ascertains whether the new experience is good or bad; just as man will, by more complicated experiments if in true, attempt to rob the mysterious of its mystery.

There is a reason, of course, for the outburst.

Strange, very aquatic monsters have been sighted in diverse corners of the globe. Reports concerning them have been considered of sufficient interest to warrant publication all over the world. A British Columbia lake provided the first thrill of the present series in that which became familiar in everyone's mouth under the euphonious title "Ogopogo". The ocean, not to be outdone by a mere inland lake, immediately produced another of these strange dominoes of remote waters, which, christened 'Cadebonarmore' to the the credit of its habitat to Vancouver Island, quickly acquired a popular name. As "Cady" it attracted as much attention from reporters and the general public during its brief occupancy of the spotlight, as have the Qui-hi quintuplets of more recent and certain origin.

France next came to bat with a claim on behalf of its particular pet, seen as through a glass darkly, but acclaimed a monster, a fresh, a bona fide monster — a throwback. The world was agog with speculation as to what manner of things these viewless creatures were.

The sea serpent of myth and anecdote never attained such repute as the new pretender. A thousand years ago the sea serpent was the monster of a media which had stamped from the forest hair to many adventure on the briny deep, or it was the gnarled and twisted trunk of a fair mast caping which ocean currents imbued with semblitude of life.

This was less easily explained. His successor, whether in British Columbia, France, Scotland, Brazil or elsewhere all stressed the fact "Ogopogo", "Cady" or what-have-you, was different! Scientists were interviewed by representatives of the popular press and, in many instances, suggested it was a relic of pre-historic times hurtled across the ages, in some inexplicable way, into A.D. 1933 or 34.

It is to be regretted that Scotland should have been visited by one of these unfortunates. The hard-headed Scot, on occasions such as the anniversary of Burns, may indeed be prone to wax imaginings and uncanny visions, but in his normal state he is, essentially, "from Missouri". Loch Lomond, Ireland has learned, "ought be fashion. It produced a fresh scare from its "bonny banks". But when Loch Ness sought to uphold the dignity of salt-water—that was one month for the practical race north of the Tweed. It (the Loch Ness monster) was plain long-necked—and strange, indeed, it looked! A scientist subjected the picture to piercing scrutiny—and the mystery was gone. It was, in his opinion, the photograph of the flukes of a killer-whale, too modest to claim distinction for itself, abashed in competition with the million year throwbacks which imagination had created.

Until another wave of fresh discoveries hit the pages of our newspapers then, we must content ourselves with Alley Oop's dinosaur as a constant reminder of things that were before man was endowed with his amazing capacity to wonder

To Explore Ellesmere Island

Oxford University Expedition to Leave England in July

Edward Shackleton, son of the late Sir Ernest Shackleton, famous Antarctic explorer, is organizing what it will be known as the Oxford University Ellesmere Island expedition, which is to leave England in July to conduct a scientific investigation of the expedition is receiving the practical support of the Canadian government and the Royal Geographical Society.

Exploration and geographical survey of some of the hitherto unexplored interior of Ellesmere Island, about 600 miles off shore, Canada's Arctic coast, is the object of the expedition, which will be led by Dr Noel Humphreys.

Queer Thing About Prices

B.C. People Pay As Much For Apples As In Londonon

It costs just as much to buy an apple in London or in the British Columbia Interior, according to Lord Marshall of Chesterton, Major Pat A'Bechett, of Khartoum, Major Pat A'Bechett and Mr. Sprott, a Buckinghamshire village, owns the largest collection of walking sticks in the world. He has 22,000 different tags, and they cover every available inch of space in every room in the house and in his home. He has been collecting them for many years, and has travelled almost the whole world in search of new designs. He has some of the first match-boxes which came into use, and a history of wood; program can be traced in the collection. Pat designs on the match-box covers which form a unique wallpaper at his sporting inn. A few years ago, ex-King Alphonso, who is also an enthusiastic match-box tag collector, paid a visit to Major A'Bechett and spent several hours inspecting his display. But ex-King Alphonso's collection was limited to a mere three thousand!

All the most important growings-pers in Canada shed their oldest representatives of five times during the course of their development. The grasshopper's skin does not keep pace with the growth of his body, so this past goes through the several processes of moulting by hanging upside down attached by his legs to some support and slowly wriggling out of his old coat.

Show Tree Progress

Nevember Train Promises Railroads New Lease Of Life

M. H. Tracy is an artists in the New York World-Telegram, says carrying eighty-five passengers together with baggage and express 1,000 miles in thirteen hours and on $17 worth of fuel is something new. It promises the railroads a new lease of life, capital new enterprise and labor new work. Best of all, it promises the traveling public more for its money.

We have needed something of the sort for five years. With all the experimenting little has occurred in thrill people by. And many they have been forced to fall back on the hope that the best which could be done was to rearrange what they had on hand.

Progress, which should be considered a blessing, has dealt with passenger, is not made of that kind of stuff.

We are not going to find better living conditions, much less happiness, by doing what we have always done in a different way. That is where progress comes in.

Progress is a matter of invention and achievement.

Not the substitutive type, for instance, and what does it imply?

It implies the scrapping of billions of dollars worth of investment of crude oil for coal, the abandonment of steam locomotives for Diesel engines, a great reduction in labor and a reduced economy of item of steel, different operating and mechanical methods, the modernization of terminals, a new type of train and a multitude of other drastic readjustments.

LETTER FROM A MAN OF 90

About His Rheumatism

He asks us to excuse his writing. We do more than that we congratulate him on his writing and in spite of his age, especially as he has such sufficient vigor to demonstrate that he is still in his letter:—

"Three years ago I was in bed for six with inflammatory rheumatism. Since that time I have been taking Kruschen Salts, and have not had another attack. Still my hands are still somewhat crippled. I take Kruschen every morning before breakfast, and shall continue to do so. Indeed I am sure it has kept me in good shape for three years. Enclosed you will find a P.O. for another year's aid, and use both hands to write." J. R. G.

Kruschen dissolves away those needle-pointed crystals of uric acid which are the cause of the painful troubles. It will also flush these dissolved crystals out of the body for you. Then if you keep up "the little daily dose", excess uric acid will never form again.

An Unusual Hobby

Collection Has Wonderful Collection Of Match-Box Tops

A nephew of Lord Alverstone of Khartoum, Major Pat A'Bechett, of To Old Ploughs Inn, Speen, a Buckinghamshire village, owns the largest collection of walking sticks in the world. He has 22,000 different tags, and they cover every available inch of space in every room in the house and in his home. He has been collecting them for many years, and has travelled almost the whole world in search of new designs. He has some of the first match-boxes which came into use, and a history of wood; program can be traced in the collection. Pat designs on the match-box covers which form a unique wallpaper at his sporting inn. A few years ago, ex-King Alphonso, who is also an enthusiastic match-box tag collector, paid a visit to Major A'Bechett and spent several hours inspecting his display. But ex-King Alphonso's collection was limited to a mere three thousand!

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

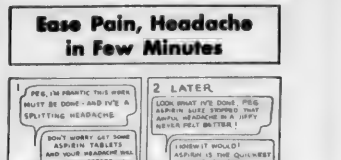
Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, soothing the stomach, and toning up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 86 years — you do not experiment when you use it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Ease Pain, Headache in Few Minutes



For Quick Relief Say ASPIRIN—*When You Buy*

Now comes amazingly quick relief from headaches, rheumatism, neuralgia, colds . . . the fastest we've ever seen! It's sold, get discovered!

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly (you swallow it). And then it really *begins to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN, demand *relief*. Be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Trying To Solve Puzzle

Scientists At Chicago Seek Reason Why Midgets Do Not Grow

Why is a midget a midget?

Scientists and medical men who have haunted over that baffling question for years will have an opportunity to pursue their investigations at the Century of Progress exhibition in the World's Fair this summer.

Nate T. Eagle, managing director of the new midget, and Major Bowes extended an invitation to scientists to use the colony of little people as a "clinic" for the presenting problem of why the midget never grow up.

The midget city will occupy the same location as it did last year but will be four times as large. It will be populated by the largest gathering of midgets of both sexes and all ages ever congregated in one place.

Although a midget's size is believed to be due chiefly to glandular disorders, no one has ever answered the question logically and scientifically.

X-Ray Motion Pictures

Newly Perfected Camera Shows Bones in Process Of Knitting

Motion pictures which are made by a new camera perfected by Doctor Arthur C. Pillsbury, naturalist and photographer of the University of California. Doctor Pillsbury's camera works on the same principle as the "movie" camera, but photographs the inside of bones, taking a series of single pictures at intervals, of a movement progressive to the human eye, and then running them off as motion pictures to show movements which may have taken several days, all encompassed in a few moments. The first motion picture made with the x-ray camera showed the growth in the interior of a rose. It took seventy-two hours to film, as only one picture at a time could be made in intermittent exposures. To avoid damaging the rose during the filming Doctor William D. Coolidge, inventor of the Coolidge tube, designed a special x-ray tube

Australian Poet Honored

Soul Placed In Poet's Corner Of Westminster Abbey

Adam Lindsay Gordon, national poet of Australia, who has been honored by his land being placed in the Poet's Corner of Westminster Abbey, is the first British Dominions poet to be so commemorated. One of the first poet so honored since Tennyson, beside whom his bust stands.

A memorial volume by Mayne Holmes, Gordon's friend, was petition the monument has been erected, has been published, giving the story of Gordon's eventful life, his one love affair, and his tragic death.

Gordon sailed to Australia "in the hold of a ship" and became successively a mounted policeman, a horse-breaker and trainer, a member of parliament, and the most famous amateur steeple rider Australia has ever known.

He died by his own hand in 1870, his memory still dotes, and depressed by the news that he had lost the case for the recovery of his ancestral home (on land of the Gordons of Haillead in Aberdeenshire) he went out into the scrub and shot himself—the day after he had published his last book of poems, "Bush Ballads and Galloping Rhymes."

The average cost of producing hay on the Dominion Experimental Farms in the Prairie Provinces has been $5.00 per acre, or 4.35 per ton for a yield of 1.44 tons per acre. Considerable variation in cost has occurred on different experimental farms, the cost per acre having ranged from $8.00 at Swift Current to $61.19 at Morden, while the cost per ton has varied from $4.47 at Scott to $8.42 at Indian Head.

Bumped By Sea Monster

Crew Of Schooner Has Exciting Experience Off Nova Scotia Coast

Yarmouth, N.S. A night of terror passed the sailing schooner Margaret K was described here by both crew and passengers as the sea monster bumped and battered the vessel off the Nova Scotia coast.

It happened Tuesday night, related one of the crew. The night was clear and calm and we rounded the eastern end of Seal Island.

Suddenly there was a thundering and then there was the shock. One of them shouted we've been rammed! Let's get out on deck.

Out we scrambled to the moonlit deck and saw nothing except for the swirling waves the huge form of what appeared to be a whale.

In fleeting seconds the thing rushed astern, directly beneath the ship and the force of the monster lift her almost clear of the water, almost if he plunge back with terrific force.

We don't know what it was but we started our engines full speed ahead and left the scene in a hurry, you can bet!

Japan Keeps Plans Secret

No Information Given Out Regarding 1935 Naval Conference

London. The Japanese have erected a disc-music fortress of secrecy around their plans for the 1935 naval conference despite assurances of the fairest treatment by representatives of Great Britain and the United States.

Tosuke Matsudaira Japanese ambassador to London lived in London and home. The man himself sits one piece of bread for his lunch

"Why can't these people live," asked Sam Factor, Lib., Toronto. "If I were the executive of a department store I certainly would inquire about such terrible wages."

The auditor told of conditions in another store where $5 per cent. of the employees were paid below the legal minimum. In one department of 55 girls, only two made the minimum wage. Two boys received $2.50 and $3 for a week of 53 hours. In this factory, 63 per cent. of the men were paid 10 cents an hour or less.

There was an audible gasp in the committee room when the auditor told of work being done in home by adults and children. About $1.50 would be paid for jobs requiring 10 hours of adult work although it was impossible to say what per centage was done by children.

Another plant, dating back to 1926, discharged women workers who could not earn legal minimums but, on the other hand, paid extremely low wages to men. In the week ending April 28, 1934, the company had 29 men and boys earning less than 10 cents an hour and whose weekly average was $2.65. One-half the men in the plant earned less than $6, the minimum for inexperienced women. The average for all men, excluding foremen, was $6.71 a week and for women, $7.37.

Gold Coinage Disappearing

Premier Bennett Predicts That Gold Redemption Of Currency Will Be Ended

Ottawa. — Expressing the belief that gold redemption of currency would ultimately be resumed, Premier R. B. Bennett, in the House of Commons, prophesied that gold coinage would disappear.

Gold redemption would be resumed by the nations of the world "since apparently it is the only basis on which we can have any stability," but the redemption would be in bullion, not in coin

Canadian Cheese Good

Ottawa The quality of Canadian cheese in the United Kingdom was so satisfactory that no suggestions were offered by the largest importers on how further improvements could be made, said J. S. Singleton, Dominion dairy commissioner, on his return from London and Liverpool.

SORDID DETAILS OF CONDITIONS IN SWEATSHOPS

Ottawa. Sordid details of sweatshop conditions in right shoe factories in different parts of Quebec were disclosed to the parliamentary committee investigating the findings auditors said they found many breaches of Quebec minimum wage laws and the evidence probably will be passed on for prosecutions

The committee ventured up another alley wages paid in factories supplying goods to operations at stores. The Quebec shoe manufacturers were selected from advertisements run in different stores but though no evidence went unturned Here were the highlights of one plant

It has made substantial profits for four years

The average weekly wage paid women employees in October, 1933 was $8.71.

The average for 172 men was $9.35

Of the 172 men, 126 were married with 401 children.

Eighty-two men received less than $6 a week

There were two accidents in one week one operator lost a finger from the owner of the factory leaning over the shoulders of his workers shouting at them to speed up their work.

Fifty per cent. of the men and boys in the plant last October received less than the minimum wage set for inexperienced women. The Quebec law, like Ontario's, does not touch men.

One investigator asked a man how he existed on his wages. The reply was that four children lived in one home The man himself his one piece of bread for his lunch

"Why can these people live," asked Sam Factor, Lib., Toronto. "If I were the executive of a department store I certainly would inquire about such terrible wages."

The auditor told of conditions in another factory where 85 per cent. of the employees were paid below the legal minimum. In one department of 55 girls, only two made the minimum wage. Two boys received $2.50 and $3 for a week of 53 hours. In this factory, 63 per cent. of the men were paid 10 cents an hour or less.

There was an audible gasp in the committee room when the auditor told of work being done in home by adults and children. About $1.50 would be paid for jobs requiring 10 hours of adult work although it was impossible to say what per centage was done by children.

Another plant, dating back to 1926, discharged women workers who could not earn legal minimums but, on the other hand, paid extremely low wages to men. In the week ending April 28, 1934, the company had 29 men and boys earning less than 10 cents an hour and whose weekly average was $2.65. One-half the men in the plant earned less than $6, the minimum for inexperienced women. The average for all men, excluding foremen, was $6.71 a week and for women, $7.37.

Second Action Against Rodeo

Tax Auditor Is Having His Troubles In England

London. — Troubles continued to pile up for Tax Auditor, promoter of England's greatest rodeo.

Already accused of terrifying a steer in violation of laws against cruelty to animals, Auditor was notified of another action against him because he staged a charity performance of his greatest rodeo Sunday.

The action was instituted by the Lord's Day Observance Society, which seeks to collect $500 from Auditor and $1,000 from the National Sporting Club.

United States Buying Silver

Washington. — United States government has extended its new monetary policy into another field with the signature of President Roosevelt of the Pittman silver purchase bill. The measure directs buying of the metal by the treasury until it comprises fifty per cent. of the nation's metallic monetary stock.

Canadian Printing

Ottawa. The Canadian printing trade employs 32,584 men and women, says the Dominion Bureau of Statistics, and produced $101,492,886 in 1931. $66,312,866 representing daily newspaper output.

Across Atlantic In Yacht

Lone Adventurer Makes Perilous Trip From Ireland

St John's Nfld. A lone adventurer from Great Britain sailed his tiny yacht into harbor after crossing the Atlantic and then tumbled gratefully into bed for his first real sleep in 24 days.

Commander R B Graham R N was skipper and crew of the 26-foot yawl on the perilous crossing from Baltry Ireland He left there 24 days ago and though heavy weather beset his little boat at times made a remarkable fast crossing

To Lone Commander Graham spent sailing across the Atlantic while handled right he an every-day happening "Yes" he said, "we had some varied weather but the boat behaved splendidly

Nothing worried him on the long trip, he said except lack of sleep At night he would turn in after setting a course and leaving the yawl's helm lashed but sleep would be interrupted from time to time

JAMES G. GARDINER

Liberal leader of Saskatchewan, who was re-instated to power by a resounding majority.

Saskatchewan Elections

Liberals Returned To Power By A Most Decisive Reelection

Regina The Liberal party under the leadership of James G Gardiner, were swept back into power in the Saskatchewan elections in a most emphatic manner With the election of five or six Farmer-Labor candidates the C C F party will form the only opposition Not a single Conservative supporter was elected.

In an interview Premier-elect Gardiner said the legislature would be assembled as soon as possible There may be a special session to repeal the School Legislation Act passed by the now-extinct Anderson government.

This legislation, which would automatically come into effect August 1, would place educational matters in the hands of a commission, called "take education out of politics" as Premier Anderson contended. But it was diametrically opposed to Liberal educational policy, said Mr. Gardiner, and he was basing into the legal aspects of the legislation to see if a special session would be necessary to preclude its going into effect.

The campaign had been closely fought The issues were clear and the policy of the Liberal party to enforce economy in administration, effect reconstruction and to improve the trade relations of the Dominion with other countries had been clearly approved.

Better Feeling Towards Canada

Vancouver Better feeling towards Canada and Canadian products is reported by Col T. A. Hinds, former assistant to the president, Canadian National Railways, who arrived in Vancouver on the liner Empress of Japan, after what he termed a "scouting" trip to the orient.

Crop Situation Improves

Dominion Bureau Of Statistics Issues Report For West

Ottawa. — Cereal crops in the prairie provinces were adjusting themselves to the complete change in weather conditions which occurred during the first week in June, and which had continued since that time stated a crop report issued by the Dominion bureau of statistics

In some areas notably the southern portions of the three provinces drouth, wind and grasshoppers have done a toll of the crop and even the favorable weather so far experienced in June will not effect damage. In these areas, however, a noticeable improvement has taken place. Grasshoppers have been generally inactive Crops in northern areas of the three provinces have made steady progress during the past week

Manitoba prospects range from fair to good except in southern districts, where adverse weather conditions caused serious damage

British Tariffs Attacked

Rome Germans and Italian delegates to an international wool conference here attacked British Empire tariff preferences and threatened to curtail imports from much wool producing countries if refused to accept German industrial exports while giving preferences to those of other countries

No Answer From Thomas

London. J M. Thomas, secretary for Dominions declined to answer in the House of Commons when a questioner asked if the British government was prepared to "bring pressure" on the Canadian government to implement the Ottawa agreement in respect of the Canadian tariff board

SPECIAL STAMP COMMEMORATES DISCOVERY OF CANADA

Here is a reproduction of the special stamp to be issued by the Post Office to commemorate the 400th anniversary of the discovery of Canada by Jacques Cartier. The stamp is to be released on July 2nd.

HEPBURN TO TAKE OVER REINS OF OFFICE ON JULY 10

Toronto — Mitchell F Hepburn the youngest man to ever gain the premiership of old Ontario, arrived here to build up a Liberal cabinet to take over the reins of government, back in the group of the party after a lapse of 29 years

As the 37 year-old Liberal leader, tired but happy", rested at his home near St Thomas after a strenuous campaign climaxed with a smashing victory disclosure of the overwhelming downfall of Conservative representatives turned to eager speculation as to the next steps

It appeared the new regime the first Liberal administration since 1905, would not be in office for three weeks, or until about July 10. Premier George S Henry and his ministers and heads of departments will clean up their desks before tendering their resignations to the lieutenant-governor Mr Hepburn will complete his cabinet slate and formulate the initial program before taking over

Date of the advent of beer by the 4 p.m. proclamation of an early session of the legislature to deal with unemployment and relief, as promised by Mr Hepburn, the first bunch of 23 bands and commissions which are to be revised, and like questions occupied the minds of the slenderwhile they their record-breaking turnout.

Aftermath of the Liberal avalanche which swept Conservatives out of every seat west and south of Toronto and took six of Tory Toronto's 12 ridings, were suggestions of recounts in a few ridings where the vote was close, and a few unofficial pleas to Conservative headquarters for consideration of a convention to choose a new leader and revise the platform

Much Depends On Weather

Global Waves Begin Will Greatly Lessen Grasshopper Menace

Saskatoon — Extraordinarily early maturity of grasshoppers in Saskatchewan, where they attacked British Empire tariff preferences and threatened to curtail imports from much wood producing countries if refused to accept German industrial exports while giving preferences to those of other countries this year has pushed forward the mature age of the grasshopper into Saskatchewan's rainy season. Much depends on the weather. Given warmth and moisture the damage wrought by grasshoppers after the flying stage is reached may be much less than last year

Public Works Program

Federal Government Plans Expenditure Of Forty Million Dollars

Ottawa. The House of Commons has before it the government's public works construction program involving an expenditure of some $40,000,000 on building operations scattered over the whole Dominion. It is intended to provide employment and stimulate business and industrial recovery With little discussion the house passed the resolution preliminary to the introduction of the bill to provide for the construction projects and gave first reading to the bill.

Bank Bill Approved

Ottawa. — The senate banking and commerce committee passed with two exceptions, the first 87 sections of the banking bill passed by the House of Commons, June 11. Section 35 dealing with annual and special statements of the chartered banks, and section 75, dealing with the business and powers of the banks, were held over for further consideration.

Silver Export Higher

Ottawa. Export of silver bullion in May more than doubled that of the corresponding month last year, while a substantial increase was shown in the value of gold bullion exported, the Dominion bureau of statistics says in a report.

Research Laboratories Investigate Possibilities Of Using Wheat For Manufacture Of Fuel Oil

Seeking new uses for Canada's new over-abundant supply of wheat, scientists are investigating the possibility of using 25,000,000 bushels of wheat every year to drive motor cars. After further study of the possibility of using alcohol made from wheat as a motor fuel the national research laboratories have issued a revised report bringing the information available up to date.

If one-tenth of the annual consumption of motor fuel in Canada were replaced by alcohol made from wheat the report estimates, some 25,000,000 bushels would be needed. A survey shows the use of mixed motor fuels is increasing in Europe and is being seriously considered in the United States.

In a discussion of this possibility the report estimates it would increase the cost of motor fuel by approximately 4 or three cents a gallon, assuming the use of No. 5 wheat at 68 cents per bushel. Fort William basis.

Engine tests carried out in the national research laboratories with mixtures containing 5, 10 and 15 per cent alcohol show that alcohol is an excellent anti-knock agent. The 15 per cent blend gave somewhat more power than gasoline alone, but fuel consumption is higher. It is suggested the use of alcohol might reduce the necessary the importation and use of tetra-ethyl lead as an anti-knock compound.

In the future motor fuel made by the hydrogenation of coal may also be a competitor in the motor fuel market, the report notes. This will be finally demonstrated in the course of a year or two as a result of a plant being built in England under a subsidy arrangement with the British government.

What Is Wealth

No Surplus Of This Commodity Says Official of Farmers' Union

Henry Ford

"There is no wheat surplus in the world to-day, Henry Ford said in an interview with the Financial Post. "The world could use many times as much wheat as it grows today," he said.

"Wheat is wealth," he continued. "The wheat surplus is a direct challenge to learn more ways in which to use wheat. The trouble is everybody thinks of wheat in terms of money. They raise wheat in order to buy money with it. That is putting the car before the horse. The wheat, in itself, is the money in merely part of the conveyor system which passes it from hand to hand.

"The automobile magnate who comes away in a move of some far-reaching importance to discover 'Yet with all the magic of our unrivalled future in every kernel of wheat we sell Farmers that they must grow more of it and we try to raise the price so that people cannot afford to buy it," he declared.

"There never was a crazier notion than the idea that there can be too much of anything. It is unthinkable. "There is need right now in the world for all we can produce of every useful commodity."

Canada's Dairy Cattle

Number Is Steadily Increasing Studies Federal Official

Hector Cutten of the dairy branch of the federal department of agriculture, told a meeting held at Kentville, Nova Scotia, the number of dairy cattle in Canada is steadily increasing despite Henry Ford's prediction that before long a milk flivver will replace dairy cows and agriculture cannot survive mechanization.

People in Canada are using more condensed milk than ever before, he said, noting that the first condensed milk factory in Canada was built in Truro, N.S.

He continued that Canada, in less than 50 years, produced $200,000,000 worth of dairy products.

A Scientific Feat

Scientists Freeze Fur Seals, Thaw Babies For Winter Should Growth

A scientific feat that is almost the equivalent of abolishing winter is new kind of rejuvenation process for human beings are invited or free-for-all orders are anticipated, followed a debate in the commons in which Sir John Gilmour, home secretary, intimated the government might have to arm itself with further powers to prevent disorder.

Leaders of all parties in the house will be consulted on the new legislation, it was said. Recent clashes between Fascists and Communists were referred to during the debate.

Offers Good Market

China Imported $800,000 Of Chewing Gum Last Year

Last year China imported $800,000 worth of chewing gum. This amount is estimated to total about 70,000,000 strips. The traditional Chinese equivalent of gum is the watermelon seed, of which tons and tons are eaten each year throughout the width and breadth of this vast land. Few Chinese pass a day without cracking a few hitch dried seeds between their teeth and it is estimated that every Chinese disposes of at least ten seeds a day. If an arithmetic proportion of 400,000,000 is accepted it will be seen that gum has a long way to go.

Beating The Law

How the law is beaten as told by a Kansas paper: A travelling man says he called the attention of a waiter in Kansas hotel man that it was against the law to use roller towels. "I know it," said the landlord, "but that towel was up before the law was passed and the law is not retroactive. The law has been in the books over 20 years.

Water Shortage In London

City Has Only About Three Months' Supply In Storage

London tube trains and busses are plastered with notices urging economy in the use of water, as no prospect is seen of any material rainfall Home society comes in several small conduits where, if the dry weather continues, assistance may be sought from other municipalities.

London itself has about three months' supply in storage.

Tomatoes grow reddest if not exposed to the hottest sun.

May Undertake Study Of Barley With Object Of Improving Quality And Finding Markets

Problem In Nature

How Birds Know Their Especial Points Of Beauty

A mysterious problem is presented by the way birds display to best advantage their especial points of beauty, for, inching mirrors, how should they know where their beauty lies? where are the touches of color, out of sight of their eyes, which are crowning glories? How should a goldfinch know the shimmer of the yellow of the blaze of crimson on his face? Yet he will force the glory of his blaze on the attention of the hen he is courting, turning his head this way and that, as if to hypnotize her by its brilliance And it is very often that he makes the most of the gaud bars of his wings as the chaffinch does of his white epaulets The goldfinch dances to display those bars, and the way he stretches his wings fanwise, with the air of a tailor unrolling a cloth of gold has earned him the name "proud tailor" A hundred examples of beauty of which birds seem conscious though it may be unstable to their own eyes will crowd to mind A minor one is presented by that lover of frost, the ouzbird, who will turn himself into a green and ruddied image of a bush as he poses on a tree-trunk before a hen as if to give her the best possible view of his beauty Similarly the buff tonee To display the buff on his breast he parades before her with stately steps and head pushed far back.

Alberta's Fire Toll

More Casualties Last Year But Less Property Loss

Thirty deaths from fires were the casualty list for Alberta in 1933, according to the report of Fire Commissioner Henry Benns, as made to Hon. R. G. Reid, provincial treasurer for the calendar year. The number of deaths is considerably in excess of the figure for the preceding year, which was but nine

There were 1,823 fires during the year, in all parts of the province, and property loss aggregated $1,435,612 as compared with $2,695,491 from 1,937 fires in 1932 A reduction in losses for the second year in succession, amounting to more than a million dollars, is regarded as a highly encouraging feature of the fire situation. It was, moreover, the lowest fire loss on record for the past 14 years.

While the number of fires was only slightly less than the year before, the report points out that "the fires that did occur did not assume the proportions or cause the destruction that was the case in former years."

Eight out of every 10 fires are declared to have been due to carelessness in the handling of fire or neglect in removing fire hazards.

The only notable increase in Sunday school attendance in the world in recent years has been in Africa.

Establishment in Canada of a barley research laboratory and if necessary the importation from Europe of a bio-chemist with special knowledge of malting problems to direct it, was recommended by the grain research committee at its meeting in Ottawa.

E M Hamilton, member of the board of grain commissioners, Winnipeg L D Wilgress, director of the commercial intelligence service, department of trade and commerce, Ottawa, and C B Davidson, of the agricultural branch, Dominion bureau of statistics, sat in at the meeting.

Representatives of the University of Alberta the University of Saskatchewan the Canadian pacific and international institutes of barley as she had undertaken fundamental studies of wheat.

It was decided to prepare memoranda for the appropriate authorities on the discussions which had taken place at the meeting and the following Ways and means of facilitating the distribution of feed grains in the domestic market, were also means of increasing the cleanliness of coarse grains and the desirability of raising the standard of coarse grains and standard of ways and means of assuring that sufficient seed of good quality is available in growing areas.

Farm Crops Production Costs

Keeping Cost Records Has Become Necessary For The Intelligent Farmer

Data on the cost of production, ownership kept for several years and then properly interpreted, make possible a more intelligent selection of crops and throw some light on a better proportion of which crop to grow Every farmer has his own method, as is evidenced by the story of the farmer whose barn was on fire. His neighbors were helping him, first getting out the stock, and then as the exhibit a stanzer he had sculptured especially for her as a wedding gift They named it "Land of Hope".

CHAPTER XLIX

Peter refused to comply with Camilla's plans that he should come to her apartment for a week of rest, and to get away from his work

"What a big idea of that!" he wanted to know "Nothing for me to do there, and you are away all day."

"But it's a pleasant place to rest and I thought it would be a good change for you."

"Say, I'm so invalid I have to be busy doing something. You don't suppose I'm going to wait around for that critic to come expecting to win, do you?" He laughed ironically. "From now on, I am going to accomplish something worthwhile. I already have a standing order from Avis and I'm going to get to work on it."

At every mention of Avis' name Camilla experienced a shock of pained remembrance and hate There could be but one explanation of her ready accusation of Camilla after the tragedy She was trying desperately to separate her from Peter so how Camilla held that to the latter mind she never could do that herself Peter was changed, but not because his love for her had changed. It was his work and anxiety and then the final crushing disappointment that had made him seem dull and gloomy. She very patted him and pretended to do something for him which would restore him to the normal honey Peter of the spring time of their love

His remark about starting work on some a sculpture for Avis brought to her mind reluctantly some of their days of romantic and planning together Avis would make the mold of that opportunity which was to undoubtedly her team for the big Peter do the work Of course she was glad for Peter to have a good client like Avis just now after the needed definite encouragement she tried to assure herself But there was no doing the again Even of the situation She tried to appear interested as she would have been in any other such prospect

What kind of thing are you doing for her?" she inquired naively.

I don't know. Some studio stuff for vases and garden pieces, for mother That is what I've got to get busy and find out. It means that I'll have to go to the Westbrook fair and study a little and keep a weather eye to what is taking in my line suggest and plan with them It a a big order."

He agreed however that Camilla's plan for an afternoon and a picnic supper in the woods on Saturday was a good one. Peter's mood changed prayerfully for a glorious autumn day for their first opportunity of the year for a long time Camilla's spirits go to a cabaret to continue the quiet Peter and Camilla ran off to the beach by themselves and fell asleep on the sand Where they awoke It is early morning and Avis and another boy are standing near them This makes it necessary for Camilla to announce before the party that she and Peter are married Camilla urges Peter to accept some of her earnings to help pay for Peter's tuition and they started After Camilla has gone to the studio Avi Wertli calls and persuades Peter to accept a loan of $1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it Camilla suggests "Eager Youth" and Avis "Inspiration" Peter adopts the latter title and Camilla, Beatrice goes to Peter's studio for quiet and to think things out and Avis follow later, and as the light is turned on, we see the statue has been shattered to pieces Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter rubs on the exhibit a stanzer he had

All Have One Defect

Plans To Make Over Society Forget About Human Nature

Either Root, one of the foremost American jurists and statesmen of this generation, once said: "All my life people have been coming to me and asking me to make over society and its institutions. Many of these plans have seemed to be good. Some have been quite practical. But they had one fatal defect. They have assumed that human nature would behave in a certain way. If it would behave in that way the plans would work, but if human nature would behave in that way these plans would not be necessary, for in that case society and its institutions would reform themselves.—Toronto Mail and Empire.

Everybody Tries It

The human desire to get something for nothing apparently knows no limits distinction. Police headquarters revealed the occupants of 56 persons arrested in raids on local bookmaking and lottery rings. Among them, a "gentleman farmer", a journalist, a tailor, six tailors, six traveling salesmen, a dressmaker and a negro porter.

HOW TO KEEP COOL

Take an all-evening glass of pleasant-tasting Andrews Liver Salt when you begin to feel the heat. At once you will feel cooler—you'll stay cooler. Will Not Be Exhibited

Inventor Consents To Suppression Of Death Ray Machine

An astounding invention of the century a death ray machine, will not be exhibited at the National Inventors Congress at Omaha Nebraska President A G Burns, Oakland Cal had delegates.

The invention has been suppressed by the United States government, with the consent of the inventor, Burns said He said the machine capable of killing birds in flight two miles away was perfected by Dr. Antonio Longoria, a Cleveland, Ohio, physician and electrical engineer

"I witnessed a demonstration of the machine by invitation in Cleveland last October" Burns said "It resembles a motion-picture projection machine and although I passed government scrutiny were there

"Dr Longoria turned the ray on rabbits and dogs. They fell over instantly killed their blood turned to water The same thing happened to pigeons unhooded and airborne. So quick a death that they fluttered to the ground and were dead when picked up"

Because of its terrible death-dealing possibilities Dr Longoria, according to Burns, readily agreed with government representative that the machine be suppressed.

THE RHYMING OPTIMIST

By Aline Michaelis

LOVE'S CROWN

Nothing of this did you speak, O my love
When you came my way
Only your voice was the voice of a dove
And your words were gay
Laughter was light upon your lips,
And the mist
Showed the sky all blue;
Carelessly you wove me
Into your web of love
Without a thought
That you
Would ever be
Nothing to me O my love did you tell
And I tremble now
Lest only the wind be a tempest
Or the crashing heap
Splinters and falls in the gusts of
That are swooping down
Yet how is it your guirlande frail
Have become a crown?

Speedy Rail Service

C.P.R. Provides Faster, More Frequent Service Between Regina And Moose Jaw

The Canadian Pacific has inaugurated a special gas-electric service between Regina and Moose Jaw making six trips each way daily except Sunday and four trips on Sundays. In addition, lares have been added as follows:—One way $1.20, return $1.85 with special week-end fare of $1.40.

The particularity fast, comfortable service between the two cities should prove very convenient for and popular with the travelling public.

Administering The Law

In Central Park, New York, on a forbidden stretch of turf green in the May morning some children were playing Suddenly the law swooped down on them hawk-like two cops in a police car, big with duty, turned their car off the driveway swiftly shot it up onto the lawn and right across it to where the children stood "Get off the grass!" The children ran. The cops backed their car around and scuttled away. Peace settled down again the little prostrate blades of grass straggled slowly back to their feet.

Every year, 5,000 earthquakes shake the earth; the internal pressure is adjusted about once every hour.

MATURITY—MATERNITY MIDDLE AGE

At these three critical periods every woman needs a medicine she can depend on. That's why so many turn to Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.

Little Helps For This Week

"Blessed be the Lord who daily loadeth us with benefits" Psalm 68-19

Source of life's refreshing springs,
Whose presence in my heart sustains me
My love ordains me pleasant things,
They mercy orders all that pains me
—A. L. Waring

When I survey the occurrences of my life, and call into account the finger of God I can perceive nothing but an abyss and mass of mercies, either in general to mankind or in particular to myself These things which others term crosses afflictions judgments or misfortunes to me who inquire further into them thus their visible effects they both appear and have ever proved the secret and dissembled favors of His affection — Sir T Browne

A New-Found Continent

Discovered On Pacific Floor By Echoes From Depth Finder

Mountains higher than Mount Everest, huge plateaus twice the width of America and great chasms that drop more than six miles downwards these are characteristics of a new-found continent. This hitherto unknown territory stretches beneath the surface of the North Pacific. It was discovered by echoes From the depth finder in the U.S.S. Ramapo The Ramapo has been on a survey of the Pacific ocean bottom. It found that the submerged territory is not marked by steep depths in its separation from North America. In fact, appears to be a mined eastern shoulder of the submerged continent. but the west coast of Asia shows a series of tremendous deeps From north to south in the west portion of the "continent" is a mammoth mountain ridge with towering peaks which are known to Pacific mariners as islands banks and reefs

British Speed Ace Beaten

Youth Defeats Malcolm Campbell in Home-Made Car

A youngster in what was virtually a home-made car had the thrill of beating Sir Malcolm Campbell holder of the world's fastest land speed record It happened at Brooklands in the fourth race

He was W E. Harker and he proudly called his car a Harker Special It was driven by two small M G engines coupled up with great skill by this young engineer Campbell's car was the giant Bunhaun, of 2,976 c.c The Harker Special was only 1,092 c.c

Campbell started scratch Mr. Harker in his homemade car had a start of 31 seconds. Campbell drove with all his accustomed skill He overhauled the whole field, but found his master in Mr Harker and his Harker car

LOCAL NEWS

Mr. and Mrs. W. J. Williamson are celebrating their Golden Wedding anniversary on Friday, June 27th at their home "Elmcrest".

Rev. and Mrs. D. C. Rumsey and family are leaving next Monday for Pictonville, Ontario, by motor.

Last Thursday was the day of longest sunshine hours for 1934.

A number of Old Timers of this district attended the Alberta Northern Old Timers picnic at Lakeview last week.

On account of July 1st a statutory holiday falling on Sunday, Monday July 2nd, will be observed. All places of business will therefore be closed.

The stores in the Fort will remain open Saturday night as usual.

The transfer of Mr. W. E. Roberts as chief engineer from the provincial Coal to the Parliament Buildings power plant, is Edmonton gain and our loss. Mr. Roberts has been here for the last six years, and the family have been very popular. Many social events are being held for Mrs. Roberts and family, by the various organizations with which they have been connected.

It looks as if the tourist traffic would be abundant this season in these parts. Among foreign cars passing through we noticed one yesterday bearing a Haiti license plate.

An unusual thrill was reported to the authorities a few days ago. A farmer living West of the Fort had a hog weighing 300 pounds stolen from his place in the night. The R.C.M. Police are investigating. Other thefts were reported the same night along the highway, presumably by the same persons.

Mr. and Mrs. John Galloway will be at home to their friends on the occasion of their Golden Wedding anniversary at the home of Mr. and Mrs. Percy Galloway on Tuesday afternoon and evening, July 3rd.

Mr. and Mrs. A. E. Rogers and Josh are leaving Thursday morning by auto, for London, Ontario, and Western points on an extended holiday.

For a period of two hours Wednesday afternoon the Calgary power was suspended, while necessary repairs were being made to the line. This has not happened for sometime, and we hope it doesn't occur on a Wednesday again.

The Record for all your Printing.

FORT SASKATCHEWAN RECORD

VOL. 13 No. 14 FORT SASKATCHEWAN, ALBERTA WEDNESDAY JULY 4th, 1934 $1.50 PER YEAR IN ADVANCE

Large Attendance is Assured At Edmonton Exhibition

It is expected that all roads will lead to the Edmonton Exhibition the week of July 16 to 21, as unusual interest is evinced in the many new features which the Exhibition management have arranged for this year's show.

Free Tractor Races

Many refuse to believe that farm tractors can be safely run at several 50 miles per hour, but, seeing is believing, and this may be soon at the coming Edmonton Exhibition. The Exhibition management have been advised, Len Meyer, famous speed ace, has been engaged to drive one of the tractors which will run on Tuesday, Thursday and Saturday, July 17-19 and 21.

Television

Another unique feature will be the giant Television Show. This was one of the most talked of attractions at the Royal Winter Fair at Toronto the past winter. Prominent citizens of Edmonton, and local artists will speak or sing or play in a studio on the Exhibition grounds, and in a separate theatre they will be seen.

Advance Sale of Admission Tickets

The Exhibition Management have decided to repeat the advance sale of tickets at reduced rates, for the 55th Annual Edmonton Exhibition. There will be on sale throughout Northern Alberta to the end of the week before the Exhibition opens. A novel contest has been arranged for boys selling these tickets. Free trips to the Exhibition, all expenses paid, will be awarded to the twenty boys in Northern Alberta selling the largest number of advance tickets, and local citizens in every town will be boosting their home town boy for one of these coveted free trips to the Big Fair. Advance tickets will also be on sale by town dealers and Postmasters or you may mail a dollar direct to the Ticket Committee, Edmonton Exhibition Assoc., Ltd. Tickets are on sale in Fort Saskatchewan by Wilson Bush.

New Car Completely Damaged Townspeople in Crash

Mr. and Mrs. Mort Wright while on a motor tour, after purchasing a new car in Detriot, met with an accident at Portland, Ore., when a car coming from another direction collided with their car, turning it over several times, and completely damaging same. Mrs. Wright sustained minor injuries which necessitated her being confined in the hospital at that point for a few days.

The daughter of Mr. and Mrs. Gus Becker of Portland(son and daughter-in-law of Mr. and Mrs. George Becker) was in the car at the time, but escaped injury.

The car was completely covered by insurance and Mr. Wright will drive back in a new car.

Mr. and Mrs. Wright are expected home shortly. We are glad to hear that Mrs. Wright is quite recovered.

BASEBALL

After a hectic eleven inning game, the Fort ball team was tossed out of first money by Lamont by a score of 4 to 3 at the Brudderheim sports day held last Monday.

With ideal weather the large program of sports were run off before a large crowd of spectators.

HOGS ARE KIDNAPED IN BROAD DAYLIGHT

Owners of pigs will have to put a body guard over their hog pens in future. We reported the loss of a two hundred pounder last week, and word just came in this morning that a farmer living a few miles East, lost 2 white Yorkshires had been kidnaped during yesterday, tools and other articles were also stolen. Constable James of the R.C.M. Police is investigating.

Ten pages in this weeks' Record. Another page of local events inside.

Fort Couple Celebrates Wedding Anniversary

Mr. and Mrs. William J. Williamson of Fort Saskatchewan received the congratulations of a host of friends on the occasion of the 50th anniversary of their wedding. Mr. and Mrs. Williamson were married in Lindsay Ontario and came to western Canada, to their farm at Poplar Lake in the year 1905. For the past several years they have been farming at Fort Saskatchewan. They have six children and seven grandchildren.

Gibbons News

To Scribe went away last week and forgot to send any news.

Yes! we enjoyed the nice friendly game of baseball with your Fort boys. Seems like old times.

Crops are looking wonderful in this district the sub-soil seems to be taking all the moisture- no great run off has occurred in spite of the very heavy rains.

Mr. and Mrs. L. S. Hays are leaving shortly for Prince Albert district where Mr. Hayes has been transferred by the Federal Elevator Co. We are very sorry to lose them. Both being workers in the church work of the district. We wish them success in their new home, but hope soon to see them back to Edmonton and Gibbons.

Announcement was made by Hon. Mr. Brownlee today that he was not resigning as a private member of the legislature, representing the Peoples constituency, but had decided to resign as Premier.

Duncan Marshall, formerly minister of Agriculture in Alberta, was elected in the Liberal landslide in Ontario in Peel constituency.

YPRES VALLEY NEWS

On Wednesday, June 20th, Mrs. Wm. Gillison entertained at a farewell party for Miss Lamrick, who is leaving the district. Table tennis and cards were played. The first prize for cards were given to Mrs. Fred Davis and Mr. Art Irvin. Mrs. Attewell and Mr. Fred Davis received the consolation prizes.

Miss Lamrick took thirty school children and sixteen adults on an Educational trip last Thursday, when the Alberta Dairy Pool, Borne Fertilizer Plant, Dominion Bun Factory and Favor's Candy factory were visited. Also the McDougall Church where the children heard the pipe organ played by M. Tucker. Then all went to Borden Park to finish off the picnic, but the rain dampened the fun, but not the children's spirits. After supper the children presented Miss Lamrick, with a silver flower vase.

Quite a few have attended the Bean Creek picnic last Saturday, but were again chased home by the rain.

CORRECTION

Frances Ashton won the Short Course Scholarship to Olds, being the first eligible girl with the highest total number of points, and Ypres Valley school won the Educational Diploma for the best exhibit of school work.

U.F.A. MEETINGS IN EDMONTON AT EDMONTON

Members of the U.F.A. are holding sessions in Edmonton this week with the view of selecting a new leader to succeed Hon. J. E. Brownlee who announced last Saturday following the result of the reduction trial held at the Supreme Court that he would place his resignation in the hands of Lieutenant-governor Walsh at an early date.

Hon. George Hoadley and Hon. C. J. Reid has been mentioned in the daily papers as possible leaders, but nothing definite has been decided at the U.F.A. meeting yet.

A.Y.P.A. HOLDS SOCIAL EVENING IN MEMORIAL HALL

The St. George's A.Y.P.A. and their friends held a social evening in the Memorial Hall last Thursday evening, in honor of Miss G. Roberts, Herb. and Ed. Roberts who are leaving the town, to take up residence in Edmonton.

During the evening presentations were made to the Roberts', and also to Helen Lerman who left Saturday for Kelowna, B.C., where she is to be married.

At midnight dainty refreshments were served after which dancing was again resumed until the early hours.

The music for dancing was supplied by Miss Rita Sherman, O. Kellerhuis, W. Lamoureux, P. Smith, and M. Stackhouse.

Object-Lesson Of Peace

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world value of the lesson presented by the unique fact that not a gun nor a fort stands as persuasion between the two countries throughout the whole extent of the international boundary.

This is so phenomenal a situation that it has attracted universal attention, been the subject of thousands of after-dinner and more ceremonious addresses, and stands to-day in a belligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any act of fiscu or factors could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost inestimable benefit to Canada. Billions of dollars of American money has been invested in this country. Hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada: those people have contributed their share to the upbuilding of a great dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. Those facts are evidence of the confidence with which the people of the sister country view their neighbors to the north and lastly to the best appreciation they have of the solidarity of British institutions and British forms of government.

The unique and signal character of this unfortified frontier, the amity between the two nations, and the close economic relations which seem to stand superior to trade rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an inspiring object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The facts stand to their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to bind itself to any economic definition or be written into any formula for use of peoples who, similarly situated geographically, cannot get along together.

Whatever the finding, the lesson stands for the world to view—an irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that, demonstrating their mutual goodwill by dispensing with the so-called weapons of the defence, neighbors may live in harmony without inciting those conditions of the mind or of the body politic which lead to war.

Probe Working Of The Brain

Use High Radio Currents To Stop Functioning Of Limited Areas

How a University of California psychologist used high radio currents to stop the functioning of limited areas of the brain without interfering with the other parts, to study the purposes of particular centres of the mot. brain, was described to the American Association for the Advancement of Science.

This somewhat startling method of probing the functional workings of the brain was based on the research task, for the first surgical patient was so frightened at the idea of being "put to sleep" that he begged from the operating table and ran away.

Among the instances showing the great work being done for the people through the hospital was that of a blind man who had to be led there, and who, after cataracts had been removed, went home unaided. The gratitude of the patients is most touching, stated Miss McConnell.

In English law, a bailiwick is the district within which a sheriff may exercise jurisdiction.

Obligate plants are plants which can grow in but one life condition.

Modern War Implements

Britain Installing Rapid Fire Gun In Fighting Planes

A big gun are begins in aerial warfare. A 37-millimetre rapid fire automatic gun is being installed in some of the larger fighting planes of Great Britain and promises to have a tremendous advantage over an opponent carrying only the customary machine guns.

The heavy gun shoots more shortly sending out its messengers of death at the rate of only five to four minutes. But each shell weighs a pound and a half and is considered certain to dissable any plane however slightly, by the contact is effected. And the slow-shooting heavy gun trusts to its long range to give it victory over the heavens. The small light plane with its spattering machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 2 mile yards. Presumably, when the British air fighters a fine start over all competitors in the armament race. But the exemplation lings before the announcement that the new device was developed by experts connected with one of the great armament manufacturers whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the announcement of the invention has been demonstrated arms makers of other nations will be out with guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster. Detroit News.

Praises Missionary Efforts

Doctor Credits Christianity With Progress In Asia

The change which Christianity worked in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highclere, South Africa, by Dr. J. H. Oldham, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be sufficient, he said, to condemn since him of the worth of foreign missions. An additional argument lay in the devotion and the achievements of Christian women in the mission field.

To thousands of women in heathen lands the relief brought by the medical missions, the establishment of hospitals, and the creation of nursing services had been immense. They had took the lead and did the greater part of the work in this field of service. It might be said that Christian missions had created the medical profession throughout Asia.

Fortune Has Bring Attached

Man Must Marry By Christmas 1936 To Inherit

If John Francis Gallagher, of parts unknown, takes unto himself a wife on or before Dec. 25, 1936, and settles down to home life he will receive £100,000 from his aunt, Mrs. R. Sarah, 143 Well Hall Road, Eltham, London, Eng.

The offer of wealth was disclosed in a letter from Mrs. Sarah to Acting Mayor J. A. McKercher of Winnipeg. The mayor was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.

Mrs. Sarah, in her letter, said the last address she had of her nephew was box 139, Carleon, Alta., and gave oral delivery. Prince Albert, Sask. If Gallagher is not located and married by the date set, Mrs. Sarah said she would bequeath all her cash and personal property to the church and charity.

Gift For British Admiralty

Charles Courtney, famous locksmith, arrived in London from the United States and said he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he solved the solution from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.

When you smoke plug tobacco, you can cut each mouthful fresh when you want it and you can cut it any way you like, coarse or fine. Plug tobacco is economical, too, for it lasts longer in your pipe.

PLUG SMOKING TOBACCO

Regular White Elephant

Automatic Gate Minister From India Lots Of Trouble

Rev Elbert M McMatt, central treasurer of the Methodist Episcopal Church in India, was a medly trouble-man when he arrived from Europe on the liner American Trader, with a 45 calibre automatic revolver.

The automatic became a source of trouble to Mr Moffatt before he left Bombay. The weapon was taken there by a bishop's sister whose American friends felt she would need something to protect herself when she was so far from genteel Christmas.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The Bishop's sister appealed to Mr Moffatt to take the pistol back to the United States when he sailed.

He had it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declaration. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."

Mr Moffatt threw up his hands.

"I am," he said with determination, "taking it to the nearest police station."

Fixed Price For Tobacco Growers

Imperial Tobacco Company Of Canada Limited Signs Tobacco Growers' Agreement

Gray Miller, president of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario flue cured tobacco growers are now practically assured for 1934 a price based on 37c per lb. for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 37c average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

Proved Him Wrong

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daily artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

Population Of India

Showed Increase Of Thirty-Four Million In Ten Years

Dr J H Hutton, C.I.E., I.C.S. (Retd.), commissioner for the census of India, in his census report wrote that for long China was considered the world the greatest aggregate of human beings in the world more or less under the same administration, but India's population now even exceeds the latest estimate of the population of China. The difference between the kind of government China has and during the present century and the kind of government that India has had could not be better illustrated. The census of 1931 gave India a population of 353 millions or an increase since 1921 of just under 34 millions. The increase in the ten years from 1921 to 1931 is alone almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, a similar or even greater increase between 1931 and 1941, bringing India's population almost up to the 400 million mark which is envisaged by Sir John Megaw, cannot be dismissed as impossible.—Calcutta Statesman.

A Miracle Of Speed

Nineteen Girls in London Factory Make Shirt In Minute

Those who refuse to believe that a shirt with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London, and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. One sews cuffs, another makes collars, another buttonholes. All the time shirts in various stages of completion are moving with the conveyor from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!

CONTROL CANADA THISTLE AT ONCE

Canada Thistle flourishes in varying degrees in all parts of Western Canada. It is a native of Europe and was one of the earliest weeds introduced into Canada. The North-West Grain Dealers' Association has financed a survey conducted by Professors G. P. McRostie and W. Tilbesley, weed control authorities of the Agricultural College of Manitoba University, to determine the most satisfactory means of controlling this weed. The results of this study have been prepared in pamphlet form and these are now available without charge to all this country elevators along with other pamphlets dealing with control of Couch Grass, Sow Thistle and dodder so to the less cosmopolitan weeds in Western Canada.

HOW TO BE HEALTHY AND STAY HEALTHY

The following rules of hygiene should be adhered to: EXERCISE.—To those with sedentary occupations, a proper amount of well directed light exercise, such as walking, swimming and light gymnastics are recommended. To those in middle life, the more violent forms of exercise should be indulged in only under the guidance of a physician. BATHING.—Either a tub or shower bath should be taken daily. To some, cold baths are acceptable, followed by a brisk rubbing which acts as a general stimulant. To improve the general condition, Cabinet or Turkish baths or salt rubs will be found beneficial. SLEEP.—There should be eight hours of sleep in a well ventilated room, as proper rest and relaxation are essential. DIET.—The meals should be regular, well cooked and properly balanced to complete meals, starchy foods, cooked and green vegetables, salads, fruits and pastries in moderation. Overeating and alcoholic excesses should be avoided. BOWELS.—Regular habits. Many physical conditions can be corrected by proper diet and exercise. GENERAL CARE.—Proper clothing to meet the requirements of climatic conditions should be worn. Precautions should be observed to safeguard the body to cold, wet, draughts, etc., as nothing so quickly debilitates the system as repeated colds.

Thousands of men, women and children sufferers are treated for many or other maladies, when their real trouble is that moreover, the body governors. The sure signs of it are the passing of the particles of the parasite. Purgative signs are loss of appetite with occasional queasiness, coated tongue, heartburn, pain in back, limbs and legs, dizziness, headaches, feeling tired with an empty stomach, constipated, dark rings under the eyes. The stomach feels heavy, bloated, at times a crawling sensation from stomach into bowels is noticeable. Again, as if something moving between the throat is felt. The patient has yellow skin, loses weight, bad breath, pimple constantly, absolutely ambitionless, no desire to work, always lazy. Worthwhile file are known to have been caused by these monsters, which sometimes grow over six feet. When in crawls into the windpipe it is liable to suffocate its victim. Get rid of it in moments at once, before it undermines your health beyond help. Send $5.50 for a treatment of Lazlan. If you want to be rid of this horrible parasite. Lazlan is harmless even if you haven't a worm.

Sold only by the UB Laboratory, 1061 USL Bldg., Box 2000, Hollywood, Calif. Not sold in drug stores. State age men and sex. Lazlan is made up for you especially and it cannot be sent C.O.D., therefor, the remittance must accompany the order. To insure package add 25c extra. Economical (On this out and put it away, it may come in very handy some day. Show it to some sick friend and he may forever be thankful to you for helping him out.)

WORLD HAPPENINGS BRIEFLY TOLD

New motor cars on the roads of the United Kingdom in March numbered 43,726 as compared with 32,740 in March, 1933.

Chief S S Thomas 84, who capped a stormy career as United States senator and governor of Colorado by defying President Roosevelt's 1933 order against post-hoarding is dead.

Canada's greetings were extended to the Prince of Wales on the occasion of his birthday June 23, by the Governor-General the Earl of Bessborough.

Henry Lawson Doyle 16, attempting his first flight, at Herbert airport, Yorkshire, crashed and was burned to death 10 minutes after the take-off

Dr Wm Boyd, professor of pathology in Manitoba Medical College has accepted a similar position in Stanford University, California. it was announced. He will leave Winnipeg late in August.

The International Institute of Agriculture estimated that the dearth will mean European wheat harvest this year to fall short of 1933 by 350,000,000 bushels. The 1934 harvest is expected to total 1,670,000,000 bushels.

Rt Rev Ernest William Barnes, Bishop of Birmingham, declared at a peace service in London, that Great Britain should disarm even though she is also among powers in doing so. An alternative policy he argued might lead to war.

The Rotarians, 10,000 of them, were welcomed to Detroit Representing 30 nations and nearly as many languages and political philosophies, they assembled for the 29th convention of Rotary international.

Novak Kasmirera, Polish newspaperman, who left Warsaw many years ago to get material for a book, has arrived at Cape Town after pedalling across Europe and down the length of Africa on a bicycle.

SUNDAY SCHOOL LESSON

JULY 8

ASA RELIES ON GOD

Golden Text "The Lord is my helper; I will not fear: What shall men do unto me?" Hebrews 13:6.

Lesson II. Chronicles, Chapters 14-16.

Devotional Reading: Psalm 2:1-5

Explanations And Comments

The Prophet Azariah's Counsel, 2 Ch. 15 1-7 The Spirit of God came upon the prophet Azariah, the son of Oded. In Old Testament times the Spirit often refers to God's power As Asa, the king of Judah, was returning victorious from his engagement with Zerah, the Ethiopian (14:9-15), Azariah went out to meet him. Instead of greeting him with words of congratulation and praise, he solemnly warned him that he must remain loyal to God. "Hear ye me, Asa," he said, "and all Judah and Benjamin (the tribe over which Asa was king) Jehovah is with you, while ye are with him; and if ye seek him he will be found of you; but if ye forsake him, he will forsake you." He told them plainly upon what terms they stood with God. Let them not think that having obtained the victory, all was their own forever; no, he must let them know they were upon their good behavior Let them do well, and it will be well with them, otherwise not" (Matthew Henry). Compare David's counsel to Solomon, 1 Ch. 28: 9-10.

Asa's Reforms, 15:8. Encouraged by Azariah's words (probably the words Azariah the son of" have dropped out of the text in copying, or Oded is a mistake for Azariah), Asa put away the abominations, destroyed the idols, and did away with the degrading heathen rites, out of all the land of Judah and Benjamin and out of the cities which is father Abijah had taken (2 Ch. 13:19) from the tribe of Ephraim. How much such a reformation was needed we realize when we read that Maacah, the queen mother, had erected an image of Asherah in Jerusalem. Asa had the image ground to dust and buried in the Valley of the Wadron, and he deposed the queen. Asa rebuilt the altar of burnt offerings which had been erected before the temple sixty years earlier.

The hemlock tree is not poisonous, the "hemlock" poison made famous by Socrates being derived from a plant similar to the wild carrot and containing poison in root, stem, leaf and seed.

ASSISTING NATURE

By JACK MINER

During the past year I have read a number of articles, both in magazines in newspapers, as well as many letters that have come to me, on the subject of "Nature Balance", decrying actions or systems on the part of man which the writers described as "interfering with Nature", upsetting Nature's balance", and so on. To all who adopt that attitude I should like to put myself on record to the effect that, personally, I believe the so-called "balancing" of Nature was left entirely with man, and that I believe in assisting Nature for the benefit of mankind. I believe that everything everything and then the greatest man "in His own Scheme and gave him dominion over all." That is as I understand it, the power and authority to manage everything here on earth.

Look, for instance, at the animal world, with the livestock in the farmer's barnyard as an example Did God create the Jersey cow, and the Hereford bull, and the Shropshire? No. He gave them the original stock and then God, through man's instrumentality, having obtained the victory, all was their own forever; so, he must let them know they were upon their good behavior Let them do well, and it will be well with them, otherwise not" (Matthew Henry). Compare David's counsel to Solomon, 1 Ch. 28: 9-10.

Asa's Reforms, 15:8. Encouraged by Azariah's words (probably the words Azariah the son of" have dropped out of the text in copying, or Oded is a mistake for Azariah), Asa put away the abominations, destroyed the idols, and did away with the degrading heathen rites, out of all the land of Judah and Benjamin and out of the cities which is father Abijah had taken (2 Ch. 13:19) from the tribe of Ephraim. How much such a reformation was needed we realize when we read that Maacah, the queen mother, had erected an image of Asherah in Jerusalem. Asa had the image ground to dust and buried in the Valley of the Wadron, and he deposed the queen. Asa rebuilt the altar of burnt offerings which had been erected before the temple sixty years earlier.

The hemlock tree is not poisonous, the "hemlock" poison made famous by Socrates being derived from a plant similar to the wild carrot and containing poison in root, stem, leaf and seed.

W. N. U. 2033

But let us look at another side to the question At the same time that God created it, little was it to be created also the weed that was to choke out the good seed. Which is the gardener who has gone to man the broom and the means of controlling these also so that they may be controlled from predominating in the least weed? Who has given us the knowledge of fruit that God create the Black Delicious apple the Northern Spy, the Mcintosh, the Wealthy, the Transcendent, the Little Gem, and the Hawthorne, which is immune to all of germs and from these man developed what we have to-day. According to some people a rabbit was created to kill the mice But geologists to have left absolutely destructive

It is thought that there have been four ages of ice" in the geological history of the world each lasting for many thousands of years, and being about as much a danger as this earth's surface. The last ice age is believed to have covered about 12 000,000 square miles, and of this, 6,000,000 square miles is still under ice It is notable, however, that the world was never entirely covered with ice at one time and thus life was always preserved to spread again when the ice disappeared.

Geologists refer to an ice age, as a time when ice reenacts large areas of the earth's surface and all forms of life in these regions become extinct The condition is brought about by "ice caps", huge blocks of ice formed by piles of snow which partially melt, congealing to form ice and slowly spreading farther and farther

It is believed that it was in the melting of these great ice caps that the Great Lakes and Niagara Falls were formed, the peculiar rocky and uneven nature of the earth's surface retaining the water as it melted.

A woman's intuition is more powerful than a man's knowledge.

Little Journeys In Science

THE ICE AGES

By Gordon H. Gunn, M.A.I

Niagara Falls and the Great Lakes vacation paradise to many from the western prairies, are legacies left to us from the last great ice age which enveloped this continent many thousands of years ago. Once hushed upon as great catastrophism because they destroyed life and defaced the earth's surface the ice ages are now considered by geologists to have left no absolutely destructive

It is thought that there have been four "ages of ice" in the geological history of the world each lasting for many thousands of years, and being about as much a danger as this earth's surface. The last ice age is believed to have covered about 12 000,000 square miles, and of this, 6,000,000 square miles is still under ice It is notable, however, that the world was never entirely covered with ice at one time and thus life was always preserved to spread again when the ice disappeared.

Geologists refer to an ice age, as a time when ice reenacts large areas of the earth's surface and all forms of life in these regions become extinct The condition is brought about by "ice caps", huge blocks of ice formed by piles of snow which partially melt, congealing to form ice and slowly spreading farther and farther

It is believed that it was in the melting of these great ice caps that the Great Lakes and Niagara Falls were formed, the peculiar rocky and uneven nature of the earth's surface retaining the water as it melted.

A woman's intuition is more powerful than a man's knowledge.

BRITAIN WILL NOT PAY WAR DEBT TO U.S. IN GOODS

Washington A British reply that Great Britain was not prepared to make partial payment of its debt in goods and services was received by the state department without comment.

The formal note delivered to the state department by Sir Ronald Lindsay's charge d'affaires regarded the latest note made by Secretary Cordell Hull on a debt of June 12

The British note said the paper, since of German reparations had shown that transfer of goods was an unwilling Transfer of goods and services affairs as transfers on cash and could not be entertained by Great Britain.

The British note emphasized that the primary question for settlement was the amount that should be paid

Secretary Hull a note of June 12 after setting forth the American position in opposition to British reasons for failing to pay on June 1 explained that Great Britain had never made any suggestions for payment in kind and hinted that such payments might open an avenue for settlements

The text of the British debt note follows

After careful consideration of the note which you addressed to Sir Ronald Lindsay on June 12 His Majesty's government in the United Kingdom feels there are two questions to which it may be useful to make further reference.

In the first place, His Majesty's government would observe that in their note of June 4 they did not state payment of the British war debt was legally contingent upon payment of the debts due to them What they said was that it would be impossible for them to contemplate a situation in which they would be called on to honor in full their war obligations in others, while conditions of suspend all demands for payment of the war obligations due to them. This was a statement not of law but of fact.

Secondly, as regards the suggested payments in kind, His Majesty's government would recall that the experience of German reparations showed that transfer difficulties are not solved by a system of deliveries in kind.

As on the committee, presided over by General Dawes, pointed out in 1924 "In their financial effect, deliveries in kind are not really distinguishable from cash payments."

In fact, economic objections to cash payments would apply with equal force to deliveries in kind, unless those deliveries took the form of indigenous products of the debtor country (excluding re-exports) and unless they were to be accepted by the creditor country and consumed by it in addition to the goods taken from the debtor country in the normal course of trade.

If the United Kingdom were not to receive payment for goods exported on commercial account, her exchange resources available to purchase cotton and other goods from America would be still further diminished. Therefore she could not, failing to give further consideration to possibilities in this direction, His Majesty's government do not at the present see any method of putting such a plan into practice which would be likely to commend itself to the government of the United States of America.

In the view of His Majesty's government, the primary question for settlement is the amount that should be paid, having regard to all the circumstances of the debts.

They regret that up to the present it has not been possible to make further progress in this matter but they will welcome the opportunity of resuming discussion wherever it may appear that present abnormal conditions have so far passed away as to offer favorable prospects for a settlement. They are always anxious to remove from the sphere of controversy all or any matters which might disturb the harmonious relations between the two countries.

New Franchise Act

Bill Doubtless Will Be Debated From Voting

Ottawa Rapid progress was made on the new franchise act as the committee of the house considering the bill approved without division three amendments at a second sitting on Of the chairmanship of Hon Hugh Guthrie minister of justice.

Doukhobors in British Columbia whose lands are disenfranchised and living in provincial elections under the British Columbia law will not have the right to vote in Dominion elections under the new act, agreed

A second amendment changed one of the provisions that a person's name should be omitted from the voters' list if he or she has died or has ceased to be ordinarily resident in the electoral district

A third amendment dealt with the appointment of commissioners to each electoral district and provided that they should be nominated by the government member of parliament if there is one such. The commissioners will be nominated by the government in power in the electoral district in the last general election.

A W Neill (Comox-Alberni) C.C.F. appeared to ask that provision be made for the taking of the census in accordance the British Columbia Elections Act

Takes Tea With Queen Mary

Mother Of President Of United States Entertained at Buckingham Palace

London Two of the world's most talked about women Queen Mary and Mrs Sandro Delano Roosevelt sipped tea together in Her Majesty's private apartments at Buckingham Palace

King George was present, but most of the animated conversation was carried on by Her Majesty and the mother of the United States president.

Just two mothers grandmothers in fact they found many common interests as they chatted. The majesties were impressed by the gaiety friendliness and frankness of Mrs. Roosevelt.

High Price For Telephone

Muskeg, Manchuria Telephones are so scarce and hard to get in Muskeg, because of the growth of the city, that fabulous prices are being paid for telephones being relinquished by established subscribers. Recently a contractor here is just paid the record price for a telephone connection 1,250 yen. This is equivalent to nearly $400 in Canadian money.

Committee At Rodeo

London The score of Tex Austin's rodeo to date is five contestants injured and one steer allegedly terrified. Bull Durham Texan broncho buster of Camargo, Okla., suffered a broken leg when a bucking horse fell on him He was taken to a hospital. The bull-dogging contest since the rodeo began two weeks ago.

Trade With Great Britain

Toronto — "We intend to establish close trade relationship with Great Britain and all other countries," Hon. Henry H. Stevens, speaking for the house of representatives of the United States, declared here

MAY COME TO CANADA

The health [illegible] Bishop Mackenzie of the Canadian [illegible] leader of the Moravian [illegible] at the [illegible] Mackenzie [illegible] Mackenzie [illegible] Mackenzie

Large Volume Of New Wealth Is Brought To Canada Annually By Tourists From Other Countries

In bidding welcome to the 4th annual meeting of the Canadian Travel Bureau the Premier gave further evidence of his determination to make good use of provincial assets.

The proposal advanced by Senator W. H. Dennis, of Halifax, that there should be federal co-operation with the provincial promotion agencies recommended itself to both party benches, and to his fellow members generally.

The volume of the new wealth that is brought to Canada annually by its tourists visitors was shown by several of the speakers to reach impressive totals, exceeding the net values of many of the larger native industries.

Summer of public highways have been constructed at great expense, Premier Dennison pointed out, and they should be utilized to the best advantage of the people. Certainly the promotion of good roads into districts which for only a few years ago were considered remote should add substantially to the attractions offered by the Dominion. Large new areas of varied charm and interest have become easy of access.

There is here a good logic also, in the suggestion that fresh efforts should be made to promote the idea of "The Canada Trail" among our own people. As Senator Meighen observed, more Canadians are travelling in the United States than Americans travelling in Canada, although there was no question of the superiority of the Dominion's attractions. "Invariably behavior of tourist trade is not a story paper balance It is "cash in hand."

Strange twists and turns in international exchange values of the world have influenced profoundly the tourist movement of recent years. The flow from this country to the Old World has dwindled since the pre-depression days. A stronger turn in the tide was marked by the arrival in New York of a liner carrying 13 "dollar tourists" from Europe. The visitors, who included Belgians, Germans and French, are permitted five days of "rubber-necking" in New York by the special-rate arrangement.

Canada's "pool" train plan has provided low-cost facilities for travel within the country. Is it possible that the transcontinental excursion will enable itself widely popular as an international means of sightseeing? Can new fleet Americanized from Europe be ascribed to the decline of the dollar abroad? If there is to be no end of mass travel Canada should claim its share of it.

The personnel of the committee appointed by the senate to investigate and report in representative of both east and west. Its finding should be helpful generally in the growing trade and local agencies of promotion now operating.—Toronto Globe.

Coal Gain Growing Expensive

Slump Has Divide in Coal To Buy Canadian Wheat

Jackson Dodds, joint general manager of the Bank of Montreal and president of the Canadian Bankers' Association, was a guest of honor at the Canada Club while on a visit to the Old Country. During his remarks he pointed out that the production of wheat in Europe is on an uneconomical basis, and prophesied that with the return of more normal times various nations are likely to conclude that the purchase of that cereal from this country and other grain growing districts of the world would be more economical than the present system of exchanging their products for wheat.

A pause in white with brown novelty stripes is very effective, and incidentally very chic. Make the guimpe of white or of brown crisp organdie. Another interesting scheme is medical blue linen with white linen collar.

In housekeepers' check in gabardine, it's very sporting and utility.

Shirting cottons and overcheers are also sporting.

For town or office, choose a cool tub silk print and make various guimpes—one of soft, tucked white batiste or of white silk and possibly a third of organdie.

Style No. 500 is designed for sizes 14, 16, 18 and 20 years. It requires 3½ yards of 36-inch material for the blouse alone, and 1½ yards of 36-inch material for the skirt.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

New Type Of Plane Will Be Provided With Pontoon Wheels in Position

Aeroplane having neither wings nor screw propellers were pictured to the American association, Society of Mechanical Engineers, at Berkeley, California, as the type of aerial craft of tomorrow by H. E. Kirkeben, professor of aeronautical engineering of the University of Washington.

Professor Kirkeben outlined the essential features of the new type aircraft as resembling nothing so much as the time-tested ferry boat propelled with a stream of air instead of water would in the ocean.

That meaty tender can be carried with cotton, linens, cut skin or lightweight worsteds.

Crushed Wheat Goes Supply Of Seed Fails For Want Of Wheat Grown

In spite of the fact that there is considerable wheat grown and being produced in Western Canada, the supply is still far short of the demand. This is due in part to severe drought, which has visited the prairie sections of Saskatchewan and Alberta during the last few years, and to the unprofitable crop has had the evident distribution in that area. These conditions have discouraged its growth, general drought resistance and ability to produce in a dry climate, but have also prevented the possibility of substantial growth on available spring seedbeds and in producing seeds, the supply of moisture was frequently insufficient to fill the need. Demand for seed of the "Fairway" strain is most insistent. Seed distribution of this variety has been quite general so that, although both ordinary crested wheat and the "Fairway" variety have been grown in the mixed sections of the south, the latter has been grown almost exclusively in the northern districts, and there has been much more heavily planted with regard to seed. Mixed seed crops have been obtained therefore of "Fairway" grass and crested grass and the seed has been sold at a considerable premium over ordinary seed. For these reasons it would appear that seed stocks produced in Western Canada will soon consist largely of the improved variety Crested Wheat Grass.—Canadian Department of Agriculture.

Danger From Hopper Poison

Carotene Handling Results in Ten Loss of Livestock

Careless handling of grasshopper poisons has resulted in the death of a number of animals in the Saskatoon district and constitutes a serious danger to human beings, Dr. Norman Wright, veterinarian, warns. Five cattle, four horses and a dog have died during the past few weeks within ten miles of the city of Saskatoon from this cause.

Following the visit some people take. Dr. Wright points out that he saw a farmer driving out of the city with a wagon containing bags of flour and other groceries. Over the top of the wagon box were planks on which the farmer had thrown some bags of the vast poisoned bran. The water from these was dripping down on the flour.

In the case of the dog, the farmer was spreading the poison from the back of his wagon by means of a farming mill. The dog ran behind the wagon and was poisoned. The cattle were poisoned by bait which they dribbled on a roadway from a burst bag and the horses received fatal doses by eating bottom of the poison bait lastings, but as to the exact action of lubrication little, if anything is known, and in the commonplace things that are used in the electrical industry, such as magnetism, electric charges, etc., we have only a very superficial knowledge. We know these things exist, however, because we can see their effects.

Much your we discover now things which a short time ago we did not even know existed. I cannot help feeling that in a very short time we are going to break loose another great piece of basic information which will completely change our scientific viewpoint. It is not what we know that is so important. It is what we do not know that most of what we know can be found to be absurd. Take the matter of time and its processes as they exist to-day. But we have no conception of what a small per centage this is to what there is yet to know.

As an illustration, we perhaps do not recognize it, but everything that ever moved on the earth has been moved by energy which came directly from the sun. Our coal and oil deposits, our forests, our crops and everything that grows on the earth is simply an energy contribution from the sun. We do not know except in the very superficial way, how that energy which is given out by the sun is transmitted to the earth. We know that it comes in waves and that it envisage the entire system of aerial navigation which would be unaffected by fog and general weather conditions.

So much of our information to-day does not consist of basic understanding. It is known to us only by deductions. We say we can see through a pane of glass because it is transparent. We could put up the theory that the principle of how light is transmitted through glass. We say a copper wire is a conductor of electricity and yet we know no more about what it is than a farming mill. The dog ran behind the wagon and was poisoned. The cattle were poisoned by bait which they dribbled on a roadway from a burst bag and the horses received fatal doses by eating bottom of the poison bait

Increase Of Scientific Knowledge Will Be Important Factor In Stimulation Of World Recovery

The whole world is now absorbed in a study of social problems. The ultimate aim of all industry, science, government and sociology is for a better life—better living conditions; better health; better food; better government, better houses, in fact, for better everything.

It is my impression that the immediate future will bring a great change in our mental attitudes toward the physical world, that it will bring into existence new pieces of information which will completely change our scientific viewpoint. It is not what we know that is so important. It is what we do not know that most of what we know can be found to be absurd. Take the matter of time and its processes as they exist to-day. But we have no conception of what a small per centage this is to what there is yet to know.

We are sorry to hear that Stan Brinsley suffered injuries during the baseball game at Bruderheim on Sunday.

Mr. Little, chief engineer in the Provincial Gaol has taken up residence in the Fort.

The household effects of W. H. Roberts were moved to Edmonton Tuesday.

Mr. W. T. Lane of Wabamun spent a few days with friends in the first part of last week. Santa Baker returned Mrs. Lane for a short visit at Wabamun.

Misses Jean and Betty Badger are visiting at Lamont.

Miss Eileen White left last Saturday for Seattle where she will spend the summer holidays.

Mr. and Mrs. J. Latour and family motored to Bruderheim, Sunday, over the holiday week-end, visiting Mr. Latour's parents. Mr. W. Latour accompanied them back to the Fort and will stay a few days.

TENDERS WANTED

For the Building of two (2) Outhouses at the Pleasant View School. Particulars may be obtained from the Secretary Mrs. Gloria Smith.

Is your subscription in arrears? If so, "come in and see us sometimes".

LOCAL NEWS

On Friday evening last, the United Young People held a dance in the Memorial Hall. Due to inclement weather conditions only a small crowd attended, and they had a very enjoyable time. Frank Smith's Orchestra supplied the music for dancing.

Owing to the large amount of outside advertising this week, the school reports were held over until next week.

Mr. G. T. Montgomery, was a delegate from Fort Saskatchewan to the Union of Alberta Municipalities held in Edmonton last week-end.

Miss Ada Dishaw left Saturday morning for her home in Wetaskiwin, where she will spend a few weeks, before going to the coast.

Miss Amy West left Saturday for Vancouver, where she will spend the summer vacation.

Mrs. W. P. Calhoun, Chisholm, was the guest of Dr. and Mrs. T.W.R. Henry last Friday.

Mrs. J. M. Ritter, Miss V. Hutton, Mrs. T.W.R. Henry and Mrs. F. S. Truby left Tuesday by motor for Banff.

Dorothy and Marjorie Graham, daughters of Mrs. Ed. Graham, are home for the holidays.

Mr. A. S. Pillmore had a painful accident last Monday morning when he fell from the roof of his house, which he was painting. He injured his back and neck, but we are glad to report that he is resting easy. We hope to see him around again soon.

Mr. F. M. Badger and daughters have taken up residence in the vacated Westover house.

Born to—Mr. and Mrs. Wm. Hostyn of Lamoureux on Monday, July 2nd, a daughter.

Town Council Sets Mill Rate

A regular meeting of the Council of the Town of Fort Saskatchewan was held on Wednesday the 4th instant. Present Mayor Montgomery, Councillors Magor, Watt, Graham, Pettet and Gauf. The minutes of the last meeting held were read and adopted.

The Council discussed the matter of the mill rate for the current year, and considered the estimated expenditure and estimated revenue, and finally a By-law was passed setting the mill rate as follows: General taxes 18 mills on the Dollar; School taxes inside Town limits 20 mills on the Dollar. School taxes outside Town limits 16 mills Supplementary Revenue Tax 7 mills on the Dollar. 15 per cent discount will be allowed on the current general and school taxes if paid on or before the 15th August.

The mill rate is a little higher than last year, when it was the lowest in the history of the Town.

The following accounts were passed for payment: T. Eaton Co., Ltd., $12.80 for relief issued to Geo. Robinson in Edmonton last winter; Calgary Power Co., $117.90 for lighting streets, $6.30 Fire Hall and $1.00 Memorial Hall, W. A. Graham $1.45; The Record $6.30; A. M. Carscadden $2.20. Various accounts for hospitalization and funeral expenses were left over for further consideration.

Premier R. B. Bell Picks New Alberta Cabinet

Alberta's third government under the U.F.A. regime was sworn in by Hon. W. L. Walsh, lieutenant-governor of Alberta on Tuesday.

Hon. R. C. Reid, was sworn in as Premier, brought about through the resignation of Premier Brownlee last week.

After the swearing-in ceremonies at the lieutenant-governor's office, the new Premier, Hon. R. G. Reid announced that the following personal would make up the new cabinet.

Hon. R. G. Reid, premier and provincial secretary.
Hon. F. S. Grisdale, minister of agriculture.
Hon. J. F. Lymburn, attorney-general.
Hon. Perren Baker, minister of education.
Hon. George Hoadley, minister of public health and telephones.
Hon. J. J. MacLellan, minister of public works.
Hon. Russell Love, provincial treasurer.
Hon. Hugh W. Allen, minister of lands and mines and municipal affairs.
Hon. Irene Parlby, minister without portfolio.

LARGE DISTRIBUTION OF TREES THIS SPRING

A very large increase in distribution of trees to farmers, schools, etc., in Alberta from the provincial nurseries at Oliver, near Edmonton, was noted this spring. The total distribution was 84,330 trees, compared with only 8,886 last year. The trees this year went to 114 different points in the province, and were taken by 183 farmers, 18 schools, 12 institutions and 14 cemeteries and community grounds. The largest distribution was of white spruce, 81,138 of these being sent out. Next spring 110,000 white spruce will be available. Distribution of carragana was stopped this year, but caragana seed is now being given out by district agriculturists, and there is a plentiful supply of this for farmers' windbreaks etc.

The Irish Free State will pay a bounty of $6.18 a barrel for home-grown wheat flour. Every effort is being made to promote wheat growing at the expense of cattle production. The British market for Irish cattle has been drastically curtailed and no other outlets can be found.

POISON HOPPERS BY PLANE

Spreading of poison for grass hoppers has been so successful in one or two areas in Southern Alberta that it will probably be adopted as a regular method in future. The planes were used in Drumheller and Hanna districts, flying at 100 feet elevation, using four pounds of bait to the acre. The cost per section was $8.00 to $10.00, and the distribution thinly and evenly done, and not effective, with the use of oiled bait, that hoppers were dying a week after the bait was spread. The use of oil is a new departure this year, developed by the provincial department of agriculture, to take the place of water, thus preventing the bait from drying out and becoming ineffective in a short time after spreading.

Septimus Savage Chosen As Conservative Candidate For Clover Bar Constituency

At a conservative gathering held in Edmonton last Saturday, September Savage, B.S. 2, Edmonton South, was chosen as Conservative candidate for the Clover Bar Provincial constituency in preparation for the next election. Mr Savage has served as a member of the municipal council for M.D. of Strathcona for the past five years.

Officers of the Clover Bar Conservative organization were elected as follows, president, P. Atkinson, Fort Saskatchewan; First vice-president, S. Savage, R.R. 2, Edmonton; Second vice-pres. George Keble, Clover Bar; Third vice-pres., S. Savage, R.R. 2, Edmonton; Secretary, A. M. Adamson, Strathcona.

L. E. Hicks sold his handsome 2 year-old team to Amos Osbaldeston at Partridge Hill.

The approaches to the C.N.R. bridge across the Saskatchewan are now finished as is also the plank flooring.

A large number attended the wedding of Miss Hildegrade Elsmore, eldest daughter of Rev. C. P. W. and Mrs. Gresser to John Bonserian, last Thursday.

A large number of local Orangemen were in Edmonton Sunday taking part in the church parade.

LOCAL NEWS

Mr. G. T. Montgomery is preparing a variety of farm products which he intends entering in the "small farm exhibit" at the Edmonton Exhibition next week.

This exhibit is a special feature of the Exhibition this year and anyone with not less than forty acres can enter.

DIED

The funeral of Charles Daly Threlfall, and known by the old timers in this district was conducted by Rev. W. Smith of the United Church last Sunday at the Moose Hill Community cemetery. The late Mr. Daly was one of Threlfall's most respected old-timers and came to that district in 1904 and had seen it develop from raw bush and wild land, to a rich farming community.

Had Tried It

One morning while the children were eating breakfast Mildred put two heaping spoonfuls of sugar in his cocoa.

"I should think one spoonful would be enough," objected his sister.

"I should think so, too," he replied, "but it ain't."

Local School Board Inspect School Grounds

A regular meeting of the Fort Saskatchewan School Board was held in the School Building last Monday night. Present Mr. F. Atkinson, chairman and Trustees, Dr. Grauer, Dr. Turner and H. R. H. Hay.

Minutes of the previous meeting were read and adopted.

The members of the School Board inspected the various [illegible] the school generally, and also the outbuildings and grounds, and gave the necessary directions as to work and repair to be carried out during the vacation.

Monday the 3rd. September being Labor Day and a holiday, it was decided to open the School on Tuesday the 4th of September.

The attention of the Board was called to an article appearing in the Vegreville paper to the effect that Miss West, who has signed a contract here, had accepted a position in the School there. The Board had had no word from Miss West.

Applications of parents that students wishing to attend public or high school, should be in the hands of the Secretary not later than the 17th. August, so that they can be considered by the Board. All fees to be paid in advance. Application forms can be had from the secretary. All resident High School students who wish to attend school here are also kindly requested to [illegible] before the above date.

The Principal was present at the meeting and submitted a summary of the junior examination results.

Reported Miss A. West To Leave Local School

According to a report in the last issue of The Vegreville Observer, Miss Amy West, popular teacher of the primary room in the Fort Saskatchewan Public School for a number of years, has accepted a position on the teaching staff of the Vegreville Public School. Miss West's application was excepted among some thirty-five teachers who applied but most of them lacked the special qualifications required.

Partridge Hill NEWS

The U.F.A. and U.F.W.A. picnic was well attended and quite a success despite the shower that descended on the supper table. Only two ball games were run off, Agricola vs Partridge Hill soft-ball 13 to 1 for Partridge Hill. Brenner vs Josephsburg baseball was not finished.

Coconut shy, Aunt Sally and Bingo were well patronized and as a result a tidy sum was set aside for the community hall purpose.

The U.F.A. and U.F.W.A. annual outing will take place at Sandy Beach Friday of this week.

The Junior U.F.A. held a dandy garden party Monday, when Ypres Valley and Josephburg played off the ball game deferred from the picnic. This was a keenly contested game and resulted in a win for Ypres Valley 8-7. Batteries, Cranston and Osbaldeston; Frey and Rippel, with Jot Irwin handing out the doriaon.

In the softball game Good Hope vs Partridge Hill Juniors, honors went to the home team 16-4.

Mrs. Harold Wilson, Mrs. Reg. Lennon and Miss Jessie Houston all of Calgary were holiday visitors with their father, A. E. Houston.

Mona and Gertrude Alton, Edmonton, are holidaying with relatives in the district.

Mr. and Mrs. Stan Whitton and family of Alcomdale were shaking hands with old friends at the picnic on Wednesday.

Mrs. H. Hanley and son Billie have been visiting her sister Mrs. Verd Lowsmore.

Mr. Richard Gordon returned Monday evening from a month's visit to Ontario.

Mrs. Lawrence Sheard of Gibbons was the guest of Mrs. J. Whitton last week.

Mr. Raymond Shears who has been a patient in the Royal Alex. hospital is on for recovered to be around again. He and Mrs. Shears and children are visiting friends in the district.

Norman Lambly left last week for a holiday trip to Victoria.

Arnold and Percy Whitton left Thursday via the prairie schooner route for their homesteads at Rocky Rapids, Alberta.

United States Joins The I.L.O.

More than ordinary significance attaches to recent decision of the American Congress to apply for full membership of the International Labor Organization at Geneva, usually referred to as the ILO. Not only will accession of the United States add considerably to the prestige that organization now enjoys, but, by lapping as it will the U.S. into direct confrontation with this important branch of League of Nations' activity the move will do much to restore prestige lost by the parent body through recent defections, notably that of Japan.

From despatches here revealed little of the background, few of the motives behind this change of front on the part of the Washington government. It is true, of course membership of the International Labor Organization does not involve endorsement of the League covenant, nor does it entail any political commitments to the League as such. In fact, the U.S. desire to provide adequate safeguards against the "foreign entanglements" that country has so rigorously eschewed since the war is exemplified in the act of Congress which specifically declares that the United States, by membership in the ILO, shall assume "no obligations under the covenant."

This, of course, is possible. The International Labor Organization, like the World Court upon whose bench the United States long has been represented, is an autonomous section of the League of Nations. Membership in either or both is possible without acceptance of the covenant. Germany as a matter of fact, was an active, full-fledged member of the ILO for six years before becoming a member of the League of Nations. The connection between the organization and the League is derived not from the covenant but from the charter of the ILO, which is Part XIII of the Treaty of Versailles.

The International Labor Organization, as however, much closer to the League than is the World Court for the reason that it was created as a means of getting international legislation enacted, or treaties negotiated, as in the League itself. The heart of the League system is its permanent machinery for continuous international negotiation, and the ILO parallels this machinery throughout, in its limited field of social questions.

The importance of the United States' decision to join the International Labor Organization, therefore, can best be gauged by considering it in relation to the economic problems created by varying standards of living, chiefly of labor and rates of wages, in nations now competing for foreign markets, and also by contrasting the present action with Washington's past attitude towards the League's labor office.

Hitherto, the United States has been far colder to the ILO than to any other branch of League activity. Until one year ago, the United States government would have nothing whatever to do with the labor organization, but now, without any parade or ballyhoo, Congress has accepted, virtually without demur, the proposal to apply for membership. This will involve representation on the permanent secretariat at Geneva and ultimate appointment of American representatives to the personnel of the control office.

Psychologically, the article of Washington will have more far-reaching effects. It will give Japan, Germany and Italy "cause for thought" for, if President Roosevelt can persuade Congress to make so complete a volte face in so short a time in connection with one great section of League activity, it follows that but little additional pressure would be required to convert his legislators to the idea of accepting the League covenant. Despite present reticences, and the insistence upon non-political safeguards, American opinion relative to the League is undergoing a change - and that change is not so far short of accepting League membership as to make that end remote. If it come to pass that the United States enter the League, that body will immediately assume grander and nobler proportions in the eyes of the world, and the dramas of those who called it into existence will be within sight of fulfillment.

China Holds Cricket Fights

Sportsmen Will Pay Ten Dollars For Good Fighting

A great effort is being made in China to stamp out cricket-fighting. It is being made on great a legal offence as opium smoking, and punishable equally severely under British protection. Despite the efforts made to stop the "sport," an enormous amount of it goes on. Citizens will pay as much as $30 for a good fighting cricket, and many make it a business to breed them and train them for fighting. In the same way as cocks used to be trained for the old English sport of cock-fighting. The crickets from each nest in chinese bamboo "rings," down the middle of which a glass slide runs, through which the fighters glare at each other until would stretch 1,200 miles through such time as their ire is sufficiently such time as their ire is sufficiently North Dakota, South Dakota, Aroused for the attack. Large stakes Nebraska, Kansas and Oklahoma to the change hands during the fights. Texas border.

Plans Big Undertaking

Hundred-Mile Wide Shelter Belt Being Considered By Roosevelt

President Roosevelt is considering a proposal to plant a "shelter belt" one hundred miles wide and 2,000 miles long across the United States from Canada to the Texas panhandle.

The gigantic scheme, requiring 10 to 13 years to complete, would involve an enormous growth and help prevent winds from stripping farm lands of their topsoil. It was first suggested recently by the American Tree Association.

Planting in the 100-mile wide area would be in strips, running north and south.

There would be 160 strips of trees, or one to a mile. The shelter belt would stretch 1,200 miles through such time as their ire is sufficiently North Dakota, South Dakota, Aroused for the attack. Large stakes Nebraska, Kansas and Oklahoma to the change hands during the fights. Texas border.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, or Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and use how quickly it will relieve you.

The bowel complaint remedy has been on the market for the past 76 years. Proof enough that you are not experimenting with some new and unknown medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Project May Succeed

Some Think Boring Tried To Develop Gold From Fraser River

The golden wealth in the muds of the Fraser river, which has till now proved largely elusive to the efforts of man, and of which there is said to be enough to pay the national debt of Canada many times over is to be attacked this summer with a new type of dredge, and with what appears to be every prospect of success.

The attempt, on a strong scale, is the largest work of its kind ever attempted on the Pacific coast, incorporating for the first time anywhere in the world an entirely new process as applied to gold dredging.

Built under the engineering advice and supervision of Hume Robertson, pioneer mining engineer, who has had 20 years' experience in that kind of work with British companies in the Malaya Peninsula, the great hulk may now be seen assuming final shape at the shipyards of B.C. Marine Engineers and Shipbuilders Ltd.

Hydraulic pumps, with sustained strength of 200 pounds to the square inch, created by two 500-h.p. motors will raise the muds from the bed of the river and the complete process of washing and refining will be completed on board the dredge.

Capacity, with the present equipment in placed at 12,500 cubic yards a day, but provision has been made for doubling the dredge's capacity area by the addition of an upper deck, on an incline of 12 feet from bow to stern.

The whole operation will be electrically driven with individual motors and control switches on the bridge towards the bow of the structure. Present estimates indicate an operating cost of not more than two cents a cubic yard.

Hydro-electric plant is to be constructed on Jones Creek, near where the dredge will be put into operation, and will generate 2,000 horse power. It is understood that work upon this phase of the undertaking is to start at once.

If the opposition of the first dredge's operations proves very possible to safeguard against failure seems to have been taken the company will proceed to the construction of other dredges in the district.

Smaller units will be needed in some parts of the river under lease, but all will require the same type equipment with such improvements as practice may suggest.

Turns Page In History

British Girl Retains Nationality Although Married To Frenchman

An English girl of 21 has turned a new page in the story of English women's fight for equal rights with men.

For pretty Ina Gina, of Stanmore, Middlesex, has become Mme.—or rather Mrs Lucien Albert of Paris—and retained her British nationality. She is the only Englishwoman to have married a Frenchman—or any foreigner—and remained British.

Why she did so now gives rise to the Home Secretary on her engagement, explaining her patriotic desire—of the long negotiations with French and British authorities.

She went to Paris to be married on Boxing Day. Since then personnally, she has had no nationality —until now.

She displayed the new British passport, in her married name, which she has just received. Written in by hand was read: "British subject under the provisions of the British Nationality and Status of Aliens Act, 1933, wife of a French citizen."

Year Of Anniversaries

At Least Three Will Be Commemorated During 1934

That 1934 is a year of anniversaries was recalled by Victor Morin, chairman of the Montreal committee on the Jacques Cartier celebrations, to the Quebec Women's Institutes convention.

In 1534 occurred the discovery of Canada by Jacques Cartier; in 1634, the extension of the colony by the founding of Three Rivers; in 1734, the opening of the first road between Quebec and Montreal; and in 1934, the granting of its charter to Toronto.

Some Long Sleeps

But Record Of Rip Van Winkle Still Stands

A Huddersfield man has had no sleep for eight weary years. Not even morphine can give him an hour of real sleep. How he must envy such a man as W. Bunney, pet rabbit to the blind who fell asleep on April 7th, 1924, and slept seasons for fourteen days and fifteen nights. Fourteen days with no appreciable rise in temperature, pressure remained at 29.6 inches and the weather chart showed no change in the barometer.

Bunney awoke on April 21st, 1924, and knocked his head on the pane above. He was taken home and put to bed. The doctors said there was no concussion or nervous injury. Next morning he was still asleep, and he slept for two years and four months. He was a week when at last he woke, yet in the rest he recovered. There was the famous Margaret Boswell "the Sleeping Woman of Thetville," who was thrown into a deep sleep by a fright and slept for nineteen years and six months. Then she slowly roused was able to talk but in a weakened voice, and died five months later. The record Rip Van Winkle is an American a farmer called Hinton. He came in one evening and went to bed and was much upset to bed and slept for twenty-six years. It was possible to rouse him to take food but he could not stay awake more than five minutes. Like the French woman sleeper he wasted away and died.

May Join League

By Being So Remote Would Make Confidence Abroad

Russia, it is said, plans to enter the League of Nations and is only delaying to decide what manner of entry would leave it the least expensive to do as to why it stayed so long.

A chivalrous desire to help keep peace in Europe is credited to Moscow, no doubt correctly. But there is shrewdness, as well as chivalry in the move. Stalin has troubles enough without having to keep a watchful eye always on the western front.

In particular he has occasion to pay attention on the far end of his dominion, in which quarter Japan is carving out a piece for itself in the Oriental sunshine without much regard for what Russia may want.

Joining the League would be for Russia the next thing to making a general treaty of nonintervention with Europe, and leave the Soviet directorate free to pay attention to urgent matters in the Far East.

Japan undoubtedly sacrificed a measure of world confidence when it left the League. Russia would conspicuously gain confidence abroad if it joined the League and thus announced itself to all the practicable purposes of that organization.—Edmonton Bulletin.

Machine Reads Minds

Graph Paper Yukon Record Of Thoughts Shown On Screen

The old story about the walls of jerry-built houses being so thin that you could hear your neighbor changing his mind several times in one's very near the truth. A machine invented by Dr Alexander Cannon records any mental reaction, and consists of flexible tubes which are attached to a human subject. The reactions of the brain are recorded on graph paper. Simple emotions like surprise, love, hate, are recorded, and the machine also registers mental fatigue, the capacity of the mind, reaction to tension or concentration, suicidal tendencies, and whether the subject is telling the truth or lying. Among other things it shows that waltz music is soothing, and that it relieves asthma by inducing regular breathing. It is also claimed that it proves telepathy to be a physical fact.

Queen's Voice Over Radio

For the second time in the history of broadcasting the queen's voice will probably be heard on the wireless in September, the occasion being the launching of the Cunarder, No. 534, at Clydebank. Her Majesty having been heard on the wireless in the early days of the British Broadcasting Corporation.

In hot weather, stomach disorders and indigestion come more frequently. BABY'S OWN TABLETS

Indian Rope Trick A Myth

Occult Committee Says No One Has Ever Seen It

As the result of a solemn inquest held by the occult committee of the Magic Circle, a group of keen professionals, the Indian rope trick is, for reviews, under a headstone effectively buried.

Nobody explains before the committee showed has ever performed the trick, which is an Indian fake, is supposed to from a long rope vertically into the air, whereafter a boy to climb out of view into the heavens. Nobody could be found who had seen the trick done. So in effect the occultists found that neither for nor the story will stand up. The group has offered $2,500 to anyone who will perform the feat.

Lord Ampthill once viceroy of India, presided over the committee's meeting.

How India was scoured and large rewards were offered futilely for a rope-trickster when King George and Queen Mary visited India early in their reign was told by Sidney Clarke chairman of the Magic Circle.

Even the great Numa of Hyderabad, with limitless resources, was unable to locate a juggler who could do the rope trick, when asked to provide one for a giant garden party, related his friend, Sir Michael Sadler. In 25 years in India, Sir Michael never found anyone who had seen the trick.

Harry Price, director of the National physical laboratory, said he had collected a library of 12,000 books about magic, and not one contained any genuine evidence about the trick.

Sir Francis Griffin, formerly an inspector-general of police in India, imputed belief in the rope trick to the power of suggestion, like the tenacious belief in American lady of travel who said the most remarkable thing she had seen in all India was the sun setting behind the Agra Khan.

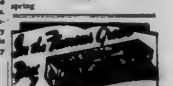
Problem In South Africa

Many Pupils With Scottish Names Speak No English

As in Quebec so in South Africa there are people with pure Scottish names like Campbell, Stuart and MacDonald, who speak little or no English, Dr S. H. Bloemfontein, Director of Education of the Cape Province State in the Union of South Africa, remarked after an investigation of Quebec school conditions.

Dr. Bloemfontein went to Quebec to study the question of bilingualism and how it is handled in Quebec in South Africa they have the same problem, the majority of the pupils speaking Dutch and the minority English. They also are faced with the difficulty of educating children in the outlying sections, as in Quebec.

Dr. Pellissier said the children with the Scottish names are the descendants of settlers who married Boer women. They gave their names to their wives but the mothers passed their own language to their offspring.



Has a hundred uses. Always have a bag in the kitchen.

Quaking

LEVY PLAN FOR MEAT IMPORTS IS NOT FAVORED

London. An import levy plan involving a guaranteed price restriction of imports from both the Dominions and foreign countries with a preference for the Dominions and financial assistance to home producers is understood to have been the basis of discussion at a meeting of the meat conference of the colonial office. The conference were described as friendly but vigorous and it is understood the plan, submitted by the United Kingdom government differed materially from the scheme approved at the previous meeting of the conference.

The conference is considering a revision of the meat clauses of the empire trade pacts which come up for review this year and are of concern to Australia, New Zealand and Southern Rhodesia but of no great interest to Canada. Canada is represented at the meeting, however, along with the Irish Free State.

It was suggested the British plan could be operated with the same set of machinery provided in the wheat agreement inasmuch as it is based on the same principle, namely, an agreed quota for each of the exporting countries. It would apply to muttons and lamb as well as beef.

The levy imposed on imported meat would be on a basis which would give the Dominions a 50 per cent preference over foreign countries. Proceeds of the levy would be used to provide financial assistance for home producers.

It is understood the Dominions are not opposed to the imposition of a quota on their shipments but look upon the addition of the proposed levy as a very serious consideration. The quota itself would be serious enough, they claim, as it would involve a restriction of their exports to the figures used in discussions at the Ottawa imperial conference which in so far been far exceeded in practice.

Official circles regarded it as possible an agreement might be reached with the Argentine to provide for the quota and levy but the latter could only be effected by the Argentine agreeing to waive the preventative clause in last year's trade agreement.

Further Arrests Ordered

Revolution In Germany Held To Be By No Means Over

Vienna. The arrest, under order of Chancelor Adolf Hitler of three high cabinet ministers, including Ehrt Von Ruebenach, was reported from Munich by telegraph.

Persistent reports that the "second revolution" was by no means over were brought here by Austrian Legitimists fleeing from Bavaria. They said they understood nearly 3,000 storm troop chiefs had been arrested.

Travellers said a "revolutionary committee," composed of the friends and relatives of the executed storm troop chief of staff, Ernst Roehm, and Bertin Heidenlang Leader Karl Ernst, had been formed in Munich.

Protection Of London

Railways And Underground Railways Guarded Against Attacks

London Questioned in the House of Commons on German preparations for bacteriological and other methods of warfare described by Wickham Steed in "The Nineteenth Century Review", Lord President of the Council Stanley Baldwin made guarded replies.

"I have seen allegations to the effect in a published article," he said, "but they have been officially denied by the German government."

Mr. Baldwin said the protection of subways and underground railways as well as aerial defence of the capital were in the care of special departments.

Pension Plan For Workers

Committee Has Approved Canadian National's New Project

Montreal A joint committee of company officers and representatives of employees has approved a new pensions plan for Canadian Government Railways employees to take effect from July 1, 1935, it is announced in the Canadian National Railways magazine.

The new plan, which has a contributive provision in addition to providing basic and service pensions on retirement at 65 years, covers all employees of the company except those under the International railway and Prince Edward Island employees pension fund and the Grand Trunk superannuation and provident fund Employees in the I.C.R. and P.E.I. funds are expected to be given the option of coming under the new plan.

Minimum basic subsistence pensions will be granted each employee solely on the expense of the company. This may be supplemented by joint contributions by the company and by the employee an employee may contribute from one to 10 per cent of his salary after 10 years' service, and not more than five per cent the company will match the employee's contribution.

The pension plans are to be administered by a board of seven members, four of whom will represent the company and three the employees.

Automobile Exports

Canadian Cars Are Being Shipped To South Africa

Ottawa. — Some improvement has been noted in the export trade of Canadian automobiles to the United Kingdom recently and a very substantial improvement in the trade to South Africa, officials of the department of trade and commerce stated here. The development has been particularly noticeable during the past few weeks.

The demand from South Africa is due to the improved economic conditions in that country because of the high price of gold. The departmental advices are that the entire shipping space immediately available has been taken up.

The reason Canadian cars are playing so important a part in the trade with South Africa is said to be due to understanding between certain United States parent companies and Canadian subsidiaries giving the latter the South African market.

Storm Causes Damage

Terrific Wind Carried Home More Than A Mile

Iroquois Falls, Ont. Reports reaching here said a terrific windstorm that struck the settlement of Normetal carried a house more than a mile and lifted three men 25 feet in the air.

A steel transmission tower, carrying power for the Abitibi Power and Paper Company, was twisted and torn. The line was put out of commission. None of the three men in the house carried aloft by force of the wind was badly hurt.

Policy Will Be Changed

United States Is Dropping Control Over Its Livestock

Washington Circumstances alter reason for the United States agricultural adjustment administration, which is planning broad changes in its policies.

Such strokes of nature as the drouth are bringing re-shape the farm administration campaign.

The program next year is expected to call for:

A abandonment of control over livestock production.

The reduction contract to cover all feed grains named in the Agricultural Adjustment Act.

Continuation of the wheat and cotton reduction programs allowing increased production over this year's figures.

A plan for storing grain on farms, possibly under government seal.

Loans might be made on these grain certificates believe regulation of the feed supplies will automatically control raising of animals.

Starts Insurance Plan

Fund For Unemployed Being Tried Out In Wisconsin

Madison, Wis. Wisconsin is watching progress of its latest social experiment - unemployment insurance.

The compulsory law became effective July 1. Every Wisconsin employer who has given work to six, least 10 persons for 15 weeks must make contributions to the insurance fund, and employers may submit voluntary plans which, if approved by the industrial commission, may be substituted in place of the compulsory act.

Until the fund amounts to $35 reserve per employee the premiums are due the act will be two per cent. of the payroll. When it amounted to $50 but less than $75 reserve the rate will be one per cent.; and when $75 or more contributions will cease unless the employer desires to provide more adequate reserves for his men.

Victim Of Heart Seizure

Wife Of Hon. Robert Rogers Dies In Winnipeg

Winnipeg — Mrs. Amelia Regina Rogers, 63, wife of Hon Robert Rogers, Winnipeg, died suddenly after a brief illness.

The wife of the former Dominion cabinet minister had only recently returned from Ottawa following the winding up of the parliamentary session.

She recently was prominently mentioned as a possible appointee to the senate

Before her marriage Mrs Rogers was Miss Amelia Regina Widmyer, Mimico Ossumi, minister of marine, will be continued in their posts in the new cabinet.

The vernacular newspapers stated that naval leaders were displeased with the selection of Admiral Kosuke Okada for premier. They regard him lake warm to many of their policies.

Will Not Change Policies

Japanese Foreign Policies Will Not Undergo Radical Change

Tokyo — Assurance that Japan's fundamental naval, military and foreign policies will not undergo radical changes were given in official statements as newly appointed premier Admiral Kosuke Okada sought to construct his cabinet

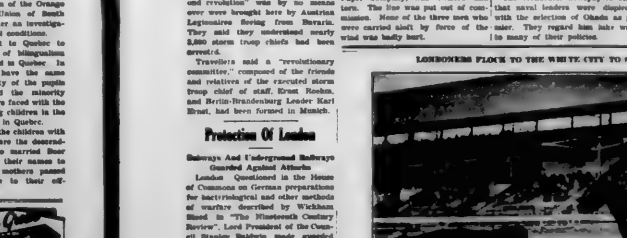
Koki Hirota accepted reappointment as foreign minister. There were also assurances that two ministers of the old Saito cabinet, General Hayashi of the war department, and Mineo Osumi, minister of marine, will be continued in their posts in the new cabinet

The vernacular newspapers stated that naval leaders were displeased with the selection of Admiral Okada for premier. They regard him lake warm to many of their policies.

House Warned By Baldwin

London — Stanley Baldwin, lord president of the council, told the House of Commons that international political conditions are so serious that it is imperative for the 1935 naval conference to "achieve some end".

LONDONERS FLOCK TO THE WHITE CITY TO SEE RODEO THRILLS



The famous White City, London, has been turned into a glorified round-up in which 100 cowboys and 15 cowgirls from Canada and the United States are playing prominent roles. The British promoters are staging a world's Rodeo Championship and above we see a competitor clinging a steer in the Strathcona Roping Contest.

WESTERN FARM AREAS BENEFITED BY HEAVY RAINS

Ottawa — A further improvement in prairie crop conditions occurred during the past week according to a crop report issued by the Dominion bureau of statistics.

Precipitation was fairly general over the farming districts and unusually heavy in some localities, the report stated

The areas which benefited most were northern and eastern Manitoba, crop districts of central and northern Saskatchewan and the Alberta districts south of Calgary and between Calgary and Edmonton.

Eighteen points and precipitation during the week of over an inch, with Prince Albert, Sask., registering 3.1 inches. Unfortunately, the precipitation fell as hail in scattered areas of all three provinces and severe damage was done to standing crops. The affected districts were S Northeastern Manitoba central Saskatchewan and south-western and southcentral Alberta.

Since the first snow wheat crops are now headed and most of the remainder in the boot. There are indications of an early harvest, except in central and northern Alberta," the report stated. "In these latter areas growth has been slow and warm weather is needed. Grasshoppers are being kept under good control by the prevailing cool evenings and the favorable weather. The feed situation has been greatly changed for the better and pasture is unusually a light crop, pasture growth will be a helpful supplement."

Saskatchewan crops made fine progress during the week. The heavy rains caused a further improvement in the feed situation, even where crops were very poor. They gone to reseed. Uneven stands of grain on stubble land are reported as a consequence of delayed germination. No serious grasshopper damage is reported.

Avoid Trade War

Great Britain And Germany Sign Agreement

London Great Britain and Germany avoided a trade war for at least six months by signing an agreement providing for the payment of interest on Dawes and Young loan bonds held by British subjects.

The agreement extends six months from July 1, the day the German moratorium on all foreign obligations became effective

Other long and medium term obligations held in Great Britain which are mostly commercial, will not be serviced during the moratorium, under the terms of the agreement.

Germany agreed to deposit British currency in the name of Ringland for payment of all coupons from Dawes and Young loan bonds.

In return, Britain will not apply the new clearing house to German which the government would have been able to seize a portion of German commercial funds for the benefit of bondholders

Pleased With Decision

London — Lord Lonsdale, baron of sports, congratulated Tex Austin, promoter of the rodeo now being produced in London, on his court victory against the Royal Society for the Prevention of Cruelty to Animals. The society had charged Austin with cruelty to steers used in the show.

Ottawa Application for reduction in the British preferential duty on boots and shoes from 25 per cent to 15 per cent. was made before the tariff board by the Incorporated Federated Associations of Boot and Shoe Manufacturers of the United Kingdom

Start Journey Through Rockies

Edmonton. - With over 15 tons of equipment, fuel and supplies, the Bodmin tractor expedition left Edmonton Friday, June 29, on the first leg of their journey through the Rocky Mountains.

Takes Census Of Buffalo In Large Area In North, Spending Two Years In Completing Work

Mr J. B. Soper, Special Investigator for the Department of the Interior Canada, just returned to Ottawa after having spent two years studying wild life inasmuch as Wood Buffalo Park which is located four-fifths in northern Alberta and the remainder in the adjoining Northwest Territories. The Honourable Thomas G. Murphy, Minister of the Interior explained that Mr Soper's special assignment was a comprehensive study of the buffalo both the original last remaining herd of wood buffalo and the plains animals transferred there within recent years from the government herd at Buffalo National Park, Wainwright, Alberta.

The difficulty of taking a reasonably accurate census of the buffalo in the immense area of 17,300 square miles of rough wooded country, the maximum limitations of which are 170 miles by 164, can hardly be appreciated. To give Mr Soper a good start on his work the department first arranged to have him make a reconnaissance from the air. Later on he traveled by canoe, dog sled and on foot. By these various means Mr Soper covered more than 3,000 miles within the park. Fortunately he had already had several years experience in northern travel, having carried out a geographic and faunal survey on southern Baffin Island just prior to the Wood Buffalo Park work.

According to the Honourable Mr. Murphy, until the completion of Mr. Soper's investigation at Wood Buffalo Park the department could only form an opinion as to the number had conviction of the buffalo in the park on estimates established by observers and others whose views were naturally colored by the prevalence or scarcity of animals in one small area. Now, later in giving out figures as to the number of animals the Department of the Interior is careful to say that it is only approximate. The animals move about daily and with the changing seasons and one can only observe at one place at a time.

Mr Murphy said that on the whole Mr Soper's findings were very encouraging. It is estimated that the total population of buffalo in this northern part is at the present time in excess of 2,000. The animals from the Buffalo National Park at Wainwright seem to have become acclimatized and along with the original herd were found to be in FIT good condition.

With the information now available the department will be in a better position to determine what is the natural increase of the herd. Although there is a small annual return from the government's investment at Wood Buffalo Park in that a number of selected animals are slaughtered each fall and the meat used for relief purposes in the Fort Smith district.

Although, as pointed out by the minister of the interior, Mr. Soper's assignment was primarily that of studying the buffalo, his all-round qualifications as a naturalist placed him in the position of being able to observe incidentally and himself a comprehensive report on the wild life of the park. More than 1,000 museum specimens were collected by Mr. Soper and a [illegible] was laid for through understanding of the wild life of the area with its numerous problems in regard to efficient administration

Extensive observations in topography and forest growth were carried out. Astronomic [illegible] were taken for position in ground control in relation to the area mapped all the park. A thorough inspection was carried out pertaining to park roads, trails, telephone lines cabins, and fire towers. Streams and lakes were travelled, where [illegible] to examine the area in general that information on the possibility of beef and canoe transport along the margins and inside the park. The waterfowl situation was investigated to ascertain its abundance and how it was distributed among the lakes and waterways of the park.

The minister said that the total of Mr. Soper's reports would make read-

WELLINGDON FAMILY HAS 307O'S REUNION IN LONDON

Lord Willingdon, Viceroy of India, who is in England on a well-earned vacation, travelled to Croydon recently with Lady Willingdon to meet his son and bride who flew from the continent. In the group, reading left to right, are: Lady Brabazon (who was Miss Mary Pester), Lord Willingdon, Sir Samuel Hoare, British Secretary of State for India; Lady Willingdon, and Lord Rathcolman (Willingdon's son).

Contrary To Popular Opinion, It Seems That Wheat Plays Minor Part In Agricultural Production

When Nature Steps In

Figures For Field Crops Are Lowest Since Records Were Kept

The famous agreement signed last August, was one of the numbers of the postwar world an international conference had achieved something Dr. William Francis Gasser Argentine delegates were all for it Nothing seemed more reasonable to them than that exports should be curtailed and production cut 15 per cent Premier Bennett, Canada's delegate, was as enthusiastic as the others But not until United States Secretary of Agriculture Wallace threatened to pour grain into the East, Australia's and Argentina's, did the antipodean dominion sign on the dotted line

The situation at that time was unexampled The world had the great est store of grain in history running to nearly a billion bushels When supply exceeds demand prices fall And it meant a great deal to the wheat-producing countries of the world that, by curtailing the supply, they should get more for their product More money for the farmers meant more money for the people generally, as cash received for the grain went into circulation

Since then Nature has taken a hand A severe winter and drought have done still more to curtail production. The United States federal crops reporting board on the basis of conditions on June 1, predicts the shortest wheat crop in that country since 1896 The Dominion Bureau of Statistics' figures for field crops, on May 31, were the lowest in the twenty-six years during which records have been kept Compared with last year, Canadian figures for fall wheat are down from 86 to 46, and for spring wheat from 99 to 73. Ontario has the poorest crop prospects on record.

Russia and the Danubian countries were also parties to the wheat agreement of a year ago. Russia, while also agreed to restrict exports, did not agree to any figure Her country said she would do her best. There were fusion conditions in Russia then. Now crops conditions in the Soviet are good in some districts, bad in others. The smaller acreage sown and inadequate crop insurance are likely to reduce the yield in the latter to the basis. What was desired last August, when the international conference met, has not been accomplished. Though Argentina's default cannot morally be condoned, its economic effects may be slight. Higher prices for wheat are indicated.—Hamilton Spectator.

Muskrats are small fish of the herring family, very valuable for their oil.

Because of the high quality of Canadian wheat, which has given it much popularity at international exhibitions, and the large part which Canada takes in supplying the world's markets with the "staff of life" it may be supposed that wheat is almost the only important farm product in Canada The statisticians of one of the Canadian banks has recently assembled figures which show that wheat after all, plays only a minor part in Canada's total agricultural production. Even before half the farmers of Canada engage in wheat raising at all, and from 1926 to 1929 wheat accounted for only about 23% per cent. of the total agricultural revenue, in 1933 the proportion was only about 16 per cent

The statistics are of interest and importance it may be noted that farm animals, including hogs, are credited with about 41 per cent of the total farm revenue, dairy products and poultry about 22 per cent. Field crops make from wheat which play an important part in the total include oats, $75,000,000, barley, $15,000,000, potatoes, $21,043,000, tame hay, $11,276,000, flax seed, $6,000,000, alfalfa, $12,334,000, grass hay, $12,800,000, and mixed grains, $17,756,000. Commercial fruits amount to about $10,000,000

Other crops which do not run into the big figures are still important factors in the country's agricultural income. The United States federal crops reporting board on the basis of conditions on June 1, predicts the shortest wheat crop in that country since 1896 The Dominion Bureau of Statistics' figures for field crops, on May 31, were the lowest in the twenty-six years during which records have been kept Compared with last year, Canadian figures for fall wheat are down from 86 to 46, and for spring wheat from 99 to 73. Ontario has the poorest crop prospects on record.

Russia and the Danubian countries were also parties to the wheat agreement of a year ago. Russia, while also agreed to restrict exports, did not agree to any figure She merely said she would do her best. There were fusion conditions in Russia then. Now crops conditions in the Soviet are good in some districts, bad in others. The smaller acreage sown and inadequate crop insurance are likely to reduce the yield in the latter to the basis. What was desired last August, when the international conference met, has not been accomplished. Though Argentina's default cannot morally be condoned, its economic effects may be slight. Higher prices for wheat are indicated.—Hamilton Spectator.

No End To Inventions

Some Are Very Practical And Others Quite Worthless

American inventors are a motley and cosmopolitan crew, a visit to the National Inventors' Congress at Washington disclosed. Men and women, race nor previous condition of servitude, seems to have any bearing on the matter. Both men and women, who are inventing things

Whites, Negroes and Chinese were included in those entering gadgets at the congress.

Many of the things exhibited are extremely practical. Others are merely fun. But to the eye of the proud originator every one is just what the world is crying for.

"Everything has by no means been invented yet," said Albert G. Burns, national president of the Congress. "A world which only recently has been freed from cumbersome hitching posts and scrotches is not too convinced that inventors are a realy resource-ful lot."

Facetiously Burns suggested other boons to mankind, including: A gadget that will whistle when a person has taken about too much food or drink, a seamless stocket skinner, waterless dishwasher, and non-run-able radio.

Origin Of Human Hair

Professor Traces It From Spinal Cord Of A Fish

New York's American Museum of Natural History bears the origin of the human mind. Prof. D. M. S. Watson of the University of London tells his audience this long-winded, human mind originated in the organ of smell of earth's first living marine creatures. The mentality of man, ape and all the remainder is traced back down the evolutionary highway to a modest knot at the upper end of the spinal cord of a fish. The reported development took ages. And this fish mind seems to have moved slowly at that. Only one explanation seems considered with the breed facts—That fishy mind just can't be that true mind among men which at times undoubtedly does reflect the infinite.—Christian Science Monitor.

SYNOPSIS
Camilla Hoyt and Lester Elmer, young and in love marry secretly deciding to live their own lives until Peter is able to provide for her Peter is a young struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adored daughter of a wealthy family who do not approve of Peter. Camilla, when she comes of age and so is studying commercial art to be near Peter and to help him along. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter Edwin Todd, Peter's rival and Guy Mathews, his former room-mate with whom he has quarrelled After a party at an exclusive club with the rest of the members of the party on a starboard excursion boat Peter and Camilla slip off to the beach by themselves and Peter asleep on the sand. Then they awake It is early morning and Avis and another boy are coming down from the cabin to help Pop about but Peter and Camilla are already there. Camilla urges Peter to enter the studio Avis Worth calls and persuades Peter to accept a loan of $1 000. Peter flushes his exhibit and asks Avis and Camilla for marriage as to a name for it Camilla suggests "Eager Youth" and Avis "Insecurity" Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for quiet and to think Peter and Avis follow later and as the lights are turned on see the clay that have been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and bewildered, flees. Camilla faints
At Camilla's suggestion Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They name it "Land of Hope"
(Now Go On With The Story)
CHAPTER LI
Avis managed to rout the exhibit alone with John Danforth on the day before the final vote would be cast for the winner of the Rome scholarship She had made the coincidence seem casual enough And her interest in art had elicited her uncle's unqualified approval from the beginning His own sons and only daughter had evinced none of his esthetic appreciation, which was one of the few disappointments of his life. So, when his niece not only patronized the production but actually won her degree at National, he was immensely proud, and sympathetic with her plans and interests
So generous was his measure of approval that he had purchased one of her best paintings and hung it in his library though he had to admit to himself that she couldn't have sold it elsewhere for a song. But he advanced that praise stimulates effort and encourages ambition
He was particularly noted for his philanthropy to talent, and not a small part of the Paris scholarship fund was responsible to his generosity but he never permitted it to be left hand to suspect what his right hand was doing
The judges have no easy task I can tell you that! he confided to Avis at the exhibit "It was difficult even to eliminate anyone
I'm only beasts and pretenders of detail enter into the contest," she answered
Oh no there are many points to be considered
Such as
Subject matter position execution of material
Does the thought hold [illegible] ye? the reason for the realism its originality mean anything
Indeed it means a very great deal Is there a piece here in which you think I stand a chance
Oh, yes, a splendid one I like John Strand just here and look at that group over there Third from the end Doesn't it tell you a dramatic story?
Yes I remember it well in the original selection There was a question about entering it I recall Undoubtedly it is one of the best that there are so many among the best
But what other one tells no point and a story of the [illegible] Others in the story are Avis Worth another wealthy girl who is trying to win Peter Edwin Todd, Peter's rival and Guy Mathews, his former room-mate with whom he has quarrelled After a party at an exclusive club with the rest of the members of the party on a starboard excursion boat Peter and Camilla slip off to the beach by themselves and Peter asleep on the sand. Then they awake It is early morning and Avis and another boy are coming down from the cabin to help Pop about but Peter and Camilla are already there. Camilla urges Peter to enter the studio Avis Worth calls and persuades Peter to accept a loan of $1 000. Peter flushes his exhibit and asks Avis and Camilla for marriage as to a name for it Camilla suggests "Eager Youth" and Avis "Insecurity" Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for quiet and to think Peter and Avis follow later and as the lights are turned on see the clay that have been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and bewildered, flees. Camilla faints
At Camilla's suggestion Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They name it "Land of Hope"
(Now Go On With The Story)
CHAPTER LI
Avis managed to rout the exhibit alone with John Danforth on the day before the final vote would be cast for the winner of the Rome scholarship She had made the coincidence seem casual enough And her interest in art had elicited her uncle's unqualified approval from the beginning His own sons and only daughter had evinced none of his esthetic appreciation, which was one of the few disappointments of his life. So, when his niece not only patronized the production but actually won her degree at National, he was immensely proud, and sympathetic with her plans and interests
So generous was his measure of approval that he had purchased one of her best paintings and hung it in his

SYNOPSIS
Camilla Hoyt and Lester Elmer, young and in love marry secretly deciding to live their own lives until Peter is able to provide for her Peter is a young struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adored daughter of a wealthy family who do not approve of Peter. Camilla, when she comes of age and so is studying commercial art to be near Peter and to help him along. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter Edwin Todd, Peter's rival and Guy Mathews, his former room-mate with whom he has quarrelled After a party at an exclusive club with the rest of the members of the party on a starboard excursion boat Peter and Camilla slip off to the beach by themselves and Peter asleep on the sand. Then they awake It is early morning and Avis and another boy are coming down from the cabin to help Pop about but Peter and Camilla are already there. Camilla urges Peter to enter the studio Avis Worth calls and persuades Peter to accept a loan of $1 000. Peter flushes his exhibit and asks Avis and Camilla for marriage as to a name for it Camilla suggests "Eager Youth" and Avis "Insecurity" Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for quiet and to think Peter and Avis follow later and as the lights are turned on see the clay that have been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster and hurt and bewildered, flees. Camilla faints

MATURITY—MATERNITY
MIDDLE AGE
At these three critical periods of woman's needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.
LYDIA E. PINKHAM'S VEGETABLE COMPOUND
CAN'T SLIP OR SLIDE
FALSE TEETH
Don't use any old kind of remedy to keep false teeth in place use a reliable, recognized one both dentists prescribe most as Dr. Wernet's Powder the largest seller in the world, gives perfect comfort or money back Has no gum or paste, no [illegible] Tasteless, odorless Sprinkle on upper and lower plate Moisten with water and fit on Forms a pure alkaline cushion to prevent and neutralize acids Nothing else may please keeps mouth sanitary, breath pleasant. Inexpensive All druggists.
Little Helps For This Week
"If ye fulfill the royal law according to the scriptures Thou shalt love thy neighbor as thyself ye do well." James 2:8
Come children let us go,
We travel hand in hand
For it is my brother then his joy
In its a salt stranger land
The striving be quick to shine
The weaker when they fall
Let love and peace and patience bloom
In ready help for all
It is a sad weakness in us after all that the thought of a man's death hallows him more than one of his wife were not sacred too, as if it were a light thing to fail in love and reverence to the brother who has to climb the whole toilsome steep with us, and all our tears and tenderness come to him the one who is spared that hard journey.—George Eliot
Would we codify the laws that should reign in households and states, all tyranny would be annoys un and degrades our household life, we must learn every day to reform it ourselves now is what to do with the [illegible] made up of petty sacrifices. Temperance, courage, love, are made up of the same jewels Liberty is every prompting of honor.—R. W. Emerson
Fight Gas With Gas
France Has Devised Defences Against Enemy Assaults
France is prepared to fight gas with gas and has devised defences against enemy assaults on whole cities by discrete germs, military [illegible] records.
A newly-developed defensive gas effectively neutralized poison gases which might be dropped on centres of population in air raids it was said Another gas, it was explained would kill microbes released over a city
Prepared to invoke these new defences military authorities said they never had studied the conditions in London that Germany allegedly has studied the feasibility of flooding London and Paris subway systems with gas and germs.
Due to curtailment in Canadian lumbering operations in New-foundland's lumbering, dulling, and mining there was a heavy carryover of molasses in Newfoundland British West Indies from 1932 to 1933. This year the demand from Canada for [illegible] has increased
On the first of May this year frozen poultry holdings in Canada were nearly 7½ million pounds in excess of the previous year, but by June export trade is largely responsible for reducing the stock

THE RHYMING OPTIMIST
By Aline Michaelis
THE MARVEL OF MAN
I thought of man, of his strength
If [illegible]
Of his wisdom, not to be denied,
Of his heart, and mind, and soul
O, the marvel of man in his upward climb!
Since the mist of earth's dim youth
He has toiled with fervor and faith
Striving
And "ll he draws nearer to truth!
There are cities climbing to greet the skies,
There are marvels of sea and air,
And I gloried in man and his victories
That are bit for a god to share
He has fashioned his life in lofty mould,
Has savored it with beauty and fire,
Has toys are fame's trappings and grants and gold,
But love is his heart's desire
Marvels Of The Heavens
Astronomer Gives Some Idea Of Age Of Sky
Sir James Jeans, the astronomer, unfolded some marvels of the heavens in a lecture at the Royal Institution recently Here are some of them: A Rogcher there are 100 million stars They are scattered round in the shape of a gigantic cartwheel There wheels or worlds are round with majestic slowness. Each revolution takes 250,000,000 years. During the whole of the civilized epoch the sun of worlds has only moved as much as the hour hand of a clock moves in one second. You and this will give you some idea of how old the skies are the wheel of worlds shows evidence of having gone round thousands of times.
Cruise Around The World
Hundreds of British workers and their wives who have never been farther from home than Margate or Blackpool, are planning to take a cruise around the world next year at a cost of $250 to each passenger.

HOW TO BE HEALTHY AND STAY HEALTHY

The following rules of hygiene should be adhered to: EXERCISE:- To those with sedentary occupations a proper amount of well directed light exercise, such as walking, swimming and light gymnastics, are recommended. To those in middle life, the more violent forms of exercise should be indulged in only under the guidance of a physician. BATHING:- Either a tub or shower bath should be taken daily. To some, cold baths are acceptable, followed by a brisk rubbing which acts as a general stimulant. To improve the general condition, Cabinet or Turkish baths or salt rubs will be found beneficial. SLEEP:- There should be eight hours of sleep in a well ventilated room, where rest and relaxation are essential. DIET:- The meals should be regular, well cooked and properly balanced to contain meats, starchy foods, cooked and green vegetables, salads, fruits and pastries in moderation. Overeating and alcoholic excesses should be avoided. HOWELS:- Regular habits. Many abnormal conditions can be corrected by proper diet and exercise. GENERAL CARE:- Proper attention to meet the requirements of climatic conditions should be worn. Precautions should be observed in exposing the body to cold, wet, draughts, etc., as nothing so quickly debilitate the system as repeated colds.

Thousands of men, women and children sufferers are treated for many other maladies, when their real trouble is that monster, the tapeworm. The sure sign of it are the passing of the particles of the parasite. Some-times there are loss of appetite with occasional greediness, coated tongue, heartburn, pain in back, limbs and feet, dizziness, headache, sometimes faint with an empty stomach, nausea, and, dark specks under the eyes. The stomach feels heavy, bloated, at times a crawling sensation from stomach into bowels is noticeable. Again, as if something moving towards the throat is felt. The patient has yellow skin, loses weight, has bad breath, eats constantly, absolutely ambitionless, no desire to work, nervous busy. Epileptic fits are known to have been caused by these monsters, which at sometimes grow over 50 feet. When it crawls into the windpipe it is liable to suffocate its victim. Get rid of this monster at once, before it undermines your health beyond repair. Send $3.50 for a treatment of Laxtan if you want to be rid of this horrible parasite. Laxtan is harmless even if you haven't a worm.

Sold only by the U.S Laboratory, 1061 U.S. Bldg., Box 2222, Hollywood, Calif. Not sold in drug stores. State age and sex. Laxtan is made up for you especially and it cannot be sent C.O.D., for the cash or money order accompany the order. To insure packing add 25c extra. Send immediately for this cut and put it away. It may come in very handy some day. Show it to some sick friend and they will forever be thankful to you for helping him out.)

A Cleanser, Germicide, and Deodorant

NEKO (Paris-Davis Germicidal Soap) does three things at once: cleanses, kills disease germs, and destroys the odor of perspiration.

The soap lathers freely and cleanses perfectly. The iodide of mercury in the soap kills germs. Infections are prevented. And the odor of perspiration is destroyed.

NEKO (Paris-Davis Germicidal Soap)

is a wonderful soap for the bath. Price 25 cents.

Smith's Drug Store

Heavy Windstorm Causes Considerable Damage

Coming up suddenly, a windstorm accompanied by dust, hail, rain and thunder swept through the entire district last Thursday shortly after six o'clock, leaving in its wake considerable damage to crops, trees and buildings.

Several stately trees along the row on the main entrance of the Provincial Goal were up-rooted and many of the beautiful flower plants were completely flattened by hail and rain.

The balcony roof on the Williamson Block was wrenched loose and thrown on top of the main building. One plate glass window in the vacant building formerly occupied by Burt Robinson was blown in. A number of citizens report minor damages done to buildings windows and gardens.

Mr. A. Walker and Mr. Atkinson living south of the Fort had considerable damage done to their crops by hail.

This is the second time within the last two years that the Williamson Block has suffered from windstorms, as the first occasion the chimney collapsed and fell through the roof.

49th Battalion To Hold Annual Parade

The 49th Battalion (Edmonton Regiment) Association will hold its annual church parade on Sunday the 22nd July instant. The troops will assemble on the market square at 10 a.m. and march to the Parliament Hill grounds where the service will be held. The Edmonton Regiment will supply brass and pipe bands, the old colours and an escort. After the parade a luncheon will be held in the Rose Room of the King Edward Hotel which will be attended by the members and their families. Special rates have been secured for adults and children. Medals will be worn. The 22nd is the Sunday following the Edmonton Exhibition. Members attending the exhibition are requested to stay over for the parade.

OTTAWA SPEAKING

A Canadian of Ottawa sends a letter to the editor of Liberty Magazine in a current issue. James Lambert, of 240 Cobrie Road, Rockcliffe Park Ottawa calls attention to the comparison between European borders and the border between Canada and the United States. He says:

"There are no fortifications—only a wire fence here and there. No fear exists among the people of these two countries, and that is the chief trouble in Europe now. Each country fears its neighbor and if that fear is not eliminated another war is inevitable. I hope European nations before long agree on a treaty similar to that existing between the U.S.A. and Canada in regard to the fortifying of their frontiers."

Taken From the Files

19 Years Ago Today

Thursday, July 22nd, 1915

The Red Cross Society have issued a cook book which is very attractive. Mrs. George Turner compiled the book, which contains over two hundred recipes.

A moving picture theatre has recently opened in the Williamson Block by Messrs. Wallace and Joe Williamson.

Mr. George Carleton, formerly with Jackson Bros., Edmonton, has made arrangements to buy the stock of G. B. Taylor, jeweler, and will open for business shortly.

Not more than 35 per cent of the sugar of maple trees in Eastern Canada are used for the production of syrup or sugar.

ALBERTA CROP REPORT No. 7

Over most of the province the first half of July has brought considerable moisture, the rains having varied from occasional showers at intervals of a few days in many parts of Southern Alberta to frequent and heavy rain storms in central and northern areas. The result is a very satisfactory supply of moisture which supplies an super-abundance in some of the central and northern districts where the need of a period of warmer weather is beginning to be felt, and where an extension of the present rainy spell would mean a somewhat serious retarding of crop development.

The fear of damage by frost is indicated in some of the reports from the west-central and northern districts, but while the temperature has dropped to low points in one or two of these districts, the damage has thus far not been severe or extensive.

There appears to be a more confident feeling among the rural population in the province, consequent upon the greatly improved general crop outlook. A very keen interest has been shown in the various field days held.

Innocent Bystander Suffers in Crash

Dr. R. H. Mason's car, which was standing in front of Mr. Fillmore's residence, received minor damages last Saturday evening, when a car driven by Mr. McCallum of Lamont which by the way was also damaged, was forced against the Doctor's car. Mr. McCallum was apparently endeavoring to avoid colliding with a car operated by Oscar Lamoureux, who was on his wrong side. Oscar did not see or hear the McCallum car behind him and turned off to the left to enter the lane to leave some parcels at Mr. Fillmore's home.

Constable Jones of the R.C.M.P. investigated.

FURTHER HIGHWAY CONTRACTS

The third group of contracts for main highway gravelling will be awarded by the provincial public works department on July 18. These contracts will cover re-gravelling and second course work on the Cardston-Lethbridge highway, and from Montrose to Fischer Creek, Camrose to Bawlf, Edmonton to Tofield, on the Edmonton - Lloydminster highway near Fort Saskatchewan, on the Edmonton-Morinville highway, and on Jasper highway from Stony Plain to Edson. Progress is being made on the gravelling contracts awarded some time ago in various sections of the province.

THOUSANDS SEE "FAIR"

With a Civic holiday prevailing in the Town, citizens motored to Edmonton and gave the Exhibition the once over. Wednesday was an ideal "Fair Day" and thousands from country and city attended this great annual event. The lack of machinery exhibits was very noticeable this year, and also the usual grandstand performances during the afternoon. But, the exhibition and midway as a whole was very good.

oooooo

Climbing roses, unlike rose bushes, produce flowers on the wood of the previous season's growth, and should therefore, not be severely pruned.

oooooo

In British Columbia where grasshoppers have been at a low ebb in recent years, there were evidences in 1933 of a general increase that may presage a further outbreak in this province in a few years, particularly on the dry cattle ranges.

Municipal Council Holds Regular Meeting

The Council of the Municipal District of Clover Bar, No. 347 held a regular meeting on Monday last with all members in attendance.

The Committee reported in connection with the request of Messrs. Legate & Walker for a road allowance East of Section 4-53-21 4, that it was financially impossible at this time to attempt the work, particularly in view of the fact that the roadway when constructed would only be used by two or three residents.

Messrs. T. & S. Mosby were in attendance to request the Council to secure sufficient land for roadway along the North side of Section 26-53-21 4. Before making any decision in the matter the Council decided to view the site of the proposed road at an early date.

A grant of twenty-five dollars was given to the Josephburg Baseball Club to assist them in maintaining a permanent playing ground. It was also decided to grant a similar amount to the Ypres Valley and Brookville Club as soon as they can arrange for a satisfactory location.

A number of applications for consolidation of arrears of taxes were considered and approved. It was also agreed to extend to the Reeve authority to grant any application for consolidation that may come to before the next meeting.

The appeal of H. Ry against a claim for damages done by his stock to the crop of R. Warring was received, and a committee consisting of Messrs. Gunn & Keith were appointed to make an investigation of the damages and determine and fix the amount to be paid.

The Reeve and Secretary were instructed to sign the agreement with approved hospitals for the care of indigent sick residents in accordance with the provisions of By-law No. 41.

The Secretary advised that a number of requests for lots in Ypres Heights had been received from people living in the City and he wished to have the Council's policy in this regard, particularly regarding terms and values in arrears.

With the reading of correspondence and the passing of paycheques and accounts the meeting adjourned.

NOTED AUTO DRIVERS TO RACE AT EDMONTON JULY 28

Edmonton July 18—Professional auto races with world's championship and record holding drivers in speedway racing cars entered will be featured at the Edmonton Exhibition track in Edmonton, Wednesday, afternoon, July 25th, it has been announced by P. W. Abbott, managing director.

At least two world's speed record holders, Gus Schrader of Cedar Rapids, Iowa, half mile champion and Emory "Spunk" Collins of Regina Sask., one mile titleholder, are among the 10 dirt track racing stars entered for the open-to-the-world competition. Schrader also is the world's competitive dirt track racing champion for 1932 and 1933 and leader for the crown again this season.

Other stars entered include Ernie Petersen, speed king from Joliet, Ill.; Roy Lake of Los Angeles, Calif. Leo Young of Chicago; Shane Fitzgerald of Monterrey, Mexico; Eddie Wagner of Grand Forks, N.D.; Ray LaPlante of Newark, N.J.; and Dave Champeau of Quebec.

An added special, daring and sensational feature will be a crash of solid board wall, engulfed in flames, by Mlle. Mainie of Indianapolis, Ind., in an automobile travelling down the track at 60 miles an hour.

The program starts at 2:30 o'clock, Wednesday, July 25th.

Commercial production of peaches in Canada is confined to Ontario and British Columbia, 88 per cent being in Ontario, chiefly in the Niagara district.

Economic News In Fashion

Periodically, organizations throughout the country meet resolutions decrying the treatment of certain news by the public press, but, as a rule, these are ill-advised (wherever has the motive behind them) for the simple reason that the press stands in the finest barometer of public opinion. Newspapers could not survive did they not interpret aright the desires of the public by which they exist; they could not exist as profit-making institutions, were it not for the fact they bury a very finger on the fickering pulse of the fickle reading public they serve. The success of a daily newspaper depends upon its ability to give the public what it wants. That is why circulation has become the criterion of success in the newspaper field.

The "events" of the reading public vary from time to time, and policies of the newspapers must vary with them. Hence, news headlines change with fashions in clothing change; and it is extremely distorting to study the changes as they appear in the columns of the daily press.

A week or two ago, H. R. Knickerbocker, well-known European correspondent of the Hearst organization, arrived in England to write a series of articles for Hearst newspapers on the economic recovery of Great Britain. In the course of an interview he said:

"One of the most remarkable things that has happened to the American Press since the depression started has been the public demand for economic news. Before 1929, nobody cared much, but when the slump hit America, it produced some peculiar results.

"Economic news now is considered as important as the latest international murder story. Whether the readers understand it or not, I don't know, but Americans have acquired a modern curiosity to know what is happening to the rest of the world. Consequently, newspapers make a large feature of analyses of world economic news."

Students of newspaper trends had been struck with this popularization of economic news in the United States, particularly through the writings of Walter Lippman, perhaps the most famous of all the commentators of economic events. In Canada, during the same period, a similar tendency has been remarked. the constitution of which, perhaps, have been more standard for reasons which are not far to seek.

Recent provincial elections in British Columbia and Saskatchewan especially, have demonstrated clearly that the public is more eager to absorb fundamental economic theories, more desirous of knowing the basic economic dynamics than the politics platform, than ever before.

This is primarily due to the fact remination of their dependence upon world markets has been brought home to the people of this prairie west with more directness than heretofore. They have become acutely aware of the fact that anything affecting the economic condition of the English textile worker, the French vineyard laborer, the coal-miner of Scotland or Wales, owner or laber, is reflected in their own economic condition. They know now that anything which affects the purchasing power of German, Austrian, Jap or Chinese wage-earner, must eventually have its reflex here.

World economic news, therefore, has assumed new and more impressive proportions in the eyes of the Canadian people. The vital importance of a healthy world economy has become all too obvious. Consequently, when news items publish, when word comes that Britain is benefiting of the ruin of long internal depression, the items partake of something more than the evanescent interest of the murder mystery or the sordid sex drama.

New political movements, too, have had their genesis in economic discontent, hence it is only natural that economic discussion should attract an ever widening public. The one drawback to the new fashion lies in the fact that economics, so far, has not been reduced to a science. Economic theories can be set forth with the precision of mathematical formulas. For that reason, it is essential that commitment to any specific theory should follow, not precede, complete study of economics, not as it has been enhanced by some proponent of a particular doctrine, but as it has been advanced throughout economic history. The truth cannot be determined by study of one set of theories, but by analysis of all theories so far advanced from times preceding Adam Smith to those of modern day socialists. Such analysis should be made with due regard to practicability, as demonstrated in political history; not in the field of statecraft alone, but in the wider field of trade and commerce, particularly during the last century and a half.

Agricultural Notes

Many Farms Of Interest To The Western Farmer

Sudan grass is being grown more extensively this year for pasture purposes in the St. Lawrence counties of Eastern Ontario.

Commercial canning of vegetables is the object of the larger organized industries in the Dominion. The first factory was established at Grimsby in 1878.

Seed cleaning operators in British Columbia state that, owing to the general low vitality of the timothy seed cleaned this year much more seed was blown out in cleaning than in previous years, in order to improve the germination.

A saving of thousands of dollars in preparing grasshopper mixtures in Alberta has been effected by the pulverization of the standard used, on the recommendations of the Dominion Seed Branch inspectors, thereby resulting in the use of only 30 per cent. of bran instead of 60 per cent. formerly.

Under the amended regulations of the Dairy Industries Act, a dairy product is defined as any fat or solid product made from milk, which in his judgment is of either the high standard of quality, purity or composition or too low a temperature. Under the amendment, until the temperature of mild cheese or butter is brought within a satisfactory range.

The sale of commercial fertilizers in Saskatchewan has been considerably higher than last year, some 1,000 tons of ammonium phosphate and 100 tons of triple superphosphate having been sold. Most of the fertilizer went into the districts to the west and north of Regina and north of the Saskatoon-Macklin line. Fertilizer trials in Quebec are estimated at 25 per cent. greater than last year.

Owing to drought, seed prospects in Quebec, as at May 31, were not encouraging, especially for timothy and clover. Farmers, however, had planned to increase their seed production considerably, and a circular with respect to prospective growers accompanying them with the services available to them from the Seed Branch of the Seed Branch of the Dominion Department of Agriculture

By the discovery of the anopheles mosquito as the sole means of transmission of malaria, overturning in a single discovery regarding yellow fever, sanitary saved millions of human lives but enabled millions of acres of potentially fertile land in tropical and sub-tropical countries to be put in place under economic crops. Previously these lands were death-traps to all who attempted to cultivate them or live upon them

During the ten months ended May, 1934, the amount of wheat exported from Canada was 136,238,849 bushels. Of this, 90,765,994 bushels went to Empire countries—Irish Free State, Great Britain, Newfoundland, Malta, other dependencies, and the United Kingdom, the last named alone taking 82,962,991 bushels. The total amount of wheat exported to foreign countries was 43,982,955 bushels. In the order of the amount imported, these countries were Holland, Belgium, France, Germany, Italy, Japan, Norway, Denmark, Sweden, China, Peru, Bolivia, Brazil, the United States, and other small shipments abroad.

Imports of Canadian barley into the Netherlands reached their peak in 1929 when they totalled 142,772 metric tons, or over 41 per cent. of the total. In 1930 the imports fell to 11,581 tons, but in 1931 went up again to 103,630 tons. In 1932 the quantity imported was 77,886, and in 1933 there were no imports of consequence. Since the beginning of 1934 there have been no imports of barley from Canada. Despite its absence from this market for a year and a half, Canadian barley is well liked in Holland and some commercial still sale for it although the price is too high to make business possible, says the Canadian Trade Commissioner in Holland.

Stitched Seed Works

The medical profession, keenly interested, kept touch by telephone as George Hampton, 41, continued to improve after an operation in a Leicester, Eng., hospital, in which his heart was lifted from its place, stitched to close a stab wound, and replaced.

Colonization Finance Corporation

W. C. McMillan, Former Dean Of Manitoba Agricultural College, Appointed Farm Manager

At Indian Head

T. O. F Herrer General Manager, of the Colonization Finance Corporation of Canada, Limited, has announced the appointment of W. C. McMillan, Dean of the Manitoba Agricultural College, as farm manager of the Indian Head farm of the Colonization Finance Corporation succeeding G. S. Langford who has accepted the appointment of Field Crops Commissioner for the province of Alberta Mr. McMillan is taking up his duties immediately and brings to his new position of farm manager, a wealth of agricultural training and practical knowledge, and experience of many years as superintendent of the Dominion Experimental farm at Brandon, as well as dean of the Agricultural College.

Mr. McMillan was born on August 23rd, 1884, at Glengarry County, Ontario, of Scotch parentage, and was raised on the farm of his father who was well known as Eastern Ontario as a pioneer breeder of Shorthorn sheep and Hackney horses and Shorthorn cattle and leader in agricultural affairs. Mr. McMillan gained his early education in country school and collegiate institute and graduated in the Agricultural College from 1901 to 1903, graduating with the degree of B.S.A. (University of Toronto) in June, 1905. He joined the staff of the Dominion Department of Agriculture as representative on the Seed Branch at Ottawa, but resigned in 1906 before he introduced seed fairs and seed field competitions in Alberta. He started a seed testing laboratory in Calgary and was instrumental in inaugurating the work of the Canadian Seed Growers' Association. In 1911, he transferred from the Seed Branch to the Experimental Farm Service as superintendent of the Brandon Experimental Farm, his work in this position being very prominent. In 1924 he became the first dean of the College of Agriculture and Home Economics following the incorporation of the Agricultural College in the University.

With the appointment of Mr. McMillan, the Colonization Finance Corporation has the services of competent corps of farm managers covering Manitoba and Eastern Saskatchewan. These men under supervision approximately 1,700 farms totalling approximately 200,000 acres. Of these quarters of which are occupied by tenants under the terms of an agreement of sale, only 25%, being operated by owners. At the end of the present month Louis L. Lang, of Gull, Ontario, president of the Colonization Finance Corporation and vice-president of the Mutual Life Assurance Company of Canada, and president of the Lang Tanning Company of Kitchener, Ontario, is expected to make his second official inspection trip to the west accompanied by a number of directors of the Colonization Finance Corporation and other financial institutions. It is expected that on a previous occasion at this time important announcements will be made regarding the future policies and operations of the Colonization Finance Corporation.

Wages Will Death

Two Colorado Counties In Text To Determine Value Of New Serum

Two Colorado counties were confident that they had wrung a death blow from the ranks of lands to determine the value of a new serum the discoverers hope will prevent tuberculosis.

The convicts, Carl Erickson and Billie Schmidt, said they have gained weight and are in good health although they have taken several doses of the serum and five tuberculosis sanitil have been injected into their blood.

The life term convicts were told the serum and injections of live bacilli might kill them, but they volunteered to become subjects of experiments after Governor Ed. C. Johnson promised them pardon if they survived.

Bees Tiresome Host

A pigeon nesting in the courtyard of the federal building at Denver, Colorado, was apparently interested by bees in the construction material used in the structure. Despite an abundance of twigs and shrubbery it made its nest consisted of wire pigeon. J. M. Lee, janitor, who discovered the nest, reported that there were two eggs in it.

New Air Service

Direct air passenger express service between Seattle and British Columbia became effective July 1 when United Air Lines opened operation into Vancouver. Distances of the Pacific coast airway will place the Canadian and Mexican borders only 12½ hours apart.

Mosquitoes Make Yellow

Avoid Skin Color But Adore Navy Blue Clothes

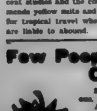
If you would be free from mosquitoes, wear yellow. They simply hate it. If, however, you would like to receive the attentions of the little blighters, just wear navy blue, which they dote on. They are keen on dark red, but adore navy blue. Odors, too, are passe and perfumes are not for mosies these blithes. Those findings, stolen the Canadian National Entomologist, have developed from research studies and the company recommends yellow mats and yellow tapes for tropical travel where mosquitoes are liable to abound.

Prosperity Village

Small Place In Saskatchewan Keeps Busy During Lean Years

Six times now within the past twelve months have the local taxes been reduced in the village of Lieberg, near Leoville, in Holland's big growing district. It is known as prosperity village. School fees, marriage fees, water and electricity charges have all come down. Only 75 of the 3,700 inhabitants are "on the dole" and they earn their keep themselves occupied by draining ditches. But no outsider can enter the village free. A turpike man collects a small charge from every stranger who would come inside.

Few People Escape Attacks Of Summer Complaint



Summer Complaint may be slight, or it may be serious, but you can't tell when it comes you how it may end. Allow the profuse diarrhoea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels go at once to your druggist and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 86 years.

Money Flows Of Interest To The Western Farmer

Commercial canning of vegetables is the object of the larger organized industries in the Dominion. The first factory was established at Grimsby in 1878.

Seed cleaning operators in British Columbia state that, owing to the general low vitality of the timothy seed cleaned this year much more seed was blown out in cleaning than in previous years, in order to improve the germination.

New X-Ray Device

Possible For Doctors Miles Away To Examine Patient

A new X-ray observation device, revealing the anatomy of the heart and skeletal body organs and even the blood vessels in their natural color has been perfected and patented by Luther C. Simjian, former director of the photographic department of the Yale Medical School, it has been announced.

Mr. Simjian's apparatus not only will show the structure and density of barely opaque parts that appear on personal X-ray plates as dim shadowy forms, but lessens existing hazards to the subject being examined. Moreover, by a system of telegraphic wiring between hospitals, it will be possible for a patient to sit before an X-ray tube in one clinic while the image of his internal organs is reproduced for specialists in another clinic hundreds of miles away, or in any number of clinics at the same time

Superficially, Mr. Simjian's invention resembles the familiar X-ray fluorescent screen which reflects the sharp shadow thrown by the subject as he sits between the source of the rays and the screen. In this shadow, dense objects such as bones, appear almost black, while tissues of lesser density fade into lighter tints of gray. Invariably the diagnostician must indulge in guesswork as he strains to distinguish faint lines of shading

When the physician desires to pour further into the secrets of a particular organ, such as the heart, he must increase the intensity of the X-rays.

Must Wear Mouthpiece

Budapest is going to have romantic mustachioed policemen. An order has been issued that no officer of police that all mounted policemen must from now on wear moustaches. It is considered not only conducive to military appearance but bearing, but in line with the national tradition of the dashing Magyar horseman.

"Continental Sabbath" refers to the European custom of closing business places on Sunday morning during church hours and then opening them in the afternoon.

DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holder keeps the cigarette dry, prevents nicotine and moisture and tasty smoke. Complete holder with refills 25c postpaid, or from your Druggist or Tobacconist. Desired enamel overpiece.

STEVENS PROBE WILL OPEN AGAIN IN SEPTEMBER

Ottawa.—Formal sittings of the price spreads and mass buying commissioners are expected to open in September. Hon. H. H. Stevens, minister of trade and commerce announced. The commission will investigate and report upon chain stores, agricultural implements, fish, flour mills and bakeries and the fruit and vegetable canning industry.

All sittings will be held in Ottawa. Pending the beginning of formal hearings, examination and analysis of the evidence taken by the parliamentary committee which has been turned into a commission, will be made. The 11 members of parliament heeded by Mr Stevens have been sworn as commissioners.

The official statement was issued by the minister. It stated in part:

"The members of the commission were sworn in on Tuesday, July 10 in the afternoon by E. J. Lemaire, clerk of the privy council in the east block.

"Subsequently a meeting of the commission was held in the office of the minister of trade and commerce. Hon. H. H. Stevens, chairman of the commission.

"L. R. Pearson of external affairs was appointed secretary to the commission. J. H. Boyer, a member of the staff of the department of trade and commerce, was appointed assistant secretary.

"The chairman outlined to the commission proposals for the very long on of the work of the commission it was decided that reports of the bureau of statistics of the department of trade and commerce would make a careful examination and analysis of the evidence taken by the committee of the House of Commons just at the session, to deal with that committee. This work will be placed in hand at once and will be carried on during the summer months.

"Under the order-in-council appointing the commission, authority is given to complete the investigations of the committee of the House of Commons and to investigate and report upon the chain stores, agricultural implements, fish, flour mills and bakeries, the fruit and vegetable canning industry and the preparation of evidence in these matters will be taken in hand at once by the secretary and his staff and counsel for the commission. The evidence when ready will be presented to the commission at a subsequent hearing, at which time witnesses will be heard in support of the evidence, also any who may be affected in any way by the investigation will be given an opportunity to present their views."

Starting Long Journey

Saskatchewan Family Going To Vancouver In Covered Wagon

Coronach, Sask. One of the longest overland treks attempted in recent years in a covered wagon has been started by Guy Hamilton, wife and family, who left for Crescent Valley, British Columbia, to locate there new home. Mr. Hamilton is taking along two cows and a calf Cows will supply the family with milk, and the calf will drink the surplus. The family will be about three months on the road.

Police Guarding Flin Flon

Winnipeg Royal Canadian Mounted Police stationed at Flin Flon as the result of disturbances in connection with the strike of miners there will not be brought back until it is apparent there is no need for their services, Premier John Bracken declared, following a mass demonstration in front of the legislative buildings by the Workers' Unity League.

Pay Visit To England

Portsmouth, England.—For the first time in more than 30 years German warships visited an English port July 11. The German cruisers Koenigsberg and Leipzig were greeted by a salute of 21 guns fired by shore batteries. They stayed here four days

W. N. U. 3000

Italian Navy Plans

France Is Annoyed Over Italian Plan To Build New Ships

London.—French negotiations on the Anglo-French naval conversations were reported in Paris to have made the situation arising that France will be unable to participate in the 1935 conference unless the Italian plan to build two new 35,000 ton vessels is eliminated.

Inquiry into espionage over Italian plans Francois Piétri, French minister of the navy who is assisting in the conversations here, indicated France is willing to do anything reasonable to avoid the scrapping of Italy.

The matter will be discussed by Premier Edouard Herriot, Louis Barthou when he meets Premier Mussolini next it was indicated.

May Revise Pension Act

British Columbia Soon Has Liability Of Eight Million Dollars

Victoria.—Revision of the old age assistance of the special powers granted under the British Columbia Superannuation Act, 1934, to the provincial government, will be made at the next session of the legislature, it was announced here yesterday. It was also revealed that there exists a liability of $8,000,000 if superannuation payments are to be made to all persons who contributed in the past and without revenue of the superannuation set-up Mr Pipe is also engaged in discussing with provincial and municipal employees, on pending recommendations which are expected to be embodied in a revised Old Age Pensions Act at the next session of the legislature.

Cattle Ranch England

Shipment Of 635 Head Landed In Glasgow

Ottawa.—Cattle to the depart ment of agriculture reported the arrival at Birkenhead, of the S.S. Manchester Citizen with 653 Canadian cattle. The shipment was in good condition. No risks had been made at the time of sailing.

No quarantine has yet been reached in the conferences now in progress between Canada and the United Kingdom with regard to the quarantine of cattle, it is stated in Great Britain for the remaining six months of the current calendar year. For the first three months of 1934 cattle quota was 23,500 head

Shingle Mill Burned

Fire Loss In Vancouver Estimated At Quarter Million

Vancouver Forty men are without employment here as the result of the $250,000 fire which destroyed the plant of the Western Red Cedar Shingle Limited. Of unknown origin, the flames broke out at the mill located on the Fraser river and raged the various buildings.

The mill, lumber valued at $62,000 was destroyed together with the buildings and machinery. Firemen fought against seven hours before getting the blaze under control. No insurance was carried.

Convention At The Coast

Vancouver More than 600 engineers from the United States and Western Canada, gathered here for the first joint convention of the American Society of Civil Engineers and the western professional meeting of the Engineering Institute of Canada. heard United States and Canadian views on power, navigation and reclamation possibilities of the Columbia river.

Promoted And Retired

Ottawa.—Promotion of Commodore Walter Hose, C.B.E. to the rank of rear-admiral in the Royal Canadian Navy was announced from the department of national defence. Effective July 16. At the same announcement was made of the retirement of Rear-Admiral Hose from the service. He was placed on the retired list on July 1. following several years as director of naval services.

Customs Show Recovery

Ottawa.—Marked recovery was noticeable in the amount of customs duties collected during the first five months of 1934 compared with the same period of 1933, the Dominion bureau of statistics reports. The amount of excise taxes collected on domestic sales also showed a very material increase.

NEW PREMIER

Hon. P. C. Veniot, Premier of New Brunswick, who has been sworn in as Minister of Lands and Mines, succeeding Hon. Peter J. Veniot, who has been appointed to the Senate.

Find Body Of Policeman

Body Of Constable Carr Is Found In Fraser River

Vancouver.—Victim to the raging of their flood waters of the Fraser river, the body of Constable Carr, 24, of the provincial police force, was found by a party from the police launch Vedette V, which was searching the river for the body of the missing man.

Constable Carr was drowned when he was thrown from a police launch when they went to the Indian reserve near Merritt, to effect an arrest.

Three Indian brothers, Richardson Ennes and Alex George have been arrested of the slaying of Cleburne and will stand to hang October 26

Duke Of Connaught Indisposed

London. The aged Duke of Connaught uncle of the king and former governor-general of Canada was confined to his bed with a cold. He has had to cancel all engagements for the next few days owing to effects of the heat and condition of his throat. Advices attending the health of duke who is 84, and his health was giving them no anxiety but the weather and his throat made it impossible to remain completely quiet for a few days

Economy Measures

Hepburn Putting Into Effect Pre-Election Pledges

Toronto Working with the assurance of tried political veterans the Ontario cabinet headed by the 57-year-old premier, Hon Mitchell F. Hepburn, began to rule Ontario. Following out their pre-election pledges their first task was to replace the two most important commissaries at a salary cut to the province more than 30 per cent. than under the previous administration.

Mr. Hepburn's "big parade" started with high officials of the hydro-electric power commission and the liquor control board heading the appointment out of government offices.

As for the lesser lights, if any, to follow the new premier kept his own counsel.

Hints were not in motion to bring the new liquor law providing for the open sale and consumption of beer and wine into operation at an early date

The new hydro commission is headed by T. Stewart Lyon of Toronto as chairman with a salary of $10,000, and the other two commissioners are ministers of the crown who will serve without salary. They are Hon T. B McQuesten, minister of highways, and Hon Arthur Roebuck, attorney-general.

Edmund D. Cahill of Tilbury, is the new one-man liquor commission, whose salary will also be $10,000.

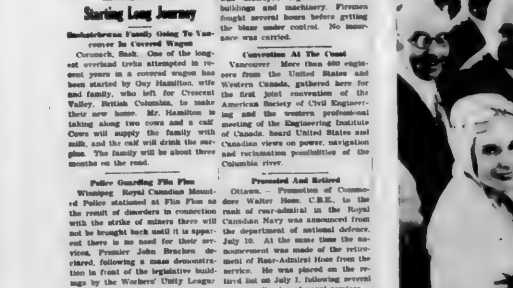
End Musicians' Strike

Effective Affecting Radio Commission Artists Has Been Adjusted

Ottawa The walk-out of musicians affiliated with the American Federation of Musicians, affecting the Canadian radio broadcasting commission, ended after a conference between Hector Charlesworth, commission chairman, and Joseph Weber of New York, president of the federation.

It was announced by Mr Charlesworth the commission agreed to continue paying union wages to musicians, but declined to operate a closed or unionized organization. This was agreeable to the federation president, who called off the strike a few minutes later through the Canadian unions.

The walkout started in Montreal June 10, and was extended throughout Canada at midnight, June 15. It affected all musicians affiliated with the American fed. ration who demand higher wages and recognition of the unions. Under the agreement the striking musicians will not be penalized and will be permitted to resume commission programs as soon as possible.



THIRD TIME LUCKY AIRWOMAN REACHES AUSTRALIA

Miss Jean Batten, nicknamed "the third time lucky airwoman" because it was on her third attempt that she succeeded in flying solo from England to Australia in record time, is shown receiving a tumultuous welcome on the completion of her flight. She broke Amy John Mollison's record for the distance by four days

BIG FEDERAL LOAN EXPECTED TO BE ISSUED

Ottawa.—The extent to which new Dominion government securities will be offered to the public this year has not yet been decided and will undoubtedly depend upon the state of the market Should securities markets continue in their present condition it would not be surprising if the government loan, to be launched within the next month or two, would reach $100,000,000

There are maturities and other obligations amounting around $400,000,000 and if the issue can be sold at around 3½ per cent, which is not improbable, it is likely the larger amount will be offered as a sound financial operation

While more than $1,000,000,000 in savings accounts drawing 2½ per cent and the possibility the savings interest rate may be cut further however, it would seem financial observers state, circumstances favor the floation of a big loan.

Another financial operation which will probably be launched at about the same time will be the shears of the old central bank amounting to $5,000,000 and bearing a maximum dividend rate of 4½ per cent. This issue will mark the responsibility of the government

These security issues will be handled entirely by the department of finance where the treasury is ready to be set in motion when the proper time arrives

By Northern Route

Cattle Shipment From Fort Of Churchill In Mid-August

Montreal First cattle shipment from Churchill will move from the northern Manitoba seaport in mid-August. It was learned in shipping circles here

The Brandon has been chartered to sail about August 20 with 350 cattle aboard, Canadian Pacific Railway officials said. The cattle being a joint shipment to the United Kingdom by the Saskatchewan Co-operative Livestock Producers and the Alberta organization, the Western Stock Growers' Association The Saskatchewan pool is shipping the grain

The cattle will be bought by the Co-operative Wholesale Society of the United Kingdom, which is also taking a large portion of the grain, it is learned. It is believed the Brandon will make a second trip later in the season to Churchill, handling a second cargo of cattle

The Dalworth, Meadowmead and Greyhound are chartered to take grain from Churchill with two other vessels, the names of which were not available here

To The Ends Of The Earth

Radio Signals Flashed From Arctic To Antarctic

New York. The radio of the earth — the Arctic and the Antarctic — were linked through New York by radio. It was said to be the first of this sort to be accomplished in history

Radio signals were sent from a remote point in northwestern Alaska, well within the Arctic circle, through New York to Little American in the Antarctic

Charles J. V. Murphy, communications officer of Rear Admiral Richard E. Byrd's expedition, said New York of having heard the Arctic signals

"But they were dim," he reported

Wins Wheat Award

Joseph Smith Captures Prizes At Calgary Exhibition

Calgary Joseph H. B. Smith, international wheat exhibitor of Wolfe Creek, Alta., captured new awards in the fields section of the Calgary exhibition.

In the general division for hard red spring wheat his half-bushel sample was awarded the grand championship and second special prizes.

The grand championship for oats went to J. Scott of Morris, Alta.

Explanation Of Marketing Act, Which Is Designed To Improve Marketing Methods and Practices

At the annual convention of the Canadian Society of Technical Agriculturists, which was also attended by the Canadian Seed Growers' Association, at Macdonald College, Quebec, Dr. Barton, Deputy Minister of Agriculture, Ottawa, gave a lucid explanation of the new marketing bill, which is in its formative stages and is officially known as the Dominion Marketing Act, 1934. The promoters of the act made "An Act to improve the methods and practices of the marketing of natural products of Canada and to export trade and to make further provision in connection therewith." The meaning is clear in that the methods followed in marketing are not satisfactory and that undesirable practices obtain. What is therefore, intended, said Dr. Barton, is provide legislation by means of which these methods and practices can be changed.

The legislation provides what may be called permissive powers which may, or may not be exercised. Until they are exercised, the provisions of the Act do not become effective in any way. These powers are vested in the governor-in-council, the minister administering the Act, a Dominion marketing board, and local boards which may be created under the Act. All powers that may be granted to governor-in-council under the Act for the administration of marketing schemes will be vested in the Dominion board. These powers in turn may be delegated to a local board, and the local board will become the administrative body under the general supervision of the Dominion board.

Thus, the local boards, under the supervision of the Dominion board, would license those who produce and market natural products in considerable territory of their own accord which they may regulate the movement, direct the sale, without power of buying and selling or of fixing prices, and to determine practices that shall prevail in the marketing of such products. In other words, the local board can control the movement of the product. It may deal directly with only a part of the product or with all of it. The local board may direct shipments in any quantity, through any agency, to any market at any time, or it may withhold them, and this direction may have reference to different quality or grades of the product. The local board may make regulations for distribution and shipping practices, such as methods of sale, consignment, etc.

Powers of exemption may be delegated to local boards, also powers of conducting a pool for the equalization of returns received from sales of the regulated product, and also powers to consolidate any powers in one, or withholding, by agency of the board, any regulated product from the market, or demand forwarding any regulated product to a specified market, pursuant to any order of the board. Compensation may also be granted for loss due to disposition of the currency of the country. Shipments may be prevented by order of the board. The local board may also be delegated to assist by grant or loan the construction or operation of facilities for preserving, processing, storing, or warehousing the regulated product, or for providing such services for the benefit of such product.

There have been boards in existence for some time, and the powers set out in the Act for regulating the marketing in inter-provincial or export trade by the Dominion Marketing Board. Another important point is the provision under order-in-council, in providing unstated conditions in trade, to regulate or restrict importation into Canada of any product which enters into competition with a regulated Canadian product. Power is also given in the Act to prosecute persons exploiting or injuring the trade or consumers of the regulated product. This provision is made in the interests of producers, consumers, and consumers alike. For the protection of administration, for instance, of a scheme, the Dominion Government is empowered to appoint inspectors, and to make it an offence to hinder or obstruct them in the discharge of their duties. Penalties are provided for breaches of the Act.

Chief Migratory Bird Officer For The Prairie Provinces Has Been Appointed By Government

Honourable Thomas G. Murphy, Minister of Labour, has announced that he has assigned Mr J Dewey Soper ornithologist and explorer in the department to be Chief Migratory Bird Officer for the prairie provinces with headquarters at Winnipeg.

The minister explained that the prairie provinces of Canada were the most important hatching areas for waterfowl, particularly ducks, in North America. It is from the prairies of Canada that a great percentage of the wild ducks of this continent by mushroom in the Gulf of Mexico, and eastward to the Atlantic coast in autumn. A more limited number reach the Pacific coast. Acting under the authority of the Migratory Birds Treaty between Canada and the United States and have enacted under the treaty by parliament and by congress, very many measures have been taken to an endeavor to conserve for the present and future the supply of waterfowl. Without the treaty and these measures, undoubtedly the great sport of waterfowl shooting would undoubtedly have disappeared years ago.

Drought in the southern part of the prairie provinces has caused serious restriction of the prairie nesting grounds for wild ducks. Other causes of depletion have affected the breeding stock, such as disease, and, as well, there has almost certainly been overshooting of wild duck and another boy are standing near them. The result is necessary for the game to announce before the party that she had Peter are overdrift Canada urges Peter to accept some of her sent reps to help I'm alone but Peter each new and they succeed After Camilla has gone from the studio Ave Worth calls and persuades Peter to accept a term of 25 years Peter pleases his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration" Peter adopts the latter title and Camilla, heartsick goes to Peter's studio Camilla and Peter leave and Avis follow later, and as the latter are leaving the studio the statue has been shattered to pieces Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints

At Camilla's suggestion Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift They named it "Lord of Hosts"

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasting of the results as produced advertising. Camilla is both write the Tiny Tads stories and to direct the broadcasting

(Now On On With The Story)

CHAPTER LII

It was arranged that the author of the Tiny Tots and the broadcaster of their escapades would remain incognito until her radio debut when she would be introduced to the public by her sponsor, the president of the "Wheatland Flour Mills" corporation What the interested public did not know was that her identity was not even known to her indirect employer. Amedee Hoyt. Though desirous of meeting this mysterious individual who had so turned the tide of his fortunes, Hoyt was not insistent, and resignedly agreed to wait with his public for an introduction.

In fact, the affair rather pleased Camilla's employer, as a dash of spice to his prosaic routine, which had been somewhat depressing during the past year.

The rejuvenation of his business was like an elixir of life to him; it stimulated his imagination and ambition so they never had been in his experience Like all things that are precious, he had almost to lose his business, his pride, his ambition, before he discovered how much he valued them And as the day drew nearer when he would meet and introduce this mythical creator of the Tiny Tots to his fast-growing concerning public he found himself almost as excited and expectant as a young man approaching his wedding day

But before that event took place another important day added its quota of excitement to Camilla's series of startling events

She had not seen Avis since the evening of the party at the studio when the statue was destroyed They had avoided each other by mutual consent and neither had discussed the other with Peter, who was moving both of them regularly

He had gone to the Worth's to tea as Avis had arranged piqued the part of the artistic critic and professional adviser with admirable charm and finesse He discovered the peculiarity of no less than three pieces for the garden which were spacious and beautifully landscaped, and he was garden needed a fountain figure the rock garden a droll woodsman and the English formal garden possibly a nude boy or a symbolic group of the seasons done in white marble

Mrs Worth was favorably impressed and remarked when he had gone "So that's the fellow with whom Camilla Hoyt managed a secret marriage" I can begin to understand why Amelia Hoyt finally approved and accepted him Charm is one thing, and I've no doubt he has it, but quiet assurance is another. Camilla will find herself considerably overshadowed by this young man"

Avis laughed at her mother's jealousy of her new protege "Camilla is not to be compared with Peter. She is only a beginner, but he is a master in his profession. Without being beautiful she was a stunning woman Having nothing else to occupy her time and thought, she had specialized in herself

"I wish there were twenty-four hours more past," she observed impudently I should like to know just how to arrange my plans so they do not depend upon the Paris archbishop's award I really don't hope that Peter will have a chance to win, but it will be a tremendous satisfaction to have it all settled Tomorrow is the day, and I suppose there is nothing to do but wait Camilla I'll call you at once Call me Peter, who was moving both of them regularly

FORT SASKATCHEWAN RECORD
An Independent Paper, printed and published weekly, every Wednesday at Fort Saskatchewan, Alberta, Canada.
Gordon Neale, Editor & Publisher

WEDNESDAY, JULY 18th, 1934

A LAUGH ON TODAY

Those whose memories carry back to the early nineties will recall the furore created by a book of that period, "Looking Backward", by Edward Bellamy. The book recorded the experiences of a young man of 1887, who, under the influence of hypnotism falls asleep, to waken in the A.D. In 2000 A.D. he finds himself in the midst of a smooth working socialized state, operating under rules and conditions utterly unimagined in the competitive individualistic social structure of 1887.

The book "Looking Backward", is being re-read today with livelinest interest. In 1887, it was regarded as highly imaginative, and entrancingly far-fetched. Today it may be accepted by an increasingly large number of people as a reasonable forecast of what may yet be and what could be. It is roughly in line with what a great number of people are thinking. That is the extent of the social progress of human beings in the past fifty years. Otherwise, although we have advanced scientifically beyond Bellamy's imaginings, our social consciousness has seen little development in the past fifty years.

If you doubt it, listen to his description of society as functioning in that benighted era of 1887. "Society in those days was like a prodigious coach which the masses of humanity were harnessed to, and dragged toilsomely along a very hilly and sandy road. The driver was Hunger, and permitted no lagging. The top of the coach was covered with people who never got down, even at the steepest ascents. Well up out of the dust, the occupants enjoyed the scenery, critically discussed the merits of the straining haulers. The competition for these places on the top was keen, and the rule was that a man could leave his seat as an inheritance to whomever he wished. These seats were very insecure, and passengers were constantly slipping off and compelled to help drag the coach. The insecurity quite clouded the happiness of those who rode.

"When the vehicle came to a particularly bad place, as it often did, the agonized ploughing of the hoses under the lashing hunger; the many who were trampled in the mire, made a very distressing spectacle. Those on the top would call encouragingly to the toilers, exhorting them to patience and holding out hope of compensation in another world for their hard lot. Some even contributed solos and instincts for crippled and injured. It was agreed that it was all a great pity, but it did enhance the sense of value of having seats on the top of the coach.

"Under the fashionable of those on top of the coach was that they belonged to a finer clay than their brothers and sisters who pulled. And the strangest thing was that those who had just climbed from the mire, began to fall under the influence of this hallucination before they had outgrown the marks of the rope on their hands.

"I am well aware that this will appear to the people of the twentieth century as incredibly inhuman, but the fact may explain it. It was sincerely believed that there was no other way in which society could get along, unless the many pulled the rope, and the few rode; and that no radical improvement was even possible either in the harness, the coach, the roadway or the distribution of the load."

It is quite a laugh on the social state of 1934, that we are still hauling the coach in the same old way,—High River Times.

First Girl Hiker: "I inserted an advertisement in our local newspaper recently under a box number for a male partner to accompany me on a 14 days' hiking trip."

Second Girl Hiker: "How interesting. Did you have many replies?"

First Girl: "Ten, hundreds; but there was a terrible row in our house."

Second Girl: "Why?"

First Girl: "Father was one of the applicants."

FORT SASKATCHEWAN RECORD

VOL. 12 16 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JULY 25th, 1934 $1.50 PER YEAR IN ADVANCE

Three Robberies Occur During Last Week

Three business places have suffered robberies in the past week, although the total loss was comparatively small. Last Wednesday, during the daylight hours, while the office of W. A. Graham's Service Station was vacant for a short time, $37 was taken. On Saturday night, the Pool Hall of Jack Gaul's was entered through the back window and about $12 in silver taken.

J. T. Fairall — General Store was broken into early Monday morning, thieves taking a small amount of merchandise, also a filing cabinet. The thieves may have thought the cabinet contained cash, but it held only account forms, which Mr. Laboda hopes to recover.

R.C.M.P. are investigating and up to press time no arrests have been made, or the filing cabinet found.

Gravelling Project Gains Favor with Premier

The provincial government will consider the plan of construction a length of highway connecting Lamont and Elk Island Park, Premier R. G. Reid informed a delegation from the Lamont and district last Monday.

The premier stated that this particular piece of highway had been recommended by the minister and would be included in the construction program for consideration if and when money was available to proceed.

The delegation consisted of Rudolf Hennig, M.L.A. for Clover Bar; R. Milsap, reeve of Leduc municipality, through which the proposed road will run; L. B. Adams, secretary of the Elk Island Park association; Dr. A. E. Archer; J. E. Harkins, president of the Elk Island association and other interested people.

The delegates pointed out that they desired a road leading from Elk Island Park to Lamont, a distance of three miles. It is now a secondary highway. They sought grading and gravelling a nthe need 50-50 costs basis as between municipality and government.

The improvements would not only benefit Lamont, but the whole district.

Both Premier Reid and Hon. J. J. MacLellan, minister of public works, were sympathetic toward the this project.

Tubes over New Duties

After 50 years in service, 52 of which were spent in this province, Dr. C. F. Hacker, dairy commissioner, retired this week, to be succeeded by J. Roy Sweeney, native of New Brunswick, and for some years chief federal grader at Winnipeg.

OLD-TIMER OF THE DISTRICT DIES AT COLINTON

Matthew Arnold Brodsworidge

Matthew Arnold Brodsworidge, of Colinton, Alta., passed away at Colinton on July 20, aged 69 years. He is survived by his wife, one daughter, Mildred of Fort Saskatchewan, three sons, Valentine of Colinton, Alta., Stanley of Fort Saskatchewan, Gavin of Cherohalm, Alta., one sister, Janet of Peterboro, Ontario, four brothers, Gavin of Edmonton, John, Thomas and William all of Peterboro, Ont. A daughter Estelle predeceased him in November, 1932. The funeral service was held on Sunday, July 22, at 2:30 p.m. at the United church, Tofield, Alta. Rev. J. K. Ball officiated and interment took place in the Colinton cemetery. The pallbearers were Messrs. E. Salsbury, H. King, E. Burbaugh, J. Milne, F. Langley, and R. Whitley. Beautiful floral tributes were received from the family and friends. Howard & McBride, funeral service.

UNEMPLOYMENT CONFERENCE

Alberta government will be represented by Hon. Geo. Hoadley, minister of health and telephones, at the unemployment conference at Ottawa at the end of July. Accompanying him will be J. C. Thompson provincial auditor.

Prosecuted Under Egg Regulations

In the local Police Court last Monday, Aron Pevenor, Merchant, of Star, was fined $20.00 and costs, charged with that he being a first receiver as defined by the Regulations made under the provisions of the Livestock Products Act, of the Revised Statutes of Canada, respecting the grading and marking of eggs did buy ungraded eggs from one Nick Rudyk, the producer thereof as defined in the said Regulations, without candling and grading the said eggs as required. Two other charges against the same man under these Regulations were withdrawn by the prosecution. W. M. Corbett prosecuted and Mr. Campbell of Lamont defended.

South Telephone Company Organized Officers Elected

The Fort Saskatchewan South Telephone Company held its organization meeting in Yorkville School House on Monday evening last. After a resolution was passed authorizing the formation of a company comprising Clovelea, 5, 6, 18 and 27, some twenty-three of those present signed up agreeing to take one share each in the company with a value of fifteen dollars per share.

The election of a president and board of directors resulted in M. L. Mason being elected president and Messrs. Dawson, Bacon, G. W. Armstrong and Dapon as directors. D. Roberts consented to act as secretary-treasurer during the formation of the company. Draft copies of by-laws were submitted and after some were amended to suit local conditions they were adopted.

The directors were instructed to apply for the charter and take over the lines from the Telephone Department as speedily as possible.

West Edmonton Association To Hold Basket Picnic

The West Edmonton U.F.A. & U.F.W.A. Federal Constituency Association will hold a basket picnic at Horse Hills Community grounds on Wednesday afternoon, August the first. The program starts at three-thirty when a large variety of Children's and ladies' foot races will be run off. Tug-of-war and baseball games representing the East and West sides of the River will compete. The ball game is scheduled to start at 4:30. Tea and coffee will be supplied free, it is suggested that you bring your own containers.

In the evening, at eight o'clock, Mr. Wm. Irvine, M.P. for Wetaskiwin, will address the gathering, after which a dance will be held in the hall.

TO MAKE HOMESTEADERS PRESERVE TREES

Consideration is being given by the provincial government to enactment of regulations compelling homesteaders to retain on their land a portion of the natural timber, according to Premier R. G. Reid. This work will be in line with the general reforestation policies adopted by the premier when he took over the then newly-formed lands and mines department in 1930.

War on Grasshoppers To Continue

Officials of the federal and provincial departments of agriculture working on the grasshopper campaign in Alberta have issued a strong appeal to farmers in the infested areas to redouble their efforts during the next few weeks, declaring that the critical point has now been reached. "There is a general impression that poisoning operations are no longer be carried on to advantage," declares H. L. Sommers, of the Dominion entomological service at Lethbridge, who has been working in co-operation with the provincial field crops branch, who have been directing the campaign against the hoppers." Time spent on spreading bait during July and August is well repaid, not only in actual crop saving but in reducing the hopper menace next year. Bait mixing stations which have been in operation will be kept open state provincial officials, and bait will be available without charge for any who will use it.

Number of Unemployed

There were 160 fewer registered unemployed persons in Alberta on July 14 than one week previous, according to figures issued by the provincial employed service.

WELL KNOWN FORT YOUNG MAN MARRIED AT ALLIANCE

Chabot—Bishop

A quiet and pretty wedding was solemnized at the home of Mr. and Mrs. L. Bishop, Alliance, on Thursday evening, July 12th, at 8.30 o'clock, when their youngest daughter, Mildred Georgina, was united in marriage to Mr. Ernest Chabot, son of the late Mr. and Mrs. J. Chabot, of Fort Saskatchewan. The ceremony was performed by the Rev. H. A Whaley. Mr. and Mrs. A. B. Moffat, of Holden, acted as witnesses, and only immediate friends of the family and relatives were present.

The bride was charming in a gown of glory blue triple sheer crepe with touches of grey trimming and grey shoes to match. She wore a shoulder corsage of pastel sweet peas.

Following the ceremony a dainty buffet luncheon was served. The bride's table was attractively decorated with sweet peas and tall whitetapers, centred with a lovely threetiered wedding cake.

The happy young couple left on Friday morning for a short honeymoon at Red Deer, Sylvan Lake and other points. They are making their home in Alliance.

Mr. and Mrs. Chabot are well known throughout the whole district and have always taken a leading part in sports and the social life of the community. The best wishes of a wide circle of friends go out to them for a long, happy and useful life together.— Alliance Times.

Character Makes The Man

In a little magazine sent regularly to the writer of this column through the courtesy and thoughtfulness of a friend, and which we always read with pleasure and profit, and from which we frequently quote, there recently appeared a short art cle that is both timely and worthy of consideration in these rather troublous days when we are inclined to place responsibility for all our ills upon governments, institutions, systems — in fact upon anything and everything except our own human frailties. The magazine article referred to reads as follows:

"Most of the ingenious schemes for making this a better world fail down because they assume that man is an angelic creature who would dance singing through the streets, with garlands in his hair, if only the chains of circumstance could be stricken from him. The trouble is that man isn't an angelic creature. He can be almost the most cruelty member of the animal kingdom. When he's mean, he makes the snake-toothed tiger look like a domesticated tabby, and for ruthlessness he can bring blushes to the cheeks of a cobra. On the other hand, it's just as big a mistake to assume that man is all mean. He runs just as high as he falls. Nothing in the jungle can match him for courage and self-sacrifice If he can be a beast, he can also be like those gentlemen who stood on the deck of the doomed 'Titanic', singing in the face of death. As Hyron said, he is 'half clod, half deity'.

For many years, almost a century in fact, it has been an accepted idea in all democratically governed countries that education was the royal road to success and legal. Practically on one principle all the way. Learn your assorted making education compulsory, and more and more money was chearfully poured into the providing of free education for all children, always in the belief that when people are educated, a golden age would dawn. People in all our so-called civilized countries are now fairly well educated, in the accepted meaning of that term, but the golden age has not arrived. Apparently, good and splendid as it undoubtedly is, education in itself is not the master-worker it was supposed to be. And the trouble is that we have confused book-learning with education, and have not such store on knowledge of facts that we have forgotten about character.

With many sincere people the tendency now is to rely on legislation to accomplish all the reforms which religion and education have failed to bring about in our human relationships. Even some clergymen apparently believe that both education and the church have failed to develop human character and thus eradicate selfishness, meanness and dishonesty, but that where these powerful agencies have failed, parliaments and legislatures can succeed through the enactment and enforcement of man-made laws and governmental administration of purely man-made schemes for human betterment. This is a wholly false conception, and if our schools, colleges and churches should ever rest upon it they would learn when too late how serious a mistake they had made.

Recognizing the truth of Hyron's observation that man is half dust, half deity, the function of the church and of all forms of religion is to cultivate and develop the deity in man and thus melt to overcome the selfishness and meanness inherent in human nature, and implant the true principles of life and living, to teach the beauty, the joy, the happiness of true Christian living; in a word, to build up character.

And the function of schools and teachers is important as they are by the State in the counterpart of the church. It is not merely to impart knowledge but to so train the human intellect and develop man's reasoning powers as to enable him to think clearly, choose wisely, and with discernment and discretion and thereby attain to a full realization not only of his own rights and privileges but to a full appreciation of the rights and privileges of his fellow men, and of his own obligations to society as a whole; in a word to live as an intelligent, informed man of character and honor.

Parliaments and legislatures have large and important duties to discharge, but under our democratic systems they are legislative and administrative bodies only in so far as they are intended to be, but a reflection of the views and opinions of the people as a whole. Those churches and schools through the discharge of their accepted functions by raising the standard of intelligence and in the development of character, thus building up personal character and higher standards in thought and living, will indirectly affect all legislation and all administration. Much more of a permanently beneficial character can be effected in this way than by the definite commitment of churches and schools to any particular set of political policies, social reforms, or economic systems in a rapidly changing world.

If the people themselves are right, if they are men and women of character and conviction, if they are educated and intelligent, sensible, honest and God-fearing, parliaments and legislatures, and the acts of them behind, will be a reflection of their views and convictions. But if the people of any nation are not of this type, neither will their governments be, and all the propaganda of churches and schools will not make them so.

If we would improve our institutions and systems and governments, we must bring about a steady improvement in people themselves, and in the bringing about of such improvement lies the first and paramount duty of our churches and educational institutions.

Finding Ready Market

Demand From British Buyer For Canada's Dressed Poultry

Dressed poultry from Canada is finding a ready market in substantial quantities in the British Isles. From January 1 to May 21, 983,800 pounds have been imported, an increase of 667,122 pounds compared with the corresponding period of 1935. Meanwhile the demand from British buyers continues active for the quality of the shipments have met the market requirements in every way, says an announcement from this department of agriculture.

Exports of Canadian cattle to Great Britain this year up to June 20 totalled 23,667 as against 12,105 for the corresponding period of last year.

Boys Decrepit Horses

Highlanders Has Carried On Work For Twenty Years

Known only as the "Horses' Friend" in England, has brought thousands of old horses and donkeys and mules from misery to comfort since he started humanely to prevent them from falling into the hands of dealers and undergoing further cruel conditions. At Burnet Fair recently she bought 40 animals; this year she has purchased more than 300. The women, who insists on remaining anonymous, has carried on her work for 20 years. She is assisted financially in her efforts by a few friends.

Next to London, Calcutta, India, with suburbs is the most populous city in the British Empire.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of the kind.

It does this by absorbing the too frequent and irritating fluids settling the stomach, and bracing up the whole nerve system, thus making it a remedy for the treatment of bowel complaints, of all kinds, young and old.

On the market for 86 years—you do not experiment when you use it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

An Era Of Suspicion

Difficulties In The Way Of Achieving Universal Peace

In the world as it is to-day to a greater extent even than in the days when Lord Month and Lord Milner surveyed it,—there are overwhelming difficulties in achieving anything like universal peace and freedom. For the moment an era of suspicion nationalism seems to make that ideal more remote than ever. But unquestionably the way to attain it lies through the gradual grouping of such nations as are prepared to work and trade together and to live at peace for all time with one another; and the one group ready formed for this great purpose—bound by all the ties of history, tradition and complementary requirements, is the existing group of the British nations and dependencies. To disregard so vast a potential force for good would be astonishingly short-sighted. To disparage it, as some of our Socialists are fond of doing, is to stultify their own professed belief in the whole purpose of British statesmen in every capital of the Empire, whether they be Conservatives, Liberals, Labor, manufacturers or farmers, should be to consolidate it, to strengthen it, and to extract to it His-minded powers of co-operation that they may be found. London Times.

New York Via Arctic

Proposed Air Route Would Find Favor With Aviators

The polar route may soon become as familiar to British airmen as the Irish Sea or the Channel are to them this summer. The air-route to the Far East is nearly half-way to succeeding via the North Pole. If directional wireless proves the success expected and hopes of it, the fifty-mile hops between wireless stations at Thorshaven (Faroe Islands), Reykjavik (Iceland) and Angmagssalik, on the east coast of Greenland and Godthaab on the west, and Resolution Island at the southern extremity of Baffinland will make their travels with flyers for several well-founded rumors. If it should prove a reliable success, then the direct route, with these sections by wireless, the skilled pilot could contemplate operation with the minimum of risk. Flights at present would make it hazardous, for he would be largely independent of fogs and other forms of bad visibility. Besides, though the length of this route from England to New York is 4,000 miles, and therefore greater than the direct route, a great advantage lies in the fact that it can be divided into 600-mile stages.

Ancient Reptile

Monster Creature Which Flopped About Prehistoric Ocean

Officials of the National museum at Ottawa say the two monster specimens unearthed at Morden, Man., by Dominion geologists, were the first complete skeletons of the 60,110,000,-year-old reptiles ever found in Canada. Scattered bones were found in Alberta three or four years ago but no complete specimen.

J. M. Steinberg, Dominion government geologist, who has unearthed many dinosaur skeletons in Western Canada will ship the fossilized bones to Ottawa where they will be mounted for display in the museum. A 35-foot specimen has been on display at Ottawa for some years but it was found in the United States. It may be a year before the completed skeleton creature, which flopped about the prehistoric ocean that covered Western Canada millions of years ago, is ready for the gaze of the public.

A Clever Idea

German ingenuity has met the problems of herding over the heads of a crowd without getting a stiff neck. At every big street parade in Berlin now, and there is one almost daily, crowds of vendors make their way through the crowd selling periscopes. With a periscope it is possible to have a front seat even if you are standing in the rear ranks.

It is believed by the Hafia of mankind that the spirits of the dead ascend to heaven by the rope of the sun.

A few centuries ago, the word "knot" was used to designate a "pelvic officer."

Reaping The Harvest

Far East Has Awakened To Machine Age Era

Europe no longer can exploit the rest of the world as a market, and now, after destroying the civilization of the Orient and India, reaps the harvest, declared Frederick W. Norwood, celebrated preacher of the City Temple, London, England, at Vancouver.

Returning from an extended trip, he said the Far East had awakened to the machine-age era.

"In Japan you have a nation that has learned the lessons of western civilization, put them into practice and now is sending back a surplus of machine-made goods," he said.

The missionary was not to be blamed. There were he recalled, 150 commercial travellers propogating industrial ideas to every single missionary. There, too, were great changes in China and India.

"These people are increasingly conscious of what we have taken from them. We have got to think of humanity; stop putting tags on things and letting it go at that," he concluded.

Canadian Vocabulary

Human Credulity Provides One Of The Serious Barriers To Medical Progress

An article in "Health", published by the Canadian Social Hygiene Council, points out the necessity for the general public realizing that many so-called cures are nothing but frauds. The article tells some rather interesting facts about the credulity of people and the wiles of the fakir. The article concludes: "Perhaps it is futile to tell the public about these tragic occurrences, perhaps it is wasting time to ridicule the fakir and charlatan. Ethically the doctor can promise no one a cure but those medical quacksters, after getting their money, laugh at the hopeless sufferer from cancer and the dying tuberculosis patient and promise him a cure." Often those neglected cases too late accept the advice of their own surgeons and are branded at the same time a unethi cortideian.

Use Scaling Boats

Wireless Will Protected If French Countries Attempt Mutiny

Sealing steam is always held ready for use on the two bombing and eighty escorts leased by the French penal settlement on French Guiana, which includes Devil's Island, which recently embarked in the convict ship La Martinieres at La Rochelle. During the voyage the convicts are kept in cages under the constant surveillance of warders who, in the event of attempted mutiny, would be able to turn steam on them.

Swimming And Health

An Exercise That Has Come To The Front As A Valuable Form Of Recreation

A well-known swimming instructor states, "The interest in swimming has been stimulated tremendously and it is now possible for people to indulge in this healthful recreation throughout the year."

Greater indulgence would naturally make the health of the nation greater. It may also be the means of saving the swimmer and another's life. As an exercise swimming has few exercises with which to be compared. It may be performed in out the age and physical condition of the individual. "The art of swimming has also developed marvelously," states a writer on "Health". In the early days the breast stroke and over-hand stroke were commonly used. The trudgeon and single over-arm stroke were next evolved. The writer outlines the methods of swimming and states, "Make up your mind that you will learn or improve". The crawl stroke is the most popular of all swim strokes. Champions all over the world use it and it is fast becoming the stroke for everybody. In explaining the crawl stroke attention is paid to position, breathing and practice. At this time of year swimming can be made easier by the reading of such an article.

Nearly 136,000,000 pounds of tobacco were grown in China last year, breaking all production records for the weed in that country.

DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holders absorb the nicotine, providing coolness and mildness and many smokers found to tobacco smoke.

Work Is Pressing Forward On Trans-Canada Highway To Link Up Halifax With Vancouver

The rocky tangled terrain along the northern shore of Lake Superior now presents the only obstacle to the completion of the Trans-Canada highway from coast to coast.

Motorists may now drive from Halifax on the Atlantic coast, to a point 44 miles north of Sault Ste. Marie in northern Ontario, over reasonably good pavement and gravel roads. From there to Nipigon, however, roughly a distance of 200 miles, lies a rugged stretch over which no car can pass. Here are masses of solid rock of all shapes and formations. There are trees and tangled undergrowth, ravines, gullies and numerous rivers.

Two huge cuts this unencumbered northern Ontario section have been surveyed and the work planned, but when they will be completed is problematical. One big cut runs from Jackfish to White River, noted as Canada's champion cold spot in wintertime. The other swings from White River to Hearet. Very little work has been done on either of these stretches yet.

The road is a road from Nipigon to Port Arthur, while from Port Arthur to the Manitoba boundary, only about 20 miles of the highway still remains uncompleted. Work on this section is being pushed ahead and it is expected that it will be opened by this coming fall.

From the Ontario-Manitoba boundary the chain of motor road stretches all the way to Vancouver, on the Pacific coast.

Twenty - five thousand bronzed young Canadians are at present engaged in pushing forward the Trans-Canada highway building program. The majority are toiling with north-ern Ontario's wilderness. Throughout the rest of the country, however, much improvement and repair work is being done.

When these workers reach their goal the quarter-century dream of Canadian motorists will have come true They will then be able to start in their cars at Halifax and drive to Vancouver, without having to detour through the United States.

Soil Solver Acreage

Canadian Wheat Crop Higher Than Year Thus Land

The International Institute of Agriculture indicated the Canadian wheat crop would be somewhat higher this year than last, but 15 per cent below the average for the past five years.

The year's figure for Canada's wheat crop was given as 280,000,000 bushels.

Last year's total was 268,000,000 bushels.

The average for the years from 1926 to 1932 was 411,000,000 bushels.

France Sets Wheat Price

Officially Dropped From $2.39 To $2.25 Per Bushel

The price of wheat has been officially dropped below $2 a bushel for the first time in more than a year in France.

A new fixed price of 168 francs per quintal ($1.25 a bushel) was published in the official journal as the result of a recent law increasing farm aid.

There was a widespread complaint the old price of 118 francs a quintal was not being observed.

No Time Like Present

All men are glad to have pleasant memories, but not all are providing the material for such memories. If you would look back by and by to something that you will be glad you said or did, now is the time to do or say something which will give you food for gladness — Henry Clay Trumbull.

Wet shortage on the flour of a bakery near our was the simple and humane method adopted by U.S. specimens to keep pests and applies from freezing to transit from the northwest to eastern terminals in readership cold weather.

Summer Care Of Eggs

Must Be Kept Cool And Marketed Often As Possible

Eggs must have special attention in summer time, and extra precautions must be taken to keep them cool. A wire or wooden basket that permits a free circulation of air is ideal for gathering eggs, and they should remain in the basket until they are cool before placing in the egg case. A clean cellar is the best place to keep them before they are marketed, which should be done as often as possible. Marketing twice a week during the summer is not too often.

Tests show that high temperatures are very harmful to the fresh egg. In addition to hastening evaporation of the egg is bottle Incubat on starts at around 70 degrees and if allowed to progress long enough the egg becomes unfit for food. The eggs should be gathered two to three times a day and as often as possible Removing all broody hens to the broody coop as soon as they are noticed keeps the hens from setting on the fresh eggs, and is the best way to get them back to laying

Seek New Arctic Seaway

Expedition Hopes To Sound Light On Mystery Of Arctic

"I have a strong belief that I may be able to come across records of the Franklin search party which may throw additional light on this tragic chapter in the history of Arctic exploration."

Mitchell Pierce makes that statement in announcing his plans for an expedition to the archipelago lying between Baffin Land and the Beaufort sea.

Much of this territory, north of Canada, has never been thoroughly explored, and the main coast and adjacent islands are only roughly charted.

Mr. Pierce spent ten years in the Canadian north when serving with the Hudson's Bay Co.

The expedition will endeavor to find a passage through Peel Sound, Fury and Hecla straits and westward, following the mainland to the Pacific.

A Quaker once hearing a person tell how much he felt for another who was in distress and needed help at a distance, dryly asked him, "Friend, has thee felt in thy pocket for him?"

Outstanding Triumph Of Veterinary Surgery

Operation Saves Valuable Dog After Having Neck Broken

A greyhound, named Somebody's Choice, who, less than a month ago, broke his neck in three places, is again cantering round the training paddocks at Wembley stadium in England.

He looks, and is the picture of health His recovery is one of the outstanding triumphs of veterinary surgery

Somebody's Choice suffered a spectacular fall in a recent hurdle trial At first he was thought to be dead.

Then it was discovered that he was alive, although his neck was broken.

His owner S Curzon, begged the veterinary surgeon in attendance to do his utmost

A brilliant operation was performed. What amounts to an artificial neck has been created by means of aluminum silver plates. Flexibility has been achieved by clever manipulation of the

Somebody's Choice will never race again But he can bark and lord it, and all the Mitre Ale drinkers in the world he is the only dog alive to-day with a synthetic neck

Testing Lumber For Pulpwood

Shipment From Tasmania Being Sent To Vancouver

A mill test of Tasmanian wood which may have far-reaching effect upon the pulp and paper industry in Canada is to be made shortly at the Canada Pulp plant of Pacific Mills Limited, Vancouver.

Suitability of the Antipodean lumber for producing pulpwood for newsprint is the question and considerable interest is being shown in the forthcoming test by lumber and newsprint men.

For many years Australia has endeavored to develop a pulpwood industry of its own. There are pulpwoods there that make suitable kraft and that like the manufacturing of newsprint has not been attained.

Extensive laboratory tests have been made, and recently a Tasmanian wood gave promises of results A large shipment has been sent to Vancouver, on board S.S. Waikawa, destined for Ocean Falls mills where a practical test will be run.

Master: Mary, has anybody telephoned while I've been out?"

Maid: "Yes, sir, but I could not make out the name. To be on the safe side, I said you would let him know something on account tomorrow."

Natural Wood Chalice

Woods Canned Thrive When Created Wheat Grown In Essex

As fully explained in the House of Commons recently by the Hon Robert Weir, Dominion minister of agriculture, crested wheat grass is well adapted for pasturing by virtue of its remarkable ability to withstand close grazing and severe trampling. It is a particularly suitable crop for feed production on the dry land areas of Western Canada on account of its adaptation to dry conditions, its winter-hardiness and its ability to compete successfully with plants of other species, hoeing is believing, and an abandoned field on the vicinity of the Dominion Range Experiment Station at Manyberries, Alberta, was seeded to this grass and was closely grazed from early spring until late fall for five continuous years without apparent injury to the grass cover. The soil was heavily infested with wood seeds, chiefly Russian thistle and mustard, yet the grass took possession to the almost complete exclusion of the weeds. Owing to its extensive root system, which takes up all the moisture, weeds cannot grow in competition with it. All the latest information about crested wheat grass is contained in a pamphlet just issued by the Dominion Department of Agriculture.

About Punctuation

An Art, Like Spelling, That Few Ever Master Completely

Lord Dunsany has been discoursing on punctuation. Very few people can punctuate properly. Many of them think that period is best indicated by a dash, and several poets who send contributions in this direction have doubtless scattered all over their manuscript instead of commas, semi-colons, periods or other points. Punctuation, like spelling, is a gift, and few ever master the art completely. while novices hardly ever gain control of colons. notes of exclamation, and quotation marks.—Hamilton Herald.

Notwithstanding two disastrous hurricanes, the population increased in 1933 Jamaica's principal item of export Her two principal markets are Canada and Britain. At one time the chief importer used to be the United States.

PROMINENT CANADIAN WOMEN HONORED BY THE KING

His Majesty the King has named several Canadians to the Venerable Order of the Hospital of St. John of Jerusalem, and among those whom he has been pleased to confer these signal honors are the five Canadians shown above. In the near future Canada will have the largest telescope in the British Empire, and one of the most modern observatories in the world The observatory proper will be located at Hamilton Hill, south of Toronto, in a 177-acre park

This giant with its up-to-date machinery and giant telescope, is expected to reveal to Canadian astronomers many new secrets of the stars Constructed and equipped under the supervision of Prof. C. A. Chant, head of the astronomy department of the University of Toronto, the observatory will shortly be ready for use It will then be turned over to the university by Mrs. D. A. Dunlap, the donor, as a memorial to her late husband, a prominent mining man

The dome and building are now practically completed, and part of the telescope is being set in position A 74-inch mirror for the telescope has been finishing the main reflector for some months This, too, will be in place shortly.

Inside a huge steel dome will be located the telescope with a 74-inch reflector, the entire assembly weighing about 45 tons. The steel dome is 61 feet in diameter, with a parallel opening 15 feet wide. The moving machinery, running on rails at the top and bottom of the dome, close the opening, and are operated simultaneously by means of wire ropes connected to a motor gear An emergency hand gear is also provided Two motor-operated wind screens of steel cloth are mounted on the opening, one rising from the bottom, the other descending from the top

The mirror, weighing about 20 tons, is carried on 24 canted rollers of 27-inch diameter mounted in ball bearings and running on a rail. Suitable pads of lubricated rubber bearings on the inner and outer edge of the rail keep the dome in position. Two motor-driven platforms, one near one at the base of the opening and the upper one at the back 18 feet higher, are fixed inside the dome Rails are mounted on the parallel straight edges on which runs a bridge five feet wide and seven feet high into two portions. the right hand side forming a stairway, the left being a track on which a truck carrying the observer and eyepiece moves.

The centre section of the telescope tube itself is a steel casting seven feet in diameter and weighing 9½ tons Just above the lower flange the casting swells out to eight feet seven inches to accommodate an iris diaphragm for use in stellar photography

Construction of the diaphragm is similar on a big scale to that of the familiar small camera But the shutter of many cameras is less than one-half-inch aperture the shutter of the Dunlap observatory camera opens to six feet, two inches. It is operated by a hand wheel

Prof Chant is enthusiastic on the possibilities of discovery and development in the science of the heavenly bodies to be afforded by the new observatory

Herb Garden Is Useful

Idea Seems To Be Gaining Popularity In Canada.

The herb garden is rapidly becoming a Canadian institution. All sorts of English favorites are found to grow well in Canadian soil The best place to plant the herb garden is right outside the kitchen door where it will be handy for the picking. Herbs that add spice to the cooking and that are easily grown in the average back yard are Tarragon, mint, chives, majoram, sage, parsley, and sweet basil, these other members of the onion family

Streamlining Saves Coal

Streamlining has come to naval architecture Appearance of the Arrivo, second of two British tramp steamers to be built on the streamline principle, in London harbor, caused widespread interest among the waterfront and elicited the information from her captain, Hoith Williams, that his ship burned five tons less of coal per day than other steamers of a similar class.

Engineers Meet

Trend In Construction Towards Better Things, Says Speaker

In the field of engineering the trend is unmistakably toward better things, Harrison P Eddy, Boston, president of the American Society of Civil Engineers, told that body and the Western professional gathering of the Engineering Institute of Canada when he addressed the opening session of the four-day convention of the two organizations at Vancouver

"It would be presumptuous for me to comment specifically upon trends of engineering in Canada," said Mr Eddy, "but I would not be loyal to the Engineering Institute of Canada, of which I have the honor of being a member, if I did not give public recognition to the splendid work which it has done in upholding and advancing the profession."

He suggested more frequent and closer co-operation between the Engineering Institute of Canada and the American Society of Civil Engineers

Civil engineers from all parts of the continent attended the dual convention.

GO MEXICAN IN GAY COTTON SPORTS PRINT DRESS

Stretch your budget—it's easily done!

You can imagine how jaunty it is in multicolored navy-and-white cotton print with its youthful trimness and its simplicity.

The small white bias be carried out in tab effects, plain pockets or shirttail flare.

In striped shirting cotton, it's also snappy. Cut the attractively shaped girdle, the sleeves and the jabot that slip through slashed openings in front of waist at the striped run in opposite direction or run diagonally. Contrasting effects can also be worked out in this way as white lines with emotion blue, or yellow and white checked paper with plain yellow.

Style No. 988 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3½ yards of 39-inch material with ¼ yard of 27-inch or wider contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Journeys in Science

THE PLANT FACTORY

(By Gordon H Grant, M.A.)

Scientists have been attempting for many years to find out how plants manufacture such complex materials as cotton, starches, sugar, fats, proteins and vitamins, and it has been found that every plant contains a little factory in which these in built from the raw materials these products which are so essential to man's existence

It is in the green leaf that this wonderful process takes place. The raw materials consist of carbon dioxide, water, and minerals from the soil. Carbon dioxide is a gas which occurs in the air to the extent of three to four parts in ten thousand parts of air. This gas enters the leaf through very small openings on the surface. The minerals enter the soil in the water which comes up to the green leaf through the roots and stem from the soil. Chlorophyll, the green coloring matter in plant tissue plays an important part in this manufacturing process. Sunlight is necessary for furnishing the energy which converts the raw materials into compounds such as starch and cellulose. The presence of chlorophyll is always necessary to the process, which is known to scientists as photosynthesis, coming from the Greek word meaning "to build up by means of light."

Directly or indirectly all life is dependent on the wonderful plant factories. Here the plant produces its own food, and from the factory this food is sent to other parts of the plant for distribution. Animals live on plants, and man in turn requires the most of animals in his diet. Thus directly or indirectly the existence with the means of food which are built up through the process of photosynthesis. Further, we are dependent on it for wood, coal and oil On these in turn depend steam power, motor transportation and other important factors in our civilization.

For many years scientists have attempted to duplicate in the laboratory this process which is carried on in the green leaf, but as yet attempts to do so on a practical scale have met with failure

Recipes For This Week

(By Betty Barclay)

CHOCOLATE ICE BOX CAKE

4 squares unsweetened chocolate
½ cup sugar
Dash of salt
¼ cup of water
4 egg yolks
1 teaspoon vanilla
4 egg whites, stiffly beaten
1 cup cream whipped
2 dozen lady fingers.

Melt chocolate in top of double boiler. Add sugar, salt and water, stirring until sugar is dissolved and mixture is blended. Remove from boiling water, add egg yolks, one at a time, beating thoroughly after each addition. Place over boiling water and cook 2 minutes, or until thickened, stirring constantly. Remove from boiling water, and vanilla and fold into egg whites. Chill. Fold in whipped cream. Line bottom and sides of mold with lady fingers. Turn chocolate mixture into mold and place remaining lady fingers on top. Chill 12 to 24 hours in refrigerator. If desired, add ½ cup finely cut walnut meats to chocolate mixture before turning into mold. Unmold. Serves eight.

PINEAPPLE
(Individual Service)

2 tablespoons crushed pineapple
or pineapple juice
½ cup orange juice
½ cup water.
1 tablespoon lemon juice

Drain pineapple, if canned, but do not extract all juice. Add lemon and orange juice, water and the sugar. Simmer and serve very cold.

Through the vigilance of Dr. Isabella Grant, Dominion Department of Agriculture, two northern pests were prevented from entering Canada this spring, namely, the gold tussock moth and the black vine weevil, both from Holland.

Devotional Reading: Psalm 119, 9-16.

Explanations And Comments

Ahab and Jehoshaphat Allied Against Syria, verses 1-4. For three years, from the time of the covenant made with Ben-hadad king of Syria, when the Israelites had so severely defeated (1 Kings 20 26-34) there had been peace between the Northern Kingdom of Israel and the Kingdom of Syria.

Meanwhile Israel and Judah had become friendly as proved by the marriage of Athaliah, the daughter of Ahab, king of Israel, and Jehoram, the son of Jehoshophat, king of Judah. It is thought that Judah had formerly been a vassal of Israel, but now Syria, the latter had promised to restore to Israel the cities which the latter had seized. This promise he had failed to keep. "Ramoth-gilead is ours, and we are still," said Ahab, "not out of the hand of the king of Syria," cried Ahab.

Ahab and the Prophets of Baal, verses 5, 6. It was after Jehoshophat had promised Ahab that he would be with them in the war 2 Chronicles 18 3, that he asked Ahab to ascertain through the prophet this will of God in the matter. Ahab summoned four hundred prophets and they all agreed that Jehovah would deliver the city into Ahab's hands.

Micaiah and Micaiah, verses 7-28. Jehoshophat would not be satisfied with these prophets and asked if there were not yet some other prophet. There was Micaiah, the son of Imlah. Ahab admitted, but he hated Micaiah, for he always prophesied evil. Jehoshophat wished to have him summoned, and Micaiah was duly yielded.

The two kings in royal robes were sitting on their thrones on the broad open space before the gateway of Samaria, the usual place for public assemblies, before them were all the prophets prophesying the defeat of the Syrians. One of them, named Zedekiah, had made horns of iron and was declaring that with these the Syrians would be consumed, when Micaiah appeared. The messenger who had gone for him urged him to prophesy good even as all the other prophets had done, but Micaiah had sturdily asserted that he would prophesy only that which Jehovah told him.

When Micaiah approached the two kings Ahab asked him, "Shall we go to Ramoth-gilead to battle, or shall we forbear?" "Go up and prosper, and Jehovah will deliver it into the hand of the king," said Micaiah, ironically repeating the words of the four hundred. But when Ahab sternly said, "How many times shall I adjure thee that thou speak unto me nothing but the truth in the name of Jehovah?" Micaiah then told of a vision he had had, of the Lord and all scattered on the hills of Gilead like sheep who had lost their shepherd. And he heard a voice saying, Thou has no master; let them return every one to his house in peace," 2 Chronicles 18:16. "Did I not tell you," said Ahab to Jehoshophat, "that he would prophesy evil?" In that vision, Micaiah continued, he saw God surrounded by heaven surrounded by his host, debating with them as to who should entice Ahab to go to Gilead to be slain. And one said on this manner and another said on that manner. **Micaiah Attacked and Jailed,** verses 29-36. Ahab asked Jehoshophat to wear his royal robes into battle, but he disguised himself. With strict orders to kill the king of Israel, the chariots pursued Jehoshophat, but desisted when it was seen that he was not the king of Israel. A bow "drawn at a venture," pierced between the joints of the armor Ahab was wearing, and gave him his death wound.

Had Answer Ready

An Irishman having accidentally broken a pane in the window of a house, ran away as fast as he could. He was followed by the proprietor, and cried out:

"You broke my window, fellow, did you not?" asked the proprietor.

"To be sure I did," said Pat, "and how can I see me running home for the money to pay for it?"

The rhododendron white fly has been found infesting a few nurseries in the vicinity of Vancouver and Victoria, B.C. This constitutes the first record of the pest in Canada and steps have been taken to eradicate it.

Memorial Church In Bagdad Is Proposed

To Honor British Killed In Mesopotamia During War

An appeal for $20,000 to build a "Mesopotamian Memorial Church" in Bagdad is signed by the Archbishop of Canterbury, Sir Francis Humphrys, British ambassador in Bagdad, and others.

The building which has been used as a church since 1921 was originally a Turkish guardhouse, and will shortly have to be demolished owing to town-planning developments, and the construction of a steel bridge across the River Tigris. The British community in Bagdad, numbering some 400, is anxious for a permanent church, and a site has been acquired.

It is suggested the new church should be built as a memorial to the 41,115 British lives sacrificed in Mesopotamia during the war, and to those killed in Iraq. The building would include a memorial shrine containing a book inscribed with the names of those British men and women who gave their lives on Mesopotamian soil.

"Why does a red-headed girl always marry a quiet fellow?"

"She doesn't. He just gets that way."

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

HEPBURN PAVES WAY TO RECEIVE HUNGER PARADE

Toronto Notice was served on the city of Toronto that the police commissioner must not pursue a policy at variance with that of the Ontario government. In the latest move in the battle between Queen's Park and the city hall the government removed two members of the Toronto police commission and replaced them by two others

The new commissioners are expected to rescind the order banning a parade and demonstration of hunger marchers from Ontario centres in Toronto on July 30. Mayor William Stewart, who has been almost continuously in controversy with Premier Mitchell Hepburn since the new Liberal government took office in early October, refused to issue a permit for the parade because he had failed to keep. "Ramoth-gilead is ours, and we are still, and take it not out of the hand of the king of Syria," cried Ahab.

Ahab and the Prophets of Baal, verses 5, 6. It was after Jehoshophat had promised Ahab that he would be with them in the war 2 Chronicles 18 3, that he asked Ahab to ascertain through the prophet this will of God in the matter. Ahab summoned four hundred prophets and they all agreed that Jehovah would deliver the city into Ahab's hands.

Micaiah and Micaiah, verses 7-28. Jehoshophat would not be satisfied with these prophets and asked if there were not yet some other prophet. There was Micaiah, the son of Imlah. Ahab admitted, but he hated Micaiah, for he always prophesied evil. Jehoshophat wished to have him summoned, and Micaiah was duly yielded.

The two kings in royal robes were sitting on their thrones on the broad open space before the gateway of Samaria, the usual place for public assemblies, before them were all the prophets prophesying the defeat of the Syrians. Seed Officials Meet

Conference Held At Saskatoon In Which All Attended

Saskatoon Further standardization of the work of the federal seed branch inspectors in the four Western provinces was accomplished as the result of a three day conference of all the inspectors from Fort William to the Rocky Mountains which concluded here Meeting with the federal men were the field men connected with the branch of the Saskatchewan department of agriculture

The conference took the form of a short refresher course in cereal grain identification of varieties and variations within varieties and the identification of diseases that attack cereal crops

Work of the conference was directed by Nelson Young Saskatoon, G. H Stewart, Calgary; J. E. Blackburn, Winnipeg district inspectors for the federal seed branch, and by R. H. Wyse, field crops director for the provincial government

The historical background of plant breeding was outlined by Dr J H Harrington, professor at the University of Saskatchewan, who pointed out the necessity for seed growers to maintain the purity of strains in their plots. Mr Harrington also spoke upon the selection of varieties of cereal crops, and the separation of any kinds of crosses that might be found in seed grain plots.

Early emphasis on several changes which different environments might cause in varieties, and cautioned the conference that the appearance of these changes in passing judgment upon the purity of the strains grown. He showed how the pollination of varieties seem too close together might come about, pointing out that the results from crosses of this kind are often much inferior to pure strains as sowing two varieties of seed in the same plot.

Explorer Thought Lost

Hope Abandoned For Young Britisher Who Attempted To Scale Mount Everest

Darjeeling, India. Hope has been abandoned for Maurice Wilson, young British flying officer, who started out on an ambitious attempt to conquer Mount Everest lone-handed.

Wilson flew an airplane to India from England with the hope of planting a Union Jack on the summit of Mount Everest. The authorities refused him leave, so he decided to attempt the climb which has yet to be achieved.

He progressed for some days until he established his camp No. 2 high on the slopes. He left his porters there and continued the climb alone, taking a small tent, an ice-axe and a quantity of food, with a camera.

He was last sighted high up, nearing the location where he proposed to establish what he called camp No. 3.

His porters now have waited for three weeks without any word from Wilson and they returned to Darjeeling to report their conviction Wilson had lost his life.

Still Paying One-Third

Alberta Making No Change In Direct Relief Costs

Edmonton Cost of relief of the direct relief method will continue to be paid by the province, notwithstanding the action of the Dominion government in refusing to be a party to it. A decision to this effect was reached at a cabinet council meeting and has been sent to Mayor Davison, of Calgary.

No time limit has been set for this rate to apply. And it will, therefore, continue indefinitely, it is learned from Premier Reid.

Action has also been taken by the government on the Edmonton city council's request for a federal loan of $1,000,000 for public works, approving the loan and agreeing to make application for it to Ottawa.

Beer Cure Produced

Ottawa.—Automobile production in Canada in 1933 amounted to 66,852 cars, with a sales value, f.o.b. plant, of $88,520,667, the Dominion bureau of statistics has announced. This was an increase of 8.5 per cent. in number but only .3 per cent. in value from 1932.

CAPTURED BY BANDITS

Here is Evan Hollis united Swedish explorer and author, who recently has been captured by a brigand Moslem chieftain named Ma Chung Ying, and a group of Turkestan bandits — the wilds of Hamihung province.

Argentina Wants Wheat Export Quota Raised

Agricultural Minister Says Large Crop Makes It Necessary

Buenos Aires. Argentina's minister of agriculture proposed that the nation's wheat export quota be raised at next month's international wheat conference to 150,000,000 bushels At present the quota is 110,000,000 bushels.

A communique by the agricultural minister stated that the abundance of the 1934 crop necessitates a larger export quota to overcome surpluses.

Four proposals to stabilize the world wheat market were definitely rejected by Argentina. They are Argentina's adherence to a minimum price, a limitation of exports to a second year by agreement to 100,000,000 bushels, a reduction of seeding to regulate yearly exports to 110,000,000 bushels and an agreement to denaturalize wheat exceeding the export quota and domestic consumption

It was contended the scheme to fix a minimum world price on wheat has proved a failure. Denaturalizing wheat is held to be impractical because the United States and Canada, "the accumulated stocks of which are responsible for the present situation," have not adopted that procedure.

Aid For Settlers

London The British government is to make further concessions to British settlers who became destitute in the State of Victoria, Australia, in order to enable some of them who have already returned home to go back and make a fresh start.

New Arms Treaty

Japanese To Confer With Washington In August

Washington Japanese spokesmen will visit Washington next month and will seek, by informal conference, to prepare for the negotiations of a new naval arms limitation treaty in 1935

These circumstance are generally reported to include

An effort by Japan to obtain a new understanding on respective positions and purposes in the Pacific later to be extended to Great Britain.

The continuing Japanese quest for a bigger navy in proportion to Britain's and the United States than is allowed by the present 5-5-3 ratio

An attempt to forward the Japanese project of a non-aggression pact with the United States

Trade With China

Growing Market For Canadian Products In The Orient

Vancouver—Trade between China and Canada has fallen off considerably owing to higher tariffs on one side and adverse monetary exchange on the other, Major Victor Ducloz, Canadian trade commissioner at Hong Kong, declared on his arrival from the Orient aboard the liner Empress of Canada.

Major Ducloz stated there is a growing market in China for Canadian merchandise, but Canadians must earn more, in order to develop that market. must pay greater attention to its potentialities and keep closely in touch with it.

The trade commissioner left for Ottawa and Montreal.

Trade Increases

Foreign Trade Showing Slight Increase, Says Geneva Report

Geneva The decline in the volume of foreign trade which began some five years ago with the depression, reached bottom in 1933, and a slight increase was noted in the last few months, a general resume of world trade for 1933, issued by the League of Nations economic information service announced.

From 1932 to 1933 the volume of trade declined 10 per cent. by value expressed in gold, or five per cent. by value expressed in sterling.

Increases in 1933 were registered chiefly in raw materials, which increased by eight per cent., and manufactured goods to two per cent.

Wheat Harvested In Alberta

Lethbridge. — Cutting of winter wheat has started on the farm of Frank Wentz at Granny Lake, about 50 miles east of here. Winter wheat has ripened rapidly under the warm weather of the past week. It will make a fair average crop. Rain would be welcomed for the spring grains show a heavy stand.

FAMOUS EVANGELIST VISITS BIRD SANCTUARY

For years Jack Miner, famous Canadian naturalist, has been an intimate friend of the Rev. W. A. Sunday, of evangelistic fame, but it was not until recently that Mr. Sunday visited the Miner bird sanctuary at Kingsville. Here we see Mr. Sunday feeding some of Jack Miner's feathered pets, while Mrs. Miner (left) and Mrs. Sunday (right) help in handing out the grain. On the left of the picture can be seen Jack Miner.

WILL MEET TO DECIDE FATE OF WHEAT PACT

Washington.—Three nations which are parties to the international wheat agreement moved to decide the fate of the compact which seeks to limit world wheat production and raise world prices.

The United States, Australia and Canada, principal exporters of the bread grain, requested that a meeting be held August 14 at London to attempt to reach "a complete understanding" on the agreement for next year They left the intimation they would seek a show-down on the position of Argentina, fourth principal signatory

Evidence to support this belief came in the guarded statement of departments of agriculture officials that they were withholding final decision on domestic wheat curtailment plans for next year pending outcome of the August meeting

In requesting the London meeting next month the three countries in a joint letter to Andrew Cairns, secretary of the conference, declared they attached utmost importance to maintaining the agreement and that they would keep every effort to continue it.

Minneapolis, Minn.—World wheat affairs were discussed here by representatives of the Canadian and United States departments of agriculture.

The meeting was preliminary to the World Wheat Conference in London, which starts Aug. 20, and was to determine what the officials of the United States positions would be toward continued wheat acreage reduction and if possible arrive at a quantity of purpose

Participating in the conference was Chester Davis, administrator of the agricultural adjustment administration; Dr. Morden Ezekiel, economic adviser to Secretary Henry A. Wallace, of the United States department of agriculture; Dr. C. F. Grant, of the department of agriculture of Canada, C. W. McPartland, Canadian trade commissioner, and Paul; G. E. Wheeler, Paul Nicham and George Kantbrunk, of the United States grain futures administration, and F. E. Murray, of Minneapolis, delegate to the London and Rome wheat conferences.

At the London conference which is when a world-wide acreage reduction programme was launched, Canada and the United States stood together in most of the reduction programme and it was anticipated that a preliminary plan for the two nations would be worked out

Test Of Subsidy Bill

London.—The test of the government's bill to end the domestic cattle industry was issued here, revealing that imported cattle must be in the United Kingdom for a continuous period of at least three months if the subsidy on slaughtered beef cattle is to be paid. The government is setting aside a sum of $18,000,000 to subsidize domestic cattle producers.

Noted Sculptor Dead

Montreal.—One of Canada's most noted sculptors, Count Philippe Hill, died here at 17 in his suburban Outremont home after an illness of 10 days. Among his best known memorials are the bronze monument in the Hall of Fame at Ottawa; Queen Victoria's jubilee monument in Victoria Square, Montreal, and that of Sir Georges Etienne Cartier monument on Fletcher's field, Montreal.

Attractions Of Canada

Ottawa.—An outstanding figure in British diplomacy in the Near East for many years, now retired, Sir Ronald Sterra, lately governor and commander-in-chief of Cyprus, declared that he was captivated by the attractions of Canada, his father's birthplace Sir Ronald was an associate of Earl Kitchener, played a prominent part in the Arab revolt and who took Lawrence to Arabia.

Cumberalan Meets King

Liverpool.—Samuel Gillingham, of Birkenhead, aged 102 years, who lived in Canada for 40 years, had the honor of being presented to the king and queen at the formal opening of the new Mersey tunnel.

Agricultural Notes

Many Uses Of Oilseed To Be Investigated

No Sewage wheat has been allowed to be imported into France for milling for domestic purposes since April 16, 1932.

Cornflower or Batchelor's button is one of the easiest hardy annuals to grow in Canada. Sown where it has to flower, it will need thinof from year to year

African sleeping sickness in man and Texas fly disease of livestock are caused up a parasite of enthelopes which causes no disease what ever in these animals.

From many of the feeding tests carried out at the Dominion Experimental Farms and elsewhere it has been found that barley is an excellent substitute for corn in the feeding of livestock.

The Academy of Sciences, Leningrad, reports that the injection of ethyl alcohol by hypodermic needle into immature tomato fruits still attached to the plant hastened ripening.

Crested wheat grass as an excellent seed producer. The yields vary from 100 to 800 pounds per acre, depending chiefly on the supply of available moisture The seed is easily harvested and threshed with ordinary farm equipment.

A live animal weighing 1,200 pounds, well finished, will yield a moderate carcass of 720 pounds. Of this, there are 720 pounds of really prime beef The prime beef is made up of the sirloin, porterhouse, and club steaks, and the prime ribs of the forequarter.

Canadian records show that by using the cans in refrigerator cars one at each end in desperately needed cars corners, the temperature of fruit can be reduced a matter of 20 degrees in 8 or 10 hours freezing, enabling the fruit to reach the consumer in good condition.

The Vilmorin raspberry, originated at the Vineland, Ont., Horticultural Experiment station from a cross between Cuthbert and Marlboro varieties, has been found highly promising in Michigan according to a report from the U.S. Department of Agriculture.

In a study at the Institute for Feeding Technic at Breslau, Germany, it was discovered that dried sugar beets could be used to make up a large part of the ration for fattening green geese, if skim-milk and young clover or alfalfa were also given.

The provisional estimate of wool production in Australia for the season just closed—11 July, 1933, to 30 June, 1934— is 950,000,000 lbs., (greasy basis), a decrease of 111,-000,000 lbs. on the estimate for the 1932-33 season. Next season's production is likely to show a fairly substantial increase.

Binding with reinforced cheesecloth having a thread count of 22 by 22 in experiments at Cornell University increased the length of stem and size of flower of all varieties. Aster, chrysanthemums, snapdragons, calendula, sweet peas and dahlias were among the most benefited. Insect injury was decreased.

Of the 676 pedigree swine registered during the month of June by the Canadian Record Association and approved by the Dominion Minister of Agriculture, 351 were Yorkshire; 63 Berkshire; 65 Tamworth; 20 Chester White; 141 Poland China, and 1 Duroc Jersey. The registrations of pedigree horses numbered 381, of which 160 were Percherons; and of the 2,367 cattle registered, 1,023 were Ayrshire. Other registrations were 310 sheep; 21 bonar; 283 dogs; 1 poultry, and 11 goats (7 Toggenburg and 4 Saanen).

Reforesting Health Service

The new director of potato health, Dr. Tessoff, is preparing to carry out drastic reforms of Bulgaria's health services. All questionable persons and conditions are to be closed or thoroughly overhauled and re-organized and new ones are to be built. As a preliminary measure, medical fees have been reduced by from 40 to 60 per cent. and compulsory reduction of hospital fees have been ordered.

HITLER WORRIED OVER MANY PROBLEMS OF GERMANY'S FUTURE

While he is urging the German people to forget the troubles resulting from the uprising in the Nazi Party and to attain a peace of mind, Chancellor Adolf Hitler, himself, has many things to keep his mind occupied regarding the future of his regime The layout above depicts his chief current problems re-organize storm troops, settle the position of the vice-chancellorship and the future of Franz von Papen, smooth out troubles with the Vatican and the churches, improve the foreign relations, now handled by Foreign Minister Konstantin von Neurath, solve economic difficulties and quell possible new insurrections against his administration

Canine Fall Equipment

Mosquito Never Dies To Go Back For Tools

Unlike the plumber who generally sadly forgets his tools and has to go back and fetch them, the mosquito never has to do that either viewing a prospective job. He carries a complete tool kit with him always

That "he" is wrong though It should be "she". The male mosquito has whiskery feelers and no appetite. The lady, being a perfect lady, has no whiskers, and she is always ready for a meal off you. In her head she carries a neat little outfit consisting of one pair of very fine drills, a second pair rather coarser, a single big drill, a saw, an elbow and a pump.

And here is how she uses them.

The fine drills are so delicate and so sharp that you feel nothing as they go in. Once a tiny pilot hole has been made the other drills are used to enlarge it and the good work is finished with the saw

But human skins even the fairest and daintiest—are tough from the mosquito's point of view. So one blunting perfectly good tools on such dry and leathery stuff. So the oil-can comes into play Unfortunately it isn't just oil that she uses as a lubricant. If it were, you wouldn't afterwards have the tickling and the swelling by which you usually discover that you have unwittingly shed her a dinner. She uses an acid solvent which makes the sawing delightfully easy. One-two, one-two, and a splendid hole is made

The solvent does something else, too. It makes the blood vessel swell, which is just what Madame Mosquito wants. Out comes the pump, and next moment she is busily bowed that you have got a flavor on anything that she has struck for a long time. — St. Thomas Times-Journal.

Largest And Smallest Book

Each Can Be Seen In The British Museum

The world's biggest book is in the British Museum. It is a gazetteer and lists all the world places in America down in 1886, and is six feet high, four feet wide, and six inches thick. It has a reading desk on which the students have to consult it as it stands in that position. The British Museum also has some of the world's smallest books. Some are slightly smaller to size than a postage stamp. There was a great vogue for these tiny books a century back, and they were carried in the volunteer pocket.

Hat On View

"Most interesting," said the most young thing to the center one admiringly, "and now over here on the extreme right, please. I hear it is heavy in that spot."

"As a matter of fact, madam," replied the upperworld, "we found it a source of worry and had it removed altogether."

Really Low In Spain

Will Allow No Noise During Three Of Afternoon Siesta

If you love lazy, during these warm days of summer, and wish that the pace of every-day life were not quite so swift, you may get a little vicarious relaxation out of considering the way things are done in Spain.

In Spain the siesta, or afternoon nap, is an old institution; and just the other day the authorities in Madrid passed a law, effective from until the end of summer, prohibiting all music in cafes, restaurants, or other places of entertainment 2 hrd 5:30 p.m., on the ground that such noise interfered with the siestas of honest Spanish citizens.

This was on the part of government to see that a MAN gets his afternoon nap undisturbed must sound attractive to many a Canadian at any rate, on these afternoons when he drags himself back to work from his lunch hour, wondering how on earth he is going to be able to stay awake through the afternoon

Cut Ice With Violin

Discovery Of New Method Made By Swiss Engineers

A stream of water under high pressure can successfully cut through thick ice, Swiss engineers have discovered. A small working model pump, in a test, cut three yards of ice more than one inches thick in fifteen seconds, developing a pressure of twenty-five atmospheres, when the ice-breaker Stream sailed for the Arctic it was equipped with more pumps to experiment further with the method.

Writers Must Write

Members Of Soviet Union Must Also Have Articles Published

"Must members of the Soviet Union write?" is the difficult question which the Russian Union of Proletarian Writers has been called upon to answer. The Soviet government, which takes its writers seriously, suddenly discovered that the writers' union had 1,500 members in Moscow, more than a thousand in Leningrad, and that even the provincial capital of the Ukraine, Kharkov, carried 500 writers on its union lists. "Are these members all writers, and if so, why are they not writing?" the government inquired

The union, which apparently had not faced this question before looked into the matter It found that most of its members had little more than their aspiration to recommend them. They hoped to write, and their hope had found expression in one or two short stories or articles, after which they had lapsed into long silence This discovery has led to the ruling that a proletarian writer, like his bourgeois counterpart, not only must write, but must write something good and, most serious test of all, must get his writings published. Membership in the union hereafter will be restricted to those who have "published works of artistic or scientific importance"—Christian Science Monitor

Women Lawyers

The proportion of women lawyers to men being called to the bar in the states is average as in past years—one in 20. Among those called recently at the Middle Temple was Miss Mary Caroline Davies, daughter of D J Davies, chairman of the Newfoundland Savory board

Indians Teach Whites

New Generation On Saskatchewan Reserves Show Their Ability

Although the majority table up facts regarding the reserves, many Saskatchewan Indians go far in the field of education and social service

At the present, four Saskatchewan Indians are teaching in provincial residential Indian schools, while three Saskatchewan Indian girls, two of them hospital graduates, are engaged in work as trained nurses

The unpublicized work of Saskatchewan Indians became known in an interview with W. Murison. Indian inspector for Saskatchewan.

Average education of Saskatchewan Indians, Mr. Murison said, was formerly grade eight, although now a number continue to grade 12. In the past several years, Normal school courses but this activity has shown a decline.

"After their school training," the official continued, "most of the men become farmers and most of the women housewives. The outdoor life is naturally adapted to Indians, and they have all the hard they can use. Free of taxation."

Indian residential schools were originally trade schools, Mr. Murison said. The pupils were taught shoe making, printing and other trades. But when it was found indoor activities did not suit them, the trade teaching was discontinued. The schools now concentrate on farming and care of stock for the boys and domestic training for girls.

In Saskatchewan there are 14 residential schools, with a total enrolment of about 1,625 pupils. Many of the schools have a waiting list.

"The Indians are also keen for steam engineering," Mr Murison added. "Most of their farming operations are by steam, and the operators are always Indians. At Threshing time there were five such engineers, once."

Rides Ancient Vehicle

Prince Of Wales Propels Tricycle That Belonged To King Edward VII.

A high-wheeled tricycle that once belonged to King Edwin Edward VII., was trundled up and down the yard of an automobile plant at Coventry, England by his grandson, the Prince of Wales.

In front of a cheering crowd of workmen, the Prince mounted the ancient vehicle and pushed about 40 yards, grinning widely.

As the Prince was completing an inspection of the plant he observed the tricycle, kept here as a curiosity, and asked if he could ride it.

Convertible berths, very much like railroad sleeping sections, are provided on some of the air line passenger planes.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is sad to inherit money when she comes of age and is productive commercial art in the hope of finding an agency job. Others in the story are Avis Worth another sculptor who is carrying a torch for Peter Sivia, Todd Peter's model, and Guy Morton, the latter's representative with whom he has remarried After a party at an exclusive club on the roof of the mansion of the party Peter and Camilla, who are in the bath by themselves and felt asleep on the roof When they return it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married Camilla urges Peter to accept some of her money to help him abroad but Peter refuses and they quarrel After Camilla has gone Peter finds Avis Worth calls and persuades Peter to accept a loan of $1,000 Camilla hears his exhibit and gives Avis and Camilla, surprised, goes to Peter's studio Camilla suggests "Three Youths" and Avis "Motherhood" Peter adopts the latter title and Camilla, heartsick goes to Peter's studio for comfort and finds Peter and Avis fondue later, and as the lights are turned on, see the statue has been shattered to pieces Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They name it "Land of Nod."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts in addition to newspaper advertising. Camilla is both writer the Tiny Tots stories and to deliver them over the radio.

(How Can She Write The Story)

CHAPTER LIII

It was Avis who first learned the news, even before Peter himself. She had arranged with John Dandelo that he should telephone her the result of the committee vote, immediately. The telephone call was awarded the Paris scholarship.

Avis was speechless with surprise, much as she had planned and hoped for that very thing. Now that plan and hopes had done a right about face on the night when "Inspiration" was discovered, and the sculptor's grinning standby turned another goal since then.

"You wouldn't just with me, Uncle John?" she asked incredulously.

"Of course not, child. But I will admit that my vote must have been the deciding factor, because he won by just one point. The nude figure 'Flight' by someone named Nels Nelson, was his best rival, but I can honestly assure you that it wouldn't have been my choice had the other

Progress in Surgery

General Anesthetic No Longer Necessary For Major Operations

The following article by H. H Bashford, M.D. appeared recently in the Nineteenth Century and After

During the last twenty years there have been very considerable strides in our knowledge of local anaesthetics—in the science of inducing an anaesthesia, that is to say, sufficient for major operations without the necessity of administering a general, and with it. It has been found, for instance, that by injecting a suitable solution of some anaesthetic drug into the sheath of the spinal cord the roots of both entering and departing nerves, sensory and motor respectively can be sufficiently affected to produce an entire loss of sensation over the whole area of the body below the point of injection. For operations below the waist this has been a development of value application It has enabled these to be carried out upon persons suffering from diseases which bear a heavy risk when the administration of a general anaesthetic would have been attended with the gravest danger even if it had been justifiable at all

THE RHYMING OPTIMIST
By Aline Michaelis
TO-DAY
To-day means beginning afresh;
With the blessing of dawn
Comes life, budding out like the east,
And the old things are gone

The old things forgotten, depart,
Be they bitter or sweet;
From out of the thought and the life
What is past must retreat

To-day hears a gift in its hands
That no other could bring,
And its light has fired torches of hope
Like the promise of spring

In the past were there sorrows and cares?
Was there old tyranny?
Then look up and be glad and march on
For to-day sets you free!

Hail Is Trod

Panama Canal The Cross Roads Of The Americas

President Roosevelt has re-dedicated the Panama canal to "all nations in the needs of peaceful commerce."

The hope that the great waterway connecting the Pacific and Atlantic oceans will serve the needs of peaceful trade was expressed by Mr Roosevelt in an address at the palace of President Arias of Panama, where he was a dinner guest

The president said that this "crossroads of the Americas" is being held in trust for all the world

Illustrating His Sermon

The colored preacher was describing the "bad place" to a congregation of saved listeners.

"Fyends," he said, "you've seen this here melted iron running out of a furnace, ain' you-all, white-hot steaming and blazing? Well —"

The preacher pointed a long, lean finger at the frightened crowd. "Well," he continued, "they use that stuff for ice cream in the place I been talking about."

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS
Wake up your Liver Bile
—No Calomel needed
When you feel blue, constipated and headachy, that's your liver which isn't pouring its daily two pounds of bowel bile into your bowels.
Digestion and elimination are being slowed up. Poisons are being absorbed. You feel sick, sour, and the world looks punk. Don't dose with salts, oil, calomel or purgatives that only move the bowels and make you sick. Don't be constipated. Get at the cause of your trouble. Carter's Little Liver Pills are famous for relieving this condition. Be sure to get Carter's Little Liver Pills. Refuse substitutes. 25c at all druggists.

Little Helps For This Week

"My meat is to do the will of Him that sent me and to finish His work" John 4 34

I am glad to thank
I am not bound to make
My way
But only to discover and to do.
With cheerful heart the work that God appoints
I will trust in Him.
That He can hold His own and I will take
It as will shove the work He needeth me.
To be my choicest good
—Jean Ingelow

Do not object if you feel your duties are too insignificant "What-soever thy hand findeth to do, do it with all thy might." If you have received from a father or mother, weigh earnestly what claim does lie upon you on behalf of each, and consider it as the one thing needful to pay them more and more liberally and nobly what you owe. What matter how miserable one is if they can do that Thomas Carlyle

Restored Old Castle

Chief Of Macleans Clan Kept His Boyhood Vows

Sir Fitzroy Donald Macleana, the 26th hereditary chief of the clan Macleana who just enters his 100th year has been head of the clan for over a half a century Eighty-three years ago his father took him on a yachting cruise in the Hebrides They visited the ruins of Dunrt Castle which had been lost to his family for more than a century

The boy vowed that one day he would restore the castle of the Macleana That pledge he fulfilled 61 years later when Dunrt, captured from the Macleans in the 45's returned to its ancient ownership. The event was celebrated by a grand gathering of the Macleans in Mull —London Daily Telegraph

Tribute

The use of the soybean alone for ensilage is not recommended but high quality ensilage has been produced by a combination of soybeans and corn, mixed in the proportion of about one part soybeans and three parts corn. The two crops can be grown together or they may be produced separately and mixed at the time of filling the silo. Harvesting will be easier and the mixture better obtained where the two crops are grown separately -- Soybeans pamphlet. Dominion Department of Agriculture

Social and Town News

A courtesy appreciated by your guests is to have their visits mentioned in the town news. Whenever you go away your friends will be interested to learn of your visit through this page. Send such items to The Record. Phone 33.

Mr. and Mrs. Hart Wright arrived home last Wednesday evening, after an extensive motor trip through the States.

Misses Rose and Pat White, Edmonton, spent a few days of this week with their sister Mrs. G. Neale.

Mrs. R. A. Whenham and daughters are spending several days at Elk Island Park.

Mrs. Johnston Carruthers left Monday morning for Red Deer, where she will visit her daughters and take in Red Deer's Jubilee Celebration on July 30th.

Mrs. C. H. Shore, Point Clair, Quebec, is visiting her sister, Mrs. W. G. Shore.

Rev. and Mrs. R. J. Hodgins and Lawrence, left Monday morning for Stanley, Alberta, where the latter will relieve in a duty there in that town for the next month. Rev. and Mrs. Hodgins will spend a few days at a lake seventy miles.

Ralph Cunningham of San Francisco, motored to the Fort with Mr. and Mrs. Mort Wright and will be the guest for a few weeks.

Tom Henry is holidaying at his home here after working several weeks at Chinook, Alberta.

Miss F. Harbour of Dallas, Sask., returned with her sister, Mrs. Carl McKenzie, and will holiday here.

Mr. and Mrs. J. R. Sherwin of Edmonton are visiting their daughter Mrs. Floyd Baker, and Mr. Baker.

A number of articles entered in the Edmonton Exhibition by the Fort Saskatchewan Breweries are now on display in the window of Jones, Graham & O'Brien.

Mr. and Mrs. Chas. Magor are holidaying at Alberta Beach.

Miss Helen Fossett, Mr. Jack McGrail and Mr. Bob Hunt of Okotoks were visitors in the Fort for the past week, the guest of Ralph Pocock.

In this issue we are introducing a new feature dealing with Current Events. These articles will appear weekly, and are written specially for The Record, under the heading "Observer".

Mr. and Mrs. Jack Westover and son are holidaying at Mrs. Westover's home at Bertha, Alberta.

Mrs. Alexander Hackett and her daughter Miss Blanche have arrived from Lamont, Alberta, to visit Mr. and Mrs. W. C. Pollard, of Uxbridge. Mrs. Hackett is a sister of W. C. Pollard and this is her first visit to Ontario since she emigrated from Ontario as a member of the first Perry Round Colony in 1885—being mentioned in "Pioneering in the Prairie West" and its companion "Life on the Frontier."

Mrs. Van Iffland and Mrs. L. M. Taylor, left on Tuesday, for Sylvan Lake.

Mr. Jack Holmes, Coronado farmer, has recently purchased a new type Monitor Vanclose Windmill which is being erected today.

A carload of McCormick-Deering Binders was unloaded last Thursday by the Fort Implement Company and are being set up in their warehouse. This is the first carload of binders to arrive in town this season, and it is some considerable time since such a large shipment was received in the town.

We think this is an indication that times are picking up.

Miss Olive Little, Edmonton, spent the week-end with her parents, Mr. and Mrs. W. J. Little.

Mr. Eddie Pollard of Newbrook, Alberta, is visiting friends in the Fort this week.

Mrs. W. H. White is visiting friends at Medicine Hat.

Observer

Without doubt one of the most general topics of conversation during the past fortnight has been "the jury question", under which heading I include all the questions that have been raised by the judges in a recent notorious case refusing to accept the jury's verdict. Now I have nothing to say about that case, because the courts have not done with it and until they have dealt with it finally and conclusively our discussions are more or less a hunting of the wind. I would, however, like to say something about juries in general and perhaps help to clarify our ideas.

First it may be said that in the earliest records of practically all of the European peoples there is to be found some trace of custom remotely suggesting trial by jury; in the main vague, legendary or mystical, but still it is there; the various forms of "Assizes" are also widely spread; these things are interesting mainly to the ethnologist, and indicate the groping of primitive and semi-barbarous men for some public determination of wrongs and crimes, but they are not the foundations of our jury.

Although the system is now distinctly British it is not Anglo-Saxon in its origin, but was transplanted to England sold by the Norman conqueror. What was transplanted was a practice which had grown up in Normandy called "recognition by inquest". It was used to obtain information for official purposes, that is to say since the system was feudal, for the king. It was his means of ascertaining the necessary facts for any purpose, for instance, for assessing taxation. It is probably the means by which Domesday Book was prepared. To illustrate let us assume that the question to be determined was the extent and boundaries of a farm and the tenant rightfully entitled. Twelve men from the district presumed to be acquainted with the facts were sworn to make a true answer to these questions. If they were not unanimous, or if some were not acquainted with the facts, others were added until twelve agreed. Faced with the antagonism of a conquered people, and hampered by the barrier of language, the Normans found in this inquest system a tool ready-made and admirably adapted to their purpose, and it is probably due to this that it persisted and developed in England while it decayed in France. Other jurors, you will notice, in the beginning acted upon their own personal knowledge and were chosen because they were presumed to be acquainted with the facts, and we shall see later that a long process of development ensued before this was changed; but from the beginning until our own day their function was limited to determining the facts.

Auto designers must expect a year of big winds.

School Board Accepts Miss West's Resignation At Special Meeting

A special meeting of the Fort Saskatchewan School Board was held on Monday night with Mr. F. Atkinson the Chairman and Trustees Dr. Turner and Mr. Ray present. The minutes of the last meeting held were read and adopted.

Miss A. West resigned her position as teacher which was accepted by the Board. A large number of applications for the vacancy in the primary room were received, but after consideration, the Board decided to leave the matter of the appointment until the regular meeting on the 6th. of August.

Tennis Club to Hold Cup Tournament Shortly

The Fort Community Tennis Club were scheduled to play Leduc Club in the inter-mediate Tennis League on Tuesday evening, but rain interfered, and this event will be played off at some future date. With only one more club to play in this league, the Community Club will soon announce the date for the annual cup tournament which is usually held soon after the inter-club matches.

MUCH MORE INTERESTING

Little Billy had just been told that an angel had brought him a little sister.

"Would you like to see her?" asked the doctor.

"No," said Billy; "but I'd like to have a look at the angel."

Gibbons News

The U.F.A. Picnic on Wednesday last was a great success everyone entering into the fun whole-hearted. The junior boys won their game from Redwater 11-4. The dance put on in the evening by the boys was well attended, good music was the order of the evening.

Mr. and Mrs. Edward Smith and son of Calgary visited with F. C. Moore this last week.

Ed. or Buster as he was better known visited here in 1920.

Mrs. A. C. Moore is confined to her bed with a serious heart attack.

Our C.G.I.T. Girls spent the past week at Silver Sand Beach, returning home on Sunday.

Do not forget Friday, Aug. 6, the boys are holding another dance.

Mrs. Miles Fraser of Tempe Creek is visiting her parents, Mr. and Mrs. Pete Billars. Mrs. Fraser was accompanied by her young son, Wesley. We are glad to see Mary back again.

Mr. and Mrs. James Hayes are spending their holidays at the Lake.

GREAT BRITAIN WINS DAVIS CUP: DEFEAT U.S. TEAM

Fred Perry and Henry (Bunny) Austin, representing Great Britain, defeated the U.S.A. team of Frank X. Shields and Sidney B. Wood, Jr., in the challenge round of the Davis Cup Competition at Wimbledon, England, Tuesday. This is the seventh victory in the years of Davis Cup competition. They won the cup from the French team last year.

District Gets Needed Rain Crop Prospects Excellent

After a week of very hot weather, a terrific windstorm, followed by a steady rain swept over the northern part of the province Tuesday, it bring joy to the farmers. Once again this district was favored with moisture at the most opportune time to help along one of the greatest crops in years. Grain was beginning to show the effects of the hot dry weather, Tuesday's soaking rain will have a wonderful effect on the filling process and conditions are of the best ever.

All wheat is now ripening rapidly and the prospects are for a fairly early harvest.

Lalonde's Filling Cabinet Found by Police

Mr. J. T. Lalonde was pleased to get his filing cabinet returned to him by the R.C.M. Police, which contained some very valuable documents. The cabinet stolen a week ago from the store, was found in the bush near the Horse Hills Community Hall. It had been forced open with a crow bar, which was found lying beside it. The contents appeared to be intact.

Experimental Farm to Hold Junior Farmers' Day

Junior Farmers' Field Day
Dominion Experimental Station,
Lacombe, Monday, August 9th.

In the "boom days" when towns and cities were making their mushroom growth, many of the finest young men and young women were drawn away from the farm. Booms are not always dangerous, and now in the reaction hundreds of these men and women are among the unemployed. The great majority of boys and girls now growing up on the farms will, perforce, make farming their life work. During the last ten or fifteen years very great improvements have been made in farming methods.

The margin of profit in farming is always very narrow, but while very few farmers make fortunes all good farmers are, in normal times, assured of a good living and one of the most comfortable and independent methods of living. With Boys' and Girls' grain and calf and swine clubs, judging classes and short courses, training at the Provincial Schools of Agriculture and, for a few, a course in agriculture and home making at the University, farm boys and girls today have opportunities which their parents and their older brothers and sisters never had.

A vital factor is to get these young people interested in better farming methods, good seed grain and good live stock, and in the improvement of their farm homes. Nowhere can this be better done than in the inspiration from a visit to the Dominion Experimental Station, Lacombe. The programme for the Junior Farmers, and boys and girls' clubs on Monday, August 9th, will give an opportunity to see the many branches of experimental work including horticulture, bees, poultry, grain and forage crops, cattle, swine and horses.

An invitation is extended to all the older boys and girls and young men and young women on farms to visit the Experimental Station for this special Field Day. The programme has been planned particularly for young people, but parents are urged to come with their boys and girls. Bring food for your lunch and supper. The Experimental Station will provide coffee, cream, sugar and cups.

GOOD HOPE NEWS

Mr. Chas. Thomas is visiting in Winnipeg for the next two weeks.

Good Hope ball team met Tofield at Partridge Hill last Wednesday and played a game of baseball. The latter winning with a score of 21-5.

Good Hope also played at Ross Creek on Friday, July 27th, Ross Creek winning 5-4.

Born to Mr. and Mrs. William Hilde on Wednesday, July 13th, a son.

Born to Mr. and Mrs. Lee Golden on Sunday, July 25, a son.

Mr. and Mrs. Higgins of the Fort, are visiting at the home of Mr. and Mrs. A. Macdonald.

Ray Johnston is holidaying at Elk Island Park for a couple of weeks.

Mrs. Glen McGint is visiting at the home of Mr. and Mrs. Strode of Vegreville.

Mr. J. C. Cripps returned home last Saturday, after spending a lengthy holiday in Ontario.

Mr. Hector Wheaton is a visitor at the home of Mrs. D. Cranston.

Two Scouts were riding on a train. They were both heavy smokers. The first Scout said to the other, "Bill's got a match?" The second handed him a match. The first Scout fooling around in his pockets said, "Blimey me! Ah seem to find me' bacca." The second Scout holding out his hand, said: "Wool, ya'll no be needin' the match then."

"SALADA" TEA

"Fresh from the Gardens"

Conscience And The "Talkies"

Hollywood and the motion picture industry have been occupying even more than their accustomed share of the newspaper spotlight during recent months and to some effect. There are indications the results of inquiry and publicity will have a salutary (if not, sanitary) influence upon the production standards for the screen and admission of the theatre-going public.

The tremendous potency of the "talkies" as agents for popular uplift, perhaps transcending that of the pulpit or the press, has found all too belated recognition in official quarters. Steps should have been taken, years ago, to ensure the influence exerted should be for good, for the blessing, not the debasement, of public taste. Institution of a mere direct and rigid censorship at the source of supply now, appears very much like closing the stable door after the horse has been stolen. Many horses have been thieved already.

Dudley Nichols' play and had the immediate notoriety of being classed as "U.S. Public Enemy No. 1", just as he left a Chicago theatre where a "serious" picture had been showing, came in a conversational burst commentary upon the feature of the business which had been engaging public attention. There had been a surfeit of "crime" films—pictures which, despite the candour of a little stuffy talk, had tended to metamorphose the "public enemy" into the "public hero", to throw a romantic glamour around the gangster and his "Moll", to augment the sordid and the sensational. The morbid and degrading curiosity of the mob which battled for magnificent examples of the dead Dillinger (the blood-stained garments and bullet-pierced paving stones) can be construed only as a species of hero-worship—a hero worship gone hay-wire, become depraved and distorted.

The second picture had been accompanied by an apparently endless string of "sex" films. It was only right, therefore, and to be expected, that the passionate climax to the first should be paralleled by an equally sensational climax in the case of the second. The "sex" series ended in a notorious "morals scandal" trial which occupied the attention of a Hollywood court at the very time police were ending the hectic career of the gangster.

There is no gainsaying that presentation of crime and sex in the average film has been anything but a healthy influence; nor can it be gainsaid that the sole criterion of motion picture production in the past has been box-office receipts. Such a criterion inevitably led to over-emphasis of the sensational, the fascinating of the thrill, and the soothing of a little nerve sentiment has never been applied in sufficient damage to neutralize the possible evil effects upon impressionable minds of scenes and sounds of doubtful moral quality.

Action finally has been taken to impose a new and stricter censorship upon the film industry, which proposes to segregate the more harmful features of Hollywood box-office attractions placed in circulation. The censorship will apply not only to the pictures themselves, but also to the advertising procured for this purpose.

Concerning the average story submitted and accepted, these opportunity is a reason why they should be trite and commonplace both in theme and presentation. Apparently, there is a premium upon the banal. James R. Grogan, noted playwright and actor, has been giving some rather caustic advice: "How To Write A Talkie" to readers of the Los Angeles (Cal.) Mercury. He advises aspiring scenario-writers never to try for style, and never to write like a Galsworthy, a Hardy or a Hudor Fort; bare-bones and nothing is wanted. He concludes in this vein:

"Never mind feeling ashamed of the story—send it off at once before your conscience gets going. And as soon as you've sent it off, start on another of the same one nearly slightly different. When your first story comes back from the first film company, send them the second and send the first to another firm. When you have about a dozen stories, keep them circulating. Don't hesitate about sending the same people a story which they have once rejected. They have probably changed their reader in the meantime."

Apparently the motto for those who seek this way to wealth is: "Abandon conscience those who wish success".

Building Activity At Coast

Considerable Construction Work Going On In British Columbia

Considerable activity is noted just now in British Columbia construction circles. Shack-sacrificing, theatre-building and home-building are items in numerous recently signed, high-ranged contracts let in the metropolis of the Coast and in many of the Great Central Dominion. Grand Central lake, which is being built at Fort Alliance. Cost of the plant is estimated at about $400,000, and an average of 300 men will be employed.

Home ownership of the same species here more than three million.

Scientists Are Puzzled

Striped Trout In California Is Producing Fish Lemons

Fish lemons are being grown in California. They are growing on one of the trees in a grove which has become a Mecca of astounded scientists who gaze at this phenomenon with eyes bulged portentously and gravity placed themselves. The eggs and first of the lemons are a vivid pink, but this is not the only strange feature about the tree. The trunk and branches are striped, while some of the branches are white and others green. The white lemons are quite lemony.

A German baron owns 30,000 fleas.

Lessoness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels.

Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly.

Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 80 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Giant Mersey Tunnel

Huge Engineering Feat Is Formally Opened By The King

The world's largest underwater roadway, the giant new Mersey tunnel between Liverpool and Birkenhead, was recently formally opened by the King.

His Majesty pressed a golden switch which rolled back huge green and gold curtains, and formally declared open what has been called the greatest engineering feat of modern times. The tunnel has four lanes for vehicles and broad sidewalks for pedestrians.

"When one reflects without awe on the toil and power of man which in our times has created the noble bridges of the Tyne, the Forth and the Sydney harbor, and has driven also tunnels such as this in which we witness streams of wheeled traffic may run in light and safety below the depth and turbulence of tidal waters bearing the ships of the world."

Thus spoke the King at the Queensway in honor of the queen.

It was conservatively estimated more than a million persons were present.

The tunnel has been under construction for seven years. Outside of the actual boring the chief difficulty was that of ventilation. The total cost is estimated at $26,000,000. The tunnel contains a three-mile roadway of special construction.

Chosen For Canadian Girls

Australian Lawrenceburg Hopes Some one Will Copy His Designs

"For the instruction of Canadian girls" an Australian lacemaker, William Blacker of Home Beach, Queensland, has sent to Canada a specimen of lace and two handcarved scrutiny sticks. They are in the hands of Col. Wilfrid Bovey, president of the Canadian handcraft guild, at McGill University.

In the letter which accompanied the specimens, Mr. Blacker explained he learned to knit and to make lacing sets during a long illness in his boyhood, and later used the experience to make new ones as wee or tea cloths. The inspiration for the wood carving, he said, was gained through watching Australian aborigines at their work.

Mr. Blacker complained that very few of the girls with whom he has come in contact in Australia have the necessary proficiency in knitting and not making, and they have not the time to learn; so he fears that his skill in lace making will be lost. Thinking that, because "of the long, cold winters" in Canada, the girls there may be more ready to sew, knit and knit, he sent samples of his craft and expressed the hope that some Canadian girl "who takes an interest in artistic matters may enjoy trying to produce something that will be a novelty."

Receive Big Salaries

Motion Picture Stars Receive More Pay Than U.S. President

The United States motion picture industry, even while suffering a loss of $18,500,393 last year, was shown to have given 110 people larger salaries in 1933 than that received by President Roosevelt.

Three others equalled Mr. Roosevelt in the salary he would have received without his governmental pay cut—$75,000.

The peak yearly pay cheque for the industry, $213,595, went to Eddie Cantor, as unnamed actor. The second highest, a salary of $200,385, went to an "artist" who received $10,000 a week. Clark Gable or Jean Harlow?

These figures were contained in a report of N.R.A.'s six months' study of the prevailing, disturbing and chaotic branches of the film industry.

With the exception of hardwood, the grains ground in Canada during May, 1934, were lower than in May last year. The exception is hardwood, with the comparative figures for May last year in brackets, were, wheat, 8,356,707 (6,009,981); oats, 878,500 (621,591); corn, 156,344 (104,004); barley, 67,979 (40,213); buckwheat, 2,886 (3,766), and mixed grain, 781,200 (1,021,976).

In his youth, George Washington made a trip to Barbados in the West Indies.

Corporal Stallworthy Recommended To Shackleton As Weather Expert

Corporal Stallworthy, Commissioner Fred Wallace's Shackleton leader of the Oxford University expedition into the Canadian Arctic this summer, asked the Canadian government for an experienced expert on conditions in the frozen wastes of the far north. Corporal F. H. Stallworthy of the R.C.M.P. formerly a constable in Alberta and now at Ottawa, was immediately named.

Famed for his exploits in the book by Ellesmere Island district Cpl. Stallworthy will accompany the expedition to that territory where it is hoped Shackleton will establish the base.

Five years in various parts of the Arctic and his splendid work on the north penetrating where, at times he was marooned for a whole year, have fitted Cpl. Stallworthy for this new post in his life.

Last November, Miss Hilda Austin, daughter of the rector of St. Catherine's church, Ilkley, married Cpl. Stallworthy and during his absence in the north she will remain in England with her husband's parents. The expedition planned the journey into the north from the European side and while in Ellesmere land will make an attempt at reaching the north pole.

Huge Producer Of Gold

Export Bullion Output Will Be Second Largest in World

Soviet Russia now ranks as the second largest producer of gold in the world as the result of spectacular output gains in the past two years, the most recent estimates, official and otherwise, indicate.

The 4,000,000 fine ounces of gold which the Soviet Union is expected to produce this year would outstrip both Canada and the United States, long rivals for the position of runner-up to South Africa. Russian output in 1933 is officially placed at 2,680,000 fine ounces by the government, a gain over 1932 of 12 per cent. and more than twice the annual average of Czarist days.

The Soviet government plans to have spent more than 350,000,000 rubles in the last four years on the gold mining industry. Its foreign orders for gold mining machinery have grown visibly. Officials of the Bolshevik regime assert that Russia's gold deposits are well-nigh inexhaustible and that the U.S.S.R. some day will exceed even the Transvaal, richest gold source ever found.

Tree Planting Plan

Shelter Belt 100 Miles Wide From Canada To Texas To Be Planted

United States Secretary of Agriculture Henry Wallace announced that work would begin immediately on a $75,000,000 project to plant a forest shelter belt 100 miles wide extending from the Canadian border to Texas.

President Roosevelt in an executive order signed July 11, allocated $18,000,000 of emergency funds to begin work.

Canada is specifically mentioned in an order issued by the German government imposing the importation of $100 bill Germany. All imports from the Dominion must be shipped direct in specified ports and be subject on arrival to inspection for San Jose scale and railroad worms.

Hunting coyotes with snowmobiles has become a popular sport in Manitoba.

To Save Sugar Crop

Flies Scourge From Brazil To Scottish Guiana By Air Mail

Three men nearly lost their lives on a journey of 1,500 miles to bring some flies from the interior of Brazil to Georgetown, British Guiana. The flies, it is hoped, will save the chief product of this British colony—the sugar crop. In six special parcels upon the first have travelled 500 miles along the Orinoco to Para by fast motor launch, and then 1,000 miles by air mail. They have been brought to fight the moth borer, a pest which at present destroys about 20 per cent. of the sugar crop by burrowing through the sweet cane. They are "Amazon flies," and their existence and partiality for moth borers was discovered after two years of research by Dr. J. G. Myers, of the Imperial Institute of Entomology. Dr. Myers set out to bring a "force" of these flies with a number of assistants, and has had an adventurous journey. The launch in which he brought the flies down the Amazon had to be carried on a bullock wagon over twenty miles of mountainous country. Once the boat was swamped in rapids, and Dr. Myers and his two chief assistants had a narrow escape from drowning. All the scientific instruments for the expedition were lost. But the flies were saved and, if conditions suit them, they should obliterate the moth borer.

University Gets Radium

Most Valued Possession Of Late Madame Curie

The late Mme. Marie Curie's most valued possession, a gram of radium purchased for her in 1921 with funds raised by a committee of American women, has been presented on to the University of Paris with the stipulation that her daughter, Irene Curie be permitted to use it at will.

Mrs. William Brown Meloney, chairman of the Marie Curie radium fund, said she received word to the effect.

Mme. Curie's daughter is herself a distinguished physicist, having virtually grown up in her mother's laboratory and serving as her principal assistant for years prior to Mme. Curie's death on July 4.

Mrs. Meloney expressed a belief that the radium constituted the only property of value left by Mme. Curie. With the exception of a meagre bank account, a plot of land in a Paris suburb and personal effects.

Flour production in Canada for the month of May this year amounted to 1,176,633 barrels, exceeding the amount for the previous month but lower than that for May last year when 1,304,181 barrels were produced.

"Many a young woman," says Dorothy Dix, "has helped her husband to the top of the ladder." Sure, and then decided to keep the picture elsewhere.

Observer

(Continued from last week).

The Frankish request was adopted, as we have seen, as a convenient instrument for the purpose of determining the facts in issues arising between the king and his subjects. The extension of the system to issues between subject and subject, i.e. to private disputes, began with questions of disputed tenancy and inheritance. Now the accepted method of trying such disputes had undoubtedly been used for the matter of that mentioned for long afterwards to be) the trial by combat, but by a statute of Henry II a defendant in such a case was enabled to decline trial by combat and choose trial by assize, which was conducted as follows: "The sheriff summoned four knights of the neighborhood, who, being sworn, chose twelve more, and the knights most cognizant of the facts to determine on their oaths which had the better right to the land. If they all knew the facts and were agreed on their verdict, well and good; or, if some were ignorant of the facts, that fact was certified to the court and new knights were added until twelve were found to be agreed. The same course was followed when the jurors were not unanimous. New knights were added until twelve were agreed. This was called affirming the assize. You will bear in mind that this agreement of the twelve was arrived at upon their own knowledge of the questions in issue and not upon the testimony of witnesses, but you have there the beginnings, the germ, from which our jury system grew. It might appear to us at this day as strange that this practice did not immediately by reason of its obvious advantages displace all more barbarous forms of trial, but it is the fact nevertheless that trial by ordeal persisted until abolished by the Lateran Council in or about 1220, and Blackstone in his Commentaries in 1758 gives seven species of trials in civil cases, including "by witnesses, by wager of battle, by wager of law, and by jury," to omit existing by the law of England. When you hear, therefore, as you may, someone with a flavour of the demagogue about him declaim that our forefathers by Magna Charta wrested trial by jury from the wicked king and established it as the inalienable right of every Free-born Englishman you will deliberate a moment before pronouncing judgment. In the first place you will remember that the barons in initialing in the Magna Charta the clause that no man should be condemned but by the judgment of his peers and by the law of the land were no doubt thinking mainly of the titles and estates of themselves and their compeers and in the second place that by the "judicium parium suorum" they signified no such jury as we have today but such a one as we have above described.

Japan has about 900 woollen and worsted weaving mills and imports 96 per cent of her wool from Australia.

Here and There

The Open Dominion championship match in the Dominion Marksmen Rifle Shooter competition was won recently by the Canadian Pacific Railway Ontario pipline team with a score of 1435 points out of a possible 1500. R. C. M. P. civil and provincial police also competed.

Plans for the musical festivals of Western Canada during the coming year with a tentative division of points for the first two seasons, were featured at a meeting of delegates of Western Competition Festivals recently at the Palliser Hotel, Calgary.

John Jacob Astor and his bride have decided to spend their honeymoon tour to the Canadian Rockies and British Columbia. "We intend to stop over at Lake Louise," said the young millionaire, "and then move on to Vancouver, taking in the sights on the way."

Captain R. G. Latta, skipper of the liner Empress of Britain and commander of the Canadian Pacific fleet, retired from active duty recently. He was succeeded on the bridge of the British by Captain R. K. Stuart, V.C., D.S.O., R.N.R., R.D., R.N.R. Captain Stuart was promoted to the post of commodore of the Canadian Pacific fleet.

Indicating the trend towards greater production and recovery of business, substantial increases in the second quarter of 1934 as compared with the corresponding period of 1933 is shown in the recently published production figures of Consolidated Mining and Smelting, one of world's greatest mining companies.

Driving a jaguar, Stanley Somerville into the Canadian Pacific Railway depot at the end of the Calgary-Edmonton run recently, A. N. Robbirt, veteran conductor, completed 42 years of continuous service with the railway, most of it at the throttle of an engine. "I have always liked my work and I hate to quit", said Mr. Robbirt.

A RIDICULOUS STATEMENT

It is absolutely ridiculous for Easterners to kid themselves and try to kid others into believing that they have been very generous and kind to the West. Instead of the West "sponging" on the East it has been the other way round. One high tariff policy is maintained for the benefit of the East and it injures Western farmers. It is a toll-gate at which the West has to pay 365 days in the year.

To claim that the West ought to be grateful to the East for all the millions of dollars that have been poured into it is just so much piffle. The money-lenders are not philanthropists. They do not give money away, and they do not lend money for the sheer love of the thing. They know money simply becomes they figure it is good business for them to do so, and they refuse to make loans unless they have excellent reasons for having that the loans will be repaid.—Canadian Countrymen, Toronto.

INSURED IDIOCENTS

That even motor insurance claim forms can be humorous would appear from the following statements made in all innocence by the insured

"To avoid a collision, I run into the other car."

"I thought the side window was down, but it was up, so I found out when I put my head through it."

"I told the other idiot what he was and went on."

"I collided with a stationary tree."

"I heard a horn blow and was struck in the back—a lady was evidently trying to pass me."

"I unfortunately ran over a pedestrian, and the old gentleman was taken to the hospital much regretting the circumstance."

"I ran into a shop window and sustained injuries to my wife."

"I was overhanging my car when it was stolen."

"There were plenty of leaders—so I took two."

"The car in front stopped suddenly and I crashed gently into his luggage van."

"I enjoyed a lady crossing the street."

"The accident was due to the other fellow narrowly missing me."

Mistress (ringing): "My love, my baby."

Peppo: "That's right, you teach him to buy low and I'll teach him to sell high!"—Widow.

Canadian records show that by using two fans in refrigerator cars, one at each end and in diagonally opposite corners, the temperature of fruit can be reduced a matter of 20 degrees in 8 or 10 hours fanning enabling the fruit to reach the customer in good condition.

WORLD HAPPENINGS BRIEFLY TOLD

Blood experts in Germany claim to have developed an alloy nearly as hard as diamonds for cutting tools.

To cope with a potato shortage the reich government has lifted import quota restrictions on potatoes from Holland, Belgium and Italy.

Sir Hubert Wilkins British explorer left Croydon by airplane for Singapore to join the Lincoln Ellsworth Antarctic expedition.

A new museum of antiquities has been opened at the ruins of Corinth to house relics found in 60 years of excavation.

In the first four months of 1934 building plans in Johannesburg exceed the total value of plans for the whole of 1933 by $500,000.

The Prince of Wales received 300 war pilgrims from South Africa in the grounds of St. James's palace, the party being from a pilgrimage to the battlefields of France and Flanders.

A collection of 300 letters belonging to Napoleon Bonaparte which were apparently abandoned when Napoleon fled from Moscow in 1812, were reported found in a box in a corner of the Kremlin.

Helen Boucher, French air woman set a new world speed record for light planes weighing 12,500 pounds by covering a 1,000-kilometre course at an average speed of 204 kilometers per hour.

Married recovery was noticeable in the amount of customs duties collected during the first five months of 1934 compared with the same period of 1933, the Dominion bureau of statistics reports.

Hon. G. Howard Ferguson, Canadian high commissioner to the United Kingdom, held a London audience the world looked more than ever before Britain for leadership, Mr. Ferguson was speaking at the opening of an exhibition of Canadian products.

Has Ingenious Idea

When In English Accountants Use Pen Old Razor Blades

There is one man at least who has solved the question that torments hundreds of families what to do with used razor blades.

Moreover, he is prepared to take other people's old razor blades and use them for the greatest good? He is Mr M. J. Harvey, borough surveyor at Hythe, England.

Mr Harvey has hit on the ingenious idea of using safety razor blades to keep down the weeds in the Royal Military canal.

An official of Mr. Harvey's department said that scores of them are strung on rod to a long wire, which is weighted with lead.

A workman on each side of the canal then drags the contraption through the water and good-by, weeds! The device has been found so effective that there is hardly a weed in the canal and the old method of cutting them from a barge has been dispensed with.

Library Is Popular

People In English Cotton Town Are Great Readers

Great Harwood, the cotton town near Blackburn, England, claims the distinction of being the best read town in the country.

Of its 12,787 inhabitants, more than 6,000 are registered readers of the local branch of the county library.

Membership has increased steadily since the library was opened about three years ago, and so great is the demand on its service that the question has arisen whether to increase the premises.

It is common to see a queue of borrowers waiting outside the library doors.

It is only a small wooden building and people have to take their turns in selecting the books they want.

During the last twelve months 100,000 books were issued.

The estimated consumption of creamery butter in Canada for August 1934 was 18,763,676 pounds, showing an increase of 682,224 pounds, or 3.63 per cent., on April 1933.

Little Journeys In Science

THE LIVING CELL

(By Gordon H. Scott, M.A.)

To Robert Hooke, an English botanist, goes the credit for the discovery of the cell. It was about the middle of the seventeenth century that this scientist, while examining a piece of cork under the newly discovered microscope, observed that it was made up of a number of cells of which he gave the name of "cells". Other scientists continued to study these cells but it was not until one hundred and fifty years later that Brown and Dujardin commenced to study the contents of these cells.

These scientists new them as an agglomeration of very small bags which were independent of each other and contained a substance which they called "protoplasm". Protoplasm possesses the property of changing the materials received from the blood stream, oxygen and food, into living matter. How this change is to be taught about is still a mystery. All that science knows is that water and blood, for example, contain the same atoms as the deadliest of poisons. Food causes the cells of living organisms to grow and increase in number, whereas poisons bring about their destruction.

When examined under the microscope the cells seem to consist of a nucleus suspended in the protoplasm, the latter being a more or less viscous translucent material. The whole cell is held together by a protective membrane which is the protoplasm in nature. In certain organisms, however, we meet with cells that have no membrane. This membrane is missing and that the cells are simply drops of liquid without any protective coating. In these cells are found masses of carbon, oxygen, nitrogen, hydrogen, sulphur phosphorus, nickel, iron, arsenic, lime, zinc, titanium, vanadium and molybdenum perhaps gold. Because who can say with assurance what elements exactly enter into the construction of a living cell.

Science has discovered very little as yet about the nature of protoplasm, because no sooner do the men of science attempt to analyze it than the cell is no more. Examination of dead protoplasm gives no further clue to the phenomenon called life.

Scientists cannot agree on the number of cells of an adult human being. Some say a billion billions, others estimate it at only sixty billions.

Has Gone Air-Minded

Dawson Creek Building Landing Field For Big Planes

Dawson Creek, the terminus of the Peace River district of British Columbia, is becoming air-minded. Not content with a landing field for small planes, the town is building a field to accommodate the largest aeroplanes in existence, with the advance aviation has made in the north country. The air-minded have citizens become they have voted to move the curling rink, tennis court, basketball court and baseball diamond to provide a field large enough for a tri-motored aeroplane to land and take off.

Public streets take up one-third of the area of Manhattan Island.

To Increase Vision

Optical Device May Be Used And To The Near Blind

An instrument of what he termed the "microscope spectacle", an optical device to increase visual acuity by 250 per cent. and employing a "new principle" in optical science, magnifying the vision of the partially blind beyond that of any other known device, was made at Toronto by Dr William Feinbloom, of New York, before the international congress of the American Optometric Association.

Dr. Feinbloom said he had been working for nine years on the problem of achieving this maximum magnification of vision for the near blind in a convenient form that could be worn like ordinary spectacles.

Boat Driven By Car

Man Being Tried Out On Thames In England

A strange craft was seen under going trials on the Thames recently at Putney, England. It consisted of a large, flat-bottomed punt containing a four-seater motor car with a 12 h.p. engine, from which the punt derives its motive power.

Paddles are fixed to the rear wheels of the car, which are jacked up off the bottom of the punt, and these wheels, set revolving with the running of the car engine, cause the paddles to churn the water. The inventor has only to drive his car on to the punt and couple up.

Most of the manners in the automobile world are possessed by gasoline station attendants.

SUNDAY SCHOOL LESSON

JULY 22

ELIJAH HEARS GOD'S VOICE

Golden text: "Speak, Lord; for Thy servant heareth." I Samuel 3:9.
Lesson I. Kings 19:9-21
Devotional reading: Psalms 37:1-6

Explanations And Comments

Elijah's Lament at Horeb, verses 9, 10. A week ago we left Elijah on Mount Carmel. Now he has reached his destination and we are told about his experiences there. He had, in a cave, and the word of Jehovah came to him. And just as we should listen to a virginal, kind dialogue between Jesus and Satan through what struggles of mind Jesus passed, so here in the Old Testament by a similar method, a dialogue between God and Elijah. We are given a glimpse of what passed in the mind of the prophet's mind.

"Elijah had been the chief actor in a stirring drama, but away from the footlights he had to find his bearings in a new situation. In retreat from the wrath of Jezebel he was overtaken by such a doubt as vexed the soul of Hamlet. 'The world is out of joint: O cursed spite that ever I was born to set it right!' But, unlike Hamlet, the prophet had a refuge. He found his way to Horeb that sanctuary of nature curtained by clouds, that temple of Jehovah not made with hands. And there he sought to wrestle things out in the presence of God and to find a theory in accordance with the divine will."

"What doest thou here?" was the word to Elijah. Did it mean that Elijah had come to Horeb because there Moses had communed with God, and he should have known that he could meet God anywhere?

The Cure of Despondency, verses 15-18. God recommissioned Elijah. The post he had thought to lay down until the end of life. He must leave the refuge of the cave and get to work. He was not at the end of his life's work. He was more for him to do. There were new leaders to be found and anointed for the work. On the way to Damascus there was Hazael (now a general of Benhadad) to be anointed king over Syria, and Jehu (an officer at this time in Ahab's army) to be anointed king over Israel, and Elisha to be anointed as prophet to take the place of Elijah himself.

A "Railroad Zeppelin"

Shows Speed On Trial Run From Berlin To Cologne

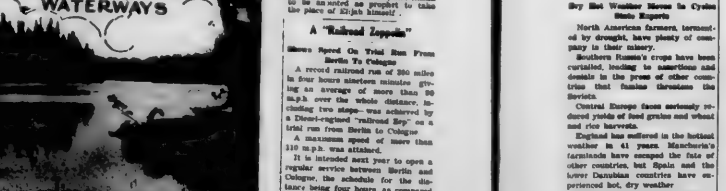
A record railroad run of 200 miles in four hours nineteen minutes giving an average of more than 90 m.p.h over the whole distance, including two stops—was achieved by a Diesel-engined "railroad Zep" on a trial run from Berlin to Cologne.

A maximum speed of more than 110 m.p.h. was attained.

It is intended next year to open a regular service between Berlin and Cologne, the schedule for the distance being four hours, as compared with seven hours taken by the fastest steam train.

A "railroad Zep" service to Hamburg has been in operation some months, the time for the 196-mile journey being two hours twenty minutes.

In two years, records of Oregon state penitentiary show that out of 287 new prisoners 64 were college graduates, 203 had high school educations, 613 had common school educations, and only 23 were illiterate.



HANGE is the prime resource of a vacation and a canoe trip in Canada is one method by which the stress of daily life can be exchanged for a tranquil, carefree existence. It may be for a limited time only but its effects are felt all the year, round. Sending crowds, rumble of traffic, but pervasive quiet visited air here, no phone in the life of the hermit, no phone

A large number of interesting routes are outlined in "Canoe Trips in Canada," a booklet recently issued by the National Parks of Canada, Department of the Interior, Ottawa. Following the routes described therein no one can drift lonely along or relive the strenuous days of the voyageur. There are routes which lead for a hundred miles through cool, virgin forest and lake with alternating wilderness and light settlement country. There are long, smooth flowing rivers and placid lakes on

which one can travel for days, and by contrast rushing streams which rove and again break into foaming rapids and thundering falls. There are adventurous trips through wilderness country along routes once followed by Indian and fur-trader, now almost forgotten as settlers are they travelled. Other geological formation, cold, fog, good fishing, the abundant and the picturesque await the adroit of canoe and paddle. Canoeing and the picturesque small

Has Plans For Utilization Of Canadian Wheat Surplus By Producing Valuable By-Products

Plans for utilizing the Canadian wheat surplus to produce valuable by-products by chemical means are being earnestly considered by a scientist at the Canadian Pulp and Paper Research Institute at McGill University.

Dr W. Boyd Campbell, consulting physical chemist to the forest products laboratories at the institute, discussed wheat surplus in an interview. He stated that in China, by an ingenious method, scientists had succeeded in producing a valuable substance known as monosodium glutamate from wheat, and added that the success of the possibilities of converting wheat into more costly products had only been scratched.

"If the Dominion," he said, "were to spend a small fraction of the money it has spent on providing transportation and handling facilities for the Dominion's wheat crop on research for new outlets and new uses of wheat, I believe that the wheat surplus would in time be a forgotten legacy. I would suggest that the Dominion government include in the budget, as a start in the right direction, the sum of $200,000 to be used in this research over a period of five years."

The monosodium glutamate being made in China, of which Chinese have sold between $1,000,000 and $2,000,000 worth annually, was until recently a rare chemical found only in research laboratories in America.

It is used in China and Japan much the same as pepper and salt are used here. It is a condiment used by housewives, restaurants, Buddhists and other vegetarians to impart a desirable flavour to vegetable food. As a flavoring agent it is 15 times more powerful than cane sugar and seven times as soluble than salt.

Canadian wheat, with its comparatively high content of protein, is the best wheat for manufacture of this condiment, the scientist said. China has been making it for several years and production is shortly to be undertaken on this continent.

An Buddhists regard it against their religion to eat any meat or any food prepared from an animal sacrifice, the condiment has a wide sale in the east. Wheat worth two cents a pound was then transformed into a substance worth from $1 to $8 per pound.

But this was only scratching the surface, Dr. Campbell said. Many uses could be developed, Dr. Campbell said in suggesting $500,000 be spent on research in this direction. He pointed out: "This amount seems small when we consider the millions spent in establishing shipping facilities at Churchill, improvement of St. Lawrence waterways, building elevator terminals, and on creation of extensive transcontinental and branch line railway facilities for facility in the movement of Canada's wheat crop."

Heat Has Its Course

Sky Hot Weather Moves In Cycles Static Reports

North American farmers, tormented by drought, have plenty of company in their misery.

Southern Russia's crops have been curtailed, leading to assertions and denials in the press of other countries that famine threatens the Soviets.

Central Europe faces seriously reduced yields of feed grains and wheat and rice harvests.

England has suffered in the hottest weather in 41 years. Manchesin's farmlands have escaped the fate of other countries, but Spain and the lower Danubian countries have experienced hot, dry weather.

Ash the experts what the cause is and they answer that no one can explain fully. Dry and wet weather move in cycles, weather bureau men say. The present dry "spell" started about 1930. The hope is expressed that it has about run its course.

Japan announces that she is China's boss, but after 1,000 years of that sort of thing China can still say "Oh, yeah!"

Huge Machine Moves 400 Tons Of Earth At Once

The largest electric excavator ever manufactured in Europe is now being erected at Corby England, for use at the rolling mill plan being constructed for the production of steel tubes

The excavator is to be used in the fields adjoining the works for stripping to a depth of fifty feet to seventy-five, the soil or overburden which covers the iron ore needed to feed the huge furnaces of the rolling mills. The machine, which is also known as a stripping shovel, is capable of removing some 500 tons of earth an hour. With it earth can be dug, lifted, rotated, and dumped.

The unusual size of the excavator is indicated in the facts that the jib is 160 feet long; the bucket which can cut the earth weighs twelve tons, has a capacity of nine cubic yards, and is capable of holding a full-size saloon car.

Check Soil Drifting

Alberta May Pass Hose Regulations For Compulsory Tree Planting

How to get more trees across the face of the country in order to check the drifting soil, stop drifting of soil, and incidentally beautify the landscape is one of the questions that the Alberta government is now taking up.

Now regulations that will compel homestead entrants to retain a portion of their land under timber are being considered and may be passed shortly, it was stated by Premier Reid.

It is believed that the passage of regulations requiring homesteaders to keep from 10 to 15 acres in bush and wood-lot on each quarter section of land would have a beneficial effect both in the way of controlling the soil drifting and checking the intensity of the winds.

Combination Is Better

Soybean And Corn Make Good Feed For Hogs

The use of the soybean alone for ensilage is not recommended but high quality of feed has been produced by a combination of corn and soybeans, mixed in the proportion of about one part soybeans and three parts corn. The two crops can be grown together or they may be produced separately and mixed at the time of filling the silo. Harvesting will be easier and the mixture better obtained where the two crops are grown separately.

Baseball shoes cost $16.50 a pair. They're made of kangaroo and the average player wears out two pairs of shoes during a single season.

LOVELY MODELS FOR FIGURES ABOVE NORMAL WEIGHT

It's delightfully slimming besides being so cool and smart.

Here's a dress that will stretch your budget for you. It's so comfortably cool and smart to wear in so many places.

It's exceedingly becoming, sketched in white tub silk with nautical blue coin dots. Striped, checks and gay floral prints could also be used very effectively.

This model entirely in plain pastels in tub silks, pique, linen, etc. is also most attractive.

Style No. 404 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. To require 3½ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada Was First Country In The World To Institute A Practical System Of Egg Grading

Require Delicate Care

Oyster Raising Is No Slip-Shod Business Shuts Exports

Tasteful oysters, a delicacy meticulously prepared by the chef, need just as delicate care in their nurturing in the opinion of J. J. Cowie of Ottawa, secretary of the Biological Board of Canada. With Dr A. T. Cameron, chairman of the board he inspected the Ellerslie station in Prince Edward Island, where research work in the cultivation of oysters is proceeding.

The station was established in the first place to discover how Malpeque Bay could be restocked with oysters since the bay was denuded of that shell-fish some years ago, and in the second place the work is intended to develop and demonstrate the best oyster growing methods which may be applied in oyster areas throughout eastern Canada," they explained.

This advice is especially valuable at the present time in connection with the booming of areas by the department of fisheries," Mr. Cowie said.

Dr. A. H. Needler, the expert in charge of the work, has surveyed hitherto unproductive areas in the east of Malpeque Bay, and under his supervision some of these will soon be leased for oyster culture.

This oyster raising business cannot be handled in a slip-shod manner The tasty shell-fish demands a lot of care and study before they can be harvested in wholesome quantities.

Non-Profitable Producers

Hens Completing Moult By September Should Be Sold

Hens that complete their moult and have a complete set of feathers by September 1 should be sold as non-profitable producers. The hen that has not moulted by mid-September, is still laying eggs and will continue to do so as long as she is permitted to get a full supply of eggs and feed during the shortening days of fall. Natural moult of the best layers comes after October 15 and will last for but a short time, providing the egg laying feeding schedule is maintained through the moulting period. The natural moult of the poor layers appears about the first hot days of summer in June and lasts till fall. The poor layers do not get back to laying till after the moult, another reason the poor layer is also a lazy hen and will not eat enough to keep her laying.

In Canada and the more northern latitudes and on the bogs of mountains, the duration of twilight during summer is much greater than on the lowlands or in places nearer the equator.

NIGERIAN CHIEFS VISIT ENGLAND FOR FIRST TIME

A happy snapshot of the Sultan of Sokoto and his Prime Minister, the Waziri of Sokoto, as they enjoy the sea breezes en route to London from Lagos to visit England. Two other chieftains, the Emir of Gwandu and the Emir of Kano, with their cabinet ministers and suites, reached England at the same time to be guests of the British Government.

Canada Requires Best Eggs In The World

Per capita consumption of eggs in Canada is the highest in the world—approximately 380 a year. In 1933 total consumption amounted to 3,500,000,000. Why is it that Canadian flavour eggs are much? One reason, undoubtedly, is that the Dominion is the only country in the world that has a system of egg grading controlled and supervised by the Dominion Department of Agriculture from producer to consumer Under the system only good eggs are allowed to present themselves to the consumer as companions with the bean or bacon rashers or in the thousand or more ways in which eggs are used in the wide range of cooking

Eggs now constitute an important item in the economic life of the country as a whole, to say nothing of their incomparable worth in many respects from a food point of view Their marketable value last year even at the lowest prevailing prices for several years, totalled about $30,000,000

Canada was the first country in the world to institute egg grading in any form. It was introduced in 1918 In that year the Dominion had a substantial surplus of eggs and the British market looked up as a possible outlet, but other countries were keen competitors. The officials of the Dominion Department of Agriculture decided in order to establish a market standard of quality that all eggs exported to other countries and those shipped from one province to another should be graded as to quality, size and cleanliness and that the grades should be plainly indicated The introduction of graded eggs on the British market established an enviable reputation for Canadian eggs Wholesalers, retailers and consumers knew exactly what they were buying. The element of uncertainty as to quality was removed with grading. Such eggs soon began to command a premium over the ungraded product shipped from other countries and the grading regulations were also applied to all eggs imported into Canada. It was not long before other countries followed Canada's lead in regard to egg grading

Soon after the grading system for export eggs and interprovincial shipments came into effect, farmers began to see that the consumer is no fool and is prepared and willing to pay a higher price for an assured quality product. The advantages of grading began to be obvious to both producer and consumer. Per capita consumption of eggs in the Dominion was then about 16 dozen annually. By 1932 egg grading regulations were enacted to apply to domestic consumption. The Dominion officials concluded that if such regulations as applied to export eggs were a good thing for the farmer, then he would benefit to a greater extent if the grading regulations were made completely effective from producer to consumer in the home market. The wisdom of this step was soon made evident for the per capita consumption in 1934 rose to 23.4 dozen By 1929 it had risen to 29.05 dozen. At the present time it is between 29 and 30 dozen. the highest average of any country in the world

There are two sound reasons why the Department of Agriculture has shown so much concern and zeal about graded or quality eggs. First, that they feel that the government has a responsibility in seeing the public obtains pure or good food. It is sound business in public health which embraces several factors. Second, by insisting that eggs are marketed according to quality, the farmer gets the benefit of greater returns and the poultry industry is thus improved

Quite naturally, the grading of any product does not meet with immediate approval on the part of all producers The farmer having his eggs graded for the first time may, in fact feel something approaching resentment. But he soon realizes that grading is of great advantage.

There are 32,000,000 laying hens on the farms of Canada.

Early Quebec potatoes appeared on the Montreal market on June 26.

WORLD HAPPENINGS BRIEFLY TOLD

An unusually severe heat wave in France caused the 324-foot Eiffel Tower to stretch eleven inches upward between sunrise and sunset, an observer said.

The total cost of Great Britain's extended air force program up to 1939 will be about $160,000,000, the house of lords was informed by the secretary for air, Lord Londonderry.

France has decided to invite all the nations of the world to take part in a great international exhibition in Paris in 1937. Its estimated cost is $15,000,000.

The British Columbia canned salmon pack during the year ending June 30, 1934, totalled 1,605,929 cases, the Vancouver Merchants' Exchange reported. In the preceding year the pack totalled 830,256 cases.

Hundreds of acres of sugar beets that failed to germinate because of the drought, have been planted under by farmers in the Chatham district, according to W. H. Riddle, of the Ontario department of agriculture.

Premier T. D. Pattullo of British Columbia announced that a mountain in Mount Robson Park in British Columbia was named "Mount George Graham" in honor of Rt. Hon. George F. Graham.

Establishment of a free wheat market in the Soviet Union has been announced, and will take effect after delivery of the present harvest. The decision was made in June by the Communist party congress.

Hon. Irene Parlby, U.F.M. member for Alix and minister without portfolio in the provincial cabinet, announced at a U.F.A. constituency convention that she would not stand for nomination again.

Ralph Chawin, the first Indian to make a flight from India to Hoglend has started on the first stage of his planned flight around the world. He is going first through Baghdad, Aleppo and Istanbul, travelling eastwards.

Canada's total exports of paper and manufactures of paper during June were $7,377,892. This was lower than in May when the total was $8,494,867, but considerably greater than June of last year when it was $5,-998,610.

Smooth Sea Serpent

Giant Specimen Is Discovered By Biologist In Alabama

What may be the "daddy" of sea serpents, a monstrous, has been unearthed in exploration of the Alabama river, department, Dr. Walter L. R. Jones, state geologist, disclosed recently.

"We have already fallen out 10 feet of a 35-foot monstrous near West Bowen, in Greene county, that probably is 70,000,000 years old," Dr. Jones said.

"And in the stone county near Bestow, we have unearthed a two-ton turtle, possibly as old. Both were encased in chalk of the cretaceous age."

The Canadian milling industry provides a market for about 15 million bushels of Canadian grown barley in the manufacture of food products and feeds.

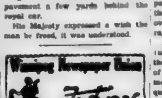
Owes Freedom To King

Man Who Started Battle At Royal Car Discharged

A man who hurled a bottle at the king and queen was discharged at police court hearing and, it was believed, had the king to thank for it.

The object was thrown as Their Majesties were returning to Buckingham from Hartihill. It struck the pavement a few yards behind the royal car.

His Majesty expressed a wish the man be freed, it was understood.



By Ruth Hoyers

THE SAILOR "GAL" DRESS A FAVOURITE WITH GROWING DAUGHTER—IT'S SO SMART AND PRACTICAL

Here's an attractive little model. Little daughter will be so proud to wear it. Don't you think it really lovely? And it's so easily fashioned for a very small outlay. You'll be surprised.

It can be white linen, pongee, cotton, jersey, etc. Make the sailor collar, tie and belt of navy blue. A blue leather belt can be worn, if you prefer it.

The tailored sleeves with plaits are especially smart and cool. Similar plaits in the skirt allow plenty of freedom for action.

Another nice idea is to carry it out in nautical blue and white dotted percale with white pique trim.

Style No. 435 is designed for sizes 8, 10, 12 and 14 years. Size 8 requires 2¼ yards of 39-inch material with 1 yard of 35-inch contrasting and 2½ yards of braid.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Journeys In Science

RAYON!

(By Gordon H. Canot, M.A.)

Rayon, or artificial silk, which has become in recent years a widely used product, resembles good paper in that it consists of pure cellulose. Four different processes have been perfected for its manufacture, but of these the viscose process is used for over 80 per cent. of the world's rayon production.

High grade alkaline wood pulp (usually taken from spruce trees), is the starting point for the production of artificial silk. Canada supplies almost 40 per cent of the world's requirement of wood for this purpose. This material, which contains largely of cellulose, is treated for ten hours with a weak solution of caustic soda which results in the formation of alkali cellulose. Surplus moisture is squeezed out of this alkali cellulose, and the material is then torn to shreds, which are left for 36 hours in a closed vessel.

A liquid known by chemists as carbon disulphide is now added, producing a substance called viscose. This solution is allowed to "ripen" for a day or two, after which it is ready for spinning. This is accomplished by forcing the viscose through fine holes, into a preparation of dilute sulphuric acid. The acid causes the fine jets of liquid to change to solid threads, which are spun into the material we know as rayon.

This artificial silk is altogether different from the natural product. It lacks the tensile strength of pure silk, but it has a fine appearance, and this combined with its cheapness, has led to it being used extensively either alone or as a mixture with wool or cotton.

Hated Talking Bird Dead

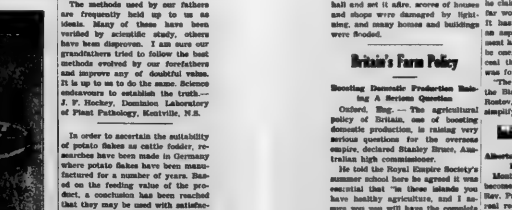
Provided Amusement For Many Visitors To St. Louis Zoo

Jocko, famous talking Mina, one of the various Oriental starling-like birds, at the St. Louis zoo, is dead from old age.

Jocko amused zoo visitors for six years. His repertoire included the following phrases:

"Hello guy", "Hello Jocko", "How are you like the rain?" "Anybody home?" and "Boy, how much money you got?"

Jocko appeared in several talking newsreels. He will be replaced by another Mina, which was Jocko's understudy.



—Cunard White Star Photo.

Making her first arrival at Montreal under the house flags of the new Cunard White Star Limited, the S.S. Laurentic, big 18,000-ton liner docked at Montreal, Saturday, July 14, from Glasgow, Belfast and Liverpool. Her master is Captain R. Sewell Quinn, and she sailed out again from Montreal on her first departure under the new regime on July 20.

SUNDAY SCHOOL LESSON

AUGUST 5

ELISHA HELPS THE NEEDY

Golden Text: "Inasmuch as ye did it unto one of these my brethren, even these least, ye did it unto me." Matthew 25:40

Lesson: II. Kings 4:1-44.
Devotional Reading: Psalm 41:1-4.

Explanations And Comments

A Widow Helped. Verses 1-7. No one can read the miracles recorded in this chapter as wrought by Elisha without remarking their similarity to some of those recorded of Elijah. Both multiplied the substance of a needy widow, both restored a dead child to life, both multiplied the loaves and gave it brings to our mind, of course, the miracle wrought by Jesus in feeding the multitude.

In our first story there is a widow in sore distress. The law allowed a creditor to take children as bondservants for a debt—see Leviticus 25:39, 41—and this woman's creditor was about to take away her two children as his opponent to Elisha for help. The method which Elisha is said to have employed to relieve her distress differs from that of most miracles of Elisha. What had she in the house? he inquired. Oil, a pot of oil. Borrow all the empty vessels you can from your neighbors, fill them from the pot of oil which you possess, then sell the oil, pay your debt, and live upon the remainder of the sum for a time. Incredible! Her needs were supplied by a divine mercy of which the oil that flowed as long as she had any empty vessels to receive it is a type.

Famine Relieved Helped, verses 38-44. There was a great famine in the land and the prophets were in dire need. Elisha made noxious pottage mix for them to eat, verses 38-41, and then made a little food go a great way. With twenty barley loaves and a sack full of ears of grain, which had been brought to him as a present, he fed a hundred people. "What, should I set this before a hundred men?" his servant exclaimed in great surprise when directed to feed them all. Said Andrew to Jesus: "There is a lad here, who hath five barley loaves and two fishes; but what are these among so many?" John 6:9.

So he set it before them, and they did eat, and left thereof, according to the word of Jehovah. "According to the word of Jehovah"; the character of this man was wholly a ministry of the word of the Lord. "By all his activity he was demonstrating to those who had the spiritual capacity to apprehend, how good and beneficent were the thoughts and instructions of God concerning his people. He deeds were expositions of his messages". (G. Campbell Morgan).

Church steeples are descended from the tower of Babel, architecturally, the ancient idea being to approach heaven as nearly as possible in worship.

Agricultural Notes

Interesting Items Gleaned From Many Sources

Cattle can eat poison ivy with impunity but dogs are poisoned by it.

For the past seven weeks, the amount of United States wheat in Canada has been shown as two bushels. On July 6 last year, the amount was 2,500,000 bushels.

In tests for feeding dairy cattle at Montana, it was found that the consumption of hay by growing heifers was greatly reduced by distiller, molasses and sprinkling over the hay.

With the exception of corn and sugar beets which show increases, there is little change in the acreages of late-sown crops in Canada, according to the preliminary estimate.

The export of Canadian cattle to Great Britain for this year up to July 13 totalled 26,115 head as compared with 23,861 during the corresponding period of last year.

For the first 26 weeks of 1934, ending July 13, the number of hogs killed in Canada was 1,719,786, a decrease of 55,339 compared with the same period of last year.

Butter, raisins and dried currants, which are the chief items in the four Australian products which do not receive the benefits of the British preferential tariff when imported into Britain.

"Handpicked" in the Fruit and Honey Act, 1934, means that, as applied to the dominion honey agricultural, it is moving into the North Adriatic, particularly Port Trieste, to keep in touch with Austrian developments.

The Italian press regarded with particular animosity the part the German ambassador to Italy played in the granting of safe conduct to the killers of Dollfuss who was to come to Italy to confer with Mussolini.

Il Duce was keeping a vigil at Riccione.

No effort was made to disguise the fact that the Austrian question is viewed in a very grave light.

"Italy is in the first line of defence for the peace of Europe," said an authoritative editorial which the newspaper Popolo Roma will publish.

It is difficult if not impossible to deny that Germany has had grave responsibility in that which has occurred in Austria.

England Gets Heavy Rain

Traffic Held Up And Lightning Causes Wide Damage

London.—Great thunder and rain storms have swept England, breaking the long drought and leaving everywhere a trail of havoc.

London experienced a downpour of tropical intensity and many roads were quickly under several inches of water. Traffic generally was held up, underground and surface train services were disrupted.

Hammersmith bridge was struck by lightning and cables underneath it caught fire, being extinguished by a fire brigade.

A thunderbolt fell in a suburban hall and set it afire, scores of houses and shops were damaged by lightning, and many houses and buildings were flooded.

Britain's Farm Policy

Boosting Domestic Production Basing A Serious Question

Oxford, Eng. — The agricultural policy of Britain, one of boosting domestic production, is raising very serious questions for the overseas empire, declared Stanley Bruce, Australian high commissioner.

He told the Royal Empire Society's summer school here he agreed it was essential that "in these islands you have healthy agriculture, and I assure you you will have the complete co-operation of the Dominions."

He pictured Britain as the centre of a great group of agricultural countries with Britain giving them the opportunity of selling their products in exchange for her manufactured goods.

Prince George is to present to the Edinburgh Zoo three lion cubs given to him by the municipality of Lydenburg, Transvaal, during his present visit to South Africa.

W. N. U. 2057

ITALIAN TROOPS ARE BEING HELD IN READINESS

Rome. — A statement emanating from official sources said that the Austrian government had requested intervention by European powers to guarantee Austria's integrity.

The statement, which was given to the government controlled press, was published shortly after it was announced that Premier Mussolini had issued war time military orders to the army, navy and air forces to the north of Padua.

The inspired press reported that diplomatic representatives of Italy, France, England and the Little Entente country, will hold an urgent conference at Vienna to determine what action should be taken.

The conference also will decide which of the powers should intervene in case armed assistance is determined upon.

Italian troops are prepared to march into Austria on short notice.

Leaves were cancelled and each unit was told to keep itself in full strength with all of its mechanical war devices in order.

The order applied to 70,000 men north of Padua.

At the same time an official communique was issued stating that the first naval squadron had left Port Arsona.

The communique did not give destination of the squadron, but authorities said that it is moving into the North Adriatic, particularly Port Trieste, to keep in touch with Austrian developments.

The Italian press regarded with particular animosity the part the German ambassador to Italy played in the granting of safe conduct to the killers of Dollfuss who was to come to Italy to confer with Mussolini.

Il Duce was keeping a vigil at Riccione.

No effort was made to disguise the fact that the Austrian question is viewed in a very grave light.

"Italy is in the first line of defence for the peace of Europe," said an authoritative editorial which the newspaper Popolo Roma will publish.

It is difficult if not impossible to deny that Germany has had grave responsibility in that which has occurred in Austria.

World Wheat Shortage

Extra Needs Shown In Year Statistical Survey

London — Wheat-starved countries of the world will have to depend for extra needs on Canada and Argentina, a new statistical survey reports.

Weather conditions have cut down the crop in the United States, completely changed the average favourable outlook in the Danube basin made crop forecasts in Russia extremely uncertain and lessened only mediocre production in Australia.

Even Canada's crop has been reduced considerably by heat waves of recent weeks.

Wheat experts here have watched a steadily mounting total of reports in recent weeks indicating disastrous inroads made by weather on previous production estimates. Prices are going up until ever last week's figures. It would appear that nearly every wheat-producing country has been more or less affected.

According to British government statistics the estimated annual total of 683 million bushels shows a surplus of 150 million bushels over domestic consumption, and hence there will be virtually no wheat in the United Kingdom available for export, as reserves must be held for next season as usual.

To Aid Stock Feeders

Credit Corporation May Help Farmers Through Winter

Regina — Provided reasonable assurance of the safety of investments is given, the Dominion Agricultural Credit Corporation has decided on a policy of assistance to stock breeders and farmers to assist them in carrying young cattle through the winter, Mr. Gardiner announced at a meeting of directors here.

An important decision which will in time affect the cattle industry of the Western provinces, it is expected to result in the placing of between 5,000 and 10,000 cattle on farms during the fall in Saskatchewan and Alberta this coming winter. The meeting and discussion then got down to the question of ways and means, it was announced by W. W. Sharp, Stettler, Alta., president of the corporation.

In all three provinces there are many stockmen who have not the feed to carry their stock and who would be therefore compelled to sell on the fall market for what they may can get. There are also many farmers having ample feed but no money to buy cattle. The aim of the corporation is to bring these two together.

Famine In Russia

Statement Says Not Less Than Five Million Persons Have Died

Montreal.—On a mission to awaken public opinion to necessity for relief to famine sufferers in Russia, Dr. E. Ammende, secretary of the international relief committee, was in Montreal recently.

The committee hoped, he said, to have surplus grain sent to Russia. Clergymen of various Canadian bodies interested in the project following his trip there, he said.

"Not less than 5,000,000 persons have died from starvation since 1933, the year our committee was formed," he claimed. "The next famine will be far worse than anyone can imagine. It has already assumed so serious an aspect that the Russian government has actually admitted there will be one, after doing its best to conceal the fact since our committee was formed.

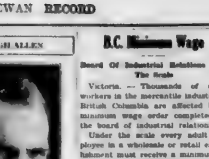
"The areas affected are all near the Black Sea ports of Odessa and Rostov," he added, "which would simplify redistribution of grain."

Indians To Receive Priest

Alberta Cree Completes Studies And Is Joining Oblate Order

Montreal.—The fourth Indian to become a priest of the Oblate order, Father Patrick Mercredi was in Montreal recently on his way to Normandin, Alberta, where he will be ordained by Mgr. Breynat.

Mr. Mercredi, a Cree Indian, was born in Normandin and was educated at all Indian schools in the Mackenzie district, at Edmonton and at St. Laurent, Man. He has just returned from France where he completed his theological studies.



HON. HUGH ALLEN

New Minister of Lands and Mines and of Municipal Affairs in the reorganized Alberta Cabinet. Born at Stella, Ontario, Mr. Allen is a graduate in chemistry who took up farming in the Peace River country. He was elected M.L.A. for Peace River in 1926, and in 1930 was returned by acclamation for the new riding of Grande Prairie.

Aspects Of A Desert

Conditions In Southwestern Manitoba Said To Be Bad

Winnipeg Southwestern Manitoba is taking on aspects of a desert as the drought-stricken district this year has extended over a greater area than ever before, says a summary of crop conditions issued by the Manitoba department of agriculture.

A strip of land 20 to 40 miles wide along the international boundary shows scarcely a single good field of grain. Soil drifting was followed by clouds of grasshoppers and hot, parching winds have withered whatever crop promised to mature.

"There really is no crop in this district west of the Red River valley close along the boundary that has anything like a decent crop," the summary says. Wheat might yield five to 10 bushels an acre and oats and barley barely sufficient for seed purposes.

In the northern and eastern sections of Manitoba, conditions show sharp improvement. Conditions are good in the north, though more rain is much needed.

Japan Makes Final Offer

Wants Definite Answer From Moscow On Railway Question

Tokyo. — A spokesman for the foreign office revealed Japan has sent to Moscow a proposed agreeing a yes-or-no answer on the potentially dangerous problem of disposal of the Chinese Eastern railway in Manchukuo.

The proposal was in the nature of a final offer to the Soviet government, the spokesman said, on protracted negotiations involving the transfer of the railway to Manchukuo. The line formerly was jointly operated by China and the Soviet.

It was made clear Tokyo considers that upon Moscow's answer depends whether the negotiations already drawn out for 13 months, will be abruptly terminated, producing a dangerous crisis upon Russo-Japanese relations, or their speedy and successful termination assured.

B.C. Minimum Wage

Board Of Industrial Relations Sets The Scale

Victoria. — Thousands of adult workers in the mercantile industry of British Columbia are affected by a minimum wage order completed by the board of industrial relations.

Under the scale every adult employee in a wholesale or retail establishment must receive a minimum of $15 a week, providing he works 40 or more hours a week.

For those working less than 40 hours a week the scale is 40 cents an hour with a minimum of $1.60 a day.

For youths from 16 to 21 years of age the scale is graduated according to the period of employment as follows: First three months, $9 a week; second three months, $10; third three months, $11; fourth three months, $12. Thereafter until the age of 21 is reached, $12.75 a week.

German Minister Recalled

Is Censored For His Intervention In Vienna

Berlin.—The German government recalled Herr Reith, German minister to Austria, for his intervention in Vienna without the government's consent

It was learned from private but reliable authority that Herr Reith conducted the negotiations which led to the end of the Balthauspiatz siege.

It was determined that, while still in power, Minister Emil Fey telephoned to Reith, asking him to assure assurances that Nazi plotters would reach the border and safety.

After receiving such assurances, it was said he agreed to conduct negotiations in a personal capacity with a view to preventing bloodshed, and went personally to the chancellory

Pool Payment

Final Cash Payment Received By Alberta Farmers

Calgary. — Cheques representing final cash payment on the 1933-34 voluntary pool have been mailed to all participating members by the Alberta wheat pool. The aggregate amount was not announced.

The final payment on No. 1 Hard was 12.317 cents, making the net total payment 68.317 cents per bushel while for No. 1 Northern it was 15.065, with the total payment 65.065 cents per bushel.

Pool officials announced the initial payment on deliveries of wheat to the 1934-35 pool had been set, for the time being, at 35 cents per bushel

May Go To Russia

Possible U.S. Army Members Will Make Goodwill Flight

Fairbanks, Alaska. — A possible goodwill flight across the Bering sea to Siberia was in the offing for the United States army bombers.

Basing here for the squadron's three weeks stay in Alaska, Lieut.-Col. Henry Arnold, flight commander, said extensive aerial photographic work and other military surveys will occupy the airmen.

Plans for the possible Bering sea flight were delayed pending approval of the war department.

Left, R. J. M. Parker, veteran member of the Saskatchewan Legislature, who is Minister of Municipal Affairs in the new Liberal Cabinet and, right, Dr. J. M. Uhrich, Minister of Public Health. Dr. Uhrich, who held the portfolio prior to 1929, is a Southern physician.

TENSE FEELING IN EUROPE OVER AUSTRIA'S LOSS

London Every capital in Europe is tense with expectancy and in some can a apprehension.

Twenty years to a day after Austria's severance of relations with Serbia, which placed Europe on the brink of the Great War, events caused fear to be expressed in Paris over the possible consequences of Austria a loss of independence

The Italian ambassador to France consulted with the French foreign minister and it was unofficially said that telephone wires between Paris, Rome and London were busy with consultations.

France and the Little Entente view Austrian independence as vital to the peace of Europe.

In Praha, Czecho-Slovakia, it was said that only Austrian union with Germany would cause the Little Entente to interfere with Austrian developments, however

At Berlin, reports that the Nazi putsch in Austria had been engineered from Germany met with denial, but there were "I told you so" expressions from the man in the street

At the Vatican City the utmost regret and sympathy was expressed over the death of Chancellor Dollfuss, an Austrian Catholic.

Despatches from Munich said the news from Vienna accounted for renewed activities of storm troopers in Bavaria.

In Italy, where the populace was in a high state of excitement over the issuance of orders to the military, former service men's groups were said to be at war time pitch as news of Dollfuss assassination permeated the kingdom

Their deep resentment against Germany was freely expressed

Made Clean Sweep

Stock From Prince Of Wales Farm Takes Honors At Saskatoon Fair

Saskatoon — Stock from H.R.H. Prince of Wales farm at High River, made a clean sweep of the herd classes of Shorthorn cattle at the Saskatoon exhibition. In the individual classes, however, F. H. Deacon, Unionville, Ontario, secured premier honors, taking the grand championships male and female, with his senior champions. The E.P. ranch exceiled in the younger classes, having the reserve grand in the junior champion male and female and heading the female two-year-olds. Duncan Campbell Fraser, Guelph, Ontario, took reserve female and T. A. Russell, Downsview, Ontario, the senior reserve male.

Soil Drifting

Co-Operation Of Federal And Provincial Governments Is Sought

Winnipeg — Closest co-operation of federal and provincial governments on the problem of soil drifting was sought here by C. E. Hopkins, of the Dominion experimental farm at Ottawa, now on a survey trip across the prairie provinces.

He planned to confer with agricultural officials of the Western governments, and discussed the situation here with J. H. Evans, deputy minister of agriculture in the Manitoba government.

Will Visit Prairies

Welland, Ont.—En route to Calgary from Riverhead, N.Y., R. H. L'Hommedieu crossed the Peace bridge on his specially constructed English bicycle. The 2,500-mile jaunt will take him through Ontario, Manitoba, Saskatchewan and parts of Alberta. The bicycle's special equipment includes a free-wheeling system to make hill-climbing easy.

Plans To Be Announced

London.—What arrangements may be made for celebration of the silver anniversary of the accession of King George and Queen Mary next year, will be outlined in an announcement which it is hoped to make in the house before it rises for the summer vacation, said Acting Prime Minister Stanley Baldwin.

Farm Inhabitedness

Survey Shows Inhabitedness Has Generally Increased In Several Years

Farm community research in Saskatchewan has been in progress since 1935 under the direction of Dr Wm. Allen of the University of Saskatchewan. Since 1937 manual of individual farm businesses have provided considerable information on farm inhabitedness. From 1936 to 1939 [illegible] records were obtained from 1,226 farms situated in representative districts of Saskatchewan. In 1936 in the northwest belt, the farming district around Turtleford was studied, and on the heavy land of the west-central portion of the prairie plains, the district of Kindersley was selected. Inhabitedness per acre of crop land for these two areas was found to be $11.22 and $10.99 respectively. Similar figures for districts studied in 1937 were as follows: Davidson, $10.66; Maple Creek $7.66 and Richmond, $3.55. For 1938 the figures were Rose-mont, Redfern, $14.42; Strath, $24.29; Watrous, $12.92; and Brownerdell, $7.07. The 1938 study revealed that inhabitedness per crop acre was $19.12 in the Grenfell and Wolseley districts, $17.91 at Balcarres and Indian Head, and $14.36 in the Hendorf and Lemberg districts. The difficulties of recent years have prevented farmers meeting their obligations, and despite reduced costs of operation and curtailed living expenses inhabitedness has generally increased.—The Economic Annalist

Keep Navy Plan Secret

British Workmen On Construction Are Sworn To Silence

A mysterious admiralty plan is being carried out at Milford Haven, England

Seventy men, all sworn to silence, are at work. They have fenced off many acres of land and have begun preparations for large-scale tunnelling operations.

It is known that, a mile away, the admiralty propose to establish a $1,750,000 cooling depot, but the Milford Haven scheme has given rise to three theories.

These suggest that the secret works will prove to be:

1. An arsenal a branch of Woolwich.
2. A new naval base.
3. An air base, to be linked up with the flying-boat station at Pembroke dock.

But these seventy workmen know they are working for the silent service—and they are saying nothing.

Seeking Giant Panda

Lionel to Brave Zoo May Receive Wave Pharmacie

The giant lizard that has been stalking a dozen eggs at a nest at the Bronx zoo in New York may have to beg, have a panda for a playmate. Lawrence K. Griswold will [illegible] another expedition in September, in search of the giant panda, one of the most spectacular animals in existence.

Griswold brought three of the lizard giants this spring from the Dutch East Indies, but this parade with cubs has to "Diet.

No one has ever exhibited a giant panda alive and it is believed the only ones in America are three mounted in Philadelphia.

In shape, the animal is like a bear. Dr. Raymond Ditmars, the curator, said. But it has strange black and white markings and a white face with two black rings around the eyes. The eye it, the appearance thing of wearing spectacles. Little is known about its habits.

Finds Interesting Shell

While searching through some unclaimed effects in his hotel at Port Erie, Ontario, Robert Beatty, well-known border sportsman, found a 200-year-old book titled "Allen Ramsay's Poems," written in old English style with spelling peculiar to those times. Published in Edinburgh, Scotland, in 1720, by Thomas Ruddiman, it contains an extensive glossary of Highland Gaelic words and their English equivalent.

It is reported that Russia has over a thousand scientists working on problems of crop improvement.

Reichswehr Looms as Power After Nazi Purging

General von Seeckt — General von Blomberg — Versailles treaty "demons broke"

One of the chaotic blankness following the Nazi "purging" ordered by Chancellor Adolf Hitler Saturday, the Reichswehr, whose 100,000 gray uniformed generals stepping-stones have become the real power of the reich, pushing aside the storm trooper legions to hold in their hands the future destiny of the republican, and loyal to their ex-chief, President Paul von Hindenburg, the Reichswehr is composed of privates enlisted for 12 years, and officers for 25 years. Led by General von Seeckt, fiery, unemotional leader, the Reichswehr has become the most efficient and powerful professional army Germany has known for many a day, despite its General Blomberg is the present chief, holding the portfolio of Minister of War in Hitler's Cabinet.

Treating Ivy Poisoning

Remedies Suggested To Allay The Burning And Itching

A few years ago the immense from the effects of poison ivy, but most campers know to their sorrow that poisoning by this mean plant is no joke and many are suggested to allay the burning and irritation. the simplest being the immediate washing of the affected parts with strong yellow laundry soap. An application of absorbent cotton saturated with a solution of common baking soda is simple and efficacious, also dashing with a three per cent solution of potassium permanganate is widely recommended. Iodine tincture has also been found to be useful. Once the blisters have appeared, oil rubbing should be practiced and care taken to localize infection by painting iodine around the edges of the sores. However, in cases of severe poisoning, the aid of a physician should be obtained. On return from a day's outing where there was danger of meeting poison ivy, the liberal use of the strong yellow soap might prevent much suffering. Indeed, it is a good idea for campers and other holiday makers to carry a piece of this soap with them. As a protection from going among ivy, says the Dominion Botanist, it is well to wash all exposed skin surfaces with a five per cent. solution of ferric chloride in water, allowing it to remain on. This, of course, is merely a preventive measure, intended to neutralize the poison ivy oil. If oil is suspected to have reached the unprotected skin, scrubbing with soap and water is necessary. Alcohol is recommended to remove it before it penetrates. During dry baking powder or borated talc on oozing sores should be avoided, as they appear to seal the sores over with a hard crust, thus aggravating conditions. Frequent exposures of the sores to air gives relief.

Just Another Animal

Dogs Are Usually Annoyance To Everyone But Owner

The praiseworthy devotion a great many people feel toward dogs should not be allowed to obscure the fact that a dog may cause untold damage and inconvenience to a great many people and hence all owners of dogs should give heed to the plea of the police to keep them under control so that they do not make nuisances of themselves

The police say they have received a large number of complaints that dogs are destroying gardens, barking, chasing people and otherwise annoying themselves in a manner that gives offense to a great many persons. They are appealing to dog owners to take upon themselves the responsibility of seeing that their pets do not become a nuisance to the community

The fact is owner a dog may be a friend and companion of the rarest virtues, but to the neighbors it may be just another animal that digs up the flower beds, tramps up the front porch and barks half the night. The owner sees it in the rosé of the puppy, but the neighbor may not share his fondness for his pet to see to it that their rights are not invaded.—Saginaw Daily News.

Trees And Moisture

Million Leaves Discharge Ten Of Water On Hot Day

An average size oak or elm bears each summer approximately 5,000,000 leaves according to scientists. Patchouli together, these leaves would cover five acres, and they are continually giving off moisture perspiring, you might say

On a fairly hot dry day, for every one million leaves there will be a ton of water will be given off. Therefore, you can see what need trees have of water. Water, air and a few minerals that are in the ground which miniaturize the tree insides, thinly diluted in its water—are what build a great tree.

And here is a thing to remember, for life somewhat in knowing how to prune a tree: The roots of almost all trees extend as widely and as deeply as the branches and leaves; to have a certain number of branches you must have a corresponding amount of roots to nourish them.

Keep The Windows Open

Gas Accumulating In Moving Car Might Explain Accidents

Feel dull while driving? Sleepy and get a breath of fresh air. Recent tests made prove that most automobiles after being driven for some time accumulate a considerable quantity of carbon monoxide to affect seriously the mental alertness and muscular coordination of the driver. Insurance companies are calling attention to the fact that while it is commonly known that many motorists are suffocated by gas from motors running in closed garages, it is not generally suspected that the gas accumulates in moving cars may be the cause of many hitherto unexplained traffic accidents.—Detroit News.

Know What He Meant

The teacher was examining the class to see how much they remembered of a natural history lesson given the day before, and told each child to give her the name of an animal.

"Well, Tommy, what animal do you remember?"

"The warmer," was the unexpected reply

"Nonsense. There's no such animal. Eh, class?"

Up went another hand.

"Please, miss, I know what 'e means. 'E means an otter."

Hallowe'en has been traced back nearly 2,000 years to the time of the Druids.

Ornamental Hedges

Best Time For Trimming Depends On Variety Of Plants

Russell Preston, Central Experimental Farm, Ottawa, says hedges [illegible] different kinds of plants, some of which are [illegible] but they drop their leaves every fall, while others are evergreen.

At the Central Experimental Farm, Ottawa, almost one hundred and thirty different varieties of trees and [illegible] shrubs are grown, and there are now about sixty different hedges growing side by side some of which were planted in 1889

The deciduous hedges are generally trimmed about the end of June or when the season growth is almost completed. This gives them time to make enough new growth to cover the wounds left by the clipping. The evergreen hedges are trimmed a little later as their growth is slower

Sometimes a few deciduous bushes may grow large and spoil the neat appearance of the hedge after the trimming. If this occurs the branches are cut off.

The trimming should be done [illegible] usually it will not be [illegible] to remake a hedge unless it has lost its shape. It is better to clip the hedge at the young season rather than not clip it at all

The shaping of a hedge is very important and it has been found at the Central Experimental Farm that it is better to have it widest at the base. It can be tapered to the top or it can be rounded or flat. In districts where there is much snow, a tapered top is much the best, as the snow will slide off instead of settling into the cavity and spreading and breaking the branches and thereby spoiling the shape. If the hedge has rounded sides and is wider above the base, there is danger that the lowest part will grow bare and ugly

Origin Of Word "Purser"

Formerly Meant Man Who Paid Out Money On Ship

Originally the purser was the dispenser, the man who held the ship's cash, stunned by the disaster, and hurt and horrified by the accusation, insists.

At Camilla's suggestion, Peter enters as his client, a figure he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts, in addition to newspaper advertising. Camilla to both write the Thy Tots stories and to deliver them over the radio.

Peter's exhibit was awarded the Paris scholarship, and he prepared for his journey to France.

(Now Go On With The Story)

CHAPTER LXV.

That was the shortest two weeks in Camilla's whole life, during which Peter made hasty preparations for going to Paris. He had so many people to see, so many were eager to honor him personally, various duties to attend to, additional work to make in his routine life, that she couldn't see him half as much as she wished. Her own work, now so involved and complicated, added to the difficulty; and it seemed to her as if their hours together were only fleeting moments of greetings and farewells, plans and occasional wistful moments of despair over so long a separation.

"Perhaps," said a sudden idea one day, "if I continue to make so much money and get my work arranged in advance, I can run over to see you for a little vacation in the spring." Her eyes shone with anticipation in the first joyful moment she had known since the beginning of the whole chaotic affair. "Paris is reported in the springtime, darling. Wouldn't that be wonderful?"

"Sure would," he agreed, his own spirits rising. "Well, a six months' sentence instead of a year. That helps some."

To which vague reprieve they clung hopefully, trying to convince themselves that six months really wasn't a long time at all when people were so busy and interested in life as they were. No, six months is not a long time in which to be busy but it is no a century of time, waiting for love

Peter secured his most valued possessions into Camilla's apartment. How she would treasure the sight of them in his absence, what poignant memories of their [illegible] they would recall.

"Having them here will be begin of something," she told him.

"Well, my, if a few pictures and books and things can take my place there will be no need of my coming back," he attempted to be gay

She rebuked him lovingly. "Peter darling, don't you know that every thing you have touched and looked at is precious to me? To be where you have been, to touch what you hands have touched that is some thing. I do love you so—"

"I know it, precious. But you're not going to be too lonely; that will make it worse for me are you"

"I won't," she promised with a valiant smile which glistened with unshed tears

"Sorry I can't even hear your voice over the radio, or see you on the screen," Peter added ruefully. "If I had a fortune, I might arrange for a special short-wave hookup from the Eiffel Tower twice a week

"Don't be extravagant, foolish thing, I should be going right along with you," she reminded him

"Have you your own career behind you?" doubtfully

"My real career is being Mrs Anson," she told Peter firmly "I am only playing at being an artist, an author and a radio speaker while I am waiting for the big opportunity of my life—being yours"

"You are sweet to say that," he declared, but he did not believe that she meant it. "Anyway, I am glad that I left a debut on the air before I leave. Should you rather I came to the studio with you or listen in somewhere?" he asked.

"Find a good radio and listen in. I'd like to think I am just talking to you somewhere, instead of possible thousands. That would make it easier."

"I might listen in with Avis," he observed casually.

Camilla winced, tried not to mind. "I'd rather," she hesitated, "just think of you listening alone, somewhere."

"Okay," he agreed, without attempting to analyze her thought. "And if it will do you any good hereafter, I'll tell you that I'll issue you in in Paris twice every week."

She tried to be assumed by his banter, but a tremendous weight hung in her breast that his gayer mood did not lift. She was ashamed of herself that he was happier only because he was going to his work and ambition, while she already had been satisfied with her, which made it seem less of an adventure to her. To be sure, she anticipated the expansion of her own power with a vast pride and satisfaction; but just now, Peter's departure was paramount in all her thoughts and feelings.

During that fortnight, Avis felt somewhat like an amateur ballet dancer, over whilst someone has jumped in any new partner. After her first disappointment over not being able to tell Peter of her victory, she rejoiced in the opportunity to keep the invitation. But she resolved that her own hands, with powerful chemicals, should accomplish that temporary new painting, and she would again be the prominent masterpiece.

She saw Peter only occasionally as he came and went, but did not intrude into his busy days. After her first display of enthusiasm and compliments, she spoke to him only with quiet encouragement and an impersonal interests in his plans.

"It's going to be frightfully busy here after they are gone," Avis remarked one afternoon when he had stopped in like a chat. "I may give up the plan for the winter. On the other hand, I may get to work in real earnest and accomplish something with which to surprise you when you return. I'll decide about that later, when I see how it goes to miss you. Perhaps in the spring, I'll run over to Paris for a while. Should you be glad to see me?"

Rather! By spring I'll be trafficking every American-looking person I see a block ahead of me to get a look at his face and see if I can claim his acquaintance or hers

No! I'd be just another American" she said scornfully

Oh no, not at all! I'll rejoice at the sight of any and all Americans and just go simply curious at sight of an old friend. Don't be surprised if I have you on both cheeks when I greet you though," he added jovially "From impulse or habit."

"Well when in Rome—" he reminded her lightly

Be sure though won't you let me give you a grand party to celebrate your success and give you a proper send off" I'll have a big dinner party at the house any fifty or so.

"Please, no!" She recalled the night of her last party in his honor its tragedy Camilla's chagrin Avis' cruelties. He wanted to spare Camilla any further humiliation, his time was so limited for being alone with her, and he did not particularly enjoy being fried by Avis' wealthy sailing friends whose compliments he [illegible] manner nauseous

He suspected that Avis regarded his ambition as a huge joke and his victories as a jolly good excuse for a party with plenty of champagne and [illegible] over exclusive chefs. He tried to explain gently [illegible] made which glistened with unshed tears

"Sorry I can't even hear your voice over the radio, or see you on the screen," Peter added ruefully. "If I had a fortune, I might arrange for a special short-wave hookup from the Eiffel Tower twice a week

"Don't be extravagant, foolish thing, I should be going right along with you," she reminded him

"Have you your own career behind you?" doubtfully

"My real career is being Mrs Anson," she told Peter firmly "I am only playing at being an artist, an author and a radio speaker while I am waiting for the big opportunity of my life—being yours"

"You are sweet to say that," he declared, but he did not believe that she meant it. "Anyway, I am glad that I left a debut on the air before I leave. Should you rather I came to the studio with you or listen in somewhere?" he asked.

"Find a good radio and listen in. I'd like to think I am just talking to you somewhere, instead of possible thousands. That would make it easier."

"I might listen in with Avis," he observed casually.

Camilla winced, tried not to mind. "I'd rather," she hesitated, "just think of you listening alone, somewhere."

"Okay," he agreed, without attempting to analyze her thought. "And if it will do you any good hereafter, I'll tell you that I'll issue you in in Paris twice every week."

She tried to be assumed by his banter, but a tremendous weight hung in her breast that his gayer mood did not lift. She was ashamed of herself that he was happier only because he was going to his work and ambition, while she already had been satisfied with her, which made it seem less of an adventure to her. To be sure, she anticipated the expansion of her own power with a vast pride and satisfaction; but just now, Peter's departure was paramount in all her thoughts and feelings.

During that fortnight, Avis felt somewhat like an amateur ballet dancer, over whilst someone has jumped in any new partner. After her first disappointment over not being able to tell Peter of her victory, she rejoiced in the opportunity to keep the invitation. But she resolved that her own hands, with powerful chemicals, should accomplish that temporary new painting, and she would again be the prominent masterpiece.

Perhaps in the spring, I'll run over to Paris for a while. Should you be glad to see me?"

MAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr Wernet's Powder is the world's largest seller and prescribed by leading dentists at least as far back as 1907. They tell us comfortably—that all day long you forget you ever had false plates. Leaves no colored, gummy paste keeps mouth sanitary, breath pleasant. The best powder you can buy yet cost is small. Any druggist.

OCCASIONAL WIFE

By ANNA ROSE WEBSTER

Author of "Juvetta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is left a modest money when she comes of age and as a studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's friend, and Gus Matson, his former roommate with whom he had quarrelled after he got on the road to success, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another party are standing near them. To maintain it necessary for Camilla to accompany the party back to the city she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio Avis Worth calls and persuades Peter to accept a loan of $1,000. Peter then sees his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth." and Avis "Inspiration." Peter adopts the latter title and Camilla, heartsick, goes to Peter's studio for quiet and to think. Peter and Camilla, stunned by the disaster, and hurt and horrified by the accusation, insists.

At Camilla's suggestion, Peter enters as his client, a figure he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign was a success from the beginning, and it was arranged to have radio broadcasts, in addition to newspaper advertising. Camilla to both write the Thy Tots stories and to deliver them over the radio.

Peter's exhibit was awarded the Paris scholarship, and he prepared for his journey to France.

"Sure would," he agreed, his own

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomel necessary

For you to feel healthy and cheerful your liver must pour two pounds of bile into your bowels daily. Without this bile your food may sour and ferment in the bowels. Then gas bloats up your stomach. You get constipated. Your whole system is poisoned and you feel sunk, sour and the world looks punk.

It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely to make you feel "up and up." Ask for Carter's Little Liver Pills. Use only as directed. 25 cents at all druggists.

Will Be All Scottish

Clydeside Fully Declare England Shall Not Use Fir Vessel Lines

The new Cunarder now building on the Clyde will not have a mere bullying good like other big liners, but a real bathing beach. Between will walk into the beautiful green water down a stretch of sand, just as they would do at the seaside. Then they can lie on the sands and enjoy artificial sunlight in every way the environment will be realistic

Down on the south coast of England near the mouth of the Thames, in a seaside resort called Margate. It is a place where London "trippers" go by the thousands to spend an odd day, or their annual two weeks with pay. It is strictly the playground of the democracy, but Margate is very proud of itself, and it was just like Margate's impudence to offer to supply the sand for the Cunarder's

The Clydeside folks immediately waxed indignant They would has none o' that English sand. It had to be sand free the banks o' the Clyde or nothing

No doubt the sand will be selected from Rothesay, or Ardrossan, or maybe from the Harry Lauder's town of Dunoon. This is a Clyde ship that is going to be the pride of the ocean, and the Thames is not going to be allowed to butt in and steal any of the glory — St. Thomas Times-Journal

Don't Read This

Unless you are interested in a medicine which has helped over 7,000,000 women and girls. Take it before and after childbirth, as the Change of Life approaches, as nervousness and weakness. We can of 100 up. "It helps me!"

Little Helps For This Week

"Let the Lord do that which is good in His sight." 1 Chronicles 19:13.

"Let Thy mercy be upon us O Lord, according as we hope in Thee." Psalm 33:22

I cannot feel
That all is well when darkening clouds conceal
The shining sun:
But then, I know
He lives and loves; and say, since it is so
They will be done.

—S. G. Browning.

No fair evil or defect becomes divine until it is inevitable, and only when resistance to it is exhausted and hope has died does surrender cease to be premature The hardness of our task lies here, that we have to strive against the grievous things of life, while hope remains, as if they were evil, and then when the stroke has fallen to accept them from the hand of God and doubt not that they are good But to the loving trusting Lover all things are possible, and even this change from valiant resistance to complete surrender is realized without struggle—Martineau

A Remarkable Operation

Secret Surgeon Removes Large Tumor From Girl's Brain

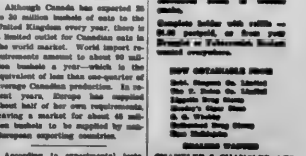
What is described as one of the most remarkable operations in medical history was performed at the Leningrad Surgical Institute

A tumor the size of a pigeon egg was removed from the brain of a young girl The malignant growth was threatening her with blindness.

The tumor was located only a few millimeters from sensitive where all life centres are located. The surgeon lifted a portion of the brain to remove the tumor

It is understood that only a few times in medical history has an operation of this character been undertaken successfully.

Timothy blooms relatively earlier in northern areas than in southern. One possible explanation of this says the Journal of Agricultural Research, is that the development of the plants in the south during early spring is delayed by the relatively short days that occur in southern latitudes, while on the other hand the development in northern regions is hastened by the relatively long days of the late spring and early summer.



DENICOTEA Cigarette Holder absorbs nicotine and moisture, prevents unpleasant tongue and throat irritation. Keeps fingers clean. Unbreakable. Easily cleaned.

Complete holder with cotton filter & pouch, 25 cents Postpaid or 2 for 45 cents. Refills 10 cents.

Although Canada has exported 20 to 30 million bushels of oats to the United Kingdom every year, there is a limited outlet for Canadian oats in the world market. The total import requirements amount to about 80 million bushels a year—which is the equivalent of less than one-quarter of average Canadian production. In recent years, Europe has supplied about half of her own requirements, leaving a market for about 40 million bushels to be supplied by non-European exporting countries.

MADAM, THIS McCORMICK-DEERING IS EASIER TO KEEP CLEAN BECAUSE OF THESE RUST-PROOF STAINLESS STEEL DISCS

I'M GLAD TO HEAR THAT! OUR OLD MACHINE WAS HARD TO CLEAN TOWARD THE LAST

—and the best part of it is they will always be exactly the same, no matter how long she uses the McCormick-Deering. These new discs cannot and will not rust. Even the spacers are rust-proof stainless steel. Each disc is exactly like every other, making it unnecessary for them to be numbered or used in any special order. Semi-smooth stainless surfaces make the discs easier to keep clean. We will be glad to arrange a demonstration on your farm, giving you a real opportunity to examine and use the new machine. See either you stainless steel discs, ball-bearing construction, automatic lubrication, beautiful black japan finish, and thickening delivery over an unusually wide range of temperatures. The discs are available.

FORT SASKATCHEWAN RECORD

VO[illegible] No. 18 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, AUG. 8th, 1934 $1.50 PER YEAR IN ADVANCE

Le[illegible] School Board Appoints New Primary Teacher

A Regular meeting of the Fort Saskatchewan School Board was held in the Town Hall on Monday the 6th. August at 7:30 p.m. Present Mr. F. Aitkins, Chairman and Trustees Dr. Turner and Mr. Rep.

The minutes of the previous meeting were read and adopted. The Secretary submitted additional applications for the vacancy created by Miss Wyatt's resignation, and two applicants applied in person before the Board. At the invitation of the Board, School Inspector, Mr. C. H. Robinson was present in connection with the matter of selecting a teacher. Mr. Anderson, the Principal was also in attendance. After carefully considering each application a resolution was finally passed appointing Miss Margaret Kolterborn at a salary of $[illegible] per annum.

Accounts were passed for $64.66 for material and labor on repair work etc., in carrying out repairs and renewals in the school.

Applications of non-resident students wishing to attend public or high school should be in the hands of the Secretary not later than August 17, in order that they might be considered by the Board. Applications in forms may be had on request. It would greatly facilitate matters if all resident students who desire to attend High School during the year 1934-35 would leave their names with the Secretary by the above date.

"Let me see, now," said the minister at the Christening, dipping his pen into the ink to record the event. "Isn't this the 27th?"

"I should say not," retorted the indignant mother: It is only the ninth.

Fertilizer Beneficial to Crops In Fort District

You have, no doubt, noticed a considerable difference throughout the growing period, namely, the difference in height, increased stooling, and earlier heading of the fertilized portions of grain in this district. However if you will examine the crops now that it is coming to maturity, it is quite possible you will find that the unfertilized is almost as high as the fertilized. This condition is entirely normal. Grain becomes plants ripens at maturity earlier and thereby cease growing, allowing the unfertilized plants to attain very nearly the same height.

Records covering the inspection of thousands of fields in the 3 western provinces have proven that a maturity the comparison in height will seldom exceed 2 or 3 inches in favor of the fertilized fields. The use of fertilizer does not in every case, increase the length of straw, but greatly improves the thickness and strength.

Work into a fertilized strip—count the No. of heads in a 3 row of fertilized and unfertilized plants. A few extra heads and better filled heads on the fertilized should convince you of the value of fertilizer. The use of fertilizer crops can be thrashed 5 to 10 days earlier than unfertilized crops. Rub out a little of the grain and compare the kernels for that is a very important factor—earlier maturity. Not the difference in the heads themselves, and also in the general stand and strength of the plants. Fertilizer shorten the growing period and in that way helps the plant to adapt itself to our short summer season.

(See the Fort Hardware Co., add in today's Record).

96 CANADIANS COMPRISE TEAM FOR BRITISH EMPIRE GAMES

The Canadian team for the British Empire Games being held in London during this month will be 96 strong, including officials and lawn bowlers who are paying their own expenses to go to the games. Col. Hamilton, Secretary of the Games Committee, will act as manager of the expedition.

The Canadians will enter men's and women's track and field events, men's and women's swimming events, weight events, boxing, wrestling and cycling. Athletes to represent Canada in the various classes were chosen by regional and national competitions and are giving a good account of themselves in London this week.

Council to Repair Main Sidewalks

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chambers on the 1st. Instant, with Mayor Montgomery presiding, and Councillors Magor, Pettet and Graf present.

The minutes of the last meeting held were read and adopted. The report of the Medical Health Officer, Dr. Henry, was read and filed. The Council had under consideration the question of repairing portions of certain sidewalks and Councillors Pettet and Graf were to make enquiries regarding material etc., and report. A limited sum was set aside for this in the estimates, the idea being to do a little of this work each year.

The Secretary was instructed to write to Mr. Lucherelli M.P., and advise him that this Council unanimously endorsed the resolution of the Council of the Municipal District of Clover Bar No. 857, regarding the construction of a gravelled road to Elk Island Park, and to express the desire that he will exert every effort in having the Dominion Government undertake the work asked for in the resolution.

Tennis Tournament To Start Next Thursday

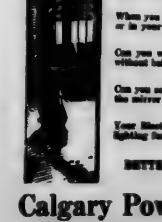
The third annual Tennis Tournament of the Fort Community Tennis Club will get under way next Thursday, the 10th, Inst., with the following list of events:—Ladies' Singles; Ladies' Doubles; Men's Singles; Men's Doubles, and Mixed Doubles. All those intending to enter any or all events must hand their entries in to the President, Dr. T.W.F. Henry, on or before noon Wednesday, Aug. 15th.

Draws will be made and will be posted up at the Courts and will also appear in this paper.

An entry fee of 25 cents per person, for each event entered has been set and any member of the St. George Tennis Club, Provincial Golf Club or Community Tennis Club, may enter any or all events in this tournament. This year attractive prizes and cups will be awarded to the winners of the various events, these will be presented at the annual tennis dance which will be held later on.

Now get busy and select your partner for the biggest tennis tournament ever held.

LIGHTEN THE BURDEN ON YOUR EYES



Is every room in your home well lighted?

Can you see to read or sew comfortably in every chair in your living room without annoyance from the glare of unshaded wall brackets or ceiling lights?

Are the lights in your living room placed so that every member of the household can read comfortably at the same time?

Is it possible to sit at your desk or secretary and not have your hand shadow the lines you are writing?

Can the children do their homework without unnecessary strain on their eyes?

When you sit at the dining table, is the light on the table or in your eyes?

Can you work at any working surface in your kitchen without being in your own light?

Can you see both sides of your face at the same time in the mirror of your dresser?

Your Electrical Contractor will help you plan adequate lighting for your home.

OUTSTANDING TRIUMPH OF VETERINARY SURGERY

A greyhound, named Somebody's Choice, who, less than a month ago, broke his neck in three places, is again cantering round the training paddocks at Wembley stadium in England.

His bones, and is, the picture of health. His recovering is one of the outstanding triumphs of veterinary surgery.

Somebody's Choice suffered a spectacular fall in a recent hurdle trial. At first he was thought to be dead.

Then it was discovered that he was alive, although his neck was broken.

His owner, S. Carver, barred the veterinary surgeon in attendance to do his utmost.

A brilliant operation was performed. What amounted to an artificial neck has been created by means of delicate silver plates. Flexibility has been achieved by clever manipulation.

Somebody's Choice will never race again. But he can bark and lead it over all the Mick the Millers in the world: he is the only dog alive today with a synthetic neck.

Ladies' Wear Specials

LADIES' COTTON AND SILK VESTS

To Stimulate Objective Thinking

The topsy-turvy condition in which the world finds itself to-day, naturally leads to serious thought on the part of everyone. Why should there be so much penury and want in the midst of a surplus of commodities? What are the real causes of stagnation of trade the world over One hears that the capitalistic system is doomed, and out of the present chaotic conditions a new order is to be established. Many theorists are busily constructing, or have constructed, designed to produce a new Utopia. The history of the world establishes the fact that all reforms necessarily come slowly. There can be no rapid realization of many obviously needed changes in our social system. But the world does not stand still, a forward and not a backward movement is inevitable The encouragement and not the suppression of constructive thinking and expression of thought would be of material assistance. In the annual address of Principal Fyfe of Queen's University, reference was made to the stimulation of thought by means of discussions in the class rooms. He is reported in part as follows

"In our academic seclusion we sometimes catch from a loaner world the echoes of an accusation that the Universities of Canada are becoming 'nurseries of anarchy and revolution'. So far as such charges have any foundation (except hysterics, they may serve to encourage us, for they seem to indicate that students are in some measure acquiring the art of looking at both sides of disputed questions, an art in which it is our duty to encourage them. The blest of suppressing enquiry and free speech, which has for the moment established a tragic dominance in many parts of the world, is nowhere to be admitted than in a University, where men and women gather to exercise their faculties of curiosity and logic. These faculties in them are necessarily immature; their utterances are often crudely dogmatic. But in stifle thought and utterance would be in a University the basest treason. As Penn said, 'Whoever is right, the persecutor must be wrong'.

"If we are to stimulate in our pupils objective thinking, we must be equally free in speech and thought ourselves - not equally rash. Propagandas in no part of a teacher's proper function. He is not concerned to produce opinions, a temporary state of conviction which can be quickly changed by counter-propaganda. His aim is to stimulate the growth of intelligence, the power of detached judgment. To that end he may exercise in the class-room every art of sophistry, but if he blinks his way into the outer world, where opinions clash unanchored both from fact and reason, it behooves him to remember what astonishing weight that world attaches to a professorial pronouncement At the dignity of the University stalks beside him on the platform, sternly demanding judicial sobriety. A University teacher should certainly be clever; he needs to be wise; and of the factors of wisdom not the least are self-restraint and lindliness and patience."

Has Given Good Service

Denver Man Still Driving Number Bought In 1910

C. C. Dill, a Denver roofing contractor, estimates that he has got 600,000 miles out of his 1906 roadster He bought the machine in 1910, took it the east of Europe adds another paragraph to a new and more hopeful chapter in an old and rather sorry story. The story is that of the failure of an experiment, which, like so many other things in modern Russia, has very humble origins, accident or brought its owner into difficulties with the law.

Education in Russia

Middle Outdoes Secondary Schools

To Raise Standards Again

Moscow is behind no one that the secondary schools of the Soviet Union must, in some degree at least, regain the standards and methods of the rest of Europe adds another paragraph to a new and more hopeful chapter in an old and rather sorry story. The story is that of the failure of an experiment, which, like so many other things in modern Russia, has very humble origins, accident or brought its owner into difficulties with the law.

To Salvage Treasure

Nineteen Gallons Rank In 1708 To Be Searched For Gold

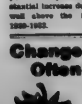
The 19 gallons of the Franco-Spanish fleet sunk in the Bay of Vigo in September, 1702, by the combined British and Dutch fleets, which Sir George Rooke and the Duke of Ormonde, will be searched for gold this summer, the Madrid newspaper El Debate reported.

The treasure's attempts to salvage the treasure brought by the fleet from the West Indies were fruitless.

Cigarettes in their modern form were introduced into America and Europe about 60 years ago.

It is estimated ten million bicycles are ridden in Great Britain.

Change of Climate, Diet, Water Often the Cause of Diarrhoea



If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and use how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 83 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Gold Pouring Into London

Great Increase In Foreign Deposits Of Precious Metal

The golden tide unexampled in the history of the world's monetary movements, continues to pour into London.

It began a year ago with a gold inflow at the rate of $25,000,000 weekly, then it increased early this year to $62,500,000 weekly, and now it averages 45 millions weekly and shows no indication of declining As soon as gold arrives in England from South Africa, Canada and other points during countries, it is bought by French, German, Dutch and American buyers, moreover all the financial centres of the world, with the exception of Russia, cannot be touched Already in the square mile that constitutes the city of London nearly one-third of the entire monetary gold stock of the world is stored away next only in the vaults of London banks, where the Bank of England is altogether at the present time billion and a quarter of pre-war gold is stored in the city banks a figure which is more than double the amount in peace time

Bankers do not want this gold, they cannot use it either to prepare new issues of paper, or to work for Britain's unemployed Moreover, any fresh financial upheaval in Europe would drive this flood of gold back with disastrous effects on sterling's international stability. Its unloosed use is further complicated by the fact that, although London's vaults are bursting with it, the official government figures reveal that the British Government has practically no power in the way of wages and salaries has been decreased through an economy campaign by $216,000,000 since the gold crisis of 1931.

Wonder Of Modern Surgery

Doctors Can Remodel Faces Entire Away By Disease

Persons whose faces are disfigured by disease or accidents no longer need live the remainder of their lives in horror of being seen in public.

Almost entirely new faces can now be "manufactured" by surgeons, according to Drs. Gordon B. New and Frederick A Figi, of Rochester, Minn. The doctors described the operations to members of the American Medical Association during the annual session of that group in Cleveland.

Operations to removate faces are now performed after disease eats away bone, cartilage and mucous membrane, or following the removal of tumors, the doctors add.

Artificial plates are inserted in the cheek-bones, jaw-bone and nose; noses are "lifted" by means of grope, and skin and bone are borrowed from other parts of the body to be grafted to the face.

And when these things are accomplished, the doctors asserted, the person again can face the world with something akin to confidence.

Hiding History

Great Seal And Royal Signet Given To South Africa.

The British history was made recently when King George handed to Charles te Water, South African high commissioner to the United Kingdom, the great seal and royal signet of the union. The king's act made South Africa the only Dominion to possess a great seal of its own.

The South African seal, struck at the royal mint, bears the king's head on the obverse and the South African coat of arms on the other.

Canadian production of timothy seed is less than one half of domestic requirements, as indicated by importation statistics, while substantial export shipments of alsike, mammoth clover, and Canada blue grass are usually produced yearly.

The Christian Science folk built a new publishing house in Boston during the years of depression, paid $4,000,000 for it in cash and never held a garden party or a church supper.

The growing of field corn for grain production in Canada is practically confined to Ontario.

Agricultural Notes

Interesting Items Gleaned From Many Sources

More than two-thirds of the bronze and western rye grass seed of commerce in Canada is grazed in the sack and certified to be free from the seeds of couch grass

The trading room of the Winnipeg Grain Exchange is connected by telegraph with all important grain markets and there is direct communication by telegraph and telephone to all parts of Canada and indeed, to all parts of the world

Experiments conducted both at the United States and in Canada have shown that the two species of bot-infesting cattle are easily controlled by sodium fluoaluminate applied either as a powder or in solution at the rate of one ounce to a gallon of tepid water

Alsike produced a significant part in causing the wheat surplus condition, notably in big yields in 1928 after good yields in 1927 and in 1929 Europe excellent grain crops in 1930 and following big crops in 1928, 1931 and giving Russia large crops in 1930-31 and good prospects for grain in 1932

Individual tubes of cream, after the style of toothpaste have been placed on the market in Germany at one penny Each tube has a round flat base which enables the tube to be stood upright, and holds a definite quantity of cream for consumption at tea or other beverage

Regarded as a harmless insect for a few years ago, the common European earwig has now reached an important place where he has no longer to apologize for his existence Such organizations as agricultural societies have known and valued by those who love them

The keeping of livestock is one of the oldest occupations of civilized man It represented the wealth of all the nomadic tribes and peoples and the principal reason why those people were nomadic arose from the necessity of constant movement in order to provide grass and water for their flocks and herds

For having mark'd cheese with a false date of manufacture a factory manager in Eastern Ontario was convicted and fined The provisions of the new regulations under the Dairy Industry Act require the correct date of manufacture to be marked on the cheese within 24 hours after removal from the press

The most recent demand for lighter weight cattle showing a better finish, the question of international trade relations involving tariffs and embargoes, monetary standards and allied financial conditions generally, all have a significant influence on beef production not only in Canada but in all the beef producing countries of the world.

Legislation giving some degree of control over the marketing of natural products, mainly agricultural, is found in most of the principal countries of the world, and The Natural Products Marketing Act, 1934, of Canada is an attempt to give the Dominion legislation similar to that at present found in the statutes of the United Kingdom, Australia, and other parts of the Empire.

Annual pasture crops are important in many parts of Canada. In the prairie provinces, perennial grasses and legumes cannot be depended upon to supply grazing during the periods of dry weather which occur almost every season. This is the case also, though not to the same extent, in Ontario and Quebec. The most feasible method of overcoming this difficulty is to seed some of the grain crops to provide pastures when the perennial grasses are unproductive. The cereals used as annual pasture crops are oats, barley, wheat, and spring rye, oats being by far the most important for this purpose.—Scientific Agriculture.

Glass Is Latest Vogue

Glass and steel are the vogue for modern homes in England this season. Glass wheat-oats and chromium-tubed easy chairs are among the most popular pieces. Glass beds are coming into style. Steel drawing rooms and glass bedrooms are considered the latest in human habitation.

Red tape can slow up business even worse than red lights on roads.

Appoint Commission

To Inquire Into Claims Of Alberta For Further Resources Compensation

Hon Andrew K Dysart judge of the Edmonton court of king's bench is Thomas M Tweedie judge of the supreme court of Alberta and George C Macdonald Montreal have been constituted a commission to inquire into claims of the province of Alberta for further compensation with respect to the administration and control of its natural resources Announcement of the appointment was officially published recently Mr. Justice Dysart is chairman

With the exception of Mr Justice Tweedie the commission is the same as that which investigated similar claims on the part of Saskatchewan recently On the completion of the Alberta report the commission will refer to the federal government joint recommendations on behalf of both provinces

Secret Method Revealed

How Scotland Yard Determines Age Of Finger Prints

Scotland Yard's secret method of telling the age of finger prints was revealed in Session Court Day Nurse during the trial recently of John O'Connor charged with breaking into the Lady Margaret Day Nursery Kirkie against him was a thumb-print found on a clock, but O'Connor said he had only handled the interior in 1927 Detective-Sergeant Jack Livings, of New Scotland Yard said he had no doubt the fingerprint was that of O'Connor He added "The powder we apply to latent impressions to bring them out will stick to the ridges of a new print but an old one is dry and the powder will not adhere to it. A fresh print can easily be removed by the finger, but a stale one can only be removed by a damp cloth"

The principal European countries, notably France, Italy, and Germany, have stringently controlled the imports of dairy products during the spring year by tariffs, quotas, and other means This has resulted in a steady increase in the quantities of butter and cheese exported to the United Kingdom.

Both the production and consumption of oats in Canada have followed a downward trend since 1920.

"It Helps Me!"
That's what 90 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more strength before and after childbirth, takes them over Change of Life . . . makes life seem worth living again.
LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Oats Proven To Be The Best Annual Hay Crop, After Tests Made At Experimental Farms

Interesting data on cereal grain crops for annual pasture are given in the June number of Scientific Agriculture as a result of investigations by Dr Kirk, Dominion Agrostologist, Ottawa. J G Davidson, assistant superintendent, Dominion Experimental Farm, Indian Head, Sask, and S N Hamilton, Division of Chemistry, Ottawa. It is pointed out that annual pasture crops are important in many parts of Canada, and that, while the superiority of oats as the one best annual hay crop has been generally recognized throughout Canada, it is not so clearly appreciated that oats are also the best annual pasture crop. The data submitted in Scientific Agriculture supports the view that the oats crop is even more valuable for pasture than for hay as compared with other cereals

There are certain questions relating to the use of cereal grains for pasture that have not been investigated. Definite information is lacking on the relative productivity and nutriment value of the different cereals It is not known whether or not there is any practical power for regrowth after having been eaten off and which of these will produce the greatest number of pasture crops in a single season. Several other questions also require answering. What is the best time to begin pasturing? How soon the percentage of protein in the herbage compare at different stages of growth? Will the fresh growth provide a high protein food as in the case with perennial grasses and, if so, is the total amount of protein sufficient for satisfactory" Are the results better with early then with late seeding, and how do the different cereal crops compare in this respect?

In order to answer these questions, an experiment was started in the spring of 1923 at the Dominion Experimental Farm, Indian Head, Saskatchewan. Four cereals were grown, namely, oats, barley, wheat and spring rye. These were cut with a horse mower to stimulate grazing Provision was made for three plots of each cereal, clipping to begin at different stages of growth at (1) 2-leaf stage; (2) 5-leaf, (3) shot blade, and (4) early heading. (4) fully headed, and as often thereafter as the growth reached seven to eight inches. Certain supplementary refer to the last mean, and the following is the summary of the results obtained Oats, barley, wheat and rye were compared with reference to yield, feeding value, and utilization as annual pasture crops. With respect to yield of dry matter per acre and per centage of protein, oats were always superior to barley, followed in order by wheat and spring rye To total average yield of protein per acre from the early seeding, oats exceeded barley by 54 per cent, wheat by 98 per cent., and spring rye by 112 per cent. At the later date seeding, oats exceeded barley by 31 per cent., wheat by 58 per cent., and rye by 65 per cent. Oats produced five cuttings in 1923, and seven cuttings in 1928 as compared with four cuttings in both seasons of the other three crops. Largest yields of protein per acre were obtained from oats when pasture cuttings were begun at the 5-leaf stage Oats from the early seeding produced 1,500 pounds of dry matter per acre, with an average protein content of 20 per cent This is equivalent to a greater carrying capacity than was obtained at Ottawa on good quality native bluegrass and. Young oats herbage may be regarded as a highly concentrated protein food.

During the first five months of this year, 835,500 pounds of dressed poultry have been exported from Canada to the United Kingdom. Compared with the corresponding period of last year, this is an increase of 537 122 pounds, and the demand for Canadian poultry still continues Most of the poultry shipped was packed, inspected, and graded according to government standards.

Radio Discovery

Find That Radio Signals Reach A Height Of 1,000 Miles

The highest point yet reached by human signals, a "refracting region" 1,000 miles overhead, which reflects precious signals back to earth, has been discovered with Harvard instruments

From 100 to 300 miles short of the ordinary height of the layers of air known to reflect wireless waves Previously the very greatest height of such layers has been about 300 miles

But 1,000 miles is above the region of air which scientists ordinarily describe as the outer limits of the earth's atmosphere And the Harvard report the commission will refer to the federal government joint recommendations on behalf of both provinces

Secret Method Revealed

How Scotland Yard Determines Age Of Finger Prints

Scotland Yard's secret method of telling the age of finger prints was revealed in Session Court Day Nurse during the trial recently of John O'Connor charged with breaking into the Lady Margaret Day Nursery Kirkie against him was a thumb-print found on a clock, but O'Connor said he had only handled the interior in 1927 Detective-Sergeant Jack Livings, of New Scotland Yard said he had no doubt the fingerprint was that of O'Connor He added "The powder we apply to latent impressions to bring them out will stick to the ridges of a new print but an old one is dry and the powder will not adhere to it. A fresh print can easily be removed by the finger, but a stale one can only be removed by a damp cloth"

The principal European countries, notably France, Italy, and Germany, have stringently controlled the imports of dairy products during the spring year by tariffs, quotas, and other means This has resulted in a steady increase in the quantities of butter and cheese exported to the United Kingdom.

Both the production and consumption of oats in Canada have followed a downward trend since 1920.

New Zealanders Healthy

Average Life Span Considered To Be World's Record

"It is impossible for us to increase our life span by 10 years" claiming inspiration from the example set by New Zealand we should be able at least to increase the average life span of Americans men six years from 59 to 65 Women apparently need not strive so assiduously for longevity in living to the average rope old age of 62 they already have a three year head over men in the marathon of life

Men and women live to average ages of 65 and 67 respectively in New Zealand, which Metropolitan Life Insurance Co statisticians consider to be a world's record They state that the white population of the United States still has about 10½ years to gain before reaching a hypothetical ideal estimate of a little more than the Hibbics three score and ten An advance toward this has already been made reports show the decade the 1923 1933 which were exceptionally good health years Encouragement comes with the report that some of the diseases which in years for while females has been increased

Excellent health management particularly in the matter of diet is cited as a reason for New Zealand's excellent record In the care of mother and child during a baby's infancy, effort is expended with the greatest effect For girl babies the mortality rate has dropped to the overwhelming low figure of 39 in a thousand in comparison to 46 for the United States The corresponding figures for boys between 20 months per thousand against 53 in New Zealand Science Service

Largest Baby Found

Believed to be the largest in the world, a baby weighing 2 987 carats has been found in the gem gravels of Angola Experts state the gem, which weighs nearly two pounds is defective in color, being yellow instead of deep red. It is impossible to value the stone accurately until it has been cut.

The total annual consumption of alsike seed in Canada is estimated at 1,500,000 pounds, so that any production over this amount required to be exported The production last year was 2,500,000 pounds, and the average price received by Canadian growers for alsike in the past five years has been about 10 cents per pound basis No 1 grade.

SMART FOR WARM DAYS—TOWN OR COUNTRY

Keep cool in sheer cotton so smaller how high thermometer climbs.

Here's a perfect summer dress for casual daytime wear.

It's the cool sleeveless type with rolled caped collar, that you always want to town as well as for the garden, too.

Chiffon cotton voile print, so soft and pretty, made the original It's available, too.

In turquoise blue, aqua-tone, lemon green pink or white ink with. It's very charming.

Style handkerchief linen, dotted sheer lawn, eyelet batiste, etc., are very cool and smart materials.

Style No. 388 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. 16 requires 3 yards of 39-inch material with 1¼ yards of 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin preferred). Wrap coin carefully.

Floating Power Plant To Provide World's Cheapest Electric Power From The Waters Of The Sea

A Heartening Sign

Recovery Of Canada's Newsprint Industry Is Good News

One of the most heartening signs of the times is the recovery taking place in Canada's newsprint industry For May (the latest available figures) the production exceeded by well over one million cwt the production in May 1932 while for the twelve months ending May the production was some 10 000 000 cwt in excess of that for the previous 12 months

This means much more than benefit for newsprint workers or for the holders of newsprint securities The newsprint industry is one of the greatest in Canada It is one field of production in which this country holds a supreme place, and it is not much to say that crisis through which the industry has passed contributed tremendously to the general depression.

Perhaps, too, the lessons of the past three or four years will mean a future gain They may have taught that in the newsprint industry as in others there can be such a thing as more of stocks and bonds and high-financing than the trade will bear.—Ottawa Journal

Golden Rod

Has Nothing To Do With Hay Fever Says Noted Botanist

Golden rod has nothing to do with hay fever and all the sneezes in the world won't shake the belief of Dr Ormiston Roy Montreal naturalist, who has been working the thing out in collaboration with Professor E. G Moore of Harvard University

Messrs Roy and Wilson returned from the Gaspe peninsula and have made a report which bears out the belief of the late Thomas Edison that ragweed and not golden rod is to really suffer for persistent hay fever.

Aviation In Australia

Australia is going ahead rapidly in organized civil aviation In less than a year 60,000 passengers, 70,000 pounds of parcel mail and 35,000 pounds of mail have been transported by air over the country Australia has a population of less than 6,000 000 but that she is doing very well in the air

SISTERS WIN HONOR FOR MURALS

Featuring the Mexican mural painting movement which has achieved international fame in the past few years is the participation of two Brooklyn sisters Marion and Grace Greenwood, whose murals have aroused the favorable comment of Mexicans and foreign critics. The Greenwood sisters, aided in their study of fresco technique by Paul O'Higgins, young California painter, obtained walls for decoration in Morelia, State of Michoacan.

Power Plant Is Cheapest

Professor George Claude's floating power plant was completed at Dunkerque France, recently and he was prepared to turn out the world's cheapest commercial electric power The power will be used right on board the ship to manufacture 1,000 tons of ice per day in hold 130 covered guards, all engineers. The French scientist will utilize thermal difference between surface and depth waters of tropical seas to create power

Following experiments in Cuba in 1931 when he dropped a tube a mile and one-eighth long into Matanzas Bay to prove that power could be made, by his process, he secured financial aid and himself purchased the steamer Tunisie which French shipyards have just equipped with a power and refrigerating plant

The ship is a sightseer of Jules Verne with its bridges and cabins laced with pipes, cylinders, valves and motors, all designed to aid in drawing electrical power from the sea. Professor Claude himself explained his process to his guests.

"The George Claude process consists essentially in causing warm surface water of tropical seas to boil in a vacuum, put the steam to work in the turbines and then condense it by cold water from the depths

"Experiments made in 1926 and in Cuba in 1931 on a small scale demonstrated that the process is ready to put them into a plant industrially exploitable.

"As I told the finance it myself I thought of a feasible method, to equip a floating plant permitting the use of a relatively short vertical tube installation in interesting points of the equatorial zone"

Professor Claude said it had also occurred to him to utilize the plant to make ice

The plan calls for a tube with a 30-foot buoy to be dropped and anchored to the bottom.

A 2,300-foot tube, composed of 115 enclosed sections and lined in diameter will bring the water to the plant from the depths The plant itself will contain a vacuum chamber 100 feet long and 32 feet in diameter placed 35 feet beneath the surface of the sea

As air extractor will make the vacuum in the boiler and vacuum pumps will bring up the water and pump the warm water out

The cylinder will contain four compartments for boiling and five for condensation The steam produced in the boiling chambers will pass into the condensing chambers after passing through the turbines and creating power

The cold sea water will do the condensing

Eyes Getting Tired

Negro Claiming To Be 140 Asked Question For Test

A claimant to succeed the late Saro Agha of Turkey as the world's oldest living person, appeared in a hospital in Rio De Janeiro to have his eyes tested Hypolito Xavier Ribeiro, a negro asserted he was 140 years old, and that he was beginning to have difficulty reading classified advertisements in the newspapers Physicians were inclined to credit his claims that he was born in 1794 as a slave, and participated in a revolution of 1847 and the Paraguayan War of 1865 having pronounced his eyesight perfect only "somewhat tired".

Canada's "Sun Porch"

Lord Willingdon once referred to the British West Indies as Canada's "sun-porch" So far as the Bahamas are concerned they have become much more than that Last year the Bahamas purchased goods from Canada to the value of $1,305,790 an increase of five per cent over the year before Practically all of the potatoes going to these islands were supplied by Canada, also butter, flour cured meatsmeat milk, rubber and canned boots and shoes.—Ottawa Journal

December 31, 1699, was the date of the landing of the Pilgrims on Plymouth Rock.

Three more governments have pledged themselves to place an embargo on war materials destined for the Bolivia-Paraguay war in the Chaco, it was announced at Geneva. The countries are Lithuania, Portugal and Uruguay.

Little Journeys In Science

WATER

(By Gordon M. Guest, M.A.)

Water is the most familiar of all chemical compounds. It covers about three-fourths of the earth's surface, the greatest depth of the ocean being about six miles. It is an important component of the air, and even "dry" land contains considerable quantities of water. It constitutes about 65% of beef, 87% of milk, 92% of watermelons, and 95% of cucumbers. Then, when we buy normal milk we pay for about 87% water.

Living things, both plants and animals, cannot exist without it. Enormous shipping, fishing, and other industries result from the fact that three quarters of the earth's surface consists of sea water, and in addition, there is a great volume of fresh river and lake water so necessary to human beings and other creatures not inhabiting the sea.

Steam power is derived from water, and other mechanical power is obtained from falling water, as at Niagara, where electricity is generated on a very large scale.

Pure water is odorless and tasteless. In this layers it has no color that can be detected, but it has a bluish tint when observed through considerable thickness. When slightly impure it exhibits a color. Ice, when heated it boils and changes rapidly into water vapor, commonly called steam.

There is a general law of nature that substances expand when heated and contract when cooled. Particularly for man and other living creatures water does not always follow this law. Then warm water is cooled it contracts according to the law of expansion and contraction. At 39 degrees Fahrenheit it reaches its greatest density. Then some reason which scientists cannot explain, from four degrees down to freezing it does not contract any more but instead of contracting. Now, if it expands it will be lighter than it was above four degrees, and hence it will remain cold and rise to the surface. When the temperature drops to zero be forms at the surface first, and then layer after layer of ice forms from the surface down as the temperature remains below zero.

All would be different if water followed the law of expansion and contraction right. The water would become heavier as the temperature approached zero and this heavy cold water would drop to the bottom of lake or river. So would form first at the bottom and as the winter progressed the lake would freeze from the bottom up, until it was converted into a solid mass of ice. All water animals would be destroyed and the growth of summer would not be continued to those it cast.

LIVE AT HOME

By JACK MINER

There is no human power that can make this little spot nearer and dearer to your heart. Grow your potatoes, rather, mill other vegetables. Oh, yes, and if far enough south, plant a dozen mulberry trees in the north, plant Manchu Ash. Watch for people who have nice flowers and kindly ask them for a few plants such as iris, ask them for some hollyhock, larkspur, some Oriental poppy pods. Yes, and a little Golden Glow.

A view of Jack Miner's home from the Public Highway. Notice the flowers planted by the side of the road.

Then when you are paying rent for your home again. Maybe what a loaned you in a few short years you will find yourself possessed of a little planned and built cottage perfectly surrounded with a little bit of heaven and the fragrance, layed up by the songs of a variety of birds that come floating through upon your open window.

My dear friend, this is a dream but it can be done and you can do it if you will only cultivate the desire. My grey hairs and a varied experience have compelled me to believe that a man can accomplish most anything he concentrates on. I tell all I can God that things are as well as they are with us and help our fellows by entertaining more than at home" desires.

Noted Horticulturist Dead

Ernest Hutcherson Was Charter Member Of B.C. Fruit Growers

Ernest Hutcherson, 81 years, one of the first horticulturist at the Ontario Agricultural College at Guelph, Ont., and who gave instruction in 1879 to Hon. Mr. R. McBrierd, former Dominion minister of agriculture, is dead at Ladner, B.C., where he had resided 53 years.

Mr. Hutcherson resigned from the Guelph college in 1885. With the late Thomas McNeely, he set out probably the first commercial orchard in British Columbia.

He was one of the founders and charter members of the B.C. Fruit Growers' Association and was appointed the first fruit pest inspector in the province. In 1908, Premier Australia appointed to the B.C. government for a man to frame and enforce a fruit pest act for the state and Mr Hutcherson was loaned. He remained on the government staff in Western Australia for 10 years.

Airport At Grains Green

Moves For Shipping Couples In Ceremony

Grains Green, England's famous airport for eloping couples, has just opened its airport. In addition to handling the arrival of the first pair to marry by air, Reginald Bennett, the aerodrome's "proud," has also announced the opening of an aerial plane to hold an air pageant shortly. The first couple arriving by plane will be married free of charge and will be given a wedding present.

New Type Of Weed

Secret processes which make weed unobtainable, remove the tickle, and add lustre are understood to have been perfected at the West Indies Tobacco Research Association laboratories at Trinidad, Leeds. For the first time in history, a tobacco has been tested only to members of the association.

One of the most important influences in the volume of cheese produced per hundred pounds of milk is the butter-fat content of the milk.

The production of milk in the provinces of Quebec is more important than the production of beef.

SUNDAY SCHOOL LESSON

AUGUST 12

AMOS PLEADS FOR JUSTICE

Golden text: "Love worketh no ill to his neighbor: love therefore is the fulfilling of the law." Romans 13:10.

Lesson: Amos Chapters 5 and 7.

Devotional Reading: Proverbs 21: 1-3.

Explanations And Comments

A Lament over Israel, 5:1-3. Amos has been called "the first democrat of Israel." Hear ye this word which I take up for a lamentation over you, O house of Israel (The Amos legend our message). A lamentation is a technical term applied to poetry of any calamity, such as the bereavement over Saul and Jonathan (2 Samuel 1:17), or in the face of any calamity, such as the bereavement over Israel in 586 B.C. "The virgin of Israel is fallen; she is cast down upon her land." Although Amos wrote many decades before the destruction of Samaria, the contemporaries which he saw and of which he was an eyewitness, and the present tense, could be pass in 722 B.C. when Assyria conquered the city and carried its people off into exile.

Injustice and Oppression Denounced, 5:10-15. The gate, as we learned in an earlier lesson, is the broad, open space before a city gate where claims were adjusted. "They hate him that reproveth in the gate," said Amos, "and they abhor him that speaketh uprightly." Amos knew only too well how he was hated in Israel. He was accused of blasphemy and high treason, and told by the priest Amaziah to "Go, flee to the land of Judah, and eat there thy bread, and prophesy there: but prophesy not again any more at Bethel." And he had obeyed. Because he wrote down the substance of the oldest prophecy he had given.

Amos next addressed the judges and accused them of transgression and sin, demanding a portion of their scanty harvest of wheat, for in no other way could they satisfy the justice except by thus buying it. Retribution would overtake them; they would not dwell long in their fine houses of hewn stone, nor drink the wine from their pleasant vineyards.

Your transgressions are many, your sins mighty. You take a bribe from the rich and let them escape the penalty due, and withheld a man's rights who is too poor to pay a bribe. Moffatt translates: "I know your countless crimes, how defiling your sins, accepting bribes, defrauding the poor of justice."

A Way Of Escape From Penalty, 5:14, 15. Professor Kent paraphrases these verses in these words: "To whomsoever my words appeal, I urge them to persevere in your efforts to do that which is right in the sight of God, and be, the all-powerful and just, will not fail you. Undauntedly strive to put down public evil, and to establish in the law courts, perchance a faithful few may yet survive the approaching destruction to enjoy Jehovah's blessing and favor."

Sunday, Not Mere Ritual, Pleasing to God, 5:21-24. The prophet now represents God as saying, "I hate, I despise your feasts, and I will take no delight in your solemn assemblies." But I prefer real deeds as waters, and righteousness as a mighty stream.

The Canada thistle is not native to Canada. It was introduced originally from Europe.

Balatte is an artificial coal-tar product used as a substitute for hard rubber, celluloid, or amber.

MAY CALL ON WEALTHY FOR MORE TAXATION

Toronto Premier Mitchell Hepburn promised full consideration for the demands of the Ontario hunger marchers but refused to give as an cover to any one set of definit ques tions submitted to him as to the government's policy on unemployment.

He described the questions as in volved and unfair. Bill declared the government was agreed conditions in Ontario were bad. At the same time he moved notice as "men of wealth and affluence" that they might be called upon through taxation to contribute a larger amount to the public treasury.

For more than three hours Mr Hepburn, Hon. Arthur Roebuck, attorney-general, and Hon. David Croll minister of welfare, listened to spokesmen for the hunger marchers who came to Toronto from nine scattered points. At the end they each spoke briefly and the marchers declared they are wholly satisfied with the interview.

A group of about 200 met the ministers and there were half a dozen speakers. At the end of the meeting they went out into Queen's Park to join a gathering of 2,000 or more and denounce the Hepburn government as an agency of the capitalist class.

Absolute freedom of speech and of assemblies was promised in the province by Mr Roebuck who declared the day of tyranny had gone. Mr heard complaints about the refusal of a permit to the marchers to meet in city parks and told them to meet on government property. That done and enough, a speaker said. They wanted the definite right to meet in any park.

"What do you want us to do?" asked Mr Roebuck. "Go out and consult Queen's Park?"

"The workers will conquer Ontario shortly," was the retort.

Mr Roebuck said he had fought the battles of the workers for years and had not changed his views. He could picture himself in the shoes of any one of them making the same demands.

"Go on with your organization," he said, "and God bless you. No one will interfere with you. Make yourselves so strong you can enforce your demands on any government no matter what its politics."

Scheme Well Advanced

Imperial Airways Have Received Tenders For Flying Boats

London Tenders for a fleet of 20 multi-engined flying boats to be used in the projected Empire-Canada air service have been submitted to Imperial Airways, according to the air correspondent of the Daily Telegraph, who says the scheme is well advanced.

The flying boats would accommodate from 24 to 50 persons.

In the winter, the correspondent says, the route will be by Bermuda and in the summer by Iceland and Greenland.

Aviation Program Reduction

United States Naval Aviation Contracts To Be Reduced

Washington. — The United States naval high command was disclosed authoritatively to have determined on a drastic reduction in naval aviation.

Present plans, which may be altered, call for 774 first line planes than the 3,184 which the navy had decided would be necessary under the Vinson bill authorizing a treaty strength navy by 1942. A thousand planes now comprise the naval air force, and plans had evolved to build the other 1,184 in annual installments.

Bovaby Tourist Trade

Winnipeg Col. F. C. Pennetta, general manager of the tourist and convention bureau of Manitoba is on route to Ottawa to attend a Dominion-wide conference on the development of tourist trade in Canada. Representatives from all parts of Canada have been invited.

Secure Low Interest Rate

Two Per Cent. Has Been Obtained For Ottawa Loan

Ottawa Securing what is believed to be the lowest interest rate in the history of Dominion borrowing, loan of $50,000,000 has been negotiated with the Chase National Bank of New York and a group associated with it, bearing interest at two per cent and maturing a note year. An announcement of the loan was made by Hon. E. N. Rhodes minister of finance.

With $10,000,000 from the cash balances held by the government the loan will refund a $50,000,000 treasury note issue bearing interest at four per cent and maturing on April 1 payable in New York City. These notes will be called on April 1 and the saving in interest rates over the year will amount to $1,000,000. The same being re-loaned was sold for a month period.

The new issue will not involve any public offer and may be called on the first business day of July or August 1935. It was taken by the Chase National Bank contract with the National City Bank of New York the Guaranty Trust Company the Guaranty Trust Company, the First National Bank and Trust company and the New York Trust Company.

Wants Small Navies

Absolute Minimum Is Idea Of New Japanese Premier

Tokyo Keisuk Okada, new premier of Japan before his appointment as naval questions was awaited eagerly by the world and he leaves navies at the minimum for the smallest proportions possible.

But he added that Japan is dissatisfied with the arbitrary 5-5-3 ratio fixed by the Washington treaty of 1922 as Japan's proportions of capital ships in relation to Great Britain and the United States. Whether the Washington treaty is to be abolished has not yet been decided, he said.

"I cannot favor the present ratio principle in naval limitation, which hurts the self respect of certain nations," said the premier who was called to the head of the government from a long career as a naval officer and administrator. He made at his first meeting with foreign newspaper correspondents.

To End Abuses

Relief Is Promised For Industrial Workers In Ontario

Toronto Attorney-General Arthur Roebuck announced Ontario's hunger marchers there would be supplanted by the government to definitely end abuses of relief. New legislation would be enacted at the next legislature session, he said, to bring industrial workers under the unemployment act for the purpose of evolving a code to govern industry.

"It will be an act with more teeth in it than is contained in existing legislation," he said. "We are going to bring both sides together to work out their code. We are going to put the employer employee out of business altogether in Ontario. There are other areas about which we will abolish."

High Roads To Reading

Uniform Readers To Be Used In Schools Of Western Provinces

Victoria New uniform readers and teachers' manuals will be used in grade schools and correspondence courses of the four Western Canadian provinces next term, starting in September, Hon. G. M. Weir, British Columbia minister of education, announced here.

The series will include a set of six readers and a supporting set of books for silent and work books. The series is called "High Roads To Reading" and contains many notable features not present in the series it will replace. They have already been tried at the B.C. summer school for teachers and heartily endorsed.

Communists In Germany

Berlin, Germany—Forty-six Communists, accused of subversive activities, were convicted by a special court here and sentenced to prison terms aggregating 71 years.

HON. J. J. McLEAN

Who has taken over the portfolio of Minister of Public Works in the reorganized Provincial cabinet in Alberta

Peasants Digging Free Gold

Rich Field Uncovered By Torrential Rains In China

Canton, China. The national government dispatched troops armed with machine guns to the Yanking district near Kangsimon to drive off the villagers from the gold field uncovered by torrential rains in the hillside was washed out revealing free gold.

Peasants rushed to the spot from miles around and are reported to have extracted 10 to ounces, worth about $300,000, in the last two weeks. The government then claimed the area as "crown land" but the peasants refused to quit.

Essay Winner

Saskatoon Student Is Winner Of Dominion-Wide Contest

Wheatland Province Presently, near York avenue, Saskatoon a student of Nutana collegiate institute, has been officially declared winner of the Dominion-wide essay contest conducted in connection with the convention of the National Association of Masters' Clubs of Canada.

Presently wrote a treatise on the "Autonomy of Canada." His essay was selected as the best of 15 winners from a like number of cities in the Dominion by V. L. Denton, principal of the British Columbia Normal school here.

Plane Will Be Repaired

Grimsson Hopes To Resume His Flight To Canada

Reykjavik, Iceland. — John Grimsson, British flyer whose magazine crashed here during an attempted flight from Rochester, England, to Ottawa, left here for Leith, Scotland, aboard an Icelandic steamer with the damaged parts of his machine. The parts will be repaired in England and Grimsson said he hoped to return within two weeks and resume his flight to Canada.

Meed More Relief

Native Sons Of Canada Ask For More Government Policy

Winnipeg Relief matters predominated at discussions at the Native Sons of Canada in convention here adopted a resolution urging the Dominion government to pursue a more economic policy to districts unable to assume a greater share of Governmental relief costs.

The convention received the reply of Prime Minister R. B. Bennett in answer to the organization's telegraphed protest against the new Dominion relief policy. The convention in its wire to Mr. Bennett had urged the government change its attitude toward unemployment relief.

Mr Bennett's telegram read "Certain unemployment planning provincial governments in position to exercise their control fictional functions with respect to relief. Direct contribution in aid are based upon experience of the past few years."

E. Hansford, St Boniface delegate sponsored the relief resolution. He expressed alarm at the government's attitude on relief in the resolution appealing to the government to have the words "Dominion off" deleted from the present title of "Dominion of Canada." Also was passed by the convention

Advertising Canada

Premier Bennett Moves Switch To Light Electric Sign In London

Ottawa —Moving a switch in Ottawa, Prime Minister R. B. Bennett illuminated a large electric sign placed on the grand building opposite Canada House in London, advertising the excellence of Canada's products. Mr. Bennett's words of dedication were, at the same time written against the London sky-line in electric letters.

The sign, a part of the advertising program conducted through the office of Sir. G. Howard Ferguson, Canadian high commissioner, bears a green maple leaf superimposed against a red triangle, the new "Canadian" flag officially recently registered in the United Kingdom. Beneath the mark appears the words "Canada The Empire's Larder," and in the next line, "Ask Your Grocer."

British House Adjourns

Date Of Next Session Set For October 22

London — Both houses of parliament have adjourned until Oct. 19 unless the lord chancellor and the speaker decide the interval requires adjournment earlier re-assembly

During the part of the session just over parliament has passed almost 50 public bills. Those left for the autumn include the betting and lotteries bill and a measure dealing with the curb and punish persons inciting disaffection among His Majesty's forces.

The chief issue before the next session will be that of a new constitution for India.

RECOVERY IN BRITAIN SUFFERS FROM RECESSION

London Parliament has adjourned with economic recovery at a crisis.

For the first time since 1932 when Britain began her steady climb out of the depression business activity has slumped

The drop is a slight one, but it is the first, and the dominant economic question is whether it is merely temporary or the initial sag of a serious recession in the near future.

Whichever it turns out to be observers say, the limits to Britain's recovery will be reached at a point well below her pre-depression prosperity unless there is an upward read in world trade.

The reason is that the recovery to date has been fashioned largely out of internal not external demand.

Belief that there are limits to what a prosperity has been voiced by Rupert E. Beckett, chairman of the Westminster Bank, who said, "The British people can never gain real prosperity merely by taking in each other's washing."

Experts ascribe Britain's present recovery to two factors That the country has been able to keep its "barrier" intact and that, behind the tariff walls erected in 1931, she has been able to gain a large share of her domestic market.

Opening Of Bay Route

Prospects For A Record Shipping Season Seem Good

Churchill, Man. — Warm winds whistled down Hudson strait as harbor crews at this northern seaport prepared to open the navigation season of 1934 on Aug 10

With 10 steamers definitely chartered and more bookings in the offing, port officials were enthused over prospects for a record shipping season. A complete crew always is on hand to swing machinery into action at the huge elevator filled with 2,500,000 bushels of wheat.

First of the fleet of vessels to trade here this season, the S.S. Dalworth, will bring a general cargo from Newcastle and Antwerp

In addition to taking her 8ft of grain for the outward journey, she will load 1,250 tons of flour, oatmeal and other commodities

Cattle from the prairies and lumber will find their way to markets of the world through northern shipping lanes this season.

Spies Are Sentenced

Seventeen Convictions On Charges Of Espionage In France

Paris The number of convictions in the 1934 spy round-up in France has reached 17 with the sentencing of a naturalized Czech farm formerly belonged to the Foreign Legion, and a 19-year-old girl.

Frederich Pampuch was convicted of spying for Germany and sentenced to 18 months in prison at Metz, and Jeanne Diveduene to year in Nancy on a charge of attempting to pay secrets from officers stationed at an aviatory field

Thirty-three arrests have been made since January, and there are more than 100 persons arrested prior to 1934, awaiting trial on espionage charges.

French Million Defy Law

Paris — The drivers of France have openly defied the government's efforts to regulate the price of wheat. In a letter to Premier Gaston Doumergue, the National Association of Millers said it will refuse to abide by the law which fixes the price of harvested wheat at 82.20 a bushel and the coming crop at $1.93.

First Wheat Shipped

Winnipeg — The first car of 1934 wheat from the Manitoba district was shipped July 31 over Canadian National lines from St. Jean, Man., to Fort William, Ont. The shipper was Eugene Brunet and the wheat was graded No. 2 Northern. It was consigned to the M. M. Paterson Company.

THE AREA WHICH IS AGAIN THE DANGER ZONE

Above is a map showing the position of Austria in relation to the other nations in Europe. Austria's border on the Southwest where it joins Italy is literally covered with 60,000 Italian troops, sent by Mussolini to be ready to defend Austria's independence if necessary. Across the small area which once was the great Hapsburg empire there is flashing an undercurrent of revolution which may break out at any moment. Although the Nazis failed in their efforts to take over control, even though they went to the extent of murdering Chancellor Dollfuss, the situation is still fraught with factional unrest.

Idea Is Not Wholly Fantastic

By Rocket Not Limited On An Impossible

About one year ago the public was entertained by reports of a German device by which the inventor was to be shot through the air in a sort of cylinder fired on the principle of a rocket. Some experiments were made and the last we read about it the machine had been hopelessly damaged due to too much explosive used in firing the apparatus and the inventor was badly injured.

But the idea is not wholly fantastic Another German, Gerhard Sachs, received permission recently from the British Post Office to try sending mail by rocket and the government actually marked the attempt by issuing a special stamp for the occasion. It wasn't exactly a success. Mail was sent in the rocket, which was fired into the air at a point near Nottingham on the English Channel and it came down about one mile away. After that the letters were removed and mailed in the ordinary way. But what did interest him in mind to a rocket, that will shoot into the air at a speed of about 100 miles an hour some day, at previously selected spots, and come by means of an automatic parachute and then travel in a

[illegible] plane within a reasonable distance of the [illegible]

This does not appear to be an impracticable idea, at all. Things are being done to-day that would have seemed grotesque ten or fifteen years ago. Who would have supposed that at the end of the World War for instance, that men would send them-selves up in the air with a ton of scientific instruments penetrate twelve or thirteen miles straight up into the sky, take scientific observations and come down again in a few hours." Or that zeppelins would carry regular loads of fifty passengers and tons of the between Europe and Brazil? Or that women would pilot planes between Europe and the United States, or that night express planes would run on regular schedules across the United States, carrying sleeping cars just like ships and have sleeping berths on them with beds larger than those in Pullman cars? All these things have taken place.

Possibly after the rocket mail has been perfected, human beings will be rocketed the same way, dropped off at their destinations by means of automatic parachutes -St. Thomas Times-Journal

A Profitable Industry

Bush Fathers Bush Paper In Two Ye Give It Old Time

Faking old books, paintings and furniture to handmade antique collectors and bibliophiles, has become a large and profitable "industry" Thev are, in various parts of the world secretly operated "factories" where cleverly forged modern "antiques" are turned out and sold at ridiculously high prices to trusting collectors. The most common form of outright fakery is the making of the pages in old and sometimes rather rare books, and sometimes rather than erase the paper the yellowish tinge that comes with the passing of centuries.

A clever workman who knows just how strong to make the ink, and just how long to keep the paper in the beverage, closely approximate the appearance of great age Another ingenious trick of the modern makers of antiques is to bind their fakes and other books in old paper. To make such spurious volumes complete, even in appearance, the fakers usually see to it that the books actually are made from photostatic copies of the original pages of the manuscript being imitated. Expert bibliophiles have made hobbies of spotting such counterfeits.

—Chandler Sedan, in good condition, rubber good. Cash $360.00. Apply Minnie Simmons.

The FIRESIDE PHILOSOPHER
By ALFRED BROSS

Only the future: don't fear it.

Wrongful gains never satisfy.

You can't live right if you don't think right.

Don't expect perfection without giving it.

Electricity hasn't done away with mid night oil.

Harshest criticism generally can least stand criticism.

Good acts are remembered when good sermons are forgotten.

The Observer

An incident in Matthew Furis is so characteristic that I am induced to quote it at length, the more so because it is strange that so curious a narrative is omitted, and the date is 1242. The king had the whole conduct of affairs in his own hands, when two merchants of Brabant complained to him that they had been robbed of two hundred marks in money by highwaymen whom they thought they could identify. The culprits were arrested and were set free by the oaths of their own neighbours. The whole country was an accomplice in the robbery and was agreed to convict no one, so that the efforts of the judge to detect the scandal were fruitless. The despoiled merchants still pressed the king for redress and represented that reprisals might be taken against English merchants at Flanders. So the king summoned the bailiffs and freemen of the country to him and a jury of twelve was appointed out of Winchester and Hampshire men. They were kept under strict custody and held long debate. Summoned at last, they could make no mention of the thieves. The king was exceedingly angered for he knew they were well acquainted with the facts. So he said "Put them in irons. They are concealing what they ought to tell. Then choose another jury of twelve from the same district, who will be willing to tell the truth." After a long debate these twelve came forward and disclosed the crimes and offences of many persons with the result that many persons of substance and even some of the king's household were convicted and hanged. The story moreover illustrates the state of society and the process by which justice was done through the agency of a jury of witnesses compurgators. (Thorold Rogers: "Six Centuries of Work and Wages.")

The Donnelly murders in Biddulph township in Ontario, and the abortive trials thereon, afford an interesting and illuminating parallel. It grew to be a cause of complaint hereafter that the jury making a finding on their own knowledge expressed often not the truth but their own sympathies or prejudices. It gradually came to be seen that the true principle of the jury was that they should disregard their own knowledge and base their verdict upon what was given to them upon oath by witnesses. The change came about so gradually that no date can be assigned to it and no thoroughly satisfactory history. If the process has ever been written. The practice as we now have it is that the jury must be composed of indifferent persons, i. e. persons without bias or favour for either party, who are sworn to dismiss from their minds all that they may have heard or read of the issue, and to give true verdict according to the evidence alone. It can easily be seen how difficult such a task is for persons who are not trained to weigh and sift evidence, and who are effected by prejudices and sympathies the strength of which they hardly realize until they are seated in the jury box. The trend of opinion and practice for the past hundred years has been to dispense with juries, particularly in civil trials. In Western Canada probably less than one per cent. of civil cases is now so tried

MAVIS TALCUM POWDER

✦ Of course, Mavis Talcum is as indispensable as a razor to well grooming after shaving. Men prove *that* everyday. But don't stop there... To really enjoy the benefits of Mavis Talcum, as millions of both men and women now do, sprinkle or lightly massage the same incomparable Mavis Talcum over the *entire body.* That's comfort — and protection! Cools — banishes perspiration — deodorizes.

FORT SASKATCHEWAN RECORD

VOL. 12 No. 19 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, AUG. 15th, 1934 $1.50 PER YEAR IN ADVANCE

Local Young Lady Appointed to School Staff

A special meeting of the Fort Saskatchewan School Board was held on the 11th. Instant with Mr. F. Atkinson as Chairman, and Trustees, Dr. Grunert, Dr. Turner and Mr. R. H. Roy present.

The Secretary advised the Board that Ellen White had written resigning her position as teacher because of her marriage recently. In her letter Miss White thanked the members of the Board for their kind co-operation in the past two years. The resignation was accepted by the Board, and a resolution was passed selecting and appointing Miss Constance Turner to take Miss White's place at a salary of $840.00 per annum.

The Board decided to spend a further limited sum in brightening up the windows and doors outside. The painting and work to be done by the Caretaker.

Progress Being Made On New Sidewalks

Splendid progress has been made with the new sidewalk being laid from the corner of the Memorial Hall building round to the Fort Confectionery, this being the allotment for this year.

The Town Council is to be commended on its efforts.

The acquisition by the Town of a good mowing machine is another step in the right direction, and it is hoped the citizens will refrain from throwing tin cans etc., on the lanes and vacant lots adjoining their dwellings, in order to give the mower a chance to work.

Partridge Hill News

Last Sunday, Mr. Nelis V. Buckman, President of the Laymen's Association of the United Church accepted took the service for Rev. Hodgins who is away on holidays. Mrs. Hallet, soloist, of Wesley Church, was also present and gave two pleasing selections.

Miss Mary Warring, Edmonton, has been the guest of Mrs. Robt. Warring for the past week. Margaret Warring has been visiting friends in Gibbons.

Mrs. A. B. Whitson has, as her house guest, her sister, Mrs. Clark of Vermilion.

Mr. and Mrs. Wilmot Alton were Edmonton visitors Tuesday.

Mrs. Roy Alton, Edmonton, is spending a day or two with her sisters, Mrs. C. H. Plimoff and Mrs. George Oshaldston.

The U. F. W. A. met with Mrs. V. R. Lawrence, with Mrs. Robt. Gordon assisting on Tuesday the 14th.

At the Vegreville Constituency Conference held at Tofield, July 26th, Partridge Hill U.F.W.A. for the second consecutive year won first prize on handicraft exhibit.

The girls ball team were hostesses at a well attended dance last week. Lamont orchestra supplied the music.

Cutting of early barley has started, haying is under way and binders are being overhauled in preparation for harvest.

Little Dorothy Attewell has been a patient in the Fort hospital this week, following a tonsil and adenoid dietomy. We are glad to report her doing nicely.

For Interior Decoration

Storekeeper: "You want a pound of ochre? Is it red ochre for painting bricks?"

Small Boy: "No, it's tappy ochre wot ma makes puddin' with."

Club Honors Member At Farewell Party

On Tuesday evening, August 7th, the "Happy Heart" group of the U.F.W.A. and friends, held a surprise party in honor of Joan Rodger, at the home of Mr. and Mrs. Charles Glover.

The usual games were indulged in, also community singing and dancing. Edna Sherman presented Jean with a small gift from those present. Jean replied suitably.

All those present expressed regret at Joan's departure for Viking.

The hostess assisted by Mrs. Logan O'Brien and Mrs. Stanley Dennis served dainty refreshments.

The Leader and Group wish to thank Mr. and Mrs Charles Glover for kindly offering their home, for the occasion.

Agricola Oldtimer Passes Away

Mr. Peter Andrews an old timer of the Agricola district for the past 30 years, passed away at his home, early on August 10th, aged 74 years.

Mr. Andrews was born in 1860 at Pockenhom, Ontario and lived there until 1870, when he moved to Parry Sound, where he farmed until 1890 and moved to the Clover Bar district. Here he made many friends and was well thought of. In 1919 he sold his farm and moved to the Agricola district where he spent the remainder of his days, and his death, was marked with the deepest sympathy and showed the great esteem in which the deceased was held. The sympathy of the district goes out to the families concerned.

He is survived by his wife; one son, Morris Stephen, residing at home and one sister, Mrs. Susan Atkinson of Bremner.

The funeral was held Sunday afternoon at 4:15 in the United Church, Fort Saskatchewan and Rev. D. C. Ramsay officiated. Interment took place in the Fort Saskatchewan cemetery. The Pallbearers were; Mr. Joe Willis, Mr. A. A. Walker, Mr. T. Johnston, Mr. E. Cummings, Mr. G. Williams and Mr. G. Trickey.

Beautiful floral offerings were received from—Loving wife and son Morris; Mr. and Mrs. A. Andrews; Mr. and Mrs. Jos Trickey; Mr. and Mrs. M. Latam and family; Mr. and Mrs. E. Cummings and family; Mr. and Mrs. T. Johnston and family; Mr. and Mrs. A. Walker and family; Mr. and Mrs. Grayson and family.

Andrews Bros. funeral service.

NEW MOUNTAIN HIGHWAY

Announcement of the intention of the Dominion government to proceed with the completion of the new mountain highway connecting Banff and Jasper national parks in the Alberta rockies, is received by Alberta people with considerable pleasure. With the announcement comes the statement that labor will be recruited from unemployed ranks at regular rates of wages, which it is believed will assist in relieving the unemployment situation.

The new highway, which may be completed within three years, will be one of the finest scenic routes in the world. Some 40 miles have already been completed on the Jasper end, and 17 miles on the Banff end of the route.

TECHNICAL SCHOOL HAS GOOD RECORD

The provincial technical school at Calgary enjoyed a successful season, a total of 721 students being registered the past term. In addition 640 unemployed attended 23 classes offered, being given instruction by 36 instructors acting without salary.

The school is now conducting a course in aeronautics, the only course of its kind given in Canada. It is planned during the coming term to design and build a complete aeroplane.

Gibbons News

Sometime ago, we predicted great things for our baseball club, once they got going right. Seven wins in a row is now our record, this almost assures us of a place in the play-offs.

Sunday was a bummer, the score being Gibbons 11, Empire Hotel 0. Norman Blais, the Gibbons pitcher, being in great form and was backed by air tight support in the field. The same boys are not facing so well to-day.

The dance on Friday was not so well attended as usual.

The Gibbons Athletic Club held a short meeting on Friday night and arranged to put on a Free show in the open air on Saturday night. Bill Kerr was chosen for stage manager. John Sprangle and Hugh Fraser as leading men, they were supported by a strong cast of ladies and young men. The show was witnessed on Saturday night by quite a gathering. It has not been decided whether they will continue it weekly or not.

Mrs. Milne Fraser has returned to her home in Bezanath, after a visit with her parents, Mr. and Mrs. Pete Zillars.

Church services in the United Church have been withdrawn until the first Sunday in September.

Mrs. John Fraser Jr. was visiting in Edmonton for the past week.

Moose Biband's new house is nearly finished now for the bride. Who is she?

The Observer

The tragedy of Monday of this week at Wildwood, when a young man presumably enraged by jealousy murdered a young girl and afterwards committed suicide by throwing himself in front of a railway train, deserves earnest consideration. Crimes of this sort seem to be on the increase and I am inclined to think that in an undue percentage of the cases the parties have been of foreign extraction. That is not surprising when it is remembered that the great majority of our immigrants have been persons from the lower strata of society. Such persons have experienced here not merely a great increase in prosperity but also a tremendous increase in liberty of speech and action. They have not—and here is the rub—they have not at the same time acquired that complex code of restraints and prohibitions which or should be the possession of those to whom liberty of speech and action are traditional. Liberty without its accompanying traditions is very apt to degenerate into a vicious and licentious way of life. Those who imagine that by providing free schools for our immigrants we have immediately solved the problem are due for a rude awakening. There is painfully little in the bare bones of academic instruction provided in the schools to furnish the moral fibre needed to make a good citizen.

Last week a stipendiary magistrate at Coronation Gulf tried an Eskimo for murder, the jury convicted him of manslaughter, and he was sentenced to five years' imprisonment. The Eskimo are a people with quite ancient traditions who have maintained themselves in health and happiness in the most forbidding and inhospitable regions of the world, the lands bordering on the Arctic Ocean, for countless years. When our ancestors roamed the forests of Britain or Europe in complete savagery the Eskimo probably lived very much as he does today, or did when the white man found him, was a much more numerous race, died by all accounts was practically free from disease. The moral and hygienic codes by which he governed his life must of necessity have been those most admirably adapted for the conditions in which he lived or he would never have survived. Yet he did survive, prospered and was happy. It is difficult to see what benefits the white man has brought to him. The best opinion is unanimous that he was infinitely better off before the white man came than he is now. Is it not fair to ask by what right we should try him for any crime, even murder, as any rate when the persons involved are both Eskimo, and proceed to inflict on him the punishment prescribed by the white man's law. We have no treaty with the Eskimo, we are simply intruders who by force and arms have imposed our will upon him and have laid claim to his lands. Have we any legal or moral justification for attempting to do any more than ascertain and enforce his own tribal customs? Perhaps we have not even a right to attempt that.

AGRICULTURE SCHOOL TO REOPEN

Announcement is made by Hon. F. S. Grisdale, minister of agriculture, that the school of agriculture at Vermilion will be re-opened this fall, provided the registration of students is sufficient to warrant it.

The school of Olds will continue to operate.

In British Columbia there are 2,470 acres planted to tomatoes this year, compared with 2,717 acres in 1933.

Taken from the Files

19 Years Ago Today

Thursday, August 10th, 1915

Peter Gunn, M.L.A., passed through the Fort Tuesday on his way to Pine Creek.

John B. Coates came all the way from Boyne Lake, a distance of 150 miles to purchase a Massey-Harris machine.

Lieut. Hughes and family came to the Fort Tuesday. Mrs. Hughes will make her home here while Lieut. Hughes is at Sarcee, where his regiment is now encamped.

Privates MacGillyeuddy, Brumfit, G. B. Taylor, Thompson and Corporal Moon were Sunday visitors.

The fall session in the public school open August 23rd (next Monday). The staff of teachers is the same as before the holiday season.

MARRIAGE

Mrs. W. H. White of Fort Saskatchewan announces the marriage of her youngest daughter Eileen Mae to Morley Norman youngest son of Mr. and Mrs. R. F. Moore of High River on Sunday, August the 5th at Okotoks. Rev. C.A.E. Pocock officiated.

Canada was the chief buyer of coffee from Jamaica last year, importing 96.3 of the entire export.

Quality Has No Substitute

"SALADA" TEA

"Fresh from the Gardens"

The Checkerboard And Peace

"Britain's frontier is now the Rhine." This statement, made in the British House of Commons by Stanley Baldwin while acting premier during the absence, in Canada, of Ramsay MacDonald, and used to epitomize the plea for retention of Britain's central Sentu. thrust into vivid prominence the altered status of the mother country in regard to her European neighbors. Development of aircraft by continental powers has banished that security from hostile attack guaranteed heretofore by a powerful navy and the "shah cists of Dover". Automatically, her frontier has been pushed outward step by step with the growth of foreign air armadas and the increasing range of potential enemy aeroplanes.

Speaking-ing, as it did, with the disturbing sequence of events which preceded and followed the assassination of Chancellor Dollfuss of Austria, the debate in the British house startlingly revealed the extent to which the atmosphere surrounding the European scene had been impregnated with fear of war No wonder Britain's statesmen are perturbed, no wonder the chancellories have been striving to secure some effective guarantees of territorial integrity among the storm-cucked powers of Europe!

The fear of war can be traced directly to the militaristion of Germany under Adolph Hitler and the obvious ambition of the Nazis to extend the sphere of German influence until the Reich became dominant in European affairs. Prior to the Austrian embroglio, a concerted movement had been launched in Europe whose objective was (and is) effectively to crush Nazi ambitions of territorial expansion, west, east and south. The western frontiers of France and Belgium, for instance, have been "guaranteed", by the agreements contained in the Locarno treaty of 1925. Germany, France, Belgium, Great Britain and Italy had agreed, individually and collectively, to guarantee the inviolability of the Franco-German and Belgo-German boundaries as defined by the Treaty of Versailles. There had also to be a complete demilitarization of German territory west of a line drawn east of the Rhine.

Agreements with respect to eastern boundaries, however, were not sanctified by as far-reaching commitments and mutual guarantees. It is true, there was a network of arbitration treaties involving Poland, Czechoslovakia, Germany and also France, but the Reich would not go so far as to accept as inviolate and permanent her eastern border. In fact, the hope has been cherished assiduously in Berlin that sooner or later there would come a revision of the German-Polish boundary which would restore Danzig and the Polish Corridor to the Reich. It is this rift in the lute of peace, diplomats of Europe are now seeking to close by means of what has become known as an "Eastern Locarno".

The "Eastern Locarno" past now proposed calls for a mutual assistance agreement involving Russia, the Baltic States, Poland, Czecho-Slovakia, Germany and also France, but the Reich would not go so far as to accept as inviolate and permanent her eastern border. In fact, the hope has been cherished assiduously in Berlin that sooner or later there would come a revision of the German-Polish boundary which would restore Danzig and the Polish Corridor to the Reich. It is this rift in the lute of peace, diplomats of Europe are now seeking to close by means of what has become known as an "Eastern Locarno".

The "Eastern Locarno" past now proposed calls for a mutual assistance agreement involving Russia, the Baltic States, Poland, Czecho-Slovakia, and Germany, and would provide mutual guarantees of their respective frontiers and for mutual aid against an aggressor seeking to upset the status quo. As Germany is the only nation fundamentally opposed to the present territorial set-up, the real meaning of the "Eastern Locarno" is apparent.

The actual significance of the proposed treaty is that Nazi Germany's ambitions would indeed be curbed. If Berlin signs (and it has been yet squarely up to Hitler; it would mean voluntary acceptance of her present boundaries, all around. It would mean definite recognition of the Polish corridor and German claims to Upper Silesia. It would mean the stabilization of Europe in its present form. That apparently, is the key move to peace on the European chessboard.

Apparently, too, "Locarno" is the formula of peace upon which Sheropean chancellories pin their greatest faith. In addition to the "Eastern Locarno", a similar treaty, known as the "Southern Locarno", designed to preserve the Mediterranean status quo and involving, probably, Turkey, Italy, Greece and Yugoslavia, also is mooted.

Cooking Crime

Feminine Crusade Against Crime Started in United States

A feminine crusade against crime —designed to eliminate depredations of the Dillinger type—drew commendation from the United States department of justice.

The crusade has been given tremendous impetus recently by powerful women's organization.

"Women can play a most important part in the curbing of crime," said William Stanley, noted attorney-general.

"They can compare the form of government of their locality with the form in localities where there is many crimes are committed. We plan to set up a central bureau to furnish such information.

"If they find an unusual amount of crime, it is certainly indicative that there can be improvement. They can demand improvement."

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it comes you how it may end. Allow the profuse diarrhoea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels get at once to your druggist and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check the disease before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 65 years.

Some Odd Professions

Many Queer Ways Of Earning Living in India

Apparently, the West has not the sole monopoly on queer ways of earning a living, for the following extract is taken from the current Census Report, an official publication of the government of India, and shows that there are in India such odd professions as those practised by: Beaters of Grasshoppers, Purvers of Water on Gods, Averters of Hailstorms, Breakers of Bad Omens, Enchanters of Cold Nails in Teeth, Breakers of Dead Bullock Horns, Cradle Swingers, Professional Mendifying Witnesses, Charity Receivers on the Burial Grounds, Drivers Away of Epidemics by Charms and Star Wax Removers. In addition, the Census bobbs reveal that altogether there are 97,778 people earning their living as horoscope casters, astrologers, wizards, witches, soothsays and fortune-tellers.

Hotels in Sahara Desert

Hard To Be Taken By Guests in Small Parcels

As the French penetrate farther and further southward into the Sahara, opening the long arid territories as they go, hotels are being erected for the accommodation of government officials visiting army officers, business men and the occasional venturesome tourist.

The hotels had to be taken south, through the desert, in parcels.

Each parcel weighed about 200 lbs and was one camel-load. Caravans after caravans, traveling 45 days through the sands brought to Timimoun in the far south of Algeria, the many tons of wooden doors, glass, china, linen cutlery furniture, electrical installation and other equipment needed for the local hotel.

Neither foreman nor European labourers would agree to go there, so the place was built by French army engineers, who themselves had to trace in the sand the first outline of the building because the shifting sands of the desert, of the region feared The Evil Eye, and would not have anything to do with blue-prints They brought with them the bricks, but, however, which form the walls, and to drag up to the site the date-palm trunks forming the roof beams and "girder-work."

The rest had to come in parcels from the north, the camels bringing the parcels were temperamental They would not travel on even such good hard roads as were in the north of Algeria, but would travel only by night, and had to be steered over soft sandy courses Camels suffer from bad spells of sore eyes sometimes allowed auto trucks.

Model Hospital System

Irish Free State Using Sweepstakes To Further Project

With $13,000,000 available and an equal amount awaiting distribution, the Irish Free State hospitals experience an entirely new era. Money will be the envy of the world's surgeons and medical research workers.

Responsible for the permanent endowment of the hospitals of the country are being laid by the hospitals commission. The help of the League of Nations' health section has been invited on the commission can have the best advice at the hands of the foremost experts in the world. Twelve sweepstakes have already been held.

The hospitals commission, a body headed by Michael Doran, former chief European engineer for Henry Ford, controls the funds and distributes them to the painlessly raised in every corner of the globe and prevents haphazard extensions by existing hospitals in order to prevent waste and overlapping. While allowing sufficient cash to trickle out of the fund for current needs the commission is proceeding with its task of evolving a model hospital system for the Free State in which every institution will be co-ordinated with its neighbor.

Not A Jew

Sir John Simon, British Foreign Minister, Denies He Is Of Jewish Origin

Sir John Simon, British foreign minister, denied he is a Jew. Sir John wrote the denial to a correspondent who had drawn his attention to statements current in Britain and abroad that the foreign minister was of Jewish origin.

At the same time Sir John expressed hope his denial would not be distorted to make it appear sympathetic with anti-Semitism, an attitude he regards as "un-English" and which he "utterly condemns". The minister's correspondent had mentioned reports that Sir John's ancestry had powerfully influenced the national government since he became foreign minister.

Current Definition

A Sunday school teacher of modernistic tendencies was telling his class that the miracles recorded in the Bible were not to be taken too literally. "My impression is . . .", said he. Then, by way of testing their knowledge of words, he added, "Can any of you tell me what an impression is?" "Please, sir," said a shrill voice from the corner, "an impression is a dent in a soft spot."

Canada's Industrial Prairies

Report Shows Western Provinces Are Becoming Industrialized

Canada's prairie provinces Manitoba, Saskatchewan and Alberta are rapidly becoming industrialized. While these provinces often referred to as "The Bread Basket of the World" are famous for their output of agricultural products at the same time manufacturing plays an important part.

According to a report issued by the Dominion Bureau of Statistics in 1933 the three prairie provinces manufactured goods with a selling value at the factory of $187,451,377. Establishments engaged in manufacturing numbered 2,647 and represented a capital investment of $334,450,263 These plants provided employment to 30,964 workers who received salaries and wages totalling $42,435,765. The value of materials purchased totalled $92,2.7,846 and the value added by manufacture amounted to $95,202,531

Flour and feed mills led all industries with an output valued at $21,946,761. Slaughtering and meat packing followed with products worth $23,704,509. Other leading industries were butter and cheese, with the value of $13,754,928, central electric stations $15,683,275, railway rolling stock, $12,014,432, petroleum products, $11,658,020 printing and publishing $8,787,444, breweries $6,350,250, printing and bookbinding $4,417,145.

Soviet Buying Arms

Newspaper Claims Shipments From England Going To Russia

A London newspaper says that it has its facts to prove that the record exportation of arms from Great Britain, amounting to $3,482,246, was due mainly to orders from Soviet Russia.

The arms consisted largely of machine guns and munitions. More than three-quarters of the total found their way to Russia.

The persuasion of Whitehall had to be secured for these large shipments.

The reason for these rush orders is that Russia is feverishly buying up the products of the world's armament factories in readiness for the struggle she believes is approaching with Japan.

The armaments business is phenomenally busy.

Although the figures stand so high, they would have been much larger owing to insistent demands from Paraguay and Bolivia, but in these instances applications for licenses by the munitions manufacturers have been turned down by the foreign office.

Queen Develops Slow Act

Sculpturography, by means of which persons or objects may be photographed in solid form, has been developed in Japan. Sculpturography's greatest contribution to science, according to its sponsors, is in replacing the human element in the making of sculptures where exact likeness is more important than the artistic element. Just as photography replaced painting for such purposes, so sculpturography has replaced ordinary sculpturing.

According to the regulations, apples are not considered edonbles so long as any portion of the stem is left in the stem end, provided the skin is not broken.

The Great Lakes region is believed to weather men as one of the electrical loads in the world.

Agricultural Notes

Interesting Items Gleaned From Many Sources

There were 36,963 less hogs graded in Canada for the first six months in 1934 than in the corresponding period of 1933

When mixing cucumbers, a layer of dill and a handful of mixed spice may be placed on the bottom and top of the crock

The cheaper cuts of beef should be used in making soup both because of their low cost and because they come from those parts of the animal which are richest in extractives

Baron experts in the United Kingdom continue to make headway and the movement to date this year is very far ahead of that for the corresponding period of last year

On July 14, 1934, 15 pigeons, 23 mares, 18 steers, 11 heifers, 6 cows, 1 bull, 1 stallion, and 1 broncho horse, all strays were in the various official pounds of Alberta

The British Crown colony of Trinidad and Tobago, with which Canada does an increasing trade, is the largest in area of any of the island colonies in the eastern group of the British West Indies

A meat will brown more readily if sufficient flour is rubbed into the surface to make it dry This also assists in preventing the escape of the juices Beef Bulletin, Dominion Department of Agriculture.

The demand for honey in all the principal countries of the world arises from three main sources (1) from domestic consumers; (2) from various manufacturing trades, confectioners, bakers, chemists, etc., and from the catering trade.

According to the regulations governing fruit trading in Canada, the phrase "properly packed" means that apples, plums, etc., are not slack in the receptacle, or overpressed, or in a condition which is likely to result in permanent damage during handling or transit.

No fruit of any kind intended for sale shall be packed in any package other than the package prescribed under the regulations of the Fruit and Honey Act, 1924, for each individual kind of fruit, except that where packages are not identified as for an individual kind of fruit, they may be used for any fruit.

For the month of June exports of wheat from the United Kingdom were approximately 900 bead smaller than for June, 1933, the movement being influenced by market conditions, but for the first seven months of this year the number of cattle exported to Great Britain exceeded last year's corresponding period by 1,943 head.

When honey from more than one person is included in one shipment under one inspection certificate, the person assuming responsibility for the shipment must place a designating mark, registered with the Dominion Minister of Agriculture, on all lots of honey included in the shipment, for the purpose of identifying the packer.

World Demand For Speed Has Been Met By Fast Air Liners Built In British Factories

World demand for speed has drawn from British aircraft factories, within the past 15 months new types of civil aircraft which, at from 170 to 200 miles an hour, are faster and more efficient than the best commercial machines designed and built abroad.

In recent weeks the world's fastest four-engined airliner, the "Dinas," built primarily for work over the extensions of the Empire airway from Singapore to Brisbane and New South Wales, has exceeded all expectations in a series of rigorous trial flights. A similar twin-engined machine the DH 89 has proved itself nearly as fast, and just as efficient!

These more new machines designed to satisfy the demand for speed are in an advanced stage of construction and will be flying within the next few months. Much is expected to attain a maximum level speed of at least 170 miles an hour. The fusilage of the three is designed to fly at nearly 200 miles This speed will be obtained even in the most powerful of these machines with expenditure of a comparative minimum of power

Each of the new machines derives power from two engines. Two of them are monoplanes, equipped with the fashionable retractile undercarriage, and the third is a biplane modelled on the mail carrier which was built to air ministry order last year

Their designed loads in passengers ranges from six, which is the smallest, to 16 passengers and 2 crew. Up to 18 in the Blackburn craft. Each machine will carry a crew of two

Invents Weather Machine

Denver Man Claims It Will Give Rain at Command

An Utopian climate in Detroit's for the asking with warm weather in winter and cooling breezes in summer—if the city fathers but have courage to lead the way

The suggestion recently received a letter from Joseph A. Shiren, Denver, Colo., who said he had perfected a "weather machine" and wished Detroit to be the first to use it. He asked that the letter be forwarded to the "Honorable Mayor". It related a simple, inexpensive method of assuring perfect weather at all times, eliminating extreme cold and heat, dust, smoke and unsavory odors of a large metropolis.

Those "weather machines" are built by Shiren and his associates, he has revised, may be placed in alleys, houses, vacant lots, or even strung across streets. They were described as being of a long cylindrical shape.

The manner of operation was explained by Shiren. He wrote:

"We have our cooling and filtering processes in summer. We pour in the clean cold air which will rain in the hot air very rapidly. In winter we propose to take out of the machine the cooling elements and replace them with heating units."

Apparently amusing his invention would meet with some scepticism, Shiren said several foreign governments already sought to investigate it.

Not Finding Work

Bad Boys Enjoying Treasure Hunt On Lake Floor

Treasure hunting on the bottom of Nelson lake has not proved remunerative for George Munroe and "Hunter" Weeks, two youths of Nelson, B.C. But they are getting a thrill from their "under-sea" exploration journeys

The youths use a home-made diving gear a pail with a glass window and an air line made out of a 50-foot section of garden hose The air is pumped to the diver by means of two small bicycle pumps. A flashlight in an air-tight amber supplies the light

The Nelson divers have descended between 25 and 30 feet, staying down five and 10 minutes each time.

One hammer, a number of cans and a quantity of gravel constitute the "treasure" found

W. N. U. 2000

Good Feed For Sheep

Many Home-Grown Grains Should Be Included In Rations

As a class of livestock sheep are not heavy grain eaters in Canada sheep are probably fed less grain than in most other countries This is due to the fact that the majority of farm flocks in Canada are small During the summer months sheep flocks on the average farm have access to a variety of pasturage by meadows, and grain stubble fields During the winter months in some districts they usually have considerable outdoor grazing in addition to hay and straw roughage

Range flocks are handled under entirely different conditions to farm flocks, but here again the ewe lambs are carried through the summer on range pasture and during the winter little or no grain is fed except under most severe weather conditions and then only for very limited periods Hay is considered as the best feed and will be obtained even in the most powerful of these machines with expenditure of a comparative minimum of power

Each of the new machines derives power from two engines. Two of them are monoplanes, equipped with the fashionable retractile undercarriage, and the third is a biplane modelled on the mail carrier which was built to air ministry order last year

Their designed loads in passengers ranges from six, which is the smallest, to 16 passengers and 2 crew. Up to 18 in the Blackburn craft. Each machine will carry a crew of two

Was Leader Then Cruses

Miss Reitzen After 35 Years Service In Australia

A man and his world's loneliest job has just retired Me is W Hoitze, who is going into civilization after 35 years' service on the overland telegraph which runs north and south right through the middle of Australia. His solitude has at times been deeper than that of Robinson Crusoe or a lighthouse keeper Every inch of the lone wiren linking Adelaide with Darwin, 2,000 miles away, must be supervised constantly to guard against breakages. The linesmen are posted here or there on the line, but when there is trouble to the north and the south at once they are often alone for weeks on end, sometimes they have their own vegetable gardens and enclosures for cattle, sheep and goats. Travelling over the arid sandy wastes or through thick scrub would be impossible were it not for the camel, and the linesmen always employ them when searching for breakages. The normal term in such a post is only three years, but there are men who prefer it to city life, and return for choice to their hermitage where they may enjoy their hobbies in peace.

Miss Cwyn had no time to talk. Her hands were worked. And she proved to the world that actions speak louder than words.

Rapid Growth Of Crops Secured By Use Of Chemicals And Other Artificial Aids

Salt In Hay Mow

Extensive Conversion Of Heat And Also Prevents Mouldiness

Spontaneous combustion may take place in hay that is apparently well cured and undoubtedly dry when stacked or stored in the barn A state of uneven moisture throughout the stack, developed after storing, is sometimes sufficient to cause spontaneous combustion The heavier hays such as alfalfa and clover are more liable to spontaneous heating and combustion. Since these stems contain a greater per centage of moisture and they are difficult to cure properly

Salt on hay as stacks or mows rises with the generation of heat, keeps down the growth of moulds which cause mustiness at stacks and loss of food value and makes hay more palatable and healthful to animals Stated hay has a better color and aroma and a higher per centage of attached leaves, due to being cut green and carefully

All farm animals need salt and "thrive on a properly salted diet. It has been proved that cows must have salt to give milk and raise calves Salted hay has been observed to produce more milk from cows Feeding experiments show that as much as 20 pounds of salt added to a ton of hay has no harmful effects on animals 30 pounds per ton has a slight purgative action

When salting hay use an adequate amount 10 to 20 pounds to the ton of hay and distribute evenly throughout the load Place hay in the stack or mow in layers of 12 to 15 inches then salt and apply salt liberally after each loading with the hayfork or slings

The River Pedlars

Ingenious Way Of Dodging Shell During Siege Of Paris

During the siege of Paris by the Germans in 1870 the post office administration hit upon the expedient in addition to the balloons of enclosing letters in small zinc globes water tight and hermetically sealed, and dropping them into the Seine There they floated, if they were not captured by the Germans, down the river to the French lines, where a net stretched across the river gathered them in, and they were sent on their way. Unfortunately for the French the Germans discovered the character of these zinc floats and as they could not hope to see and fish out by ordinary means all the letters that went down then, they stretched across the river at Villeneuve Saint Georges, a net of their own and effectually stopped this system of postal communication. The zinc bulls and their use were pretty nearly forgotten, when about 20 years ago a fisherman found in the Seine near Villeneuve, a queer looking globe of zinc With a large knife he opened it and found three hundred letters still legible, and all dated December 1870 They were delivered to the postal authorities and were forwarded to their destinations after having been in the river for more than 30 years.

Electricity Is Another Farce

Electricity is another farce which is being turned to account in the processing of livestock products. Experiments have shown that a field treated with an electrical "discharge" with increase grain crops by nearly 50 per cent., root crops, like potatoes and turnips, are doubled while delicacies of the vegetable and fruit type run about 25 per cent. or more increase

It is not a pleasant picture which the contemplation of all this progress calls up but the change is as certain as the changes which followed the invention of the steam engine. Twenty years from now the minutes of last year's world economic conference, with its resolution in regard acreage reduction, will make amusing reading

However distasteful the vision of changing events may be there can be no denying the fact that agriculture will eventually need the scientist and all his resources. The world population is increasing rapidly and the productivity of the earth, with our present methods only, is strictly limited

A Mathematical Expert

Three-Ton Machine Does Work In Record Time

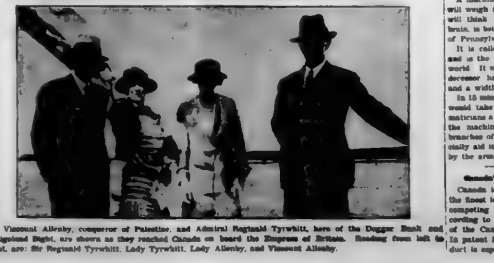
A machine which, when completed, will weigh more than three tons and will think faster than the human brain, is being built at the University of Pennsylvania, Philadelphia

It is called a differential analyzer, and is the second of its kind in the world It will be bigger than its predecessor having a length of 90 feet and a width of 10 feet

In 15 minutes it can do work which would take a dozen expert mathematicians a week to complete While the machine can be used in all branches of engineering, it will especially aid in calculating flying ranges by the army and navy

Canada's Leather In Demand

Canada is now producing some of the finest leather in the world and is competing successfully abroad, according to the industrial department of the Canadian National Railways. In patent leather, the Canadian product is especially desired.



DISTINGUISHED "PROMISING MEN" ARRIVE FOR CANADIAN CORPS REUNION

Viscount Allenby, conqueror of Palestine, and Admiral Reginald Tyrwhitt, hero of the Dogger Bank and Heligoland Bight, are shown as they reached Canada on board the Empress of Britain. Reading from left to right, are: Sir Reginald Tyrwhitt, Lady Tyrwhitt, Lady Allenby, and Viscount Allenby.

WORLD HAPPENINGS BRIEFLY TOLD

Fifty families at Deptford, England, were rendered homeless by the collapse of houses following subsidence of a road after heavy rains.

The Soviet Union's wheat harvest covered a total surface of 87,500,000 acres this year, which was 30,000,000 acres more than last year, it was reported by the Tass News Agency.

The British Exchequer will benefit by approximately £9,000,000 in death duties from the estate of the late Viscount Trenchard, bankrupt, who left an estate valued at £11,943,000.

Five destroyed Hitlerbrough Castle, seat of the governor of Northern Ireland, the Duke of Abercorn. It was one of Ulster's most historic spots.

United States exports to Canada in June, according to department of commerce figures, showed a notable gain over June, 1933. Imports from Canada registered a moderate gain.

Receipt of a cheque for $1,000,000 as a gift from the Rockefeller Foundation was announced by McGill University. It represents the endowment for life foundation of the department of neurology.

Dr Albert W Abbott, administrative head of the Canadian Red Cross and its overseas Chinese director of labor for the Imperial Munitions Board, died Aug. 7 at his home in Toronto.

France denied Japan her support in any steps toward abrogation of the Washington naval treaty of 1921 by announcing her intention to adhere to its provisions pending "some change in the European situation."

Canada-wide radio stations for the noting positions of aeroplanes and indicating their exact position if necessary will be set up around the coast of the United Kingdom, the air ministry announced.

Off the west coast of Belcher Island, Canada was paid to Robert Hudson and his men who three centuries ago were put adrift by a mutinous crew never seen again. On the last deck of the ship the ceremony was carried out by P. S. Ashley-Cooper, governor of the Hudson's Bay Company.

Little Journeys In Science

SOLUTIONS

(By Gordon M. Gunst, M.A.)

When a spoonful of salt is placed in a glass of water we observe that the salt disappears. The scientific description this simple fact by saying that the salt has dissolved in the water, and calls the resulting mixture a salt solution. The substance which is dissolved is called the solute, and the material which does the dissolving is known as the solvent. Thus, when salt is dissolved in water, the salt is the solute and the water is the solvent.

Water is the most common and useful of all solvents. It dissolves many solids such as sugar, salt, washing soda, and saltpetre. It also dissolves some liquids such as alcohol, which mixes readily with water in any proportion. Some gases are very soluble in water, whereas others are only slightly soluble. Ammonia gas dissolves very readily in water, producing a solution which is used in household ammonia. Oxygen is an example of a gas which is only slightly soluble, being found to the extent of three parts by volume to 100 parts of water. However, this small amount of dissolved oxygen is sufficient to keep fish alive. The fish extract the oxygen from the water by means of their gills.

We are quite familiar with many other solvents. Gasoline is a good solvent for grease. Turpentine dissolves paint and other dissolves fats. Acetone is a good solvent for grease in a liquid known by the chemist as carbon tetrachloride. This is used widely as a cleanser, under various trade names.

Plants can only use the minerals from the soil in solution. The water in the soil dissolves some of the minerals, and this solution is taken in through the roots of the plants, and up to the leaves by capillary action. In the human body all food is first transformed or digested into a soluble substance before being taken into the blood stream.

"Starvation" is said to be due to the presence of certain substances dissolved in the water. The best spring frequently found on the slopes of low hills is made up of these substances, which are left behind in the water when it rises to the surface.

Thrills Of An Under-Privileged Sportsman's Life

By JACK MINER

You readers and they grow to be more thrilling as the years ripen the human mind to be more and more appreciative and considerate of the human body and soul, nothing had powerful advantages God has given to the study of His great gifts outdoors. Personally I am compelled to believe that my handicaps have brought me favours that money cannot buy nor take away. For instance, when I was a little boy I was unable after father on a pigeon hunt (and big fat owl off a high limb of a pine so I can remember father shooting in his English accent, "Why they come, Jack, 'erry up and 'elo" I don't mind a third of having the thunder of that old black powder and see the pigeons rain down all around me. Later on came the thrill of moving to the much talked of Canada, and hunting and catching my first deer of sev ed. poetry. Ittle, hard-hitting red fellow. Then when fall came on and we were all most hungry I skipped out and shot a partridge. Oh! gee! what a thrill of my life, for in less than an hour I had killed my first deer a

Jack Miner about to liberate a tagged Canada Goose to study its route of migration.

won then only 15 years of age, and could neither carry or drag it, but I run home for help.

Sportsmen remember this, youth is the springtime of life, and age is the harvest, and at the prime the average sportsman is paying for his pleasure in thrills to-day I have long since been a multi-millionaire.

Years and years before we had an open season for geese in Ontario, I hunted them in Quebec, and time and again I have enjoyed the tingling thrill of having a small one hit my face at the mercy of my rifle, and from 1886 to 1912 they were plentiful as thick in Ontario. (Hence I believe are the largest scattered game on earth).

I have handled a light into a hour's run and been thrilled by seeing three of these black clowns with pretty green, looking feathers pitifully at me.

I have answered the heat of a wolf and as proof that I fooled him I once saw him come quartering to-wards me, and without exceptions I had the sparkling thrill of all my shooting career as I pressed the trig-

Jack Miner and a friend about to liberate a pair of geese which have tagged to study their migration route.

ger and saw this monstrous timber wolf leap high into the air as the 45 calibre bullet crashed through his high-power build crashed through his living room.

But remember the above are all dead thrills, and a certain per centage of them do have long since become petrified regrets, and the best thrill they ever gave me was when I sold and loaded my whole mounted collection into a box car to go to the Panama-Pacific Exposition.

And so the last quarter of a century I have manufactured my own living thrills. One pair of lawn mowers, two gardens, their sale and economy (the slogan approved) and netted to me $6,000, which proved a wonderful thrill, and I am thrilled by the fifth year.

Three wild ducks but alive brought seven hundred dollars' worth of thrills in seven years.

Then I have studied study and mastered the thrills we showed by capturing Canada geese, and I have had the great joy of putting on the first wood bands, and thrilled the whole neighborhood by the sight of them on my roost, as they lowered steadily and continuously down, down, down down down, until they joined and rejoiced with the winged tipsy dancers in the mud hole below

But possibly the most blessed and far reaching living sporting thrill that ever thrilled any sportsman's career came to me one night while at my work (burning brick). Yes, it was about 2 or 3 a.m. and I was sitting bench from the kiln waiting the time to build a fresh fire, when I felt I was studying the stars that guided me in my boyhood hunting days. Yes, that they guided me hundreds of miles through the pathless wilderness. Yet I couldn't call them by their names, but there they are all back in their November formation, and in my simple way I seem to want to know more about them With my hands I try to focus my eyes on them and so forth. Just at that stage of my anxiety my very dear uncle Mrs Miner's, where she taught the infant class, and shared with them at least one look at the star lesson. Possibly you see the colored pictures of the little curly-haired Carpenter standing before and leading the intense attention of a dozen of them. Or it may be that of Joseph making himself known to his aged brethren, and I'll set forth just one and all it has always kindled my inspiration to be more considerate, patient and loving, when I went and sat down with my own class of anachronous less aged boys

SUNDAY SCHOOL LESSON

AUGUST 19

Golden text: "Seek good, and not evil, that ye may live." Amos 5:14

Lessons: Amos 5:11-15. Devotional reading: Isaiah 55:6-11

Explanations And Comments

The False Confidence of Rulers, verses 1-3. The rulers were at ease in Zion (Jerusalem) and secure in Samaria, luxury had lulled them into a feeling of false security. There was more excuse for their pride. Every nation was at peace, and their capital were deemed impregnable. Indeed so they were by natural ing to maintain "As the mountains were round about Samaria and Jerusalem, they believed, would Jehovah himself about his people In point of fact, Samaria kept the besieging Syrian army at bay for three years before she finally met the doom which Amos had pronounced upon her thirty years or so before, and a century and a half afterwards it took the Babylonians 18 months to effect the capture of Jerusalem

The Lesson and Lunacy, verse 4. Amos now graphically pictures the everyday life of those prominent men of Samaria. They lolled upon beds inlaid with ivory brought from afar, though they are not weary, and they stretch themselves upon their couches and eat lambs, though they are not hungry. "It is easy to understand how the prophet, desert-trained, sleeping under the stars, always on the alert against robbers and wild beasts, would not only look with scorn upon so idle and luxurious a life, but would see the dangers which lay behind it. Such people as this would be a poor support in the day of trouble. They were unfit in body, mind and soul, for they have nothing of the sound sleep which follows sheer weariness; nothing of how good, simple food may be enjoyed with hunger; nothing of how blessed is a draught of cool water to those who have gone a hard way under torrid skies" (Adkins).

Vain and Vicious Pursuits, verses 5 and 6. "Rise is the mother of indolence and grandmother of vice." At their banquets the dissolute revellers sang idle songs to the sound of the viol, and invented for themselves instruments of music as Hamoul did, though for a far different purpose. David used his instruments in the praise of Jehovah; these idle wits for their drunken revels. For they became leaders who were not content to drink their wine from ewers, but must needs drink bowls, and they associated themselves with very costly oils; but they were not grieved for the affliction of Joseph, and this latter is the most damning charge of all! The supremum calls to mind that scene in the early stories of the race when Jacob's brethren sat down to eat and drink, utterly callous at the cries of Joseph in the bore-by pit. Genesis 37:25. In like manner the people of Israel were careening in utter callousness to the sufferings of the poor, when "the righteous were being sold for silver and the needy for a pair of shoes."

"It leaves the land, to hastening ruin a prey,
When wealth accumulates and men decay."

"The heartless indifference of the luxurious rich to the social wrongs of the nations stirred the soul of Amos to its depths. He saw the national and religious leaders at ease; the society was living in profligate luxury, without a care for the tragic condition of the brave classes oppressed by injustice and corruption. The great thing asked Amos is that he be not deceived by appearances; able to live in closer union with God; rich in judgment, consideration of the Poor" (Driver A. Lucas).

Keep To The Rite

Has Unusual Record

Woman Marksist Took Turn On Watch In Graf Zeppelin

Karin Mannesmann, graduate engineer holds the unique record of being the first woman machinist to be employed on a flight of the Graf Zeppelin.

Frau Mannesmann completed a round trip from Friedrichshafen to South America taking her shift in the motor gondola of the Zep with the other machinists.

The young lady wore greasy overalls the entire time aboard the ship in contrast to the chic frocks of some of the women passengers.

Miss Mannesmann has been employed in an aeroplane factory and made the trip to familiarize herself with heavy motors under flying conditions. It was a prerequisite for a better job with a rival manufacturer.

During the trip she stood watches of two hours on, two hours off in one of the motor gondolas, the trick and rest periods at night being longer.

Karin was graduated from the technical high school in Berlin receiving her degree in engineering. Since leaving school she has devoted her talent to aeroplane design and construction.

Lumber Via H.B. Line

Two and one-half million feet of lumber will be shipped over the Northern Bay Railway through Churchill to Great Britain this summer by one lumber company at The Pas. The present order is in the nature of an experiment but the company is hopeful of shipping an increasing volume from year to year.

Steel office furniture first was manufactured in South Africa.

W. N. U. 2000

NEW MEASURES TAKEN AGAINST AUSTRIAN NAZIS

Vienna — Chancellor Kurt Schuschnigg announced the government's agreement to Vice-Chancellor Franz von Papen of Germany as special envoy to Vienna, at the same time taking far-reaching new measures to end Nazi propaganda in Austria.

A government communique announcing Von Papen's acceptance revealed that the measures for granting of sweeping powers to Major Emil Fey, minister of the interior. In his capacity of special commissioner for security measures, Fey is charged with sending out Nazi influence.

The long-delayed acceptance of Von Papen by the new Austrian government as Chancellor Hitler's special envoy came during the cabinet conference.

The new envoy faces a difficult task in improving relations which have been strained since the Nazis came to power and embittered after July 27 by what the Austrian government openly considered to be proof of a putsch partially planned in Germany.

Although it was understood no conditions were attached to the acceptance, it was generally believed here the length of his residence as special envoy will depend more upon the future actions of the German government than upon anything Von Papen can do in Austria.

Under the new decree, Major Fey can order dismissal of private employees brid to be guilty of spreading Nazi propaganda against the government. "Patriotic" persons will be given jobs thus vacated The new government also has given a strip further to the Dollfuss regime ever ventured in efforts to wipe out Nazi influence.

The relentless campaign of the Austrian government against the Nazis claimed another life on the gallows this time the life of a soldier in the regular army

Ernst Feiko, a soldier, was hanged in the provincial town of Krems, after having in the putsch in which Chancellor Dollfuss was slain.

He was the first member of the government armed forces to be tried and executed on charges of high treason in connection with the Nazi uprising.

Another death sentence was imposed to-day in Klagenfurt, but the prisoner, Karl Kastreitzky, also a Nazi, received a commutation to 18 years' imprisonment from President Miklas.

Feike in his court martial trial brought in the name of Emil Fey, former vice-chancellor and still a cabinet member, who was imprisoned in the federal chancellory when Dollfuss was killed.

Feike stated that the Nazis who seized the government building declared to establish a "ministry of national concentration" with Anton Rintelen, then minister to Rome, at the head and with Fey as a member.

The session in the trial brought a hearing by the new chancellor, Kurt Schuschnigg, as to whether acts conduct to Germany had been pronounced by the putschists. This the court rejected.

As the death sentence was imposed, the prisoner raised his arm in a Nazi salute and shouted "Heil Hitler!"

He was pulled back to his bench by a guard.

Grant Wage Increase

Montreal. — An agreement giving wage increases of 10 per cent. to those paid by the week and 20 per cent. to piece workers virtually brought to an end a strike that tied up the women's clothing industry in Montreal for more than a week Some 2,000 workers, members of the International Ladies' Garment Workers' Union, will return to their benches.

Two Museum

Seattle. Work has been started on what officials say will be the "biggest tree museum in the United States." The Washington Emergency Relief administration made $600,000 available for the giant Lake Washington arboretum.

W. N. U. 2000

Churchill Busy Port

Takes On Business Augured At The Opening Of Navigation

Churchill, Man. Rising from the rock-rimmed Hudson Bay shore, the mammoth elevator and docks of Canada's most northern seaport have taken on a business like aspect as preparations were ahead for opening of navigation within the next few days.

Three steamers are insured bound the S.S Dalecroft of the Imigbush lines the S.S. Thorsten and the S.S. Rio Clara. No longer a mere outpost of civilization but a vital point in the commerce of a nation, Churchill girded itself for the busiest shipping season since the northern water route was opened in 1931

Two ships have been chartered to handle Canada's share of that golden tide of grain which flows each fall from Canada's western prairies The 2,500,000 bushel elevator is filled to capacity and in addition to grain barges, cattle, flour, oatmeal and other commodities will be shipped from the northern port this year.

The S.S Brandon last year made two trips to Churchill and took the largest shipment of $0 in the history of the northern route The Brandon will again depart with a livestock cargo and is believed to be one of the S.S Greilsund will both make two trips into Hudson Bay this year

Leaves To Claim Fortune

Former Alberta Man Will Use It To Establish Innocence

Toronto John F Gallagher convicted in 1922 of the murder of John Quinn and sent to the penitentiary for life, has been acquitted, has left for England to claim $[illegible] which an uncle left him, it was disclosed here and confirmed before Deputy [illegible]

Gallagher, who has been living in Toronto during the last three months under an assumed name, was convicted of arson when his home in Edmonton was burned. He was sentenced to life imprisonment. He appealed and sentence was judged excessive. He was released on $5,000 bail and he served the term in full

Gallagher plans to use a portion of the money he will receive from the land in an effort to establish his innocence of the arson charge and bring to justice the murderers of Edward A. Fuller, friends and neighbors in Carbon, Alberta, both of whom were killed within a year

Strengthen Gold Reserve

Flow Of Hoarded Gold To London From Indies Now $250,000,000

New York. The flow of hoarded gold from India to London, which began with Britain's suspension of the gold standard not quite three years ago, has now exceeded the sum of $250,000,000.

This movement of metal from the hide-aways of the east is a major factor in strengthening the financial basis for economic recovery, in the opinion of many commentators. Much of the gain has gone into the vaults of central banks where it provides the foundation for credit and currency.

To Reduce Relief Burden

Unemployed To Put 1,300 Men To Work On Jasper Highway

Calgary The Calgary Herald published the following:

"For the purpose of reducing the relief burden of Calgary and Edmonton, the Dominion government plans to take 1,300 married unemployed men who are receiving relief and put them to work on the Lake Louise-Jasper highway at a wage rate of 40 to 45 cents an hour.

"Six hundred men will be recruited from Calgary and 600 from Edmonton," it was said.

Gold In Mountains

Tokio.—Geologists and mining experts believe Manchukuo has rich deposits of gold, hidden in its extensive Khingan and other mountain ranges and river valleys, only awaiting exploitation by modern methods to yield returns that would make the east end Asian empire one of the wealthiest countries in the world.

Elected By Acclamation

Hon. Peter Heenan Wins Incumbent Seat For Ontario Legislature

Kenora, Ont. — Peter Heenan, appointed to the Ontario cabinet by Premier Mitchell F Hepburn as minister of mines and forests, was elected by acclamation to the Ontario legislature in the Kenora-Rainy River by-election.

Resigning his seat in the federal house, Mr Heenan was nominated by the Liberals for the Kenora-Rainy River seat when Earl Hutchinson, Liberal, resigned to pave the way for Mr Heenan's entry to the Ontario cabinet. When the time limit for nominations passed Mr Heenan's name was the only one submitted and he was declared elected by the returning officer

Pension For Dollfuss' Widow

Will Receive Same Equal To Chancellor's Salary

Vienna The semi-official Wiener Zeitung published a decree by which Austria accorded the widow of Dollfuss a pension for herself and her children

The widow will receive during the term of her widowhood a pension amount equal to the late chancellor's salary. In addition she will receive a special grant for each of the children. In the event of her re-marriage the children will continue to receive special pensions until they come of age.

Old Shell Kills Boys

Kouvi, Finland Five little boys were torn to pieces by the explosion of a world war shell they attempted to take apart. Two other lads were badly injured. The boys were tending sheep at the time.

Marketing Plan

Time To Be Put In Operation, Beginning With Apples

Toronto The Globe in a special despatch from its Ottawa correspondent says the Dominion government's experiment in control and regulation of marketing of natural products will be inaugurated this week. The first products to be dealt with under the scheme will be apples and pears, the Globe says.

The first step in launching the scheme will be the designation of a minister to take charge and it is expected Hon. Robert Weir, minister of agriculture, will start the ball rolling. The cabinet will then pass approval on Mr. Weir's instructions for the federal marketing board after which the act will be promulgated.

The Globe added:

"Mr Weir, it is understood, will take personal and active charge of the operations of the federal board, whose primary function will be to deal with the various schemes submitted by producers throughout the Dominion. The federal organization is expected to include in its various departments such officials as D. Mercer Marion, deputy minister; Dr J F Booth, formerly director of markets for Saskatchewan; and an authority in the department of the wheat situation; R. L. Wheeler, secretary treasurer in the absence of C. E. McIntosh, who is ill; J. F. Singleton, dairy commissioner and G. B. Rothwell, livestock commissioner

Reformed Calendar

Windsor Man Proposes System With Five Weeks In Each Month

Windsor, Ont. A 13-month year with five weeks in each month and six days in each week is the simplified calendar which Alexander J Gilmore, of Detroit, has before the League of Nations, he told Windsor Saturday.

His plan would make a working year of 360 days, during which time the calendar would be unchanged from month to month Sundays would always come on the seventh, 14th, 21st and 28th each month. There would be no Friday 13th.

To take up the remaining five days Mr Gilmore would have them follow Christmas being a series of festival days. They would end with New Year's day

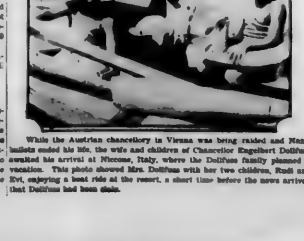
May Stop Wheat Exports

U.S. Needs Furide Northwest Supply For Emergency Use

Washington. — The farm administration plans to stop exporting wheat from the Pacific northwest because of the rapidly diminishing supply in the United States.

To date 28,000,000 bushels have been sold abroad by the North Pacific Emergency Export Association. Their operations soon will be stopped and remaining and prospective stocks channeled into domestic channels.

THEY WAITED—BUT HE NEVER CAME



While the Austrian chancellory in Vienna was being raided and Nazis bullets ended his life, the wife and children of Chancellor Engelbert Dollfuss awaited his arrival at Niccone, Italy, where the Dollfuss family planned a vacation. This photo showed Mrs. Dollfuss with her two children, Rudi and Ert, enjoying a boat ride at the resort, a short time before the news arrived that Dollfuss had been slain.

PROJECT TO BUILD UP STRONG AIR FORCE IN BRITAIN

London. — Continuous radio stations for noting positions of aeroplanes and indicating their exact position if necessary will be set up around the coast of the United Kingdom, the air ministry has announced.

The project is part of the new drive to build up the Royal Air Force to protect Britain in case of invasion.

Such stations are slated for the Isle of Wight, Ireland, Scotland and the north of England.

"A confidential mission of the highest importance connected with the defence of the Empire" is being undertaken by Sir Maurice Hankey as votary of the imperial defence committee and of the cabinet, according to the Daily Herald.

It was announced Sir Maurice is leaving for Australia to attend the Australian centenary celebrations and on the way will spend some time in Cape Town, South Africa. Lady Hankey is former Indian hotel.

Describing the centenary celebration as the ostensible purpose of the visit the Herald says the eminent secrecy is being observed with regard to the real object. It says that in addition to South Africa and Australia Sir Maurice will visit New Zealand and Canada to discuss with experts on the spot vital matters of military, naval and aerial strategy.

The paper further suggests these questions are connected with "defence problems affecting part of the new turn of British policy resulting from the reciprocal visits of General Maurice Gamelin and Chief of the Imperial general staff and Lord Hailsham British minister of war; also the naval requirements of the Empire in view of the outlook for the 1935 naval conference which the Herald describes as gloomier than ever."

Sir Maurice's intention to visit Canada and New Zealand is also mentioned by the Daily Mail and the Daily Sketch, which says he will also take advantage of his trip to make a tour visiting the various Empire governments on behalf of the cabinet and adds it is understood important questions of imperial policy, particularly with regard to defence, will likely be discussed.

It was stated some time ago that Sir Maurice would advise Australia on defence matters during his visit.

Studying Crop Loan Plan

Would Give U.S. Farmers Control Of 1933 Supplies

Washington. A gigantic crop loan plan which would leave control of 1933 supplies in the hands of farmers was given thumbs up by officials in the United States farm administration.

Modeled after this year's corn and cotton loans, the plan will call for government loans on a wide range of other crops. There will be a stipulation that supplies must be sold when prices rise to a certain point

Last year the government advanced farmers 60 cents per pound on stored cotton, and 45 cents a bushel on corn sealed in cribs or warehouses. This pegged prices at those levels and officials say the plan was a success

As prices advanced beyond those levels recently, farmers began selling crops, paying off loans and making a profit for themselves.

Calander, Ont Excavation work has started for the new home of the 71-day-old Dionne quintuplets. The modern brick building will be known as "the Dafoe hospital for the Dionne quintuplets," in honor of the middle-aged north country practitioner who has amazed the world with the favorable progress his directior has brought the infants.

Hoover Re-Unites

Cayuga, Ont. More than 500 persons appeared for the re-union of the Hoover family at Hoover's Point, Lake Erie. They came from Kitchener, Buffalo, Markham and many places in Haldimand county. A huge dinner and sports program marked the gathering.

To Make Cosmic Survey

Research Institute's Instrument To Be Tested By U.S. Plane

Apparatus that will record hitherto unknown data on the eternal fight between cosmic rays and atoms, 14 miles up in the air has been completed by the Bartol Research Foundation of the Franklin Institute and will be installed shortly in a stratosphere balloon to make a "cosmic survey."

According to Dr. G. L. Locher of the Bartol Foundation, when cosmic rays explode over a single element nucleus the one explosion may produce millions of new ionization - the scientific term for invisible particles of gas in the atmosphere with an electrical charge - in 200 times an instant. Dr. Locher pointed out, at an altitude of ten miles above sea-level.

The automatic recording apparatus will be sent at an altitude of approximately 70,000 feet. Dr. W. F. G. Swann, director of the Bartol Foundation, has announced that the initial stratosphere test flight will take place on June 15, when 150 of the small Geiger-Muller "counters" and other instruments will be hauled over to Pilot Stevens and Major Kepner, army fliers, who will take the recording apparatus aloft to make the survey.

The American Geographic Society has agreed to sponsor the experiment.

Included in the new apparatus is an instrument which freezes a light when ionization within it has occurred. In an informal experiment, Dr. Locher placed radium emission near the instrument, resulting in immediate succession of flashes.

The studies to be made with the stratosphere balloon, high above the earth's surface, may add greatly to man's knowledge of what cosmic rays really are, Dr. Locher believes.

Bees Sold By Pound

Two-Pound Package Bumble Fly Now Colony Rapidly

There are approximately 5,000 bees in a pound and they may be obtained in packages holding one or more pounds, but the two-pound size appears to be the most popular for all purposes. Flies are, however, many horsepower, especially in Eastern Canada, who prefer a three-pound package, thinking that the extra pound of bees will enable the new colony to build up more rapidly. But says Mr C. B. Gooderham, in The Dominion Apiarist, experiments with the two sizes of packages do not seem to reveal that advantage for the two-pound package will usually build up as rapidly and store just as much honey as the three-pound package. If the bees are purchased on the loss during transportation not excessive, there are enough of them in a two-pound package to care for all the brood that can be produced by the queen, and the amount will build up just as well wherever it comes workers.

Two Ways To Be Happy

Diminish Your Wants Or Add To Your Means

There are two ways of being happy - of may either diminish our wants or augment our means - either will do, the result is the same: and it is for each man to decide for himself, and do that which happens to be in the easiest. If you are idle, or rich, or poor, however hard it may be for you to diminish your wants it will be harder to augment your means if you are honest, and prosperous, or young, and in good health, it may be easier for you to augment your means than to diminish your wants. But if you are wise you will do both at once, passing on old, rich or poor, or well, and if you are very wise you will do both in such a way as to augment the general happiness of society. Franklin.

The street car conductor had called Wilbur's mother how old he was to be sure he was entitled to a ride free.

"Three and a half," said the mother.

"And mama's thirty-one," added Willie politely.

The honesty of the British public is well known in the British Museum, which reports that it is a very rare occurrence to lose a book.

Climate transforming town.

The terrific droughts that have tormented the mid-west of the United States, according to some scientists, are merely the culmination of the disastrous floods that transform the Mississippi river valley and its watershed into a raging torrent, sweeping hurriedly South of these twin tribulations of nature lies the century-long ruthless destruction of the enormous forest, the function of which, generations ago, is to retain water and prevent the wide changes in temperature. Levelling of forests has taken away nature's finest controls, while the treeless, drought-stricken plains finally are beginning to feel the temperature effects of the long campaign of deforestation.

Sunshine Trail Most Beautiful Highway

Magnificent Scenery From Peace River To Los Angeles

The Sunshine Trail, extending 2,200 miles from the Peace River in northern Alberta to Los Angeles in southern California as being used in its entirety by motorists for the first time this season.

It is now complete as an all-weather highway gravelled or paved for the entire distance from Los Angeles road through to a point 50 miles south of Edmonton, with the remaining 300 miles in northern Alberta to the banks of the Peace river completed as a standard earth high way ready for its coat of gravel

Nowhere in America is there a more scenic region more abounding in beauty and interest. The history of the west may be read on one road, in the relics of the ancient Spanish regime in southern California, in the mormon state refuge founded by the Mormons 10 years ago on the shores of the great Salt Lake in Utah, in the mining camps and the cattle ranges of Idaho and Montana, and southern Alberta, on to the far northern country where the fur traders and Indians met among the old Athabaska trail

For locality the Sunshine Trail links up, by means of short side trips, with Zion park and the Grand Canyon of the Colorado, the Yellowstone in Wyoming, Glacier in the Rockies of Montana, Waterton lakes just across the border in Alberta, Banff and Lake Louise gems of the Canadian Rockies, just off the trail west of Calgary and Jasper National Park, the largest mountain national park in the world, west of Edmonton.

The Best Disinfectant

Sloane Should Have Plenty Of Sunlight Wherever Possible

A well built house is usually cooler inside than the air outside in hot weather. The sun's rays in the house's heat is stopped to a certain extent by the walls. It is possible, by judicious building, to make it cooler still, and equally possible to bring in the heat.

Since the walls turn back the sun's rays, any break in the walls will permit the heat to enter For that reason, it is well to close the windows especially on the shady side of the house, draw the blinds, and keep the house fairly well close to during the hottest part of the day. As the temperature goes down toward evening, open the doors and windows wide, to catch any passing breeze. Later on open during the night, and close them up in the morning.

Sunlight is the greatest disinfectant, so there are limits to this program. On days when the thermometer is only comfortably high, let in all the sunlight possible to every nook and cranny. Run the blinds up to the top of the windows, and let the air circulate through the rooms freely. Give the bread box, flour bin and other closed containers a running over with the sun. Coax the sunshine into clothes closets drawers, attics and cellars, wherever there is a possibility of mould or decay being found

Only when great heat comes in there need to shut out the mighty power for health The temperature is short at best, and from its store of light comes strength for winter A dark house is not a healthful place, though it is delightful when the temperature more beyond reason

---

Answer To The Riddle

"Surely it is a rational object for civilized society, daily and hourly trumpeting forth declarations of Christianity, to devise conditions in which its competent members, at least, are able to secure a fair competence and enough margin to enjoy the pleasures of life In this objective, scientifically attained free, in my opinion obviously lies the answer to the riddle"—Major Harold Brown, Vancouver, in Country Life in B.C.

The average apple crop estimate in the districts of Nova Scotia compared with 1933 is slightly more than half the production of last year

---

Indian farmers, like modern farmers, were pinched by cutworms in their fields.

Hew Honey Haughtiness

Right Honey Per Export And Four Per Domestic Trade

Canadian honey is gaining a firm foothold in the markets of the world, said, in order that there shall be no false step in the upward journey, the Canadian government has promulgated the Honey Export Act of 1934. In future, all honey for export to Canada from outside Canada will be divided into eight classes according to colour and the whole golden, light amber, dark amber, dark and uncandied. For honey shipped from the provinces in which it is produced to any other province, the classes according to color will be white, golden, amber and dark. When honey in any of these classes is in granulated form, and any doubt as to color is expressed, a sample of the honey will be liquified and classified on the liquid honey basis. The grades for all honey, whether for export abroad or inter-provincial shipment, will be three, No 1, No. 2, and No. 3, and before shipment or before being offered for inspection, each package must be plainly marked according to the regulations. The markings include the name of the province of origin. Among the other required markings are the class (color), the grade, with a capital "F" in brackets immediately following the grade mark, and the word "honey." In the case of honey for export outside Canada, the word "Canadian" or "Canada" must be used instead of, or in addition to, the name of the province of origin. Among the other required markings are the class (color), the grade, with a capital "F" in brackets immediately following the grade mark, and the word "honey." In the case of honey for export outside Canada, the word "Canadian" or "Canada" must be used instead of, or in addition to, the name of the province of origin.

Shoop Have No Hair

As Far As Known Only Animals Covered With Fleece

When wool and hair were examined and compared under the microscope wool is much simpler than hair. Wool grows from the upper layer of the human skin. Hair on the other hand is a more complex structure which in a modified form of epidermis growing from a short papilla sunk at the bottom of a follicle or tiny pit in the outer skin As a result of this difference between hair and wool sheep have no hair. Their bodies are covered with a fleece and as far as known they are the only animals so covered.

Grapefruit rind yields essential oils which are found to be valuable in perfume and flavor manufacture.

Not Written In Stars

No Need For Disaster Like Madrera Or To Worry

They are distilling death in the laboratories of all "civilized" countries, and our own country is not behindhand. Yet, up to this time, no expert can now produce a gas mask which is proof against certain kinds of attack. One group of chemists intends a new means of dealing death. As antidote is found; then, out of the devil's brood of research comes a new compound which renders the defensive device futile . . . But such a disaster as modern war need not occur. It is not written in the stars. It can be prevented. It will be prevented if governments and people will but heed words of sense, the energy, the skill they now devote to preparing for war. If the nations will but act as men, the purpose they rule must compel them. — Australia whence it was rifled in 1915

Flags Raised Huge Sum

Kitchener Flag Collected $150,000 For World War Fund

Flags which raised hundreds of thousands of dollars for helpless soldiers and refugees during the World War have just been presented to the Australian government by Edward Solomon of Melbourne. They are to be hung near the National War Memorial at Canberra when it is completed. The most treasured relic in the collection is the Kitchener flag which alone raised $150,000. It is an Australian flag, which was sent nearly 300,000 miles and twice around the world to collect signatures. It was signed in the trenches by Joffre and King. A star from it was sent to Admiral Jellicoe, which he signed and returned for sewing into the flag. The autographs of the King and Queen were later added. Finally the flag was sent back to Australia where it was raffled in 1915

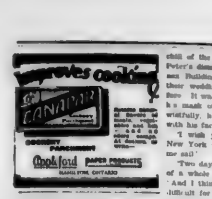
Find Bamboo At Coast

A bamboo drift has been found on the beaches of Queen Charlotte Islands on the British Columbia coast, something not noted for years. It presumably came from the Orient. In years past bamboo and even palm logs have been found on the Queen Charlotte beaches. The bamboo drift usually coincides with an unusually mild year.

World's Largest Skeleton

The largest skeleton in the world has been placed on exhibition in the New Wonder Room in the Natural History Museum in London. It is that of a blue whale, 82 feet long, which stranded in a muddy creek off Ireland 46 years ago. and has since been in storage waiting a room large enough to house it.

◆ FANCIFUL FABLES ◆



OCCASIONAL WIFE
By
Author of "Jocelin", "Lucifer Hall" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live first on the lovers apart until Peter is able to provide for her Peter is a young struggling sculptor trying to win a competition for a scholarship abroad and Camilla the adopted daughter of a wealthy family She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model and Gus Matson, his former roommate with whom he has quarrelled After a party at an exclusive club when the rest of the members of the party go to a cabaret to continue the gaiety and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Gus will another boy are making their way home. To a makes it necessary for Camilla to make excuse for the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along but Peter refuses and they quarrel. After Camilla has gone from the studio Avis Werth calls and persuades Peter to accept a loan of $1,000 Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth." and Avis "Inspiration." Peter adopts the latter title and Camilla, heartsick, goes to Peter's studio for supper and to drink Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign and "Toy Town" broadcast was a great success, and Mr Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was responsible for stimulating business for his company

Peter's exhibit was awarded the Paris scholarship and he prepares for his departure.

"I want you to be the very last person I see when the train leaves," Peter had told Camilla, when they planned their last day together.

They had dined festively at Chez Cottage, their happiness tempered with the ache of memories and the apprehension of the future. But, for Peter's sake, Camilla staunchly thrust aside her fears for what lay ahead and committed herself completely to this exquisite joy of the moment She scarcely took her eyes from Peter's sensy face, storing up in her mind a living picture of it to take out and look at often in the lonely year ahead.

They talked of trivial things, jested gayly, as if a threnody of sadness did not accompany their thoughts. They lingered over their macaroons and glace and demi tasse, as if it were not five short hours before they would part for one long year.

They walked slowly in the crisp chill of the late autumn evening to Peter's dismantled studio in the Anson Building, as they had done on their wedding day four months before. It was then that Peter dropped his mask of cheerfulness and sobbed wildly, holding her in his arms with his face pressed to hers

"I wish you might have gone to New York with me, at least to see me sail"

Two days more can't so much out of a whole year," she reminded him "And I think it might be even more difficult for both of us When I see you leave on the train, I can try to make myself believe that you're not going far and won't be gone for long But to watch a boat carry you down the river and over the bar-son " she sighed

He crushed her close and her head went up to caress his face "If only you might go with me!

Which is impossible" she added with a dull finality which left them both all at for awhile

His trunks had gone his Gladstone bag stood in readiness beside the door, like an object of evil taunting and challenging them from the shadow beyond the arc of light from the shaded lamp

And then, with a sudden speeding up of time, they were at the station in the midst of the clamor of roars shrieks hello, voices laughter They were no longer Camilla and Peter but two units of humanity. They were separate entities soon to go their separate ways, and confused for a few brief moments with the conflicting forces of Pandemonium

Camilla watched the gate man punch Peter's strip of ticket and tear it in half with the casual indifference of a doorman at the theatre tearing off the ticket stubs which gave you the privilege of being an usher for the evening Music in different quarters came the return of this half ticket had! It gave Peter the right to go to the other side of the world and stay away from her for a year

She went with him into the Pullman car, found his berth upper seven "That's a lucky number to begin with, even if I am on the upp'r," Camilla laughed, "and I also plan to take the way of least expense, you bet. Some day, you and I will have a drawing room when we travel."

"Of course," she agreed lovingly

"And you will try to come over in the spring"

They had talked that over many times, but they floundered for things to say that would fortify their courage.

"Before we know it, your work will be going splendidly and we shall be writing about where and when you will meet me in Switzerland or Italy"

The clamor outside increased, late arrivals followed hurrying porters with their burdens Peter consulted Peter glanced at his watch for the tenth time. "Guess you will have to go, precious. I'll take you to the platform."

They single-died through the aisle and corridor, descended to the platform.

"I'd take you into the station, but I don't dare. Can't afford to pay for another upper on the next train," Peter's smile was strained.

"That's what I came to the train for, to see you off. I'll watch the train out of sight until the tail-light blinks beeringly," her voice trembled a little in spite of herself

"All aboard!" sang the porter.

Peter's eyes plunged down into hers and held them for a breathless moment. Their arms clung to each other and their lips lingered in a long kiss.

"Have to go, sweetheart," he murmured

They parted reluctantly as the train began to move. Peter sprang down the steps, followed by the porter and stood waving his hand as the train gathered speed. Camilla waved back, dashing the tears from her eyes so that she could see his face more clearly. Bright, blown curls and sunny smile blurred together, became a tall figure moving swiftly into the distance. The clicking rails echoed, hummed. And with a last jarring wrish, a last light on the observation platform blinked out.

Camilla turned and walked back through the station, got into a taxicab and directed the driver to her apartment. She felt numb, lifeless, empty. Part of her had gone away.

Peter stood at the steamer rail, looking down into the sea of faces and the chaos of a pier at a ship's sailing. All the confusion of sounds and sights and odors swirled about him He was detached, seeming to be no part of it, just watching with interest. His was thankless hour different his landing in this great harbor must have been almost a score of years before He had arrived there, frightened, bewildered, clinging to his mother's hand

And now, by the results of the skill with which he had reproduced that occasion in clay he was returning across the sea to honor; confident, serene, also he was unmoved. He wished that his mother might know what he had done She always had talked him out of going "back home" scarred for it and begged him to go anyway even if she never saw him again. He would be promised himself It was possible that he would go to Stockholm from Paris before he returned to New York. But he could not go there definitely for that yet.

A bell clanged Activity increased. Hurrying officials and hurrying porters Tears and laughter Kisses caresses Sober faces, happy faces. Then photographers and reporters rushing to and fro Women in smart clothes wearing bright corsages of flowers To none of them, this sailing was an occasion of their lives; to others, it was just another lonesome departure.

Bells, whistles, moving feet. The gangplank raised Frantic waving of hands and smiling farewells. The pier drawing away from the huge steamer, disappearing into the distance. Bands passing, tugs puffing about the harbor, gulls wheeling. A bell had hatched ugly ducklings now turned into swans and didn't know what to do about them, freight-boats slipping by The sighting of the city looking like a picture of towers and spires against a dull gray sky, disappearing in the fog.

The Statue of Liberty slipped by like a phantom in the mist, an indistinction that never would have real and so the hundreds were returning whence they—or their ancestors had come.

Peter stared down into the icy foam of the disturbed water, recalling the stoic little smile on Camilla's face when they had parted, a moment's distance at the station. He wished that he might have seen her again. But perhaps it was just as well that she had not come to New York with him. It would have meant for her a lonely journey back.

But, instead, there was nothing to be gained by yearning for Camilla, now. He had to right-about-face and think of what lay ahead of him. As if the act would follow the thought, he turned about and walked down the deck toward his stateroom. Tomorrow he would begin to study French in earnest.

As he turned into the corridor, he wondered suddenly if he were already seasick and perhaps even developing a strange sensitiveness to smells and he put up his hand over his eyes with a vague gesture, as if he were seeing a vision.

There, facing him in the passage, was Avis Werth.

(To Be Continued)

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile
— Without Calomel

You are "feeling punk"—simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination get behind, food sours, and your entire system is poisoned.

What you need is a liver stimulant. Something that goes to your liver and causes it to work. Dr. Miles Laxative Liver Pills are a liver stimulant. Not a cathartic. Not a purgative. Not a drug habit. Take Dr. Miles Laxative Liver Pills. Purely vegetable. No harsh calomel (mercury). Safe. Sold on the plan to make you feel fine. Read directions. 25c at all druggists.

Ask Mother—She Knows

Mother took this medicine before and after the babies came and it gave her more strength and energy when she was nervous and rundown . . . kept her on the job all through the Change. No wonder she recommends it.

Search For Treasure

Young Englishman To Explore Lost City of Sheba

In search of treasure hidden in the mysterious lost city of Sheba, once ruled by the glamorous queen, a young Londoner of 22 is setting out on a lone trek into the Arabian desert.

He is Norman Stone Peers, who has recently returned from a 2,000-mile camel expedition across the Sahara.

Millions in gold, silver and precious stones, are believed to be hidden beneath the shifting sands which wiped the great city of Sheba from men's ken over 2,500 years ago

"It is going to be a difficult trip with lots of risks," said Mr Peers. "The Arabian desert is one of the hottest places in the world, and one day 60c of them there in 24 hours. Fierce brigands lurk in its wastes, and lost trails mean almost certain death.

"Years ago Sheba was the centre of the trading routes across Arabia. In the reign of the great queen it was a city of wealth.

"At the death of the queen the city began to decline. It became overrun with thieves and brigands, and traders avoided it until Sheba became a forgotten city and the desert sands gradually obliterated it.

THE RHYMING OPTIMIST

By Aline Michaelis

OF JOY

Though sometimes long I woe it,
This joy beloved of all,
It may not be found by pleading
Or answer to my call

Then, like a swift wind veering,
Its touch is on my life,
Where light then brave new-loomed petals
Yet honour then a knife.

I never see it coming,
I only feel it's gone;
Though, with me, it is fragrant
And vivid as a rose

It sends me no forerunner
To say when it will start,
And all I know of joy is
Its singing in my heart.

Made His Own Plans

Prince Of Wales Has Endeared Himself To People

It is one of the many practical advantages the King over Canada that there is no sharp break of personality. The people learn to know and love the son while the father reigns, and love for the son endures the other in a humane and natural succession. Our Prince, however, is not personally occupying his way King; he has made for himself his own interests and his own sphere of work. His unemployed have learnt from him the Royal solicitude; the Social Service League, which he founded, seeks to fill their vacant hours and to find them work when work cannot be found, at least occupation. The clothing of shoes, the planting of gardens, the making of simple furniture, even the building of houses—such useful arts have given new purpose, new hope, to many In many cases, to the lives of the unemployed. The State may maintain the workless in idle; but it requires the Prince's touch to make them useful.

Of the State may maintain the workless in idle; but it requires the Prince's touch to make them useful.

Grilled Or Fried

He examined the menu carefully and then tossed it irritably on the table.

"Waiter," he called, "is this all you have to-day?"

"Yes, sir," said the waiter, whose term of service expired at the end of the week.

"Why, there's nothing on the menu fit to eat absolutely nothing," said the diner. "Bring me the manager!"

The waiter smiled.

"Very good sir," he said. "How would you like him—grilled or fried?"

Happiness is the art of never holding in your mind the memory of any unpleasant thing that has happened.

Even discounting its thick blubber of ice, the Antarctic land is the highest of the world's continents.

LINIMENT

Little Helps For This Week

"Beloved let us love one another, for love is of God, and everyone that loveth is born of God and knoweth God." 1 John 4-7.

Is to the calmly gathered thought,
The discernment of life is taught,
The mystery, dimly understood,
That love of God is love of good;
That to be saved is only this,
Salvation from our sinfulness.
—J. G Whittier.

The Spirit of Love, wherever it is, is its own blessing and happiness, because it is the truth and reality of God in the soul, and therefore is the same good in itself everywhere and on every occasion. Would you know the blessing of all blessings? It is this God of Love dwelling in your soul and killing every root of bitterness which is the pain and torment of every earthly selfish love. For all wants are satisfied, all disorders of nature are removed, no life is any longer a burden, every day is a day of peace, everything you touch becomes a help to you, because everything you see or do is all done in the sweet element of Love.—William Law.

India To Pay Homage

Princes To Attend Silver Jubilee Of King George's Accession

Fifty elephant all gorgeously decorated with famous "Mouth of India Star Diamond"; 30 yard ropes of pearls—these are a few symbols of the glamour of the east which India will send to London next May, when some of her former native princes will come to celebrate the silver jubilee of the King's accession

The 50 elephants, wearing jewels belonging to the 37 chief maharajahs, are to take part in a brilliant procession in London's streets

It is reported also that a court tailor engaged by the Maharajah of Jodhpur will come to London to pronounce his blessing on Their Majesties.

The famous diamond, the "Mouth of India Star," second only in importance to the Kohinoor, will be worn in his turned by the Gaikwar of Baroda during the ceremonies and the Maharajah Sindhia of Gwalior will wear his magnificent state robes with ropes of pearls amounting to 30 yards in length

Emeralds and other jewels said to be worth $200,000 will be worn by the Maharajah of Patiala

BOY SCOUT OFFICIAL TO SPEAK AT "MOET"

John A. Stiles, Ottawa, general executive commissioner for the Boy Scout association of Canada, who will visit Edmonton Scouts and officials on August 24, will also be guest speaker at a "Rover Moot" at the Sylvan Lake scout camp site on August 25 and 26.

Rovers throughout Alberta will be invited to this gathering to hear their dominion leader, according to present arrangements announced by H. H. Johnson, Edmonton, assistant executive secretary for scouts in this province.

The Observer

It has been proposed recently that some 27,000 head of cattle in the drought-afflicted areas should be pre-zoned, meaning by that that they should be reduced to such products as tallow, glue, hides and grease, because they cannot be fed through the winter in these districts. No doubt any such measure is to be preferred to seeing the cattle die of starvation, but surely, when it has been known for two months or more that something would have to be done, a better solution of the difficulty might have been found. We seem to be lacking men of imagination in these times. There is a great deal of unemployment; there are many men, in other words, who have nothing to do and who, with their families, must be fed. In central and northern Saskatchewan and Alberta there is a great store of fodder which might be pastured by stock or stored for winter feed. In the southern areas there are these thousands of cattle which are without food. Everyone knows the story of the man who brought together the three men, one of whom had an egg, another a pint of milk and the third a bottle of whiskey, to the advantage of all of them. Why could not unemployed men be made available to transport and feed the stock and save winter feed for them, to the end that beef might thereby be provided for those men and their families. Instead of doing that, or something like it, we allow the feed to go to waste, slaughter the cattle and pay out cash relief. The slaughter of so many unfit cattle will help wreck the already poor market for beef products; the cattle will have to be replaced when the farmers in the south re-establish themselves there or elsewhere (probably at the public expense) and the loans for relief will have to be repaid from the public exchequer. Surely it is not too late to do something about it in a constructive way instead of making a sacrifice all along the line.

On every hand we hear approval and promises of support for the suggestion that the government should take steps in a definite way to restore some of the wooded areas that ought never to have been cleared, and ensure a proper percentage of land surface remaining under forest. There might be added to this program with advantage a further clause providing for the reclamation of as great an extent of water surface as possible. These are not separate measures but complementary parts of the same

JOSEPHBURG NEWS

On August 29th, Mission Sunday, Morning Service by Rev. Kerr of Vegreville 10:30 a.m. Afternoon at 2:30 p.m. Several ministers will also address the congregation in English during the afternoon service. The Bruderheim choir will be in attendance.

Messrs. Adolph Berg of Edmonton, Alfred Mohr of Holden, and Misses Gertrude Berg of Edmonton and Ruth F. Mohr of Josephburg returned home last Thursday from a two week's tour through the States and Mexico.

They visited relatives—Mr. and Mrs. Fred Mohr and family of California, formerly of Josephburg Mr. and Mrs. Gus Bocher and Mr. and Mrs. Harney Sindy at Portland, formerly of Fort Saskatchewan and many others.

Mr. and Mrs. R. Krohn and daughters, Mr. Dan Krohn and Miss Vina Becker motored to Stony Plain Sunday to visit with Mr. and Mrs. J. Dittrich.

Mr. Alfred Mohr of Holden, president of Three Hills was at his mother's home, Mrs. Mike Mohr for the week-end.

The Indian sale will meet at the home of Mrs. Adolph Becker's on Thursday, Sept. 6th, at 2:30 p.m.

BROOM CORN AT TABER

Satisfactory production of broom corn for use in the manufacture of brooms has been established on the irrigated section surrounding Taber, in southern Alberta this season. Some 400 acres have been grown under contract with a firm at Regina, which will utilize the material. The crop was recently inspected by officials of the concern and found to be in excellent shape. Some of the crop stood to high an eight foot.

BONUS FOR SUGAR BEETS

Farmers growing sugar beets under contract with the Raymond sugar factory have recently been paid a bonus on their 1933 crop which brings the total price per ton paid them to $6.05, compared with the price of $5.33 received for the 1932 crop. A further bonus is possible later in the fall.

The FIRESIDE PHILOSOPHER
By ALFRED GOSS

Anger kills passion.

A quick temper rules judgment.

Indiscretion has ruined many a reputation.

Diplomacy often arises from lack of courage.

Don't bargain with those who have nothing to lose.

Mental blemishes will destroy anyone's usefulness.

You need real courage to go forward when you're afraid.

nonsense—"Sisters twain that date upon each other, and never to be confessed without leave." It is a movement in which there is everything to gain and nothing to lose, and one in which all classes of citizens will voluntarily give their support for self-preservation if for no better reason. It will fill our granaries and our cellars (and also our wells) and at the same time add beauty to our summer landscape and provide fuel for our comfort in the long winters.

These articles are written specially for The Fort Saskatchewan Record each week.

Coronado Farmers Suffer Great Loss by Hail

It has been reported that John Trotter, Coronado district farmer, was hailed out to the extent of 50 per cent during Monday's storm. Other farmers in the district report small losses from the storm.

GOOD HOPE NEWS

Little Steve O'Gorman had the misfortune in breaking his collar-bone in three places when he was thrown from a horse on which he was riding. The accident occurred last week and he was taken to the local hospital, where his injuries were looked after.

Mr. A. H. Moyer, Miss Eva Moyer, and Clara Dittrich attended the Vegreville Federal Convention held at Andrew on August 15th.

With excellent weather prevailing, cutting of barely and early oats are well under way. Wheat is being cut on some farms in the district

Rev. and Mrs. Holst left for Calgary, last Thursday, where he will preach during the coming year. Rev. W. Jolliffe and Rev. N. Wiggins will take over the duties at the Good Hope Church.

We regret to say that the following baseball games were overlooked being recorded during summer news. Good Hope won from Ypres Valley 6-4. Good Hope defeated Brookville 10-3. Good Hope defeated Silver Lake 11-6.

Miss Golden Carmichael is visiting at the Moyer home.

She (reading sign over box office): "O Phil, it says, "Entrie Balcony 35c."

Phil: "What of it?"

She: "Let's get it so we can be all alone."

Wedding

A wedding of unusual charm was solemnized Tuesday evening, at the home of the bride's parents, when Miss Dora Emily, eldest daughter of Mr. and Mrs. Harry Looker was married to Mr. John Leslie Price, son of Mr. and Mrs. Walter J. Price of Edmonton.

The ceremony, which was held on the lawn, was performed by Rev. D. C. Ramsay, and witnessed by a large gathering of relatives and friends.

The bride, who was given in marriage by her father, was lovely in a pink organdas gown with picture hat to match, and carried a bouquet of pink roses. The bridesmaids, Miss Marjorie Looker, sister of the bride and Miss Effie Price, sister of the groom, were daintily dressed in frocks of blue organdas with picture hats to match and carried bouquets of pink and white sweet peas. Mr. Walter Price, brother of the groom was groomsman.

The bride's mother was charmingly dressed in black and white crepe. The bridegroom's mother wore a smart figured flat crepe ensemble. Each wore a corsage of roses.

Immediately following the ceremony a reception was held. The bride's table was centred by a three-tier wedding cake and was presided over by Mrs. Lundeboon of Edmonton.

The toast to the bride was proposed by Mr. Jack McLean and was appropriately responded to by the bridegroom.

Amidst a host of good wishes, Mr. and Mrs. Price left by motor for the Coast where they will spend their honeymoon. For traveling, the bride wore a brown crepe ensemble, with accessories to match.

After their return Mr. and Mrs. Price will reside in Champion, where the groom holds the position of Accountant in The Canadian Bank of Commerce.

The happy couple were the recipients of numerous wedding gifts, including cheques, china, cut glass, linen etc. The groom's gift to the Misses Lamont, Miss Flo M. Fleming of Arcadia, to the bridesmaids vanity bags and to the best man a tie pin. Those present were:—Mr. and Mrs. Price, Mr. W. Price, Miss Effie Price, Mr. and Mrs. W. Roberts, Mrs. Lundeboon, Dr. and Mrs. A. Lemay, Mr. T. Montgomery, Mrs. H. Butler, Mr. and Mrs. D. E. MacDonald, Mr. Fred MacDonald, Miss Muriel MacDonald, Mr. and Mrs. McCutchen, Miss Margaret McCutcheon, Mr. and Mrs. E.E. Kortbeen, Mr. and Mrs. D. Carroll, Mr. and Mrs. H. Bettle, all of Edmonton, Mr. and Mrs. Walker, The Misses Moon etc. The groom's gift to the Misses Lamont, Miss Flo M. Fleming of Arcadia, to the bridesmaids vanity bags and to the best man a tie pin. Those present were:—Mr. and Mrs. Price, Mr. W. Price, Miss Effie Price, Mr. and Mrs. W. Roberts, Mrs. Lundeboon, Dr. and Mrs. A. Lemay, Mr. T. Montgomery, Mrs. H. Butler, Mr. and Mrs. D. E. MacDonald, Mr. Fred MacDonald, Miss Muriel MacDonald, Mr. and Mrs. McCutchen, Miss Margaret McCutcheon, Mr. and Mrs. E.E. Kortbeen, Mr. and Mrs. D. Carroll, Mr. and Mrs. H. This Changing World

Probably no period of recorded history can show such a succession of surprising and bale-dumfoun changes, political and economic as that through which we are passing. The vast complex of peoples and nations constituting the civilized world to-day is in a state of uniformly unstable equilibrium —an equilibrium disturbed from time to time by a variety of insurgencies both major and minor. So frequent are they, so unexpected their character, so far-reaching their effects, that few even of the great among the prophets dare risk portraying the face of things to come in the immediate future. They feel safer in making (and indeed they prefer to make) their predictions at long range, and to envision a world more remote in time than that which is likely to concern much the present much-dazed generation.

The political and economic changes which occurred during the storm years of 1914-18, the revolutionary upheavals which wrecked dynasties and brought new state forms into being, probably were larger in scale. But they were not so numerous nor, for that matter, did they strike with ruder shock than those of more recent occurrence. The protracted strain of the war itself served to dull and deaden the sensibilities of the people directly subjected to it, and, more inured to shock, they were inclined to lump all the catastrophes into one the War. They were inclined, too, to the belief that, once peace were restored, the world would quickly revert to the prewar basis and settle anew to the ordered routine which seemed so stable until the unexpected happened at Sarajevo.

The world, however, has refused to settle down, refused to revert to the former status. The well-ordered machine which made this seem the best of all possible worlds until the summer of 1914, has never regained its old momentum. The people hanker for peace and a chance to routine their existence. They wish to remodel the new world on something like the old lines. But peace is denied them; peace, security and comfort, the comfort which comes from an assured livelihood. All is unrest. Not only they did upon a volcano about to erupt, and nerves agitated by uncertainties make them the more susceptible to the recurrent gusts which evidence the tur-moil beneath. Then the crises of the depression appear more menacing than those which occurred during war-time which stunned, rather than agitated.

Recent events in Austria and Germany are symptomatic of the times. The world looks on with anxiety while these two nations writhe in their efforts to evolve a state form which can bring harmony and happiness to their peoples. Equally significant to the world at large, however, are the experiments being tried in the United States and in Great Britain to evolve a new economy which will give work to the workless and restore the prosperity both, in the past, have enjoyed. Both experiments involve complete revolutions in the national economic life of these countries, but few would agree that either yet had found the solution within their grasp.

It is unnecessary to enumerate the many changes during the period of depression. Books on political and economic subjects become obsolete in a day. Anyone who reads knows that. Take, for example, the following quotation from a book which reached shelves of public libraries in Western Canada little more than a year ago.

"Nobody doubts, for instance, that America will overcome the present difficulties once it gets a grip on itself. France is sitting comfortably, and even Germany is held to have a fair chance. But the issue is more doubtful for Great Britain because her subsidy seems more fundamental. Already the British Empire has fallen from its former high estate."

The picture has been entirely reversed since then. Scarcely a statement in the quotation stands to-day and that is but a sample of the dangers besetting the would-be prophet in this dynamic, fluid world. Apparently, the unstable condition will continue until every nation and every single cure-all has been tried and tried in vain. Then perchance, a world on the verge of ruin will realize that it is not so much the medicine that is wrong as the diagnosis. Indeed, were international economy replaced by international sanity almost any kind of political or economic medicine might cure remaining ills.

Realizes Its Value

Governor-General to Patron To Junior Farm Clubs

Club members and everyone associated with club work for farm boys and girls will sincerely appreciate the great honor that has been accorded to the farm club movement by the Rt. Hon. the Earlof Bessborough, who has extended his patronage to the Dominion Council on Boys' and Girls' Club Work.

The recognition that His Excellency has thus given to the value of junior club work in Canada should encourage greater activity on the part of club member and associates a deeper sense of the opportunities that are provided in this form of agricultural extension.

Bridge and bridge tournaments are regarded as gaming in England.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry is much more relieving the pains, checks the looseness of the bowels, and then dried away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and healing up the inflamed and sensitive tissues of the bowels. Its wonderful success in the treatment of bowel complaints of both young and old.

1,027 Guns Taken From U.S. Arsenal Since 1922

The underworld has stolen 1,027 guns—ten of them machine-guns—and 33,116 rounds of ammunition from national guard armories in 30 states since January 1, 1922. William Hinsley, acting United States Secretary-general, gave the information.

At the same time he revealed the department of justice has asked the war department to prevent upon state governors to end these thefts. Hinsley recalled that the federal machine-gun law which took effect recently, is intended to claim firearms channels to the criminal.

British Dominions Emigration Society

Secretary Returns To England After A Visit To Canada

Concluding his forty-second visit to Canada from Britain Robert Culver, secretary of the British Dominions Emigration Society, returns on the Canard White Star liner Ascania from Montreal.

"I am impressed," declared Mr. Culver in an interview, "with the improvement in Canadian business conditions over last year. There are many signs of material progress and a feeling of returning confidence among industrial people I have met here this year. I feel that before long we shall have a greater opportunity of increasing the work of our society in the Dominion."

"The British Dominions Emigration Society was founded in 1922 by Fetherstony Kitts. During these 12 years over 37,000 have been assisted to emigrate and the feature of the work I am most proud of is that we have never charged one cent interest on the money advanced. It was not surprising, therefore though most gratifying to our society to receive a commendatory letter from your Prime Minister, the Rt. Hon. R. B. Bennett, praying warm tribute to our work upon the occasion of our 50th anniversary. At the present time our work is almost entirely confined to the re-union of British families."

The society enjoys the high presidency of H.R.H. Princess Louise, Duchess of Argyll and a list of distinguished vice-presidents which includes The Most Noble the Marquess of Salisbury, K.G., G.C.V.O.; The Right Hon. and Right Rev. The Lord Bishop of London. The Right Rev. The Lord Bishop of Blegney, The Right Hon. Lord Lloyd, The Right Hon. Lord Middleton, Sir Archibald Weigall.

The society's Canadian manager is R. Gordon Burgoyne of Montreal, the local committee includes many business and professional leaders.

Committees of similar calibre cooperate with the society in Toronto, Halifax and Saint John, N.B.

Assistance to emigrate takes the form of grants to persons in varying conditions to suit circumstances, to British-born subjects of good character and sound principles of advice and help to settlers after their arrival.

"It has been found by our representatives in Canada," Mr. Culver said, "that large numbers of men go out, leaving their wives and families behind, with every hope and good intention of soon being able to send for them. They make good in the various cities and towns throughout Canada, but very quickly find that after keeping themselves and sending money home to help to keep their wives and families in Britain, it is utterly impossible for them to save the amount required to bring their wives and families out. One of two things is then bound to happen—either the men have to throw up their good permanent work in Canada and return to the Old Country to swell the ranks of the unemployed there, or they have to receive assistance towards the cost of the transportation of their wives and families. We are very glad indeed to be able to take up this work, which we feel is of considerable importance."

Robert Culver and R. Gordon Burgoyne of the British Dominions Emigration Society, who returned to Britain on the White Star Liner Adcasia

The First Motorcycle

Fiftieth Anniversary To Be Celebrated In Germany This Year

The fiftieth anniversary of the first motor-cycle is to be celebrated this year; a monument is to be erected to Gottlieb Daimler, in Schorndorf, Germany. Working behind the shutters of a shop in Stuttgart, Daimler and Wilhelm Maybach made the first motor-cycle, and in the same year the first motor-boat was launched in the river Neckar, a tributary of the Rhine. Believing the inventors were manufacturing counterfeit money, the police raided their workshop, and as there was considerable public fear of petrol, wires mounted on porcelain insulators were placed around the premises to give the impression that the motive power was electricity. In the following year the first "horseless" carriage left the shop. It was an ordinary horse-drawn carriage with metal tires in which one cylinder of 1½ horsepower was mounted. It achieved a speed of eleven miles an hour.

Makes "Color Music"

Attachment For Piano Invented By English Engineer

I Shamah, English electrical engineer, has invented an apparatus for making "color-music" which may be used in any home as an attachment to a piano. By means of this, a drawing room may be flooded with diffusing lights which will automatically react in colors to whatever tune is played. He has so graded the vibrations of a piano in proportion to each other that each note has its own exact shade, so that it will be possible for dusky maids to play "God Save the King" in a combination of shades varying between red, white and blue; the "Blue Danube" in green and blue, or the "Moonlight Sonata" in yellow and silver. Another invention by Mr Shamah enables one to "feel" music. You hold two metal tubes and when a tune is played you feel the rhythm of it like a beating pulse, which send a pleasant tingling sensation up the arms.

A Pulpit On Wheels

Boston Places It Where People Can Hear It

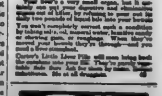
In the Church of St. James, Clovelley, is a pulpit on tram lines. The pulpit which existed before 1908, was very high and ugly, so it was decided to cut it down to its present proportions. When placed in a certain position in the church it concealed the altar, and when in the only other suitable position, people in the gallery could not see the preacher. Now, before the sermon, the verger pushes the pulpit on its lines to the centre of the church, and after the sermon it is pushed back again.

OFF COLOUR?
HOW IS YOUR LIVER?
Wake up your Liver Bile.
—Without Calomel

Your liver's a very small organ, but it upsets one if it's sluggish and stagnant. Calomel acts on the liver by refusing to your poor bile. You don't need calomel. You need bile to digest your food. Without bile it rots in the bowels. Constipation follows. Then you're sick, headachy, dizzy, nauseated, your breath is bad, your tongue coated, you're "off colour."

Carter's Little Liver Pills will soon bring back the sparkling joy of health. Purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists.

CARTER'S LITTLE LIVER PILLS



W. N. U. 2000

Colonization Plan For Quebec

Legislature To Be Called Upon To Vote $10,000,000 For Purpose

Quebec's parliament will be called upon at the next session of the legislature to vote $10,000,000 for colonization in the province Premier L. A. Taschereau has announced.

He said there would be a "colonization congress" in the fall to be attended by bishops, colonizing missionaries and others interested in the back-to-the-land movement.

Other plans of the Quebec government set out for formation of a "commission of study" to look into the question of municipalization of electricity and immediate construction of the addition to the parliament buildings on St Augustin street Premier Taschereau announced.

The premier made a statement in part as follows

"Two problems common the attention of the public: Colonization and with it back-to-the-land and the establishment of the sons of farmers, and the question of electricity.

"These are two matters which we wish to solve. Colonization is assuredly the essential work to attain our national prosperity.

"We have decided to ask the legislature at the next session to vote an amount of at least $10,000,000 to be spent entirely on colonization after a general plan by which we wish to group our settlers, to remove lands from forestry companies so as to open for the sons of farmers land in regions closer to them and more favorable to their settlement. With this view we will summon a colonization congress at Quebec in the fall to which we will invite our bishops, our colonizing missionaries and the agents of the movement to consult them and receive their advice on the best manner to obtain the best results from this policy.

"But to colonization on new lands are linked intimately the back-to-the-land movement and the establishment of farmers' sons in old parishes. These latter should have a large share of the $10,000,000. We have many unoccupied lands in the province and we wish to place on them the young folks of old parishes which the lands will enable to live.

"We have inaugurated a system of paying $200 in annual contributions for $100 each to the father of a young farmer of an old parish who convinces his son to establish himself on a vacant land. This system, of recent date, has already given excellent results and we wish to extend it further."

Canadian Economy

British Financier Pays Tribute With Business Recovery Here

Canada's showing in the general world movement towards economic recovery was cited to suggest that a artificially forced up commodity price level is not a necessary accompaniment to increased business activity by Sir Frederick Phillips, Financial Times of London. The paper devotes a leading article to Canadian business recovery as revealed in figures of industry, trade and finance for the first six months of the present year.

Substantial improvement in a number of the principal Canadian industries are referred to. The paper observes that the fact that recovery of "this magnitude should be possible without the aid of governmental intervention on any scale commensurate with that witnessed in the United States is a tribute to the soundness of Canadian economy."

Sheep Have Intelligence

That sheep have intelligence, contrary to the general belief, is declared to have been proved recently by the leader of a flock, near Blackpool, England. While the flock was drinking from a canal one sheep fell into the water. The others scampered off, but the leader ran back to the canal, jumped into the water and pushed the drowning animal to the bank. Both scampered out and rejoined the flock.

When you and she are wed
You are made one, 'tis true,
But you will quickly learn
That one is her, not you.

W. N. U. 2000

Here are two pictures of members of the Canadian team who took part in the British Empire Games in London. On the left the Prince of Wales is shaking hands with individual members of the team as they march past him at St. James' Palace. On right, one of the Canadian coaches, Miss Rosenfeld (with white beret) is giving the girls a few hints while M. H. "Bobby" Robinson, manager of the Canadian team, looks on from the left of the group.

Scrub Pines Valuable

New Chemical Process Makes Them Desirable For Many Things

The lowly scrub pine that dots millions of acres of southern forestland, long regarded as a menace, may become a source of revenue that will rival King Cotton's golden harvest.

Under the magic of experimental chemistry, the spindling "slash" pine that turpentine operators weeded out of their lands because it took soil food from the trees producing gumis, and which the lumbermen spurned as worthless, can await for cutting, may supply the high explosive with which the next war is fought, the transparent waterproof wrapping for packages of cigarettes, the thread from which fashionable women's stockings are woven, and the paper on which your daily papers are printed.

It may lend the paper mills of America to beat a path to the sunny south, capturing an import market that annually spends $170,000,000 for paper used pulp.

The development of an enormous new paper industry is due to the genius and persistence of Dr. C. H. Herty, a Georgia chemist, who discovered that one ingredient of the pine tree, long regarded as the principal one for paper pulp use, could be converted at under practical manufacturing conditions into a superior grade of newsprint.

The particular variety of the common pine tree, known as the "slash" pine, has a white, even wood and contains but little resin. It grows prolifically throughout the south.

A score or more of leading southern dailies recently published editions on newsprint made from the slash pine through the Herty process.

Dr. Herty's laboratory has not stopped with the discovery of slash pine as a practical source of newsprint pulp. Experiments are now in progress converting the pulp into nitrocellulose the basis of a vast industry that produces artificial silk, high explosives, photographic films, artificial leathers, quick-drying automobile lacquers, transparent package wrappings and countless other products.

University For Parrots

Phonograph Records Used For Teaching Language To Birds

Unique in that its students are all birds, the "university" has been opened at Berlin. The school is international in scope, the birds being taught German, French and English. Contrary to most methods of teaching the birds, the "professor" has phonograph records made of his voice repeating the sentences that the owners desire to have drilled into their birds.

For two hours a day the bird is given his individual instruction until he is able to repeat the sentence. It generally takes about four weeks to give a parrot a vocabulary of 60 words, but longer time is required to make them respond to the proper occasion.

Studying Something New

Eighteen Boys In I.A. School Take Up Many Languages

Among those who attended the annual convention of the American Home Economics Association were four boys, members of a class of 18 boys studying home economics at Bedford high school Bedford, Ohio. The class was founded seven years ago and is believed to be the first for boys in the country.

The boys are bet—fi-cinnate by any means. All are members of their high school or football teams and are studying in their spare time all the domestic arts. They have learned how to sweep the kitchen floor, wash dishes and prepare soups, vegetables, breakfast foods, meats, puddings and salads.

According to Victor Saltitis, who is president, the boys plan to take up the study of law and expects to play semi-pro ball when he returns home. It is not easy to join the new home economics class which is limited to eighteen. Each boy must have an average of at least 85 in all his other classes.

"Most of us play on some team," he explained. "We take the course because we want to learn about that part of stuff: it's easy and we want to know how to cook when we go camping."

Japan has a thunderstorm service which is particularly useful to its agriculturists. Two hundred and nineteen observation posts, manned by the employees of the various electrical companies and placed at about 121 miles apart inform the meteorological service of the government of any threatening thunderstorms over an area of 80,000 square miles.

Natural gas discovered in crude oil wells is used to supply the motive power for forcing oil from the ground.

Plan Of Old Lighthouse

Antiquarians Learn How Old Beacon Was Built

The studies of two antiquarians has been drawn from an old manuscript in vessel description of the Alnmouth lighthouse, once the "third wonder of the world."

Miguel Ann Palacios, specialist in Arabic literature, and Lopez Otero, an architect drew up a plan of the beacon as described in a 12th century manuscript left by Ibn Ez-Bayl, a Moslem of Malaga who lived from 1135 to 1207.

The lighthouse was built on an island north of the city at a distance of 1,000 "steps" and linked to the city proper by pylon 60 feet wide, which ended in a viaduct opening into one of the doors of the lighthouse. The platform stood more than 100 feet above the level of the water and was made of huge limestone blocks bonded together and further held by melted lead poured into the interstices.

The lighthouse itself was in three sections built upon the platform and superimposed, one upon the other. The first section was square, the second octagonal and the third cylindrical.

To Make It Rain

Oklahoma Paper Offers Prizes For The Best Suggestions

The Oklahoma City Times is offering prizes for the best letters from readers on how to make it rain. No rain had fallen in the Oklahoma City area within 46 days.

The first letter suggested the placing of large mirrors at many points over the state, "funneling a heating process to draw out the high pressure area in producing clouds of rain."

Success in the contest are a rain coat, an umbrella and a pair of rubbers

FANCIFUL FABLES

Agricultural Notes

Interesting Items Gleaned From Many Sources

Manitoulin Island, where the great all-turkey show is held annually is assured of a fine crop of turkeys this year

It is estimated that at least 1,000 Alaska poultry are required to supply the retail interior trade of Montreal. The supply is short of the demand

The total amount of branded beef used in Canada during the month of June was 2,497,747 pounds an increase of 314,314 pounds on June 1932.

The price of bacon for the domestic and overseas markets depends principally on quantity and also on volume which must be maintained at a steady flow

It was the uniform excellence of grade A turkeys of the Canadian Poultry Pool of Western Canada that brought repeat orders from Great Britain and this remark may also be applied to the recent export shipments of chickens

To produce and harvest the wheat crop of the three prairie provinces by the methods used 100 years ago would require the labour of all of the farmers of Canada, their sons, and their hired men ten hours per day for a period of 113 days, or about the normal period from re-t time to harvest. Dr J F Booth

Surveying respondent Svalbard has an area of some 125 000 square miles of which lakes and rivers occupy over 4 per cent. Of the land area of slightly over 120,000 square miles 70 per cent so for the most part unproductive, leaving 36,000 square miles of relatively forest pasture and arable land

The application of modern refrigeration to fur storage has made some rapid development in recent years with the use of frost, 50 colourless, safe refrigerant with by c-3 boils, which "mechanical moisture" has temperatures essential to the preservation of life and hairs of furs Cold Storage Fur Letter Dominion Department of Agriculture

There is no record of the production of wheat in Canada in 1880 but in 1890 7,266,564 acres on 464,676 farms produced 22,360,452 bushels, whereas in 1930 24,882,800 acres on 728,864 farms produced 420,672,000 bushels. Thus in 50 years, the number of farms increased only about 57 per cent while the number of acres increased about 1,000 per cent.

In the poultry work all over Canada, the Government Poultry Services of the Dominion Department of Agriculture play a leading part. These services assist farmers with the organization of pools, give direction as to the finishing preparation, grading, and packing to all concerned, and inspect carloads of poultry throughout the whole of Canada.

In the 1932 honey survey of the Empire Marketing Board, Canadian honey was found stocked in eight out of the 20 principal departmental stores in London, England, and in six out of the eight chief stores of Glasgow, Scotland. The official brands, "Bee-kist" and "Quebec" were found in Glasgow, while in London an Canadian varieties were on sale. In London, of the 4 liquid color was preferred, in Glasgow, the slightly darker amber colored honey was more in evidence

Free T.B. Treatment

Plan To Be Submitted To The Alberta Tax Inquiry Board

Free treatment of tuberculosis for all Alberta residents suffering from the disease the cost to be met out of general provincial taxation, is sought by the Edmonton board of health in a plan that will be submitted to the Alberta taxation inquiry board

The taxation inquiry board is called to recommend the plan which is similar to the one now in operation in Saskatchewan, to the provincial government

A considerable reduction in the number of cases was noted in Saskatchewan after the plan had been in operation two years, and it is felt that equally good results would be obtained here

If an ant were enlarged to human size, and its strength increased proportionately, it could move objects weighing 150 tons.

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Irene Parlby has been sworn in as minister without portfolio in the Reid government.

The Soviet Union has named M Ostrovski as its minister to Rumania. Recognition of the Soviet by Rumania came a few weeks ago.

A gold rush has developed north of Grand Marais Mines, in Ontario, where a vein has been struck which has yielded $17.50 worth of the precious metal to the ton.

In accordance with a wish expressed in his will, only six words appear on the tomb of President von Hindenburg. They are: "Paul von Hindenburg, 1847 to 1904."

Old King Winter opened his 1934 assault on Aug. 14 at Northpayne, Ont., when a high north wind brought with it intermittent snow flurries, at a temperature of 40 degrees above zero.

Claims exacted retribution for the murder of Dr. J. H. Ingram, 57-year-old American missionary, by bandits two months ago, when the provincial government executed five Chinese convicted of the crime.

The first studio in India for production of sound pictures has been opened at Calcutta. American equipment that can be moved about for production of news reels is being used.

Rumored for months, all of the Washington naval treaty before December 31, 1934, was voiced by high Japanese naval officials, including Minister of the Navy Admiral Osumi, according to reports received from Tokyo.

Premier Mitchell F. Hepburn, of Ontario, renewed his demands for monetary reform before a meeting in honor of Hon. Dr. Leonard J. Simpson, minister of education, and declared Australia had practically settled her economic problems, as Canada could do the same.

Little Journeys In Science

AMMONIA

(By Gordon H Gorst, M.A.)

Ammonia is a colorless gas which has a characteristic, pungent, powerful odor. It is about one-half as heavy as air and is very soluble in water Ammonia gas is easily changed to a liquid. At ordinary temperatures a pressure of about 66 pounds per square inch is sufficient to liquefy the gas.

Ammonia will neither support combustion nor burn in air. Although in its native when dry, ammonia will, in the presence of a small amount of moisture, react with acids to form substances known by the chemist as ammonium salts. For example, on mixing the fumes of hydrochloric acid which is known commercially as muriatic acid, with ammonia a heavy white cloud of ammonium chloride is formed.

Liquid ammonia is used very extensively in making artificial ice and in producing the low temperatures required in cold storage plants. The use of ammonia depends on the fact that it can easily be liquefied at ordinary temperatures by applying pressure. When the pressure is released the liquid ammonia evaporates, absorbing a great deal of heat from the surroundings. This evaporation usually takes place in pipes surrounded by a solution of salt which is not easily frozen. This cooled salt solution may be piped to a cold-storage room, or case of fresh water may be immersed in it to produce ice.

Ammonia gas is very soluble in water and is therefore usually sold in water solution under the name of "aqua ammonia", which is used as a cleanser both in the home and in the industries. Large quantities of ammonia are used in the manufacture of fertilizers, and in making ammonium compounds such as smelling salts.

Athletic salmon, unlike those of the Pacific, do not die after spawning.

Turkish can be cleaned from copper and brass by using buttermilk.

Christmas Seal Campaign

A.O.B. To Aid Saskatchewan Anti-Tuberculosis League in Widespread Work

The Associated Canadian Travellers, with a membership of close to 700 hundred, and close in love of the leading cities of the province, have joined forces with the Christmas Seal Sale committee of the Saskatchewan Anti-Tuberculosis League and their entire membership for two months this fall will boost the sale of sheets of these cheerful little stickers, the revenue from which is accomplishing so far gratifying results in the prevention of the spread of tuberculosis in the province.

This alert organization, the closest degree of associating itself with every humanitarian cause in which every member could actively participate, is determined to make this effort a real success. Its membership in five of the leading cities of the province have wisely-heartedly signified their approval of the Christmas Seal Sale as a major activity, and on September 1st will initiate a campaign that is designed to enlist the support of the entire business community of the province.

While the generous manner in which wholesalers and retailers have supported the Christmas Seal Sale in the past is fully realized and appreciated, it is also felt that the response would be much greater if the purpose of the sale was fully understood and that a large group of people would be willing to help the cause. As the Associated Canadian Travellers have volunteered to make Provincial contact across a great deal to this effort and this will be followed by the A.C.T members each of whom will be supplied with a pamphlet giving the full information regarding the work of the Saskatchewan Anti-Tuberculosis League and the all important preventive work that is made possible by the sale of Christmas Seals.

The information contained in this pamphlet is of vital interest to every resident of Saskatchewan. Space are some of the facts in a nutshell:

The tuberculosis death rate in Saskatchewan has been reduced by 26 per cent in the past four years.

The cost of treatment in Saskatchewan Sanatoria was over $300,000 less in 1934 than in 1929.

Since preventive work was commenced in 1928, a total of 39,873 persons have been examined and the expense of the Christmas Seal Prevention Drive.

Proceeds from the sale of Christmas Seals provides the funds for this preventive work This disclosure cases to their early stages, making recovery more certain and reducing the period of treatment and the cost to the taxpayers.

The money raised by taxes for the maintenance of the three Saskatchewan Sanatoria is for treatment only; the money for preventive work is raised by the sale of Christmas Seals.

Prevention of tuberculosis and the protection of the well from infection is equally as important in the fight against tuberculosis as the care of those suffering from the disease.

During 1933 there were three hundred deaths from tuberculosis in Saskatchewan. During the past six years one-third of all deaths from infectious diseases in this province have been due to tuberculosis. It is now the most fatal of all infectious diseases.

The education of everyone regarding the control of this disease.

The provision of clinics for the examination of all persons having symptoms of tuberculosis. These are conducted by their family doctors of tuberculosis. Every person suspected and referred by physicians to clinics, according to statistics during the past four years 800 active cases were discovered.

The sale of Christmas Seals is a benefaction which appeals to everyone who desires to help others. Sanatorium cases and through the efforts of the members of the A.C.T. a great many more people will this year be afforded an opportunity of contributing thereto.

Survey Of Accidents

Caused Above 22 In Dauphinon Ago Per Motor Driving

The dangerous age for automobile drivers is 22.

This is the information contained in a statement issued from the province's committee on street and highway safety following a three-year study of automobile accidents in Manitoba.

"Of all operators licensed, approximately one-seventh are 22 years of age or under. Of operators involved in fatal accidents, about one-quarter are 22 or under," according to the highway committee's statement.

"In proportion to the number size of this group," the committee's statement reads, "the number caused is enough worse than the performance of the other class to warrant special attention."

According to the Smithsonian Institution, there have been no major changes in outlines of the coasts and islands within recent times.

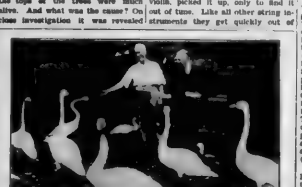
LIGHT

By MARLEY F. MINER
Man Of Each Month Naturalist



Jack Minor and Rev. W. A. "Billy" Sunday, the Evangelist. Photo taken on a recent visit of the famed naturalist to Jack Minor's home.

While walking quietly through an evergreen grove recently my attention was drawn to the fact that the trees had grown tall and rank, and as the soil was very rich in food for such trees they were very thick, all growing straight up for light. Each one lying near the ground, and on the other, but on close examination, all the lower limbs were dead while the tops of the trees were much alive. And what was the cause? On close investigation it was revealed that three limbs and lower limbs of the trees had been killed that they could not get the light that everything needs. Thus, without light these lower shoots from the trees were dying and you can be sure God's plan is that anything that does not have light and heavenly food continually, or else they die and perish. And as I have observed how true this same example could apply to humanity. If we don't accept light and keep in touch with the infinite God, Nature, or whatever you have a mind to term it, we soon die.

Yes, man might be alive bodily but be completely dead spiritually, and the unless he keeps in tune with the God, he is bound to die gradually, the same as the tree does, limb by limb as it misses the light.

After having this thought come to me, as I was alone with Nature, walking through this grove, I went home, and as I love to play my violin, picked it up, only to find it out of tune. Like all other string instruments they get quickly out of tune by the action of the atmosphere. No matter how good your violin may be, it needs to be tuned every day and many times a day The same can be said of man. The wear and tear of life and the deteriorating atmosphere he often comes in to which sin creates, so affects his disposition that he needs to be brought into harmony with God, in tune with God every day and many times a day.

Then man cannot live on bread alone, he must have Light and be kept in tune with God between meals.

SUNDAY SCHOOL LESSON

AUGUST 26

HOSEA PREACHES GOD'S LOVE

Golden Text: "For God so loved the world, that he gave his only begotten Son, that whosoever believeth on Him should not perish, but have everlasting life." John 3:16

Lesson: Hosea, Chapters 6, 11, 14. Devotional Reading: Psalm 86 5-10.

Explanations And Comments

Jehovah's Love for Israel. 11 1-4. "When Israel was a child," in the beginning of its natural existence, "then I loved him, and called my son out of Egypt." "Called him, locally, into the land of Canaan, and morally, to set an example of true religion" (Cheyne) "Hosea dwells on that beautiful past, half in melancholy reflection on the contrast, and half in persuasive pleading that the old relations between the nation and their God may be restored. The early days in Egypt and the Desert were a history of grace on the part of God. The prophet stops in his message of doom to recall lovingly the early periods of Israel's national existence, and sees God's love claiming them, and meeting with ill response." (Ilinch).

The Prophet's Entreaty. 14:1-3. Hosea entreats the people of Israel to return to the Lord, and bids them offer this penitent prayer: "Take away all our iniquity and accept us graciously in us good, instead of burnt-offerings (bullocks) we offer thee our prayers (the offering of our lips). We will no longer trust in Assyrian nor in Egypt, nor in idols, the work of our hands, but in thee alone, in helper of the fatherless."

Assurance of Divine Mercy and Loving-kindness. 14:4-8. To this penitent prayer the Lord will respond: "I will heal their backsliding, I will love them freely. See Hosea 6:1; Isaiah 51:18. Hosea is very sure of the mercy and loving-kindness of God. If this rebellious countrymen will repent, they will be forgiven.

"I will be as the dew unto Israel." The dew is often used metaphorically for spiritual blessing. Dew fails on vegetation and revives it and causes it to grow; but the dews not fall on barren rocks where it would be of no avail. The Lord is as the dew to human souls.

Luminous Human Body

Story Comes From Greece Of Strange Freak Of Nature

Another luminous human body engrossing scientific attention occupied columns in the Athenian press, recently.

Anastasios Hionomos, a seaman at Saloniki, is the subject of this second recent discovery. In Italy recently a woman's whole body was seen to give light while she slept was placed under observation in Rome. But she failed to respond.

Hionomos' body was said to give out sufficient rays to light a dark room.

Canada And Australia Reach An Agreement

Ottawa Under an arrangement arrived at by the governments of Canada and Australia, the latter will prohibit further shipments of Australian flour to Eastern Canadian ports. Australian flour will be permitted to enter Canadian Pacific ports free of customs duty.

Assurance was given that the new arrangement was made at the office of the prime minister The matter has been under negotiation between the two governments since last June when Canada gave notice, as provided by the trade agreement, that the milling Australian flour was being prejudicially affected by shipments of Australian flour into eastern Canadian markets.

Officials explained there has been a market for Australian flour on the west coast for many years. The arrangement now reached will not interfere with this.

Wheat Sales

Alleged That British Interests Made It Difficult To Sell Wheat

London During the past crop year British interests took a position in the Winnipeg grain trade which made it difficult for Canada to sell her crop, John MacFarland, general manager of the Canadian Wheat Pool is reported to have declared at a closed meeting of the international wheat conference in London.

Increased offerings at Liverpool on the part of Argentine shippers depressed the market, Mr MacFarland is supposed to have stated. The British traders' action in Winnipeg is said to have followed in an effort to depress the market before the pool should the Argentine pressure be relieved.

Admiral Byrd Recovering

Takes Stroll In Open Air With Temperature 61 Degrees Below Zero

Little America Rear Admiral Richard E. Byrd had recovered sufficiently from a touch of bad health to take a stroll in the open air on his advance base, 120 miles south of here. The admiral had a temperature of 61 degrees below zero for his stroll.

Dr. Thomas C. Poulter, second-in-command of the Byrd expedition reported the trip back to Little America will depend on the health of Admiral Byrd.

For Big Navy

Washington. — Aiming toward a fleet second to none in the world, the United States navy opened bids for 34 warship vessels. Included are: Two cruisers, 14 destroyers and six submarines. The submarines and destroyers will be the first vessels laid down under the act of congress authorizing the building of the navy to treaty strength.

ARGENTINE ASKS FOR A LARGER WHEAT QUOTA

London Argentina's demand for an export quota of 150,000,000 bushels of wheat during the current crop year, just started, was understood to have been presented to the international wheat conference

This and the drawing up of a communique by the closed meeting, recognizing the necessity for it to during more elasticity into the quota system for the current crop year, were highlights of the proceedings.

The talk by Rodolfo Garcia Arias, Argentina's new wheat delegate included presentation of Argentina's case in the long controversy with the three other big exporters, Canada, Australia, and the United States Various other representatives outlined the attitude of their nations towards the future operation of the 1933 world wheat pact None of the speeches were made public

Garcia Arias however was reliably reported to have given an optimistic report on acreage reduction in the Argentine He was understood to have charged other big exporters with failure to live up to the way of the Argentine's efforts to persuade farmers to plant other crops, by refusing to increase her quota when she sought enlargement last May

Argentina exceeded her quota of 110,000,000 bushels for the crop year ending July 31, covered in the wheat pact, by some 34,000,000 bushels Other big exporters were under their quotas

The Argentine delegate was said to have stressed that when the quotas were accepted the Argentine had no expectation of the bumper crop that actually developed

Argentina, he explained, depends on selling on a quantity, not quality basis, and therefore firmly opposed the minimum price scheme that came through this spring. He aims it is understood, declared the others could easily allow her a bigger quota as she aims among the big exporters to expects a good crop this year.

The communique issued at the close of the meeting said the delegates were generally agreed that while the small 1934 crop in North America would lead to an easier position as regards the surplus stocks, it must be realized any abandonment of international collaboration to adjust supply and demand in event of normal yields next year, would lead to an accumulation of new surpluses.

Andrew Cairns of the London, permanent secretary, said the committee's attempts to increase world consumption were disappointing, except in France, where the combination of lowering the quantity of flour extracted from wheat and of denaturing for livestock feed resulted in considerable increase in consumption.

To Teach Agriculture

Subject For Ontario Schools Beginning At Third Year

Port William, Ont.—Speaking at the Lakehead exhibition, Hon. Duncan Marshall, minister of agriculture in Ontario, announced that the new government had decided to have agriculture taught as part of the public school curriculum in the province, beginning at the third book.

The minister of education is now working on the details which will involve the instruction of teachers in the upper grades. The Hepburn government, he said, had as its aim the improvement of marketing and educational conditions to meet the needs of the farmer, and intended to try to give all children passing through the schools an insight into and love of agriculture.

Night Mean Complications

Montreal Any tampering with the British North America Act would be bound to entail serious complications, Premier L. A. Taschereau, of Quebec, declared here. His statement was made when questioned concerning the recent plea of Premier R. B. Bennett to call an inter-provincial conference in the fall to study certain amendments to the constitution of the Dominion.

For World Peace

Premier Lapres Substitutes To Refuse To Fight

Edmonton The Christian alternative for maintenance of world peace by armament preparation is substitution of the machine-gun war for the military way declared Rev Lapres Richards, D.D. of London, England in a public address here. Dr Richards, noted international pacifist is lecturing in connection with the United Church School of Religion summer conference

The aim of the Christian church is not direct elimination of evil but destruction of the roots of evil," the speaker declared "We do not wish to destroy the enemy, we wish to destroy enmity. To wage a war to end war results in multiplication of disturbance is the only way to eliminate international conflict in fact for Christians to refuse to fight. Christians cannot kill men in the name of Him who died for men."

Heading for consummation of the gospel of peace, Dr Richards asserted that the British Empire spent 1,000 times as much for the nation's means in preparation for war as it does for maintenance of peace. The land could not do Christian thing the 1914 Christian because it was not a Christian nation he said.

Auction Sale Of Cars

Ontario Government Cars To Receive Publicity

Toronto Auction sale of nearly 100 Ontario government automobiles will be held August 21 at Varsity Stadium Exhibition Grounds Hepburn announced recently. The cars will be passed in review during the games of the members of the former cabinet who rode them.

Bidders will occupy the main grandstand and the auctioneer will stand on a platform opposite in front of them. Buildings bearing the name of the cabinet minister the cars will also carry placards showing the mileage covered and the kind of upkeep during the car's life

Fear Wet Harvest

Southwest Showers Over Dry Areas As Cutting Commences

Winnipeg Prospects of a wet harvest season for garnering slim crops in drouth areas of the West provoked some of Western Canada's farmers to-day

Rains in recent days visited more than a score of drouth sections of Manitoba, Saskatchewan and Alberta.

Starting with scattered showers, the rainfall increased to heavy storms in some areas Manitoba points reported a good soaking. Southern Alberta received rain before the hail deluge occurred and in some of Southern Saskatchewan's dry belts precipitation was reported

HEADS DELEGATION

Assistance For Indians

Aid Given To Indians In Saskatchewan Third Lowest in Dominion

Regina Bank Cost of assistance among the Indian population of Saskatchewan in the year 1933-34 was only 4 94 for each individual assisted according to W Morrow Saskatchewan inspector for Indian affairs

This is one of the three lowest figures in the Dominion, and it covered hospitalization, food, clothing, supplements seed grain and other relief expenditures

Mr Morrow returned to Regina after a three weeks inspection tour of Indian agencies through the province. He was accompanied by Dr H W McGill deputy superintendent-general of Indian affairs at Ottawa

Gangster's Weapons

United States To Stop Sale Of Machine Guns

Washington The United States government seeks to stop free circulation of the gangster's favorite weapon—the machine gun

If a person possesses a machine gun after next month he will have to register it with the commissioner of internal revenue

If he wants to get one after Sept 24 he will have to get an order from the commissioner, be fingerprinted and pay a price boosted by a miles tax of $200

Japan Wants Friendship

Victoria. — "Japan desires the friendship of the world much more than she wants territory," K Imahata, member of the house of peers and Japanese industrialist said here recently following his arrival from Yokohama He is on route to Rio de Janeiro to attend a conference of world inter-parliamentary conference.

Feed Situation Not Greatly Improved

Dried-Out Parts In Alberta To Be Checked Up

Edmonton. Intensive investigation is being conducted by the provincial government into hardships caused by drouth and hail in certain sections of Alberta, Premier Reid states.

The premier was interviewed by a delegation members of which placed their various situations before him.

Replying to the delegation, the premier said that it was apparent that relief would be needed in dried-out parts and while there was some possibility of improvement in the feed situation, only a slight possibility entited Therefore, arrangements were being made for a canvas of the situation.

FEDERAL AID FOR ALBERTA SAID TO BE SATISFACTORY

Ottawa The province of Alberta now has before it a statement of what the Dominion government is prepared to do by way of assistance under the new "lump sum" payment plan. Described by Hon. George Hoadley of the Alberta government as fair in view of the obligations which the Dominion is called upon to meet, the proposal comprises a monthly grant of $100,000 for direct relief and loans aggregating over $1 000 000 to Alberta cities and relief projects.

Loans to cities aggregating $750 000, are divided as follows. Edmonton, $500,000; Calgary, $200 000; Lethbridge, $50 000

To complete the Jasper highway the Dominion will advance $150 000. It will also furnish $150 000 to assist in completion of the Alberta section of the trans-Canada highway

The three Alberta cities will receive considerably less than they requested under the Dominion proposal. In the case of Edmonton the request was for $1 500 000 of which a million was to be used for public works. Only $500 000 is granted, but no strings are attached to it. Calgary's request for half a million was implemented only to the sum of $200 000 Lethbridge asked for $150,000 and got $50 000

A further amount of $25 000 which the Dominion will contribute is earmarked for assuring in the payment of labor rents of a new building being erected at the Pemoka mental institution

Devastating Hail Storm

Thousands Of Acres Of Crops Destroyed In Alberta

Lethbridge Alta. - Thousands of acres of crops, mostly wheat, are in ruins, destroyed by the most devastating hail storm in southern Alberta in years. The loss, it was estimated will be far above the $500,000-mark, many of the fields unprotected by insurance

In a sweep 10 miles wide and 38 miles long, the storm struck with a deluge of rain followed by the destructive hail which in a few minutes battered down crops ready for the harvest Farmers reported the stones which ranged as high as 100 per cent

From Okotoks through Azure, Cayley, Nanton, Connemara, Vulcan to east of Champion and Carmangay the hail took its heavy toll, ruining crops that gave promise of yielding more than 30 bushels to the acre. With the binders standing in the fields the crops were mowed down. The hail beat across 12 000 acres in the Nanton-Connemara area, with losses estimated at 40 per cent, while 6 000 acres in the Cayley district suffered loss of from 15 to 100 per cent

In many places the hail laid on the ground inches deep after the storm passed and with the torrential rain, looked like snow in the miniature ice-covered inches. Hundreds of birds were killed by the flying hail stones

Insect Pests

Cutworm And Grasshopper Survey To Be Made In Saskatchewan

Regina, Sask.,— Cutworms and grasshoppers in Saskatchewan and Alberta are due to go under the ban as entomologists of the entomological branch of the Dominion department of agriculture set out on field surveys of the 1934 insect crop.

A group of officials of the department from Lethbridge, Alta., who will conduct the annual survey for pale western cutworms through Saskatchewan and Alberta and which will last three weeks, arrived here recently

Ontario Police Reduced

Toronto A reduction of the provincial police force by 60 men was provided for in an order-in-council passed by the Ontario government. An annual saving of $140,000 would be accomplished by the cut, Attorney-General Arthur Roebuck stated.

PARADISE BLOOMS IN THE PRAIRIES

It isn't a pretentious home, this home of William Balaugh, who farms near Abernethy, Saskatchewan, but flowers and shrubs have turned it into a beautiful spot. With a belt of Manitoba maples on the west side of the farm, which affords shelter from the prevailing winds, almost every type of flower listed in the seed catalogue is growing in the garden, while trees and vines and shrubs have added wonderful charm to the mellow old place. The top picture shows the vegetable garden at the back of the house which would supply a small village with its vegetables, while the bottom picture shows a section of the front garden.

Proposals To Change B. N. A. Act Will Be Considered At Dominion Provincial Conference

Proposals to change the British North America Act—Canada's constitution will be up for consideration at the next combination of Dominion and provincial governments.

When the conference in July concluded Premier R. B. Bennett suggested to the provincial premiers that they meet again in October. This was regarded as a tentative date. It may be earlier or later but in any event it will be before the next session of parliament.

Under the B.N.A. act, certain service, direct relief and similar responsibilities were placed on the shoulders of the provinces at the time of taxation were defined as between the provinces and the Dominion with these responsibilities in mind. In view of the wider field of taxation allotted the Dominion, it was provided that the provinces be given annual subsidies from the federal treasury. These have been revised from time to time.

The depression has created an enormous relief and social assistance that it has been contended they have become national problems and should be a Dominion responsibility. The Premier has recognized this by carrying a considerable portion of the financial load. At the last conference the Dominion changed its policy in that connection and, instead of bearing a percentage of the direct relief regardless of how extensive it might be, in the future will make monthly grants of stated amounts to the provinces and the latter will look after administration without interference on the part of Ottawa.

The Dominion also contributes 75 per cent of old age pensions paid by the provinces and there is also a movement to have unemployment and health insurance inaugurated. All these are provincial responsibilities although it is frequently argued they could be better administered on national undertakings instead of in connection with each province having a distinct system.

The provinces, particularly Ontario and Quebec, have been very jealous of their provincial rights and on many occasions appeals have been carried to the privy council in London or as it is commonly described "to the foot of the throne," when they felt that Dominion was infringing on their jurisdiction. Not infrequently the provinces have been successful in these appeals.

The Dominion takes the view that changes are necessary in the B.N.A. Act if it is to undertake relief and social services on a national scale. It might be necessary to change the constitution of the provinces as well to extend the Dominion's jurisdiction.

At the conference in Jan 1982, Premier R. B. Bennett did not press for an agenda to be discussed but referred several topics with which ministers felt at that time some provinces were not prepared to surrender jurisdiction. Since then many changes in provincial governments have taken place.

Many are of the opinion that the Dominion needs a considerable portion of the load it is carrying or they claim the provinces are not to blame for conditions that have caused widespread unemployment. They may be more inclined to give the Dominion the power necessary to make unemployment a national obligation.

Although several changes have been made in the B.N.A. Act, no such fundamental changes as now suggested have ever been made since the act was passed uniting the provinces into the Dominion.

Stolen Flying Automobile

An invention enabling aeroplanes to operate automatically, including the take-off and landing, has been acquired by the French Army, after a year of tests. The invention, the work of four French engineers, was said to simplify piloting to an extent which would enable a child to run a plane.

Husband: "You know, darling, this play made me think."

Wife: "Yes, it certainly was an extraordinary play."

Bank in Record Time

Big Swimming Pool At Wembley In The Empire swimming pool at Wembley, England, now practically completed, is in many respects a world's architectural curiosity.

The building alone covers two acres of ground and is entirely of reinforced concrete. It has no steel girders and its 250-foot roof spans 60 feet bigger than the main hall at Olympia. There is a height of 80 feet without a pillar to uphold it.

It is created on the cantilever principle—the first time such a feat has ever been attempted. Five and a half inches are allowed in the roof for expansion and contraction.

There are two acres of glass, and outside that two acres of ground for sun-bathing. It is the biggest covered bath in existence, though its 100 feet by 60 feet looks almost insignificant, seen in the floor of the hall. The water will fill it to make it deep and at the other there is 16 feet 6 inches of water.

The pool holds 700,000 gallons of water and takes seven nights to fill.

An apparatus for raising waves need start up the steps on to the bath at either end, and machinery has been arranged by breakers on one side.

The filtering plant is the biggest ever, too. It will filter, sterilize and return 700,000 gallons of water every seven hours. Pure light under the water illuminate the pool.

There are restaurants, bars, shower-baths and a flooding chamber. The normal 3,000 seats can be quickly increased to 6,500, or to 12,000 for a boxing match. In the winter the pool will be covered by a huge floor.

It has all been built in record time to house the Empire Games aquatics, boxing and wrestling events.

Grasshopper Destroyed

Vast Numbers Dead From Ravages Of Parasite Fly

Nature has laid a hand of death on millions of grasshoppers in the Sullivan Lake area in Alberta. Government experts report finding vast numbers dead from the ravages of a parasitic fly which lays its eggs in the body of the grasshoppers.

The fly and Sullivan Lake had proved a great breeding ground out of which they flew and did immense crop damage. It was covered with wild clover which provided their first food, then they turned to grain fields as the crops progressed.

The antlers of some Alaska moose have a spread of over 70 inches.

United Empire Loyalists Recently Celebrated The 150th Anniversary Of Canadian Exile

Kerensky Government Is Fighting Illiteracy

Great Progress Has Been Made In Turkish Education

Illiteracy is being combated by the Kemalist government. According to the last census, in 1927 only 10 per cent of the Turkish population was able to read. It is estimated that at present, about half of the population is literate.

Aside from normal school activity, progress is chiefly due to the work of adults' evening schools, which were organized when the Latin script was introduced four years ago. Education in the army, where the young recruit is acquainted in a course of three months with reading, writing and arithmetic, also has done much to diminish illiteracy.

Primary education is obligatory. Great stress is being laid in all schools on physical culture for boys and girls alike.

Education is free of charge and even in government boarding schools no fee for the maintenance is made.

Internal reforms of Mikmet Bey, energetic minister of education, leave no doubt that it is not the facade only which is being changed. He has ruthlessly dismissed more than thirty professors of Istanbul University as unfit to participate in modern standards of science.

Most of them have been replaced by university lecturers, scientists. Other experts have been invited from abroad to serve in high and secondary schools.

New Machines For Mines

Fit pumps designed in their work, are now being required by law to be operative in the British Isles. The new machines have so many advantages over the old Cornish engine, the government of the province of Quebec, and confirmed April 6, 1798, by proclamation of His Excellency John Graves Simcoe, lieutenant-governor of Upper Canada.

"Those loyalists who have suffered in the unity of an empire and joined the royal standard before the treaty of separation in the year 1783, and all their children and their descendants, by either sex, are to be distinguished by the following ensign, affixed to their names, U.E., allusive to the said province, the United Empire of the Empire."

Years Were Not Efficiency Years Under Infamous Conditions

A three-year study of service station gasoline, resulting in "cost-efficiency varies from week to week, even day to day, and from station to station, was made public recently at Walker laboratory of Rensselaer Polytechnic Institute in Troy, N.Y.

"Many persons seem to think in the same terms of gasoline, from one week to another or from one station to another," the report says. "Gasoline is not a uniform product and due to storage, delivery, weather and the quality of the gasoline. The study showed the changes may be sufficiently great to affect cost performance, but probably not enough for the average motorist to notice.

They disclosed new "leaks" in the gasoline problem and indicated there has been a broad improvement in motor fuels, in that they increasingly approximate the car needs for which they are made.

It was explained that some of the gasoline escapes by evaporation, and the truest portion is that fast-vaporizing stuff which affects the "last" mile.

We don't know what the world is coming to but with it would come the May, the Brandon Sun.

Readers of London newspapers have had a "refresher" on American history, particularly as it relates to the United Empire Loyalists of Canada. The occasion arose with the publication of a news item that the "American Loyalists" had celebrated the 150th anniversary of the "exile" of their ancestors in Canada.

The Morning Post on request has received an explanation from the United Empire Loyalists' Association of Canada residing in part.

"During, and more especially at the close of, the American Revolutionary War there was such a spirit of vindictiveness and intolerance established toward those who had been either in deed or in spirit loyal to the British crown that many thousands were forced to leave their homes and possessions and seek shelter in Canada and elsewhere

"At the treaty of peace, 1783, their banishment and its inherit misery was a foregone conclusion, and the bitterest words ever attributed to George Washington were in reference to the wealthy girl who is trying to win Peter. Sylvia Todd. Peter's model, and Clive Mallen, the former valet mate with whom he has quarrelled. After a night at an exclusive club when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When th'y awake it is early morning and Avis and another party are standing near them. Th'n makes it necessary for Camilla to explain away her scientific interest she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they part. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of her. Camilla overhears his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartsick, goes to Peter's studio for quiet and to think. Peter and Avis dine later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and disliked by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Lord of Hosts."

Camilla's advertising campaign and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Worth.

(Now Go On With The Story)

CHAPTER LVII.

Before Peter could recover from his surprise enough to speak, Avis smiled serenely and exclaimed, "Surprise, Peter!"

"Well, hallo," he replied with a note of consternation in his voice. "You do have a habit of appearing at the most unexpected times and places."

"And aren't you glad to see me?" she asked in a hurt voice.

"Why, of course," he was rallying to the exigency of the moment. "As a matter of fact, I was just now headed for my cabin and wondering what I was going to do with myself on this slow-going craft for a whole week. But why in the world are you travelling on a tub like this?"

"To see that you are not lonely," she replied coyly.

"That is most considerate of you," he offered gallantly.

"Oh, but I had a selfish reason, too. I didn't want to be lonely on another boat, you see. A week with a good travelling companion can be much shorter than five days alone."

"But I didn't know you had planned to go to Europe, now."

"Neither did I until two days ago, and you were so busy with your own affairs that I just decided to make it a little surprise to you."

"No doubt about the surprise," he admitted. "What's your destination Paris?"

"Oh, yes. Always Paris. I travel here and there about the continent when I am over there, but Paris is always home to me. You are still wondering why I am going. It happened this way: I was talking with Professor Drake the other day and he said that in his opinion my talent lies in portrait work, and that the very best thing I could do was to study with Monsieur Bouie in Paris. In my enthusiasm, I decided to go at once, and then hit upon the idea of taking the same boat with you, just for the fun of it. If I get over there before you do, I will meet you and then we can have a delightful afternoon at one of the cabarets. I'll take a fast boat back and start all over."

"But suppose you fail to get the money?" he sighed, smiling

"You'll be like that some day," she said severely, "when there is no sense in our standing here like this I must see that Tillie gets us settled this afternoon; and then we will have a delightful afternoon together. Do you like the water?"

"I think I do," Peter grinned, "but I have never been born out where it is so deep even as this"

She turned away, then hesitated "Shall I arrange with the dining steward to put us at the same table?"

"Why, of course. No sense in two good friends not being near each other on the same boat, sitting at different tables and wishing for congenial company all the time. Thanks for the thought, he suggested on second thought. It would look better for Avis if he sought her companionship, via tips to the steward.

"Fine!" Avis agreed, and reflected that it might be clever to arrange for the steward to send a note to Peter that Peter had bribed a dining room steward for a table with her. One could not imagine a man falling immediately into her plans than Peter had from the beginning. True, it was a slow and tedious campaign, but well worth the time and patience. "I'll see you at dinner, then," she left him gayly.

For two days' notice, Avis' trunks contained a surprising collection of stunning clothes, which might have been purchased for the ship's ball purpose. She might have been on her honeymoon, so alluring she made herself for every day and every occasion of that voyage.

By the third day, it seemed quite natural for them to face each other across the breakfast, luncheon and dinner table; with deck games, contrast bridge in the salon, dancing in the evenings or just sitting idly side by side in their deck chairs in the calm, indolent hours between activities.

Peter was seized by a spell of inertia, so easily developed aboard a steamer, and following the strain of many days over many months—which in fact, it was the first time he had relaxed from anxiety and work for as long as he could remember. It was no blissful to stroll idly around or lie in a deck chair with eyes closed and caressed by the warm sea breeze, to drink without doing and to plan without action. Avis had convinced him of the wisdom of such a week of idleness. On the second day out, he had protested when she proposed a set of deck tennis.

"But I should be working, Avis. I expected to get a lot of extra things done this week."

"Aren't you the best for work, though? Now let me tell you what would be the sensible thing for you to do, Peter. Make this week a real vacation. Forget everything except rest and a good time and be ready to leap into Paris in full swing with new ambition. You certainly deserve one week away from your work, while at the same time it would do you a vast amount of good. You must learn to play a little." She was so anxiously concerned for his welfare that he felt a responsive desire to humor her whims, even while he acknowledged that she probably was right about it.

HOW TO KEEP COOL

Take an effervescing glass of pleasant-tasting Andrews Liver Salt when you begin to feel the heat. At once you will feel cooler—and you'll stay cooler. Andrews not only quenches thirst, but cools your blood. Takes occasionally—any time—but always on rising mornings. So by purifying your system and insuring regular and complete elimination. At all druggists, in tins, 1½c and 60c. New, large bottle, 75c. Sole Agents: John A. Hutton Co., Ltd., Toronto 2a

OCCASIONAL WIFE

By EMMA ROSS WINSTER

Author of "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, are having serious doubts as to their ever being able to live their own lives apart until Peter is able to provide for her. Peter is a young sculptor, struggling and trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is in line to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Clive Mallen, the former valet mate with whom he has quarrelled. After a night at an exclusive club when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When th'y awake it is early morning and Avis and another party are standing near them. Th'n makes it necessary for Camilla to explain away her scientific interest she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they part. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of her. Camilla overhears his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartsick, goes to Peter's studio for quiet and to think. Peter and Avis dine later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and disliked by the accusation, faints.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernet's Powder. Largest seller in world holds plate so tight they can't annoy you or embarrass. Also they actually feel and act like your own. Keeps mouth sweeter, breath pleasant, special comfort-cushion prevents sore gums. Tasteless, gasless. Small cost—any druggist.

It was that receptive mood induced by his complete resignation to idleness and pleasure into which Avis deftly moved her seeds of intrigue that sprouted and flourished into a lusty romance which promised to bud and blossom.

By the third day, Camilla and America seemed vague and remote as to time and space. And Peter was luxuriating in the charm of Avis' gentle flattery, the pleasure of her gay irresponsible manner, so different from Camilla's harrying confession to work and ambition and obligation.

Avis captivated him in this period of inaction and pleasure as she never had done in the atmosphere of work and ambition at the studio. She was part of this life which had no responsibilities to him, and she made him feel that he had only to reach out his hand and grasp it. All sublimated appearance of light grey and red. The upper part of the hull will be a light grey, while the underbody will be red. Dividing the two will run the white "waterline" of the great vessel

Scores of painters will be engaged on the painting work while working, many many thousands of gallons of paint will be used in completing this striking transformation.

THE RHYMING OPTIMIST

By Aline Michaelis

KEY TO DREAMS

The keys on my ring are of little worth,
Leading to things well known;
But here in my hand I hold a key
Found on a paving stone.

Somewhat small for a gate, yet large for a door,
Too long for a sailor's bon;
And bright as the gleam again
And wonder what it unlocks.

No symbol of all I have seen on earth
Is as potent as this to me.
And I have no words for the strange allure
Which lies in the unknown key.

Perhaps it might lead to a garden-plot,
A hidden and lovely place;
It might open a door in a foreign land
And show me a dreamed-of face.

And never, as long as I am clasp
Closely this time-stained key,
Will the gates of romance again be closed
Or the door of dreams for me!

To Safeguard Drivers

Authorities May Stop Unofficial Testing Of Racing Cars

Now that the trial of Kaye Don has ended, it is stated in British racing circles that the authorities will decide to prohibit the use of racing cars and racing motorcycles on the roads out of official practice hours.

Kaye Don was sentenced by Dennister Farrant to four months' imprisonment for the manslaughter of his mechanic, Francis Taylor, while practising out of official hours for a car race.

An appeal was lodged, and after being in custody for a few hours Kaye Don was released on bail.

The authorities for many years have given a great deal of latitude to the drivers and riders from all parts of the world who come over to take part in the races.

For both the long-standing motorcycle races and the car races of the past two years there are official practice races, for which the roads are closed. In addition, a tradition has grown up that any driver or rider who wished to make additional trials could do so without any risk of serious consequences.

Narcotine is one of the organic bases or alkaloids occurring in opium, in which it usually exists in the proportion of one to eight per cent.

New White Star Liner

To Be Fitted With The World's Largest Ship's Propeller

The world's largest ship's propeller has left London for Clydebank. This propeller was the first of four specially designed for Number 534 and it was shipped by the steamer "Copeland" to the Clyde where it will be fitted to the liner.

With an approximate weight of 86 tons and a spread of nearly 20 feet from tip to tip of its blades, Messrs. Brome Bleden, its shipment occasioned a great deal of ingenuity and skill. Carefully wrapped in a protective covering of sheet iron and canvas it was hoisted on board the "Copeland" by the "Hercules", one of the largest and most powerful cranes used by the Port of London authority.

Before the propeller reaches the Clyde it will make a sea journey of nearly 600 miles. To ensure that the propellers will reach the shipyard in absolute safety, they are being shipped one at a time.

Each has been made at Clydebank in painting the hull of Number 534 for the launching ceremony. When the tens of thousands of spectators assemble at Clydebank to witness the launch they will see that the huge bulk of the ship presents a glittering appearance of light grey and red. The upper part of the hull will be a light grey, while the underbody will be red. Dividing the two will run the white "waterline" of the great vessel

Scores of painters will be engaged on the painting work while working, many many thousands of gallons of paint will be used in completing this striking transformation.

Peter is a young sculptor, struggling and trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is in line to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Clive Mallen, the former valet mate with whom he has quarrelled. After a night at an exclusive club when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When th'y awake it is early morning and Avis and another party are standing near them. Th'n makes it necessary for Camilla to explain away her scientific interest she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they part. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of her. Camilla overhears his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartsick, goes to Peter's studio for quiet and to think. Peter and Avis dine later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and disliked by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Lord of Hosts."

Camilla's advertising campaign and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Worth.

(Now Go On With The Story)

CHAPTER LVII.

Before Peter could recover from his surprise enough to speak, Avis smiled serenely and exclaimed, "Surprise, Peter!"

"Well, hallo," he replied with a note of consternation in his voice. "You do have a habit of appearing at the most unexpected times and places."

"And aren't you glad to see me?" she asked in a hurt voice.

"Why, of course," he was rallying to the exigency of the moment. "As a matter of fact, I was just now headed for my cabin and wondering what I was going to do with myself on this slow-going craft for a whole week. But why in the world are you travelling on a tub like this?"

"To see that you are not lonely," she replied coyly.

"That is most considerate of you," he offered gallantly.

"Oh, but I had a selfish reason, too. I didn't want to be lonely on another boat, you see. A week with a good travelling companion can be much shorter than five days alone."

"But I didn't know you had planned to go to Europe, now."

"Neither did I until two days ago, and you were so busy with your own affairs that I just decided to make it a little surprise to you."

"No doubt about the surprise," he admitted. "What's your destination Paris?"

"Oh, yes. Always Paris. I travel here and there about the continent when I am over there, but Paris is always home to me. You are still wondering why I am going. It happened this way: I was talking with Professor Drake the other day and he said that in his opinion my talent lies in portrait work, and that the very best thing I could do was to study with Monsieur Bouie in Paris. In my enthusiasm, I decided to go at once, and then hit upon the idea of taking the same boat with you, just for the fun of it. If I get over there before you do, I will meet you and then we can have a delightful afternoon at one of the cabarets. I'll take a fast boat back and start all over."

"But suppose you fail to get the money?" he sighed, smiling

"You'll be like that some day," she said severely, "when there is no sense in our standing here like this I must see that Tillie gets us settled this afternoon; and then we will have a delightful afternoon together. Do you like the water?"

"I think I do," Peter grinned, "but I have never been born out where it is so deep even as this"

She turned away, then hesitated "Shall I arrange with the dining steward to put us at the same table?"

"Why, of course. No sense in two good friends not being near each other on the same boat, sitting at different tables and wishing for congenial company all the time. Thanks for the thought, he suggested on second thought. It would look better for Avis if he sought her companionship, via tips to the steward.

"Fine!" Avis agreed, and reflected that it might be clever to arrange for the steward to send a note to Peter that Peter had bribed a dining room steward for a table with her. One could not imagine a man falling immediately into her plans than Peter had from the beginning. True, it was a slow and tedious campaign, but well worth the time and patience. "I'll see you at dinner, then," she left him gayly.

For two days' notice, Avis' trunks contained a surprising collection of stunning clothes, which might have been purchased for the ship's ball purpose. She might have been on her honeymoon, so alluring she made herself for every day and every occasion of that voyage.

By the third day, it seemed quite natural for them to face each other across the breakfast, luncheon and dinner table; with deck games, contrast bridge in the salon, dancing in the evenings or just sitting idly side by side in their deck chairs in the calm, indolent hours between activities.

Peter was seized by a spell of inertia, so easily developed aboard a steamer, and following the strain of many days over many months—which in fact, it was the first time he had relaxed from anxiety and work for as long as he could remember. It was no blissful to stroll idly around or lie in a deck chair with eyes closed and caressed by the warm sea breeze, to drink without doing and to plan without action. Avis had convinced him of the wisdom of such a week of idleness. On the second day out, he had protested when she proposed a set of deck tennis.

"But I should be working, Avis. I expected to get a lot of extra things done this week."

"Aren't you the best for work, though? Now let me tell you what would be the sensible thing for you to do, Peter. Make this week a real vacation. Forget everything except rest and a good time and be ready to leap into Paris in full swing with new ambition. You certainly deserve one week away from your work, while at the same time it would do you a vast amount of good. You must learn to play a little." She was so anxiously concerned for his welfare that he felt a responsive desire to humor her whims, even while he acknowledged that she probably was right about it.

MATURITY—MATERNITY MIDDLE AGE

As these three critical periods in women's health a medicine can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let it help you, too.

In Millions BABY'S OWN TABLETS

Little Helps For This Week

"I form the light and create darkness, I make peace and create evil; I the Lord do these things." Isaiah 45:7.

"All in God that is, and is to be; And God is love, and all this surface us still,
Resting in childlike trust upon His will,
Who moves to His great ends, unhurried by the haste."
—J. G. Whittier.

This then is of faith, that everything which touches us in mind, body or estate, whether brought about by this outward senseless nature or by the will of man, God, or bad, is overruled to each of us by the all-holy and all-loving will of God. Whatever befalls us, however it befalls us, it comes from the hand of God. If it is through man's negligence, or ill-will, or anger, still it is to us in the very least circumstance the will of God. For if the least thing could happen to us without God's permission it would be something out of God's control. His providence and love would not be what they are. Almighty God Himself would not be the love of God, and the God we believe, adore and love.—E. B. Pusey.

Can Recommend Canada

Earl of Chichester Thinks It Fine Place For Young Men

The Earl of Chichester, who sailed to England after spending seven months in the office of Sir William Clark, British High Commissioner, in Ottawa summed up his views of Canada before he sailed, as follows: "If I were asked by a young man just out of school, I should certainly recommend Canada, but I should also point out that he would have to work hard. Canada is undoubtedly a country for a young man, but he'll have to work."

Municipal District Hold Regular Meeting

The Council of the Municipal District of Clover Bar, 317, held a meeting on Saturday last with all members in attendance.

In reviewing the positions of relief recipients, it was decided to cut one applicant off relief for two months, and where possible, to use other applicants on road work.

Messrs. Magee, McCrimmon and Barclay were in attendance to petitions the Council to gravel certain portions of roads within Division No. 5. A certain amount of gratis work was promised if the work was undertaken.

The committee appointed to determine the amount of damages done to the crop of R. Warring by colony stock was submitted its report.

Councillor Peters was instructed to open up the road diversion through Section 2-54-22-4 to North Clover Bar School house. This decision brings to an end a long drawn out controversy as to what road should be opened up in order to gain access to the school house in question.

Two applications for old age pensions were considered and a resolution recommending that same be granted was passed.

The Secretary was instructed to send a letter of appreciation to the Divisional Engineer, Canadian National Railways, for the work done in improving the line of vision at the railway crossing on the Base line.

A resolution was passed asking the Council of the Municipal District of Sturgeon to renew the lease of the road allowance from Clover Bar through Section 7-54-22-4 to Beverly.

With the reading of correspondence and the passing of paysheets and accounts the meeting adjourned at six o'clock.

School To Open Tuesday For Fall Term

Tuesday, September 4th, will see the Fort Public School open its doors for the fall term.

Needed repairs having been looked after during the summer months and the school is all ready to welcome the children for another year.

The following will compose the teaching staff during the coming term:— Mr. E. H. Anderson, principal, Miss Flo Fleming, Mr. Stanley Hambley, Miss Ada Dickson, Miss Connie Turner, and Miss Margaret Robertson. The last two named are the only new teachers and are taking the positions vacated by Miss H. White and Miss A. West.

LOCAL NEWS

Next Monday, being Labor Day, a Dominion holiday all places of business will be closed. Stores in the Fort will remain open late on Saturday evening as usual.

Mr. and Mrs. Harvey Cranston are holidaying with Mr. Dave Cranston.

Misses Evelyn Cranston and Edith Taylor have returned home, after spending a very enjoyable holiday with friends in Lamont.

Are you a subscriber to The Fort Record, a local newspaper printed and published in Fort Saskatchewan for the people living here and in the surrounding districts. For a small sum per year you can have The Record mailed to you every week.

Why not start in today and help your district by helping the local paper that serves your district.

We will take in exchange for the paper: wood, eggs and dressed chickens. See us today. Don't delay.

To our regular subscribers, "Come in and see us Sometime".

The open season for Hungarian partridge this year will be from noon October 1st to December 15.

POLICE COURT ITEMS

At the local Police court Alex Bolinski was fined quilty of deserting his employment, and assessed the costs of the prosecution. He had been hired by a local farmer to work for a certain period, but violated his agreement. The charge was laid under the Master and Servants Act.

LETHBRIDGE DEPUTY WARDEN DIES

The death occurred last Thursday of Edwin Fowns, aged 52 years, deputy Warden of Lethbridge provincial Gaol for many years. The deceased was a patient in the hospital for some weeks, suffering from complications following a major operation, and his demise was not unexpected.

The late Mr. Fownes owned a farm in the Clover Bar district.

Partridge Hill News

Here we are again Mr. Editor, still a bit greyer after a stiff jot under the chin to which we all helped our selves to last Thursday night. But, we come up smiling and carry on despite the frost, as witness the many leaders in every field. The men folks find it hard to estimate the amount of grain harmed and unharmed. Late sown barley and green wheat suffering most.

Mr. and Mrs. H. Rye and family, and Mr. and Mrs. R. Warring and family spent Sunday in Edmonton.

Bruce Whitson is writing off some grade 10 exams in Edmonton this week.

Norman Laundy returned home Saturday, after a holiday trip to Victoria.

Grandpa Osbaldeston has been doing some repair work at the school, which has also had the annual cleaning and shining for the re-opening for the fall term, Sept. 4th.

We regret to report Mrs. Frank Kulak on the sick list, a patient in the Lamont Hospital, where she underwent an operation last week. Last report Mrs. Kulak was making favorable progress towards recovery.

Bert Whitson with Bissett and A. E. Hession with George Osbaldeston's outfit threshed some early sown barley last week. They report good yields.

Mrs. Ralph Smith has had as her house guest for the past week her sister, Mrs. Dudley Tucker, (nee Lydia Eyre) of Vancouver, B.C. After an absence of over 25 years, Mrs. Tucker observes many changes and developments in our district.

Misses Gwen and Joan Alton are spending this week with Mr. and Mrs. Jack Clancy of Edmonton.

Buster Warring of Edmonton is paying a return visit to his cousin, Bobbie Warring.

Leonard Underwood, of Edmonton, has been holidaying with Ted Osbaldeston here.

The FIRESIDE PHILOSOPHER
By ALFRED BOOTH

Pants clapel Senator.

You can't win if you're afraid to tap.

Science, words and art know no nationality.

You may play a good game and still be a poor sport.

The vices of today often are the virtues of tomorrow.

You can't separate true knowledge from modesty.

Only ignorance measures values by flimsy standards.

Tom Whitson Sells First Cards in the District

The first load of barley this season was delivered to the Quaker Oats elevator at Nimmons Siding on Monday, by Thomas Whitson of the Partridge Hill district. Mr. Hill, agent at Nimmons Siding, said the grain was of good quality and showed good yield.

Duck hunting in this part of the province opens on September 15th.

The Observer

CROPS—IN GENERAL

Harvesting is in progress in every direction. The wheat crop promises to be a very good one and by this time practically all in stook. Only about one-third of it had been harvested before the severe frost of last week but all of it had reached the stage where frost could work only a superficial damage, although the loss in its market value in a very serious matter. The damage to the coarse grains is difficult to estimate, and is still the subject of debate.

In spite of the frost it should be remembered that there is still a very substantial return on the year's farm work in this district. It is, for instance, a much better return than will be obtained this year in the district lying between Edmonton and the Red Deer River, a district where a crop failure is practically unknown but in which there have been no rains since about the first of May this year with a consequent blight on growth. The wheat appears to have made the best showing, coarse grains being light and in some places too short to be cut with the binder. The frost was about the same as here. This part has eminently about the same rainfall as we have here, and it is all the more strange that in the present year when we had such plentiful rains it should have almost none. To be sure as one goes further south and east in the province, conditions become much worse, but in that area grain growing is always precarious and it is now recognized that it had better be returned to the business of grazing. On the whole, in spite of the bitter disappointment we felt because of the frost, we must recognize that we have very much to be thankful for.

DON'T IT A FACT

It is a fact which places a startling emphasis on our notes of a fortnight since that at the moment there are four women in the provincial gaol here charged with murder, at least three of whom are of Central European origin.

LIBERTY!

It is interesting to note that the same section of the press which is inclined to grow hysterical over anything which can be construed as an invasion of our liberties is also able to cheer quite lustily over what we know as "strong arm" methods in administration—provided only they are the methods of those with whom we are politically in sympathy. Nevertheless we should remember that the whole progress towards liberty has been in the determination to check the ruthless exercise of power and to substitute for it, bit by bit, the rule of reason—right instead of might, merit instead of favouritism, law instead of anarchy.

We are, in fact, coming to see that the liberty of the press which we justly regard as one of the greatest possessions of a liberty-loving people, can also become in some cases the license of the press and that when it reaches that stage it may be one of the greatest menaces of the liberty of the subject.

These articles are written specially for The Fort Saskatchewan Record each week.

Canada, for the first time on record, moved up to 1932 to the first ads. Western Australia has sent plans as the principal supplier of wild flowers to England from its gardens to the Bahamas, British West Indies, in competition with the Old hibited at the Royal Horticultural Society's Show at Westminster.

Now It Could Be Done

Probably it is no direct reaction to the appalling state of irritant unrest which keeps international nerves continually on edge that more is being written and heard now of peace and its perpetuation than was heard or written during the great fiasco which terminated in the framing of the Treaty of Versailles.

The Anglo-Saxon world, at least, has come to the conclusion that a treaty inspired by revenge and bartered by fear is altogether too provocative an instrument to produce anything more than a mere armistice or truce. That section of the world now is convinced that the Christian virtues of humility and fraternity could and would provide a better background for an abiding peace fostering the essential conditions of harmony and mutual co-operation.

It is hard to concede that mankind is devoid of capacity to bring about the condition or state. In fact, when one scans the war efforts of the belligerent nations between 1914 and 1918, one is forced to conclude that only the Will is lacking. Were the efforts made then to destroy life and property exerted now to preserve life and property, world peace quickly would be achieved. There is no doubt of it.

If doubts be cherished, they would quickly be dissipated by reference to the recently published "War Memoirs" of David Lloyd George. Free as Britain's Minister of Munitions then as her premier, Mr. Lloyd George was primarily responsible for organizing the country's human and industrial resources for victory. How far-reaching, how exhaustive that organization was, is vividly revealed in the pages of his narrative. All essential industries were brought within the compass of his authority. All were made to contribute their full quota to the national effort. That gigantic organization was established for the dual purpose of hustling up the Allied, and of breaking down the enemy capacity to endure. The achievement shows conclusively what can be done by organization on the grand scale.

Considering the efficacy of war-time organization and effort, surely it is not foolhardy to suggest that, were all the major nations of the world to unite in organizing in the cause of peace, lasting and prosperous peace would ensue. And were the same efforts applied to solving the economic problems of the peoples of the world unquestionably they, too, would yield.

It is a strange commentary on the civilization and humanity that sacrifices to win a war should be described as "heroic" and, as such, borne with determination and a grin, while sacrifices to win a peace should be branded as humiliating and intolerable. It is strange, too, that war could be financed with no insuperable difficulty, while finances required in an economic depression to keep innocent people from starvation, present apparently insurmountable obstacles in the governments concerned.

Nicholas Murray Butler, noted American liberal, recently translated the financial cost of the world war into graphic and startling terms. It cost 350 billion dollars. "With that money," he says, "we could have built a $2,500 house, furnished it with $1,000 worth of furniture, placed it on five acres of land worth $100 an acre, and given this home to each and every family in the United States, Canada, Australia, England, Scotland, Wales, Ireland, France, Belgium, Germany and Russia. We could have given to each city of 20,000 inhabitants and over in each country named, a five million dollar library and a ten million dollar university. Out of what was left we could have set aside a sum at five per cent. that would provide a $1,500 yearly salary for 135,000 teachers, and a like salary for another army of 135,000 nurses."

Four hundred billion dollars was expended in a war which took 30,000,000 lives. Surely, a similar amount expended in a peace, would save a similar number from sufferings attendant upon economic depression.

Recover Sunken Gold

Five Million Dollars Removed From Hold Of Liner

Bullion valued at £1,000,000 ($5,000,000), was removed by a private salvage firm from the sunken steamer Laurentic, which went to the bottom in a German torpedo attack in 1917, the London Mail says.

Admiralty divers salvaged £3,000,000 of bullion in 1918 and 1924 and abandoned the remaining £1,000,000 because the ship had been smashed and buried in the sand.

Salvage operations on the steamship Laurentic, a 15,000-ton White Star liner which lay in 120 feet of water, known to be richly laden, were most difficult ever attempted.

British navy divers clad in rubber suits worked more than 5,000 hours to recover $5,000,000 worth of bullion.

The Laurentic was sunk off the mouth of Lough Swilly in Northern Ireland, in a position supposed to be westerly and northwesterly going.

Hail By Rocket

German Invention May Shed Lottery From Brave To Coward

A rocket mail service may be established between Dover, England, and Calais, France. The enterprise would employ the "Sucker" rocket, a German invention which was exhibited at the International Air Post Exposition in Berlin last year, the London Mail says.

It is estimated that by means of the rocket service letters may be delivered between the two countries at a distance of 21 miles, in one minute.

It is reported locally that the inventor, after demonstrating the practicability of the invention, is looking for capital to approach the British and French governments with a view to arranging for a regular rocket mail service.

A British syndicate being formed for the purpose. Under the proposed scheme, Calais would be the receiving and dispatching point for the continent.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Sometimes it develops into Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly.

Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 86 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Fight Auto Invasion

French Countries Do Not Want Class On Almost Equal

The only city in the Dominion which boasts a monument to its midst is in the middle of a small war about the streets.

Mount Royal, the roaring landmark from which the metropolis of Canada derives its name, is the bone of contention in the argument as to whether automobiles shall be allowed for the first time in history to make its summit.

The mountain broke into the headlines when Ald. J. Allan Bray ventured the suggestion motorists be permitted to wind their way upward to its wooded dells and breed complacency of grass overlooking the modern city. An immediate storm of protest broke and thousands of citizens voiced their determination to preserve the primitive natural charm of Montreal's namesake for future generations to enjoy.

One of the few fortresses yet remaining against the advance of the automobile age Mount Royal has continued to share its picturesque beauty with Bernard's motorless avenues. To date, only pedestrians, bicyclists and the horse-drawn conveyance which are vestiges of another age in Montreal, are allowed on the mountain and the French-Canadians, who regard the grand rock as part of the rich tradition of their land, declare the banning of the automobile lanes will never be allowed to break its spell.

Have School Host

Thousands Of German Professors Seek Work In Foreign Countries

Some 7,000 academic and professional men from Nazi Germany are now attempting to create a new existence for themselves in foreign countries, the New York Emergency Committee in Aid of Displaced German Scholars reveals. It is declared that "of all the classes affected by the National-Socialist revolution in Germany, the academic and the professionals have suffered the most."

A high proportion of the refugees coming from Germany is co-ordinating the work in various countries. Sixty chairs of German subjects have been placed in American institutions of higher learning. More than 1,500 German scholars have been displaced, of whom 600 to 700 have or will shortly emigrate. Between 5,000 to 6,000 professional people have left Germany and 1,000 to 1,500 of the 7,000 German university students forced to quit their studies have sought refuge outside Germany.

Alberta Teachers

Considerable Versatility Is Demanded By School Boards

Does Alberta school boards appreciate demand considerable versatility of talents in their school teachers. This was revealed at Edmonton on the hearing of appeals for alleged failure of committees of teachers continued before Judge MacDonald, sitting as a board of reference.

A young lady teacher teaching in the Wilmington district claimed she had been dismissed because she could not keep discipline.

Another board, through its chairman, stated that the teacher had been dismissed because she was incompetent and was continually hanging the pupils on the hooks.

Wanted His Razor

Portland Man Would Shave With Knife That Almost Killed Wife

Was clemency ever duly this for this one. Here's the story.

A little man entered the police station in Portland, Oregon, and asked for the razor which his wife used to slash her throat in an unsuccessful suicide attempt a few days ago.

"What do you want with the razor?" a police sergeant asked. "I want to shave!" was the cool reply.

It was suggested that he buy a new razor.

In her 33 flights across the Atlantic, the Graf Zeppelin has never been more than an hour behind her schedule and in many cases she has been several hours ahead.

The Atchafalaya river, on Disembarrass Bay, rose 47 feet during the last earthquake.

Gigantic Canard White Star Liner

Name Startling Facts About The New Queen Of The Seas

The names of the new Cunard White Star superliner now known as No. 534 will be divulged 24 hours before the hull slips down the ways at Clydebank, Scotland. Queen Mary, attended by King George V, will launch the new steamship. The ship will be at least 1,013 feet long and register 75,000 or more gross tons. She will cross the Atlantic from England and France in four days.

Cost of the superliner has been estimated at $30,000,000. The ship will be over 11 decks high, the first class promenade being 750 feet long, just 83 feet less than the entire length of the Mauretania. She will be five times the length of the original Titanic or the Britannia. The height to the masthead will be 250 feet. The ship's draft will be 34 feet. The Aquitania's is but half this weight. The ship's plates weigh from ¾ inch in length to 20 feet, and weigh from 5lbs. to 6,000 pounds.

There will be 2,000 portholes and windows, the panes of glass ranging from 24 inches in diameter to large oval panes two feet in height. The anchor cables, wire hawsers and rope for the ship will be more than four miles in length. The anchors, of special design, will be the world's largest. There will be 60,000 tons of refrigerating space. The automatic steering gear will be like that at an any ship. The ship will be driven by single-reduction geared turbines supplied with steam from high-pressure watertube boilers. There will be four screw propellers, each driven by an independent set of machinery. The driving machinery will be placed in two separate engine rooms. Four turbo-generators will supply power to the auxiliary machinery. Three others will supply light and power for the hotel services in the ship. Oil fuel will be used. The propellers will each weigh 35 tons and measure 20 feet from tip to tip. There will be 257,000 turbine blades, varying in length from two to 18 inches and geared to the thousandth part of an inch. The Clyde River has been widened and deepened for the launching at a cost of $400,000. The new superliner is being built in the yards of John Brown & Co. Ltd., which built the Aquitania was built.

There will be three funnels. The first funnel will be more than 70 feet in height. The other two lower. This arrangement will keep the decks and ventilators clear of funnel gases. The hull of the first Cunarder, the Britannia, could be passed through any one of the funnels of the new superliner. The ship will contain 30 miles of plumbing pipes. The electric lighting system is sufficient to service a city of more than 150,000 inhabitants, such as Quebec, Hamilton or Ottawa. Steam will be generated in 27 enormous boilers. The number of cabins in the mass and auxiliary accommodations will approximate 60,000. The electrical wires used would reach from Halifax to Vancouver and the gas mains cut into the Pacific ocean. The giant's stacks will be thirty feet in diameter, exceeding the Holland Tube, between New York and Jersey City, by six inches. From the keel to the top of the foremost funnel is equal to the height of an 11 story building. The engines of the 534 will generate 200,000 horsepower — enough to tow Staten Island across the Atlantic. The make up of the ship will require 33,000 tons of steel. The catering department will contain 1,000 pieces of cutlery. Two miles of carpets will be used in covering the ship's floors. Tableware, including knives, forks, spoons, etc., will total 160,000. The ship's insurance will cost $2,500,000. Her [illegible] will be assured by a rubber-bulge pneumatic device weighing 800 tons. This device will keep the ship steady in the roughest sea. The engine's bridge will be 100 feet about the water line. The steamer's ventilators will be large enough to accommodate a subway car. The sun deck will contain shady garden lounges, palm courts and swimming pools, giving a tropical aspect to the surroundings during all the seasons. The steamer will be insured for approximately $7,500,000.

The final round of southern Venezuela is being explored by a scientific expedition.

Commemorate Early Flight

Aeroplanes Kept In Air From Dawn To Dusk At Edmonton

The twenty-fifth anniversary of flying in Canada was effectively commemorated at Edmonton recently among many fitting memorials of the event was the formation of the Edmonton Aero Club kept an aeroplane aloft for 15 hours. 15 minutes in "a dawn-to-dusk flight."

In common with other flying clubs across the Dominion, the flights were carried out each machine staying in the air for shifts of one hour, to be replaced by another before the first had touched the ground.

Pilot C. North Hawks, hopping off at 5:00 a.m., was the first to commence the flight, while Pilot Sven Jensen was the last to land when he brought his machine down at 6:25 p.m. after a black rain cloud and thunder made the sky too black to continue.

Miss Margaret Fane was the only woman pilot to take part in the commemoration of the flight made by "Casey" Baldwin, who hopped off in his crudely-built [illegible] 25 years ago, August 16, in Nova Scotia.

London's Newest Building

Blue Model Service And Every Accommodation For Women

"Flatrix" is the newly coined name to describe a $10,000,000 block of flats which is being completed in London. The name is intended to describe flatlets having hotel service. There will be 50 flats, accommodating 1,200 people. As far as possible every daily want of the tenants—food, clothing or service—will be available within the building. A shopping expedition of the fast-footed term will be merely a trip to the ground floor, and there will be restaurants, dining rooms, barber shops and beauty parlors. A novel feature will be a tarrace, 16 feet wide, surrounding the top floor of the building. It resembles a liner promenade deck and will be available for sun-bathing and exercise.

Teeth have shown that actors or speakers in a hall should speak louder in cold weather, because the heavy clothing of the audience absorbs more sound.

The total length of the Amazon river from the head waters of the Ucayali is about 3,200 miles.

Fort Augustus

A. H. GIBSON
Fort Saskatchewan
1934

Various conjectures have been made from time to time upon the origin of the name "Fort Augustus", bestowed upon the first trading post established in the Saskatchewan District. The post was established by Angus Shaw for the North West Fur Company in 1795 on the north side of the Saskatchewan River, about two miles below the present town of Fort Saskatchewan. In the following year, 1796, the Hudson's Bay Company erected close by, on the same flat and about two hundred yards east of it, an establishment which was given the name Edmonton House, usually assumed to have been so given in compliment to one of the clerks whose home was in Edmonton, England. The site of these posts is now marked by a cairn erected a few years ago by the Historical Sites and Monuments Board. It is on the river road towards the east side of Lord Rodney's farm. The settlement was abandoned in 1808 in favour of New Fort Augustus which had been built upstream approximately on the site now occupied by the City Waterworks and Power Plant within the present city of Edmonton. The name "Augustus" continued to be that by which the settlement was known until the two companies were merged in 1821.

As to why this classical and imperial name should have been given to the beginning to this far out-post in the wilderness, the reason which I think has most commonly found favour inquires of our day is that it was in honour of the then Prince of Wales, the "Prest Gentleman of Europe", who later ascended the throne as George IV. This reasoning is based upon the assumption that Angus Shaw who had two years before, in 1793, built Fort George (about six miles below the present town of Elk Point) had so named it in honour of George III. So, therefore, it said, if he named the first one Fort George in honour of the King, we must conclude (since the popular Prince of Wales had Augustus to his name) that he named the second one in honour of the Prince. I think there is a better foundation to support the supposition which I propose to establish.

Without doubt to a Scotchman the most outstanding events in Great Britain in the 18th century were the Jacobite risings of 1715 and 1745, the final unsuccessful attempts to restore the house of Stuart to its ancient rights and privileges. If one looked for arguments to support this claim respecting the tremendous appeal which the Stuart risings made to the popular mind of the day it might befound in the persistence of the song and story of the time even to our day.

We must remember, too, what a large proportion of the partners and clerks of the Nort West Company were men of Highland origin and sympathies. Angus Shaw, the builder of the two post, could hardly deny that his ancestors were from north of the Tay; and I make no doubt that he, like all Scotsmen abroad, cherished a warm and romantic attachment for all that pertained to his native land. Exiled Britishers the world over have given most eloquent evidence of this in their fondness for duplicating in various new lands the place-names of the old. In one small county of Lanark, Ontario, we have Perth on the Tay, Lanark on the Clyde and a score of lesser names reminiscent of Scotland, and all centers. My suggestion is that the adoption by the partners of the North West Fur Company of such names as Fort William, Fort George, and Fort Augustus, is more than likely just another instance of this habit so characteristic of the Scotsman abroad.

In the latter half of the 18th century there were three places in the Highlands, all on the Caledonian Canal, of outstanding military importance and significance. They were Fort William at the south western end, Fort George at the north eastern end, and Fort Augustus roughly midway between.

The first Fort William had its origin almost one hundred years before the final Jacobite rising, having been built in 1655 by General Monk "to hold the Cameron men in subjection." The situation, on the north east end of Loch Linnhe, an arm of the sea, was long regarded as one of the keys of the Highlands. It was rebuilt and enlarged in 1690 when it lost its original name, Kilmallie, and was renamed Fort William in honour of William III, the boy being named Maryburgh after his queen. It was successfully besieged by the Jacobites in 1715 and again in 1745. It remained in active occupation until 1890 and was only demolished in 1896 for the purpose of giving room for the modern railway and station.

Fort George commanding the opposite end of the canal has fortunately been out of the limelight of the trade, should have determined to perpetuate in stone the place names associated with the house of the Stuarts, however remote his own connection with it may have been; just as, for instance, the late Colonel Macleod, who was a Canadian and educated in Canada, gave Calgary its name after "Calgarry," the residence of the chief of the Macleods of Skye.

It may well have been that the partners of the North West Company in giving a name to the new post which they established at the mouth of the Kaskatchewan River, were thinking of the history of the clans before them as that the Shaws were a sept of the clan Chattan, and the history of hereditary blood-bills tells us that their occupied lands in the central and southern portion of that shire. Of course the name Shaw is now widely naturalized through Scotland but Inverness-shire appears to be the modern home of the clan. It is not, therefore, inherently unlike that Shaw, when he rose to a position of importance in the North West Company with authority to select forts for the prosecution of the trade, should have determined to perpetuate in them the place names associated with the home of his clan, however remote his own connection

Alberta Grain Growers
Read This Message

It is of vital importance that a strong co-operative elevator system should flourish in Alberta. It is desirable that such an elevator system should be under the control of Alberta grain growers—men who are actually following the occupation of farming.

The Alberta Pool Elevator system is the only organization in Alberta that meets these requirements.

All country elevators of the Pool system are operated under public license and no such can be a position to handle the grain of any grower.

Alberta Pool Elevators are on a sound financial basis; are efficiently managed and can give unexcelled service to the grain growers of this province. Alberta Pool agents are carefully selected and have strict instructions to give fair treatment, including proper weights and correct grades, to all patrons.

Alberta Pool Elevators operate on the co-operative principle of "Each for all and all for each"—a principle which will tend to bring a measure of economic and social justice, peace and prosperity throughout the world.

Alberta Pool Elevators

Laying the Blame!

In the early days of a certain Western city, two newspapers came into existence; The Journal being founded over by Mr. Dobbs, and The Bulletin by William Bell. Their wars of course opposite politics, but in addition Mr. Dobbs of the Journal was a poet and he used often to regale his readers with bits of verse which made his townspeople regard him as a genius of whom they should be proud. Bell's papers struggled on, however, and what the Bulletin lacked in poetry it tried to make up in general energy in the direction of news collecting, but all the same Mr. Dobbs often deplored the fact that he himself had no poetic fancy. In the fullness of time, Mrs. Dobbs had a baby and her proud and happy husband thought that the occasion was one which should be celebrated by an outburst of song. The following, composed in the presence of the whole house of the Journal, and was immediately:

Our Little Angel

One night when old St. Peter slept
He left the gates of Heaven ajar,
And through a little angel stepped
Who came down on a falling star.
Twas at the first bright break of day
He stood,
Blushing, bonnieous bride
Then ran down the name to say
She'd found this angel by her side.
God grant but this, I ask no more—

Notes from the Files

10 Years Ago Today

Thursday, September 6th, 1928

How grain is coming into the local elevator.

A fine sample of native strawberries was picked on Sept. 2nd in the Fort Pelly district, this being a second crop.

Tenders for the fair on Oct. 7 and 8th, are coming in already to Secretary Montgomery.

R. S. Hamilton has gone to Redwater where he will be engineer of the Brown threshing outfit.

Mrs. Miller, St. Paul, Minn., is paying her brother, Jos. and Otis M. McLellan, a three months visit.

Gasoline is selling in the Port at 23c per gallon. Wheat 93c. 1 Dk.

The local militia, affiliated with the 10th Alberta Dragoons, are holding rifle practice every Tuesday and Thursday.

That when he leaves this world of pain
He'll wing his way to that bright shore
And find the gates of Heaven ajar.
The shoemaker of the Journal sent up with a bound that took the roof off of the Bulletin was green with rage and jealousy. Now it happened that Mr. Dan had that very day engaged a new assistant and the latter hearing the challenge, to place his inability to cope with his rival's poetic effusion, offered to do battle in defence of the dignity of Dobbs and the baby. The following, therefore appeared in the Bulletin and it read only too well that for some days the supply could not keep up with the demand:

St. Peter's Reply

For nineteen thousand years I've kept
The golden gates of Heaven ajar.
There is no little winged shipped
Who came down on a falling star.
Go ask your wife and I'll be bound
She'll blush but fondly own and say
That when her angel babe she found
She found it in the good old way.
God grant but this—I ask no more—
That should your number still enlarge
You will not lie an hour-to-few
And lay it to Old Pater's charge.
—The Frontier News.

RUSSIA MAY BE OUT OF WHEAT MARKET

Russian wheat authorities are pretty well unanimously of the opinion that Russia's wheat crop this year will be considerably smaller than last years. In that case Russia will be a very small factor in the International wheat trade, as last year she only exported about 30,000,000 bushels of wheat.

The Russian crop this year suffered severely from drouth at a critical time particularly in the grain areas of the south. Late rains were reported by Mr. Brownell (Sask.) that they did some good, but the Russian government is making every grain estimate this year than in past years which will bring down the estimate considerably for export.

A continental authority suggests the possibility of famine in the South parts of Russia during the coming winter.

"I've not seen old Mrs. Wagtail lately. How is she?" "Dead, sir." "What! Dead! Why, the great majority?" "Oh, no sir! She was a good enough woman as far as I knew."

TREES AND MOISTURE

An average size oak or elm leave each season approximately 5,000,000 leaves according to scientists. Packed together, these leaves would cover five acres, and they are continually giving off moisture—transpiring, you might say.

On a fairly hot dry day, for every one million leaves about a ton of water will be given off. Therefore, you can see what need trees have of water. Water, air and a few minerals that are in the ground—which minerals the tree imbibes, thinly dissolved in its water—are what build a great tree.

And here is a thing to remember, for it is essential in knowing how to prune a tree: The roots of almost all trees extend as widely and as deeply as the branches and leaves; to have a certain amount of leaves and branches you must have a corresponding amount of roots to nourish them.

AT LEAST SETTLE

An intimation to overpaying customers was time given by a country storekeeper:

"All persons indebted to our shop are requested to call and settle. All those indebted to our shop and not knowing it are requested to call and find out. Those knowing themselves indebted and not wishing to call are requested to stay in one place long enough for us to catch them."

Exhibition Park, home of the Canadian National Exhibition, is one of the most beautifully landscaped parks in Canada. It is a mile and a half in length on the shore of Lake Ontario and covers an area of 350 acres.

"You can't Stop stoking a steam engine" said Wrigley

Interviewed, and asked to what he attributed his phenomenal success, the late Mr. Wrigley, of chewing gum fame, replied, "To the consistent advertising of a good product."

"But," asked the reporter, "having captured practically the entire market, why continue to spend vast sums annually on advertising?"

Wrigley's reply was illuminating.

"Once having raised steam in an engine," he stated, "it requires continuous stoking to keep it up. Advertising stokes up business and keeps it running on a full head of steam."

This applies to your business, too. Don't make a secret of your product. Tell people all about it. Tell them what it does. Tell them its advantages. Tell them where to get it. Tell them through the Press and keep telling them.

Facts Go To Prove That The West Is Rapidly Learning Its Lesson Of Diversified Farming

By SENATOR W. A. BUCHANAN
In Canadian Homes

Alberta leads Canada in per capita production of commercial bags. Statistics of Alberta last year underlie 1,652,169 bags through the recognized commercial channels. This constituted 32.6 per cent. of the commercial bags produced in the Dominion in 1928. With 7.5 per cent. of the population, we produced almost one-third of the important branch of livestock marketings.

It would be well to have this fact about Alberta more generally known throughout Canada, especially to the financial, manufacturing and business interests generally. For so long the people of the West have been called "wheat miners" and "soil robbers" that there is a strong tendency to blame the financial ills of the West on poor farming. We have heard Eastern men, high in the business or financial world, say on Alberta, "If the people out West would grow something besides wheat, a bad crop wouldn't cause such a depression." that we had almost come to believe it ourselves, and to wonder if, after all, we were such bad farmers. But the 1931 census promises to do for the west to prove that, farmer for farmer if not acre for acre, we have nothing ill to be ashamed of.

The last census figures showed that there are more dairy cattle per farm, more beef cattle per farm, more hogs per farm in Alberta than in any province in the banner province of Ontario. Check the Statistical Branch at Ottawa for the proof. Take the figures for commercial hog marketings last year as further evidence.

Alberta in 1928 marketed 1,863,-169 hogs. Ontario, with more than three times the population, marketed 1,300,000 odd. Quebec, second largest province in point of population, marketed a mere 60,000 head.

We did our share in beef cattle production in 1928, too. Alberta marketed last year 128,000 head of cattle shipping 16,480 of them to the Old Country to find a market. Our combined cattle and hog marketings provided approximately 300,000,000 pounds of beef and pork for consumption. Alberta's consumption of these two meat commodities is in the neighborhood of 90,750,000 pounds annually. Our surplus, for which we had to find a market outside the province, was more than our home consumption.

At a time when Canada farmers are being told that they must curtail their production of wheat, which is the West's financial mainstay, the matter of livestock production and livestock marketing takes on a double significance. If we take across out of wheat we must either give them over to coarse grains and pasture for livestock, or let them go back to weeds. And we have millions of acres of rough land available for cattle and sheep grazing upon which we can expand the livestock industry without taking an acre out of wheat. Alberta has practically tripled hog production between 1921 and 1928 while, at the same time, we have practically doubled our wheat acreage. It is being forecast by livestock officials that we shall soon be loading 1,000 cars in hog production, it being pointed out that Ontario has some close to the saturation point in the production of pork. The incidence of higher pork prices during the past year due to the increasing market for Canadian bacon in the British Isles is just the stimulus needed to encourage hog growers to expand their holdings.

What has happened in hog production is happening in production of dairy products in Alberta. In 1923 the province set a new all-time record in creamery butter production, in the neighborhood of 25,000,000 pounds, and the value of commercial dairy products approximated $12,750,000 as compared with a total valuation of $33,000,000 for field crops another evidence that, so far at least as Alberta is concerned we are rapidly learning the lesson of diversified farming.

Dairying and hog production, therefore, are rapidly taking up the slack in our agricultural fabric that so in the case with wheat, us in the West are producing much more than we consume, and the importance of markets abroad grows more acute. Whether in these days of extreme nationalism throughout the world, the West can go on expanding live stock and dairy production while holding its place as the world's large est producer of fine milling wheat will depend entirely upon what can be done to break down the tangled web of import restrictions which have so greatly curtailed world trade. The West would like to increase livestock production, and Alberta during the depression has shown that it can be done It only remains for markets abroad to offer opportunity for a further expansion of this phrase of the farming industry

The fact is proven to-day that the West is "raising" its agriculture. It is diversifying according to the best practice, and it is becoming adept at it. No longer can we be accused of being a "one crop" country

Canard White Star Superliner

Massive Propelling Machinery Being Installed Most Powerful Ever Constructed

Rapid progress is being made in the construction of the propelling machinery for the Cunard White Star superliner No. 534, which will be launched at Clydebank at an early date by Her Majesty Queen Mary, attended by the King. When completed, this installation will be the most powerful ever constructed for any liner and the spaces reserved in the ship for turbines, boilers and auxiliary machinery will equal the total length of some large Atlantic liners. The combined length of the four sets of engines, one of which has been completed, is more than 200 feet, while no fewer than five separate rooms will be needed for the 27 enormous boilers, nearly all of which are now ready. The main steam piping leading from these boilers to the engines would cover a straight distance of 2,500 feet. The number of tubes in the massive main and auxiliary condensers will approximate 60,000

The installation of the propelling machinery calls for the attention of highly specialized mechanics. Every one of the 267,000 turbine blades, varying in length from two to sixteen inches, requires expert testing by hand. The gear wheels, of which there are four, received three months of delicate cutting and are lined up to a thousandth of an inch.

Holes in the stern of the hull are being completed and will soon be ready to receive the propeller shafts. This installation consists of a series of forged steel shafts approximately 33 feet long. When joined together each complete line of shafting will extend a distance of nearly 220 feet, being actually nearly 30 feet greater in length than the hull of the first Cunard liner, "Britannia".

The greater part of the propelling machinery will be fitted into the ship after the launching. Owing to the size and weight of the various parts it will be necessary for them to be handled in sections.

The four propellers of the No. 534 are the largest ever cast for any ship. Each one will weigh 30 tons and have a spread of nearly 30 feet from tip to tip. The propellers are made of manganese bronze because of its great strength, non-corrosive and non-erosive qualities. They were cast in the foundry which supplied the propellers for the British Battleship Hood

Small hunting is a sport in France.

Winnipeg Newspaper Union Fashion

By Ruth Rogers

523

PLENTY OF FREEDOM FOR WEE MAIDS

Characterizes French model for pre-kindergarten and Kindergarten age.

This adorable little frock of sprigged dimity shows today. Smocked bib sleeves and waistline with lace banding and grosgrain ribbon. The edge of the sleeves has a veil lace frill, to match the crisp white organdie collar and edge.

The full-gathered skirt allows plenty of freedom for romping about.

It's also pretty as can be and practical too, carried out in polka dots and white, tiny checked gingham, pink and white candy striped percale, red and white plaided linen, etc.

Style No. 523 is designed for sizes 2, 4 and 6 years. Size 4 requires 1¼ yards of 36-inch material with 1 yard of 36-inch contrasting, 2 yards of lace, 1½ yards of ribbon.

Price of pattern 20 cents in stamps or coin (coin is preferred) Wrap coin carefully.

Western Farmers Favor Plan For Planting Tree Belt Across The Dried Out Areas of Prairies

Some Unusual Questions

News Results Decide on Most Suitable Trees With Crude Instruments

That story from Chicago about the doctor who saved a child from strangulation with a broken knife and a piece of rubber hose, didn't stir up much excitement among Halifax medical men.

They recalled that one of their number had saved a life in just a slightly different way Without time to get his instruments, he had rushed to a home where a child lay near death through strangulation

In the house he found an ordinary jack-knife While that was being sterilized by boiling he took the father's clay pipe and snapped off the stem close to the bowl Then he made an incision with the jackknife, and inserted the pipe stem into the lad's windpipe Life-giving air flowed into his lungs instantly, and subsequently he made a full recovery.

Just as remarkable was another Halifax doctor who arrived at the bedside of a choking woman with only a scalpel He pitched a hairpin from her head, then he cut a slit in her throat and inserted the hairpin

So that the pin would keep a breathing space open, the doctor tied a length of string to each prong, then brought the strings around her neck and knotted them firmly at the back. The makeshift enabled the stricken woman to breathe comfortably until she could be taken to hospital for an operation. She too recovered, and to-day is alive and well

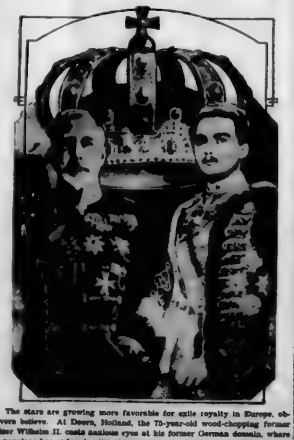
Girls Take Up Dentistry

Profession Is Attractive To Professional Station Canadian Principal

Fermoona girls are attracted more to dentistry than to the other professions, and are making good at it, in the opinion of Miss Dorothy C. Douglas, principal of a school of dentistry in Fermoona, who passed through Winnipeg for a fortnight at her home in Lucknow, Ontario

"One girl graduate of our school is an exceptionally good dentist," Miss Douglas added. "She offers a reduction in her set prices to all patients who are Christians."

STARS BEAM FOR ROYAL EYELIDS



The stars are growing more favorable for exile royalty in Europe, observers believe. At Doorn, Holland, the 70-year-old wood-chopping former Kaiser Wilhelm II. casts anxious eyes at his former German domain, where the populace has endured political insecurity for most of the post-war years. Not much farther away than a "Big Bertha" shell could travel, waits headsome Prince Otto at a villa near Brussels, Belgium, hoping to hear trumpets sound for the restoration of the ancient house of Hapsburg to its throne in Austria and Hungary.

Some Unusual Questions

With the announcement of the start of the tree belt in the United States comes a suggestion from many farmers in the dried out areas of Saskatchewan that federal authorities should take under consideration a tree belting plan for the bald part of the province.

In the connection Alex Beaven, of the Canadian Forestry Association tree planting car, who has been working in southern Manitoba, and at most points in northwest Saskatchewan and Alberta has discussed the proposal of tree belt with hundreds of farmers both in Manitoba and Saskatchewan and he reports that the project is one the farmers want, it is feasible it can be done on a relief measure and as to details of inauguration and supervision, these should be left to federal authorities.

There are seven excellent reasons cited by Mr Beaven for the construction of a tree belt in dried-out districtsviews

These seven reasons are

Cooling effect on atmosphere
Breaking up of damaging winds
Conservation of moisture
Formation of surface moisture
Breeding grounds and homes for insectivorous birds
Improved conditions for diversification in farming
Improved living conditions for the people

Basis for improving conditions, according to Mr Beaven, lies in the fact that any program should aim not so much to try to change climatic conditions but to alter the entire agricultural system to take the greatest advantage of moisture secured, and to break up the destructive wind sweeps

Taking periods of time, such as 10 years, moisture and precipitation records and velocity of winds have not changed greatly, but intensive agricultural development has changed their effect on the prairies.

Farming operations, he says, have gone on, until much of the forest has been done away with, the sod turned to the sun, and then the sweeping winds have set sand drifting, or in other words the development of agriculture since prairie settlement has turned the prairies at this time into a potential desert.

As to the cost of the project, Mr. Beaven points out that it would not cost more than railways for relief on the prairie to date, and that 90 per cent of the outlay would go direct to the farmer for labor.

Mr Beaven has observed that certain protected areas around farm homes in dried-out Saskatchewan during the past five years have produced some of commercial and market size, then all the rest of the farm.—Regina Leader-Post

To Winter Dredged

Plans Discussed At Calgary To Cope For Cattle During Winter

Plans for the feeding of Western cattle during the winter were discussed at Calgary by a committee appointed by the Dominion Agricultural Credit Company and representatives of the Central Alberta Feeders' Association, the Olds and Southern Alberta Co-operative Associations

Two plans were discussed One plan proposed feeder cattle be purchased outright from the rancher the credit company advancing the major portion of the money and the farmer the rest The other called for the advance of 50 per cent. of the steer value by the credit company to assist the farmer in carrying over his stock until next spring

Farmer Is Optimist

Who is the world's biggest gambler? We'd say the farmer He gambles with the weather, with the soil, with grasshoppers, with army worms, with grubs and a score of other plagues—a desperate chance If he wins, as he does occasionally he comes off with a big stake. If he loses, which he does frequently, he has a chance to try again. Happily he is a good loser, or the world would starve.

WORLD HAPPENINGS BRIEFLY TOLD

Raymond Poincare, former premier of France, who "saved the franc" in 1926, recently celebrated his 74th birthday.

The price of flour in London was reduced one shilling per bag of 280 pounds. The new price is 31 shillings and sixpence including the four shillings provided by the Wheat Quota Act.

Premier Mitchell F. Hepburn, of Ontario, declared his government would welcome introduction of unemployment insurance by the Dominion administration.

The United States army bombing plane, comprising the Alaska flight squadron, landed at Boeing field, Washington, recently, completing their 10,000 mile round trip to the north.

Kidnapping, not murder, is the most heinous crime of the day, S. E. Sandwell, editor of the Toronto Saturday Night, declared in a recent address.

The discovery of a vegetable fluid which may supersede the use of blood for purposes of transfusions was made known to the delegates of the fifth annual convention of the Vegetable Growers' Association of America on Tuesday.

Premier Benito Mussolini is not necessarily unfavorable to restoration of a monarchy in Austria or even over a reanimated Austria-Hungary, he told Archduke Otto Von Hapsburg in a secret interview recently in Italy.

"We shall not only oppose a recommendation of a 44-hour week for the means for relieving unemployment, but we are firmly opposed to such a measure," was the conclusion of an inquiry by the League of British Industries, in a report on the question.

Amy Johnson Mollison will be the first woman pilot on the regular trans-channel service. She accepted a post as secretary-pilot with Imperial Airways, emphasizing she intends the maximum practice before she enters the London-to-Australia air race with her husband next October.

Prospecting for diamonds will be undertaken for the first time in British Columbia's history by Thomas W. Dunsmuir and George Copeland, both of Vancouver, B.C. Leases on two 10-acre pieces on the Nechako river, sought by the two men for this purpose, were approved by the provincial cabinet.

Wheat Exports

United Exports For Past Twelve Months Show Falling Off

Wheat used in the United Kingdom in July totalled 5,714,546 bushels of the value of $6,573,323 compared with 16,171,234 at $7,561,221 a year ago, the bureau of statistics announced. The total export of wheat to all countries during the past 12 months was 19,386,000 bushels less than in the previous 12 months and to the United Kingdom about 43,000,000 less.

July port of wheat flour to the United Kingdom was 264,698 barrels, valued at $668,336, compared with 289,044 valued at $634,973 a year ago. The export to the United Kingdom in the past 12 months was 3,-743,114 barrels, valued at $9,321,966, compared with 3,573,065, valued at $7,989,866 in the previous 12 months. The export to the United Kingdom is about half of the total export to all countries.

Must Be A Habit

Magistrate Fine Man Because Change Carried In Left Pocket

In which trouser pocket does a man carry his change? The question arose in a recent case in a Rhyl, Wales, court. A man accused of stealing a shaving brush from a drug store said he placed it in his right hand while he put his left hand in his pocket for the money. The druggist then showed him a duster brush, which he bought. Next home he found he still had the cheaper brush in his right hand and before he could return it the police came. After his testimony the magistrate placed their hands in their trouser pockets. Their money was in their left-hand pockets, and they fined the man.

Living In Poverty

Mrs. Paul Poiret, Princess Boni de Castellane, Empress Eugenie and Queen Marie lived in the penniless apartment in Paris, but dependent for food and clothing upon charity and a 70-cent daily government dole, Paul Poiret is dreaming of a comeback in the dressmaking realm he once ruled.

"I spend most of my time with scissors and cloth," said the former king of Paris dressmakers, as he held up a piece of material and designed. Sometime someone will buy one and I will start on the road back to success."

"I haven't given up," he declared firmly, although he has been out of work for 16 months and stands in line with thousands of others to get his card punched and receive his dole.

He does not know how much longer he will be able to keep his penniless apartment, only remaining sign of his former great wealth.

Mme. Poiret entertainment in his chateaux and his three yachts attracted the aristocracy of the world.

Little Journeys In Science

INSECTICIDES

(By Gordon H Conet, M.A.)

Insecticides are classified into poison sprays, gas or fumigants, and contact poisons. The former cause death when taken internally, while the latter bring about destruction of life by mere contact. Pyrethrum belongs to the contact class of insecticides. Arsenic compounds are of this nature. A paste prepared by divided lead arsenate suspended in water is used extensively and is very effective. Chlorine arsenate is much cheaper and more abundant than lead arsenate. It is used in wage war against the bollworm, which is very destructive to the cotton plant. It is also used to destroy the potato beetle. Aeroplanes are employed to drop the calcium arsenate in the form of a fine dust upon the cotton plant.

Oil emulsion, produced by the addition of fish-oil soaps to hot water is a considerable extract. Nicotine, a complex compound found in tobacco, is rapid and effective in the destruction of aphis. Another good spray is used against scale insects. This is prepared in concentrated form by boiling together lime, sulphur and washed lime. Prussic acid is used as a fumigant in greenhouses and orchard spray treatment. It is an extremely poisonous substance

Many of the poison gases used in the late war have been tested in distant lands. They might be used in the warfare against insects. One of these, chloropicrin, is the most promising gas known. It is a fine destructive insecticides have been mentioned. Science is continually developing new methods of warfare and more efficient ways of applying them in this ever-lasting struggle of mankind against insects and fungi.

It's easier for a woman to hold a strong man than her own lusgage.

SUNDAY SCHOOL LESSON

(By Rev. P. B. Fitzwater, D.D.)

LESSON 3

Golden text "He hath showed thee, O man, what is good and what doth the Lord require of thee, but to do justly, and to love kindness, and to walk humbly with thy God"—Micah 6:8.

Micah, chapters 2-4 and 6:1—7:6.

Devotional reading James 1:22-27

Explanations And Comments

A Dramatic Scene, and Proceeds The indictment of the Faithless People, verses 1-5. The prophet Micah, in a burst of oratorical passion, declares that God will contend, or plead (the figure is that of a complainant in court), with the people before the mountains, as judges. "Hear O ye mountains, and ye enduring foundations of the earth," the prophet cries "For Jehovah hath a controversy with his people, and he will contend with Israel" "The mountains are spoken of as 'enduring,' for they have outlived many generations of peoples.

Jehovah now speaks. He is the plaintiff, the prophet is his attorney (Micah) is the defendant, the mountains are the judges "O my people," Jehovah exclaims through his attorney, "what have I done unto thee? and wherein have I wearied thee? Testify against me." Sheer cause for your disobedience No answer comes, for the only answer that could be given is that the fault lies in the people, not in Jehovah.

The Divine Conception of True Religion, verse 8. To all of this, verses 6 and 7, Micah replies with what is the greatest saying in the Old Testament, which combines the character istic messages of Amos, Hosea, and Isaiah The keynote of Amos' teaching was to have seen, in justice, the rule of Hosea, love, and the characteristic of Isaiah righteousness. Micah's creed shall see, in humble fellowship with God. "He hath showed thee, O man, what is good" This is the true synopsis of the obedience to the will of God; and what does Jehovah require of thee but to do justly, and love mercy, and to walk humbly with thy God?" With this definition of religion may be compared the last verse of our first. From Amos two weeks ago "Let justice roll down as waters, and righteousness as a mighty stream"; last week's Golden Text from Hosea, "I desire goodness, not sacrifice, and the knowledge of God more than burnt-offerings", and verses twelve and thirteen of Deuteronomy 10 "And now, Israel, what doth Jehovah thy God require of thee, but to hear Jehovah thy God, to walk in all his ways, and to love him, and to serve Jehovah thy God with all thy heart and with all thy soul, to keep the commandments of Jehovah and his statutes?"

Recipes For This Week

(By Betty Bentley)

ORANGE NUT BISCUITS

(Makes 15 medium sized biscuits)

2 cups sifted flour
4 teaspoon baking powder
1 teaspoon salt
2 tablespoons sugar
½ cup shortening
½ cup finely chopped nuts
1 egg
Orange juice
1 tablespoon orange marmalade.

Sift dry ingredients together. Cut in shortening. Add nuts. Beat egg; pour into measuring cup, add enough orange juice to make ⅔ cup. Combine with dry ingredients and add marmalade. Knead a few seconds on slightly floured board. Cut and bake in hot oven (425 degrees F.) for 10 to 15 minutes.

Note: A little more orange juice will be needed with some flours to make the dough soft.

CARROTS AND PEAS

2 cups cubed carrots
1 cup cooked peas
1 tablespoon butter
2 tablespoons flour
½ teaspoon salt
½ teaspoon pepper
1 tablespoon sugar.
1½ cups milk.

Boil the carrots until tender. Combine with the cooked peas, reheat and serve with melted butter or make a sauce of the flour, butter, milk and seasonings, add the cooked carrots and peas, reheat and serve hot.

Office Boy—"I ain't feeling so good; kin I have the afternoon off?"
Boss—"Why don't you tell me your grandmother is dead?"
Office Boy—"I'm saving her for later in the season."

Agricultural Notes

Interesting Items Gleaned From Many Sources

Canada exported 37 live cattle to Hong Kong, China, for dairying purposes during the first three months of 1935.

Hogs graded in Canada during the 52 weeks of 1934 up to August 5, totalled 1,883,717, as against 1,988,-851 in the corresponding period of 1933.

The general effect of the customs changes in the Fiji Islands is to increase the margin of preference in imports from Canada and other Empire countries

There has been more tomato puree, tomato sauce and ketchup, and tomato soup imported into the British Isles from Canada than from any other country during the first six months of 1934.

Reports from Moscow show that there has been considerable difficulty in the Russian production of harvesting machinery, particularly harvester combines, and this has had an effect on harvesting arrangements.

The total stocks of Canadian wheat in Canada on July 31, 1934, were 192,322,863 bushels - 18,417,325 bushels less than the total on the corresponding date in 1933, but 61,719,057 bushels more than on July 31, 1932.

Shipments of livestock from Western to Eastern Canada for the 31 weeks of this year, up to August 3, 1935 figures within brackets) included 68,575 (32,062) cattle; 694 (1,145) calves; 146,015 (190,273) hogs, and 45,000 (33,945) sheep.

For the first six months of 1934, Canada exported to the London (England) market the following fresh fruits: 71,722 cases of pears; 14,385 cases of loganberries; 2,823 cases of peaches, and 46,864 cases of canned apples.

A trial shipment of Ontario apples in hampers made in 1933 to Covent Yeat from Homes. "I desire goodness not sacrifice, and the knowledge of God more than burnt-offerings", and verses twelve and thirteen of Deuteronomy 10 "And now, Israel, what doth Jehovah thy God require of thee, but to hear Jehovah thy God, to walk in all his ways, and to love him, and to serve Jehovah thy God with all thy heart and with all thy soul, to keep the commandments of Jehovah and his statutes?"

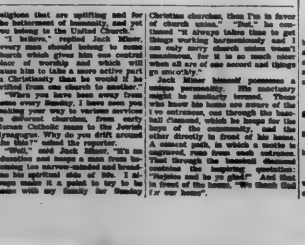
It takes a wise man to give a woman advice without borrowing her money.



Jack Miner about to liberate a tagged Canada Goose to study their route of migration. One side of the tag has Jack Miner's Post Office address, while on the opposite side of the tag is a verse of scripture, which Jack Miner thinks unique way in spreading the Gospel to the Indians and Eskimos of the far north.

religions that are uplifting and for the betterment of humanity, and yet you belong to the United Church."

"I believe," replied Jack Miner, "every man should belong to some church which gives him the most central place of worship and which will cause him to take a more active part in Christianity than he would if he drifted from one church to another."

"When you have been away from home every Sunday, I have seen you

Farmers Must Prosper

Trade Will Revive When They Get Fair Price For Products

Businessmen realize that unless the farmers prosper, the whole country cannot but suffer, whether they live in the cities or on the farms. The reason is simple enough. Not nothing to do with fixing the prices for his own products. When he goes into a store he is told that a suit of clothes or a hat, coat or a pound of bacon or many cents, but when he tries to sell any of his own products he discovers that he must take what he is offered for the wool for the suit or the hogs from which the bacon is taken.

The Niagara Falls Review the other day pointed to the case of an Ontario farmer who a et seven hundred pounds of hogs to market and got enough out of the transaction to purchase one pound of brown Oleomargarine. The farmer cannot continue doing that sort of thing. All of which is brought to mind by a paragraph in the annual report of the Ontario Live Stock Growers' Association. It is pointed out that: "Seventy per cent. of the world's population is agricultural. Seventy per cent. of the customers of the world's industry are agriculturists. Broadly speaking, all the farmers of the world are in the same box. Whereas will come this much-announced trade revival from the impoverished agriculture? Apparently, the thirty per cent. of the world's population that is industrial and tradelvisible a large percentage of these are at present unemployed and on relief, are going to have a real revival amongst themselves? To a friend and last evident but are of the opinion that the party will only be of short duration. The revival will come when seventy per cent. the agricultural part of the world comes producing at a loss and have a surplus with which to buy from the industrial thirty per cent."

Surely this is not an illogical position. Brantville Recorder and Times.

Harvested Apples Alive

Changes Take Place During Time They Are Stored

When an apple is picked, it is a living thing and there are constant and gradual changes going on throughout its storage life. The speed of these changes is largely governed by the temperature and humidity at which the fruit is stored. A freshly harvested apple contains sugars and starch among other things. The starch is converted to sugars first, sometimes to a reducing sugar and sometimes part of it is changed to sucrose or cane sugar. Then the sucrose is gradually used up and turned into reducing sugars next. When the sucrose is used the sucrose have practically disappeared the apple begins to lose its quality and becomes what is commonly called "over-ripe". The length of time taken by these changes varies in different varieties. It is a varietal characteristic, not solely related to the actual amount of these materials in the fruit, for there are several fall varieties which have higher sugar content than many winter varieties. However, it has been found in the laboratories of the Dominion Department of Agriculture that, all other things being equal, the fruit with the highest total sugar content has the best keeping quality of the samples of that variety.

Unusual People

Possess A Single Watch Hidden Them Always Welcome

Unusual people make a dull day cheerful, they have somewhat of the same effect in a room as an open fire or a bouquet of flowers; they make us feel for the time as if everybody was unusual because they are. We cannot always explain why they are so pleasant. They may not be beautiful they are often plain; they are not always the wittiest; but they possess a magic superior to all these which dwarfs the wit and cleverness of others, and makes them of small value beside their own attractiveness.

"I went some hot peppered butt cons—I mean red buttered hot cons, —that is, cors buttered pep hot, or rather hop buttered pep buns. I mean, oh, well, dinner some pudding."

W. N. U. 2322

Europe has turned to the air with feverish interest and each nation is pouring out millions to build up powerful military aviation fleets. Since the rise to power of General Hermann Goering, Germany's minister of air, the Nazi regime has quadrupled its expenditures for "civil" aircraft, and many schools for flying have been established. England has appropriated almost $160,000,000 to double her airplane squadrons, and acting Prime Minister Stanley Baldwin states the new boundary of England is ocean of the air, in new the Rhine France Italy, Russia and the smaller countries also possess powerful aviation corps, and each is planning even stronger forces in the air to keep its defensive power on a par with might boring nations.

Mrs. and Miss Hedora of Torquay, England, who have been visiting Mrs. Rhodes brother, Mr. von Iffland, leave on Friday, to spend some time at Jasper Park Lodge, accompanied by Mrs. von Iffland.

Mr. R. B. Henderson of Winnipeg, was a visitor in the Fort Monday, when he obtained data for the new Henderson Directory, which will be published sometime this year. The last Directory for Alberta was published in 1929.

Dr. W. F. Calhoun spent the last week-end in the Fort, after spending several months in the North country. The Doctor left Monday for Chinchaga, Alberta, where Mrs. Calhoun and sons have been visiting during the summer.

Mrs. Dave Gaibi will leave Thursday for her home at Lethbridge, after visiting with friends visiting her parents, Mr. and Mrs. Bert Bissell.

Mr. J. Dewar and family are taking up residence over the Royal Bank this week.

Mr. and Mrs. W. A. Graham left last week for a short holiday at the coast.

Mr. and Mrs. T. Holt and family returned Thursday, after an enjoyable holiday at Banff.

The I.O.O.F. Lodges of District No. 32, which includes two Edmonton lodges, Waskatenau, Fort Saskatchewan and Lamont, will hold a basket picnic at Elk Island Park on Labor Day, Monday, September 3rd. While basket picnic is the order of the day, above lodges everybody is urged to come out and enjoy a good time.

Canada was the chief buyer of coffee from Jamaica last year, importing 96.3 of the entire export.

ISN'T IT THE TRUTH

Over the hill trudged a man bobbed a mule drawing a plow. Said the man to the mule: "Bill, you are a mule, the son of a jackass, and I am man, made in the image of God. Yet here we work, hitched up together, year in and year out. I often wonder if you work for me or if I work for you. Verily, I think it is a partnership between mule and fool, for sometimes I work as hard as you if not harder. Plowing and cultivating we cover the same ground, but you do it on four legs and I do it on two; I therefore do twice as much as you do.

Soon we'll be preparing for another corn crop. When the crop is harvested I give one third to the landlord for being so kind as to let us use that small speck of God's universe. One third goes to you and the balance is mine. You receive all your portion with the exception of the cobs which I divide cobs with seven children, six hens, two ducks and the heathen. If we both need shoes, you get 'em. Still you are getting the best of me and I ask,—Is it fair for a mule, the son of a jackass, to eat as much as the son of the Lord, out of his sweat?

Why, you only help to plow and cultivate the ground and I clean, meet you, shock, and husk the corn, while you look over the fence and bee-haw at me.

All fall and most of the winter the whole family helps in order that we make money to buy new harness and have the harness repaired at the cost of the landlord, at the mortgage expense. And what do you care about the mortgage? Not a darn. You uneasy mule, I come home to do the worrying about the mortgage on your tough proposition both.

Above the only time I am better is on election day, for I can vote and you can't. And, moreover, I, regardless I was as big a jackass as your fellow. Verily, I am prone to wonder if instead of you being a mule, I am one, or is mule jealousness of me.

And that ain't all, Bill. When you're dead you're supposed to be the end of you. But me? The preacher say I am bound for the lower regions forever. That is, Bill, if I don't do just as he says. And most of what he says keep me from gaining my kick out of life.

Tell me, Williyam, considering these things, how can you keep a straight face and look as dumb and solemn?"

—Exchange.

Social and Town News

A courtesy appreciated by your guests is to have their visits mentioned in the town news. Whenever you go away your friends will be interested to learn of your visit through this page. Send such items to The Record. Phone 33.

Mr. W. C. Pollard returned home last week from a hurried visit to his father who was seriously ill at Fort Saskatchewan, Alta. We are glad to report that on his arrival he found his father much improved in health and enjoyed a short visit with him. He reports conditions in the northern parts of the province as being very good but in the southern parts the drought has taken terrible toll of complishes.

—Uxbridge Journal

Note: Enclosed with the above clipping, the Editor received a Sunday Booklet of Uxbridge which was published by F. S. Mears in 1925.

Members of dances and clubs are reported to have died last year in two localities in Middlesex County, Ontario, as a result of eating roast chuckers.

Mrs. Donnes McKnight of Alameda, Cal., Mrs. Robert Alexander and Mrs. Sidney Wood, Edmonton spent last Friday in the Fort, visiting Mrs. F. H. Walton. Mrs. McKnight has been spending the summer with her mother, Mrs. D. G. McQueen in Edmonton.

Mrs. Johnston Carscadden returned on Saturday from Red Deer. We are pleased to know that Mrs Carscadden has recovered from her recent illness.

British farmers registered as farm laborer-mariners with the Milk Marketing Board of Great Britain last month numbered 1,394, owning 54,000 cows with an estimated output of milk of 23,000,000 gallons per season.

Threshers' Licenses can be obtained at the Municipal office.

ALBERTA PACIFIC GRAIN COMPANY

FORT SASKATCHEWAN RECORD

VOL. 18 No. 32 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, SEPT. 5th, 1934 $1.50 PER YEAR IN ADVANCE

Delivers First Load Of 1934 Wheat; Grades High

L. Sandquist delivered to the National Elevator Co., today the first load of 1934 wheat, which graded No. 1 Northern, 1 per cent.dockage, and weighed 64 lbs to the bushel.

The grain fortunately was cut before the heavy frost, which accounts for the high grading. Bill Anderson, agent, is very pleased with the splendid sample.

THE PEEP SITUATION

Taking the province as a whole, it is estimated by the Department that there are sufficient supplies of feed in the province to meet requirements. In the south-western district there is a considerable production of long feed this season, the Pincher Creek area having produced a large supply, including a considerable amount of excellent timothy. Good crops of alfalfa hay are being harvested from the irrigated districts. Throughout the south-eastern, eastern and some of the central districts, there will be a shortage of feed. In the north-central and northern districts an abundant supply of feed of all kinds is anticipated. One effect of the recent frost undoubtedly has been to reduce some grain crops to the status of feed.

Skating Rink Fence Suffers Small Fire Damage

A small fire occurred last Friday night, caused by hot ashes being placed to near the skating rink fence A few boards were burnt, but the prompt action of the fire brigade under chemicals, quickly extinguished the fire with little damage done.

PROVINCE SAVES ON INTEREST

Reduction by the Dominion Government of the interest rate on provincial borrowings in the last three years, from five to four and one half per cent., will be passed on to the municipalities, whose treasury notes the province holds, according to Hon. J. E. Love, provincial treasurer. The reduction by the Dominion is applicable to about $10,000,000 borrowed by the province for relief works and direct relief and included in this amount is about $1,460,000 which the province loaned to the cities of Edmonton and Calgary.

The reduction is effective as from July 1st last. Savings to the Provincial Treasury will also be considerable.

EXTEND SCHOOL LAND CONCESSION

An extension of the period covering the "dollar for dollar" concession on interest payments made on school lands has been granted by the provincial government, it was announced by Hon. Hugh Allen, minister of lands and mines. The boom originally became effective in May, 1933, and was made retroactive from September 1st, 1932 to continue in force until July 31st, 1934. This particular legislation was arranged with a view to facilitating economic conditions in rural communities by the concession of a boom of one dollar to be credited with every dollar paid on account of current or accrued interest on school lands sales but did not apply to payments made on account of principal. The benefits derived from this arrangement have been most noticeable and it has been decided to extend the period covering the offer of this particular boom to March 31st, 1935.

Mrs. Hope: "Did you see the footballers?"

Hope: "Yes."

The Mrs.: "Don't you think the boy is a picture of his father?"

Hope: "I sure do—and the girl is a talky of her mother."

United Grain Growers Ltd. Announce Dividend

Announcement is made by United Grain Growers Ltd., of the payment of a dividend of four per cent. or one dollar per share on the paid-up capital of United Grain Growers Ltd., for the fiscal year ending July 31st. In announcing the dividend Mr. H. S. Law, president of the Company stated that payment is made from the earnings of the company after making provision for bond interest and full depreciation, and a satisfactory addition to surplus account. Attention was called to the fact that for the second year in succession, during the life of the Company, by way of dividends, an amount greatly in excess of the paid-up capital of United Grain Growers Ltd. Changes for the dividend just declared are to be mailed to shareholders on September 15th.

New Hardware Firm to Open in Williamson Block

Mr. R. H. Klassen of Herbert, Sask., will open a hardware business within the next ten days in the store occupied at one time by W. A. Dalton. A carload of hardware and office fixtures are being unloaded and a large consignment of brand new stock will be on display before the opening date.

DANCING SCHOOL TO RE-OPEN

Miss Peggy Aitken, Teacher of Dancing and Physical Culture will re-open her classes in the Redmiere Hall on Saturday, September 8th at 9 a.m.

JOSEPHBURG NEWS

Services will be held at Josephburg Church this Sunday at 11 a.m. Rev. Hooper of Edmonton, taking the service.

NEW HIGHWAY WORK STARTS

Tenders for highway improvement on the Calgary-Banff highway and on the Jasper highway in the vicinity of Edson are being called for as a result of financial arrangements recently completed at Ottawa by Hon. Geo. Hoadley. It is the intention to do as much of this work as possible this fall.

Contracts for the work will be awarded September 7th.

YPRES VALLEY NEWS

Mr. Sam Broady had the misfortune to get his thumb and forefinger in the binder. His thumb was badly crushed.

Miss Gwynn Watt, Edmonton is visiting at the Broady home.

There has been three deaths in the new here, which Mr. Bert Davis has built and removed of more.

Bobbie Jardine has bought a new Ford Coupe now. Go get the girl Bobbie!

Miss Margaret White, who has been in Portland for the past year, is back once more. She is at the home of Mrs. Fred Davis.

We have seen Nellie Clark, who is home returning from a small operation.

We congratulate Mr Clarence Armstrong on securing a brand-new son. No wonder I looks blissful.

Mrs. D. Gunn is visiting her sister in Vancouver, with daughter Kathleen.

We welcome Mr. and Mrs. W. E. Griffin to our district. Mr. Griffin is our new teacher.

We see both Bill and Pete Gunn running brand new binders.

Now Mr. Editor! Don't you think I have made up for lost time. You haven't heard from this corner for awhile. But all are hooping their chins up despite the frost and are hoping the next black cloud has a silver lining.

Editor's note: The Record is certainly pleased to receive this news and hope that in future, this column will contain a large portion of Ypres Valley news.

ALBERTA'S NEW CANNING FACTORY

Operation commenced last week in Alberta's new canning factory, at Taber, the only one in Western Canada. This season the factory is turning out 50,000 cases of canned corn grown under contract by the farmers of the Taber irrigation district, as well as product from some 30 acres of pumpkins and 300 acres of other vegetables. Prospect of a bronze factory loome up as result of successful experiments carried on in the Taber district with the raising of brown corn, of which there are about 300 acres in crop this season.

The Observer

A 2,000,000 DOLLAR SPORTING EVENT!

We will experience next week the thrill of the greatest international sporting event in the calendar, the yacht race for the America's cup. It is true of course that it is a contest in which only men with princely incomes can engage, for the cost of building, fitting and maintaining such a yacht as the conditions of the race call for touches a million dollars. But there is no race which offers a wider appeal to all sorts and conditions of people, not even excepting the great events of the turf.

The history of the race is a nest of demonstration of the rival theories of sport, a contrast between the British and American attitude. At the time of the Great Exhibition of 1851 an American sportsman, Mr. Stevens sent the "America" to England to take part in the races at Cowes, Isle of Wight, which had been conducted by the Royal Yacht Club for many years. She did not take part in the August races because the owner declined to concede the time allowances for yachts of different sizes which obtained by the rules of the Royal Yacht Club, but later, since it was considered a pity that the visitor should have to return without the opportunity of racing, it was decided to throw the race open 27th.

to the world and remove all bars. The course as laid down was "inside No Man's Buoy, inside Sand Head Buoy, and outside the Nab." The American went inside the Nab and won the race, but the protest which was considered on the ground that she had not followed the course was not permitted in, and she took back the Cup. It was later, in 1851, presented by the owners to the New York Yacht Club as a challenge cup to be raced for by single entries from such challenging country, the entries to be made ten months in advance with particulars of rig and dimensions and to sail to the scene of the race on their own bottoms. The disadvantage to the challenger which must cross the Atlantic is apparent, but the advantage to the Cup has continued to be made for more than fifty years and doubtless will still continue. The margin of the winning boat has sometimes been so little as 40 seconds and is seldom more than a few minutes over a course of ninety miles. The conditions this year, due to agreements arrived at under the mutual agreement clause of the deed of gift, are thought to be more nearly equal than heretofore and a great race is anticipated.

These articles are written specially for The Fort Saskatchewan Record each week.

The Peace River Record completed twenty years of publication on July 27th.

Soviet Claims Scouted

Claims from Moscow that Russia had usurped second place among the world's gold producing countries, supervoting Canada, has been received with almost universal scepticism. Apparently, the abnormal has been interpreted as just another of these efforts in propagandism with which Soviet authorities beg their nationals to further sacrifices, but which singularly fail to impress the outside world.

During progress of the first five year plan, Moscow deluged the world with claims of amazing achievement, which, now that the strokes of the period have subsided, are being assessed at their true worth. There is no acknowledged great advance in the production of consumers goods in so-called heavy industries, under the programs initiated by Lenin and carried into effect by Stalin. In some instances there have been spectacular, but (and this is the rub) seldom have they been quite as significant or sustained, lay as the claims made concerning them.

Several of the leading magazines and newspapers of Britain and America are devoting considerable space to reviewing the Soviet industrial and agricultural achievement. These have been applauded, reprobated and probably based upon the true facts, for truth and not antagonistic propaganda is what the public seeks these days. The claims made on behalf of Soviet achievement by propagandists of the Moscow government, apparently do not stand the test of statistical investigation. Alan Monkhouse, one of the British engineers marshaled for propaganda purposes in the notorious sabotage trials of a year or so ago, in a book of his experiences in Russia is surprisingly sympathetic to the Soviet planning scheme in the light of the circumstances governing his deportation. Paying some attention to the statistical record of Stalinist achievement, he shows that the Soviet government's own figures in specialized lines such as house building do not compare favorably with similar achievements in capitalistic and industrialized New England, recorded at the same time. He cites several particulars in which Soviet authorities endeavored to lessen the dangers of strikes and collapsing capitalistic contemporaries, which are not substantiated by the facts.

Apparently, the same is true of the gold production, hailed by Russia threats that, having overtaken Canada they will shortly overtake and pass South Africa in production of the precious metal. In reply to this, Canadian mining authorities have intimated that, while Canada has been cropping up in production, it has not yet supplanted Canada as ranking second in production of newly mined gold. Much of the Russian gold, it is claimed, was withdrawn from hoarding and, therefore, it is old gold reclaimed.

South Africans scoff at what they term a boastful statistics, aside, and have no fear of being premier place among the world's gold producers. This contention is backed by Dr. F. B. Mansfield, formerly a famous Russian geologist and now a fugitive from the Bolshevik authorities. His statement, based on actual knowledge of his various Russian goldfields and not upon political bias, is to the effect that nowhere in Russia do gold-bodies occur with the regularity and in the volume seen in the Rand or in the Ashanti area. "If Russian gold fields ever reach the stage of providing competition for South Africa it will be at tremendous cost of time and labor of transportation," he concludes.

Rebuilding Viking Boat

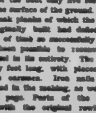
Oak Timbers Dated After Being Submerged Thousand Years

A Viking boat has been "reconditioned" at Sandvig, after one thousand years. Timbers supposed to be oak, giving a clich at Oliva found the remains of the boat only five feet beneath the surface of the ground. The wreck consists of the bottom of the boat, nearly six planks of which the best was originally built and dated the passages of time as exceedingly well. It has been possible to reconstruct the vessel in its entirety. The boat is thirty feet long, with places for eighteen oarsmen. Iron nails had been used in the making, as well as wooden pegs. Parts of the gunwales, with the original rowlocks, have survived, and much of the mast with which the oarsmen were pushed to make them water-tight is still in place.

A new machine determines scientifically how sharp a razor blade is, how much it is dulled by use in shaving, and how successfully it can be resharpened.

Wire must come from a limited area of France to be legally called the Woodchopper.

Change of Climate, Diet, Water Often the Cause of Diarrhoea



If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and use how quickly it will relieve you.

This honest compound has been on the market for the past 86 years. Proof enough that it has not degenerated with more new and untried remedies.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be sure the name is right.

Put up only by the T. Milburn Co., Ltd., Toronto, Ont.

Bugs In Garden Flowers

Many Are Valuable For Securing Insect Agent From Europe

Most gardens contain at least one flower whose value to mankind is not to be estimated simply in terms of honey. The leaves of the stately foxglove yield the drug digitalis, which still has no superior as a cure for heart disease or dropsy. The cocoa is the basis of a preparation long prescribed as a tonic. The tender bended good service as a balm for whooping cough. Then what a store is the monkshood! Its attractive blue flowers conceal a deadly poison, aconitine, used in the making, as well as wooden page. Perrin of the gumwales, with the original rowlocks, have survived, and much of the mast with which the oarsmen were pushed to make them water-tight is still in place.

A new machine determines scientifically how sharp a razor blade is, how much it is dulled by use in shaving, and how successfully it can be resharpened.

Wire must come from a limited area of France to be legally called the Woodchopper.

Or Even A Shave

"Automobile owners will have their vehicles unlocked with keys at least and then complain to the police when someone borrows or steals them," remarks the Ed. in the Times-Journal. Well, why should it be necessary to lock a car, and not a house or barn and beggy? asks the Woodchopper.

Was In Two Rebellions

Alberta Veteran Carried Despatches For General Strange

In Alberta 52 years ago, when Indian uprisings were just drifting from the western frontier with the coming of the first Northwest Mounted Police, and when Indians were still on the warpath with Chief Big Bear, Alberta drove the mail stage. Now 69 and retired, he lives at Edmonton

Before he left Alberta on new two rebellions at first hand. Son of the chief factor of the Hudson's Bay Co. he was a lad of eight and lived a few miles below Fort Garry (later Winnipeg) in the troublous days of the first Red River rebellion. His son recall seeing the soldiers coming up the Red river. As a youth of 20, when the mails were stopped by the Indians during the second rebellion, he was on the counter line, carrying despatches for General Strange's Alberta field force. He recalls several trips on horseback between Saddle Lake and Fort Pitt.

The proprietor on the mail job, Peter Campbell, was on the driver's seat when the Calgary coach was held up and the mails robbed by highwaymen in the only case of its kind in this part of the west.

It was no plain-sparse coach that he was in then but a heavily ironed wagon with an open centre for package freight and a closed cabin on the rear for passengers. His load was a general assortment of supplies for the Hudson's Bay Co. store at Saddle Lake. Two days out from Edmonton, a visit will be made to Vallieau, his home in Ajax in the Saskatchewan. Then the homeward journey and dramas were forded en route.

Proposed Tax On Noise

Idea Of British Minister Of Transport May Save Nerves

A fine on noise is proposed to save the nerves of the people of the United Kingdom. It is thought that taxation may succeed where all appeals have failed in the matter of unnecessary noise, and the suggestion of a tax was made in a letter from London to Herr Dietrich, minister of transport, which was read at a conference of the Anti-Noise League of Ontario.

"All new heavy motor cars put on the road since January, 1935, have to be fitted with pneumatic tires," he wrote, "and the makers of tractors have been invited not to give a strong incentive to people to substitute pneumatic tires on existing vehicles. The heavy vehicles on solid tires which caused so much unnecessary noise in the past is rapidly disappearing.

"Regulations also forbid the use of motor vehicles and trailers which are in such excessive noise and the sounding of horns on stationary vehicles.

"The road traffic bill proposed further to prohibit the use of the horn in prescribed hours and zones of silence." Mr. Hore-Belisha stated that in order to test public knowledge of what really causes noise the ministry has invoked the best scientific assistance. It appointed the hope the motor manufacturing industry will co-operate with the government in a determined effort to find a remedy for present unnecessary and harmful noises.

Looked The Part

He was a golfer who always played in his oldest clothes. One day he set out for the course, his clubs slung over his shoulder.

Walking down a street he saw a woman leaning over her garden gate, crying his approach angrily.

"You're very late," she said, sharply, as he drew near.

"Late?" echoed the

golfer.

"Yes, late! You promised to sweep my chimneys at eight, and it's past nine o'clock now."

Around The World Cruise

Cunard White Star Liner To Make Interesting Calls At Many Ports

Preliminary enquiries throughout America indicate that the 1935 Around the World Cruise of the Cunard White Star liner Franconia will be well booked up. The Franconia will follow the route around the Southern Hemisphere as she has done during the past two seasons. The liner will leave New York on sailing day, Jan. 12, and call mainly at British port of call at Kingston, Jamaica. Here there will be a drive to Spanish Town and other points of interest for passengers. Leaving Jamaica on the 16th the Franconia arrives at Panama on the 18th, sailing at midnight. A daylight passage of the Panama Canal is made, with an hour's drive to Colon, Ancon, Panama City and Old Panama.

The Franconia calls at San Pedro in California to allow Westerners to rejoin the steamer and also to permit passengers to drive to Los Angeles, Hollywood, Beverley Hills and other famous California resorts.

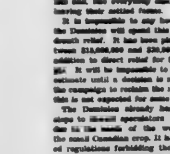
Crossing the Pacific the Franconia will call at the Hawaiian Islands, remaining two days and will be aged from Feb. 2 to Feb. 4. The Kaverley here calls for tours to Hilo and Honolulu, Mauna Loa, Kilauea, Waikiki Beach, the Fern Forest, Diamond Head and Whitehill Beach. An unusual call is to be made in the Society Islands at Papeete (Tahiti). Here passengers will bring made for entertainment and dancing by natives to assume the passengers. Leaving Papeete the ship will call at Suva, Fiji Islands, and after two days later and there will be a motor drive in the Island of Tonga, stops, with native dancing at Nuku'alofa. Passing the Islands of Stevenson, a visit will be made to Vallieau, his home in Ajax in the Saskatchewan. Then Islands of Samoa, or native dance will be performed in Apia.

The Franconia then sails on to the Fiji Islands, with a motor drive into the interior where there will be "Meke" or tribal dances performed. The Franconia will also visit Australasia. Five days will be spent in New Zealand, commencing with a motor drive from Auckland, a two days inland tour to Rotorua and the famous Thermal district, with visits to Maori villages. Two days will be spent in Australia, with motor drive in and around Sydney, including visits to the famous Sydney Harbour Bridge, Kuala Bear Farm and the celebrated zoo. A special attraction of boomerang throwing will be arranged at the native settlement of La Perouse. There will be an optional two days trip over the Blue Mountains to Mount Victoria and the Jenolan Caves.

March 11 finds the Franconia at Port Moresby (Papua) New Guinea. A visit to the Papuan village at Hanuabada will include tribal dances by natives. Another unusual port of call for the Franconia will be in the Lesser Sunda Islands with a visit to Bali at Kalabahat. A day or two will be spent in Bali at Teloh Ayoeng with visits to temples and magnificent scenic points. There will be an exhibition here of native arts and crafts and Balinese dancing. Two days will be spent in Java. There will be an auto drive passing Tjandi rang to Batavia and Buitenzorg, including the famous Botanical Gardens.

The Franconia will call at Singapore, March 24. There will be visits to points of interest in the Malay States, the Botanical Gardens, for instance, and Penang Hill. The Franconia sets sail to South India, arriving at Madras on the 30th and calls at Ceylon early in April. There will be visits in and around Colombo and Mt. Lavinia, as well as to Kandy and the Botanical Gardens. A unique port of call will be Port Victoria in the Seychelle Islands with a motor drive to the Islands of Mahe, where an exhibition of native arts and crafts has been arranged. Kenya Colony is next visited, with a call at Mombasa. A "gymka" or series of tribal dances will be performed at Kilindini. Next comes Zanzibar and Madagascar, visiting Majunga, one of the most interesting ports in the Indian Ocean. Three days will be spent in the Union of South Africa, with drives in and around Durban and an excursion to Pietermaritzburg, Port Elizabeth and Cape Town with optional tours issued for ashore.

The Franconia then makes a long voyage across the South Atlantic to the River Plate. The Franconia calls at Montevideo and in Uruguay and passengers may visit Buenos Aires by special steamer. Turning north the



Millions Of Acres Of Finest Wheat Lands Is West To Come Under Reclamation Plan

Reclamation of millions of acres of the finest wheat land in the world, dominated by successive years of drouth, is the immediate object of four governments in Canada, the federal, Manitoba, Saskatchewan and Alberta.

Plans have been laid already to relieve distress in the dried-out areas of the prairies. Had the impoverished people, provide seed for next year's crops and look after millions of half-starved cattle and horses. But there is another object in mind: how to reclaim for the land its binding and freshness due to years of drouth.

For months the Dominion department of agriculture has been experimenting with grasses gathered from all parts of the world to determine the best to act as a binder to the wind-tossed soil of the prairies. Agricultural experts believe many sections of the West never will regain their permanent place as wheat producers until the soil has been restored and reinforced. Eventually it may lead to reforestation and irrigation on a wide scale.

Some idea of the vastness of the problem may be gathered from these figures: In Manitoba, 1,000,000 acres in 13 municipalities affected by the drouth. Sixty per cent. of the cultivated acreage of Saskatchewan has been dried out and 40 per cent. will not produce a satisfactory crop this year. The dry area in Alberta is 1,000,000 acres, a decrease from last year. Many sections of this province have had five crop failures in a row.

Agreements were signed last week between the Canadian Pacific railways, the federal government and the prairie provinces for reduced freight rates on livestock and seed to the dry sections and cattle from the drought-stricken to northern ranges. It will be impossible to transfer all the half-starved cattle from the driest-out areas and some are not worth the cost of feeding. It may result in the slaughter of cattle to be marketed later for food.

A trickle of emigration has started from the dry districts to date is now regarded as practical on any large scale. In Saskatchewan, for instance, where 100,000 families have inhabited their homes in the south and settled down to stay in the north, this movement is limited to the small-scale passage of individuals and groups of families. In addition, local farmers are the world's best optimists and, the everybody else, distinctly hard-boiled optimist farmer.

It is impossible to say how much the Dominion will spend this year in drouth relief. It has been guaranteed $18,000,000 and $20,000,000 in addition to direct relief for the people. It will be impossible to give an estimate until a decision is made on the campaign to reclaim the soil and this is not expected for some time.

The unemployment situation has taken steps to thwart speculators in land by the heads of the west and the small Canadian crop. It has practically succeeded in forbidding the export of hay without licence. This will conserve the Canadian supply in view of crop failures in the United States and Washington's removal of the 35 a ton tariff.

A Remarkable Test

Wireless Telephone Talk Heard Distinctly Over Record Long

Wireless telephone link has been established between India and London and recently a telephone conversation between the Collector of Karachi and a London Post Office official was heard distinctly when the first test was made of the proposed wireless telephone service between the two cities. This is remarkable, because the voice traverses 5,000 miles of land line, via Lahore, Agra, and Surat, before being sent out from the Karachi wireless station.

There's always the bright side. You can't paint the same finger hair on electric fan twice.

Invention Seldom Get Rich

Thousands Of Canadians Are Never Granted A Patent

A window pane, which, on being broken by a burglar, creates an intense vacuum, drawing the hapless intruder into the room and holding him on the floor until captured, was one of the 30,000 inventions of last year which were not granted patents. "Perpetual motion machines are the most popular, and about a hundred 'fresh' discoveries of this kind are made every year," a well-known firm of patent agents informed a representative

Aid U.S. Farmers

Large Sums To Be Paid Out To Help Agriculture In States

Since June $1,500,000 a day is claimed to be paid out by the United States farmers through the agricultural adjustment administration before the end of 1935.

Cotton growers, wheat and corn-hog benefit payments will total $779,402,000, officials estimated. Of this sum $363,000,213.31 had been paid out up to August 25.

Of the latter payments cotton farmers have received 1,200,000 shares, $182,510,798. Wheat farmers netted 367,761,861; corn-hog farmers, $48,815,000, and tobacco growers, $18,773,980.

In addition to the $779,402,000 which is being paid out to farmers this year, it was learned, the growers will not obtain $130,000,000 and sharecrop, approximately $7,800,000 of which is for cotton, ultimately remain to the government. This raises the total for farm adjustments close to $1,000,000,000.

The figures do not include benefit payments under the sugar program which is still being drafted.

The Latest Fashion

Umbrellas for shoppers have just appeared in London. The top of the brolly is shaped like a beauty parlor hood. The customer sits under the cover, while the attendant waves a very slimming line. Plaids lend animation to the skirt portion.

Agnora panels in bright colors, rayon moreenin, heavy novelty crepe with lightweight woolens, etc., are also seen for its development.

Style No. 484 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size pattern envelope for material requirements.

Price of pattern 10 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How To Organize A Poultry Pool

Preparing Poultry For Shipment Important Part Of Business

Profession poultry pools, where farmers assemble, but pack and make ready their own poultry, are growing in popularity and utility in practically every province of the Dominion, and the reason why there is not a poultry pool in every district is because the farmers, however willing, have not had the time to find out exactly how to proceed about the business. Markets pay a premium for poultry of the highest quality, when properly graded, but packed, and government inspected.

In all this work the Poultry Service of the Dominion Department of Agriculture play a leading part, assisting the farmers in every way in organizing and carrying out the working arrangement of pools. These services have just issued a pamphlet on why and how to organize a poultry pool, and the prospect is one to be more welcome to the many farmers interested in that it places the matter of pooling in the hands of the assembling and preparing of poultry for shipment to as much the business of the farmer as the actual growing of the birds, and the overhead expenses of preparing for shipping is largely governed by whether or not every member of the pool does his share of the work. The steps to be taken to form a pool are clearly set forth.

Sheep In Western Canada

New Government Sheep Shows Large Increase In Numbers

A map showing the location of all large sheep ranches in Western Canada has been prepared by the Department of the Interior at the instance of the Economics Branch of the Dominion Department of Agriculture to assist sheep ranchers, farmers, and feeders to make contacts with one another. The map may be obtained from G. S. Harrenger, secretary of the South-eastern Saskatchewan Wool Growers' Association, Maple Creek, Sask.; H. T. McLeod, secretary of the Southern Alberta Sheep Breeders Ltd., 1321 2nd Ave., Lethbridge, Alta.; Miss M. M. Lamb, secretary, British Columbia Sheep Breeders' Association, Kamloops, B.C., or the Economics Service, Department of Agriculture, Ottawa.

The purpose of the map is to increase the contact between ranchers and those seeking to feed lambs or purchase sheep. It is pointed out that there is a considerable movement of sheep livestock from ranches to farms particularly during the fall of the year for feeding purposes. Losses are often contracted by farmers and breeding cows are sometimes sold to farmers on a percentage of the lambs. Copies of standard contracts used for such purposes may also be obtained upon request from those mentioned above.

In the case of cows purchased under contract it is the custom for the rancher to deal directly with the farmer. This makes it desirable that the farmer be located within driving distance or a maximum of approximately fifty miles from the rancher with whom he is dealing.

The location and address of sheep ranchers is given on the map and should be interested in the feeding of lambs or in the purchase of ewes under contract or otherwise may correspond directly with ranchers or with the secretaries of the organizations mentioned.

The preparation of this map is one of the results of an economic survey carried on in behalf of the sheep ranchers of Western Canada by the Economics Service Branch of the Department of Agriculture with the co-operation of the Dominion Experimental Farms and Illustration Stations.

Interesting History Of Panama Dates Back To The Time Of The Earliest European Explorers

The Republic of Panama, divided by the narrow canal zone strip, is one of the most known of the nations on the Western Hemisphere, and yet practically every school child knows of the Panama Canal, the great American feat. Ammerica - owned waterway connecting the Atlantic with the Pacific

Panama the Republic is one of the infants of the New World, both in area and age, yet its history dates back to the time of the earliest European explorers of America.

Columbus cruised in Panamanian bays on his fourth voyage in search of a short cut from Europe to Cathay. Balboa crossed this same neck of land to discover the Pacific ocean. Later it enjoyed high rank among the Spanish colonies. Then became rich man on the West coast of South America preferred to come it rather than to "double" Cape Horn on the way to Europe.

Panama's real advancement, however, dates from 1903. When the province changed from a department of Colombia to an independent state.

In 1902 the United States by treaty offered to pay the government of Colombia $10,000,000 and an annual rental of $250,000 for the right to construct what would make possible the building of a canal across Panama. Colombia refused. Panama offered $25,000,000 beginning nine days after the ratification of this agreement. It also provided that the United States should have perpetual control over the canal zone should be neutral land under the [illegible] of both countries.

The Colombian senate voted against the acceptance of the treaty, and as a result on November 4, 1903, Panama declared itself an independent republic. The United States troops prevented the land of Colombia from forces of Colombia, and the new republic was formally recognized by the United States on November 13, 1903. The treaty with the new republic was concluded a week later.

Under the treaty the Republic of Panama granted to the United States a zone of land ten miles in width and extending five miles on either side of the center of the canal with the proviso that the cities of Panama and Colon should not be included within the grant. The concession was the same as provided in the former offer to Colombia. The zone is governed by a commission of seven miles, with a population of half a million.

Actual work on the canal was started in 1904, but little progress was made until 1907, when the work was turned over to the engineering corps of the regular army, the director of General G.W. Goethals, under whose efficient administration the gigantic work was brought to a successful issue in August, 1914.

Shaped like a crawling caterpillar, Panama is bound between Costa Rica on the north and its tail reaching southward to the forested, mountains of Colombia Panama, equal in area to the State of Maine, is known to few people beyond its borders because its fame is overshadowed by the importance to the world of the Panama Canal and the Panama Canal Zone.

Panama City, visited by nearly every passenger who debarks at Colon, from the frequent Mauretanian cruises, the largest to call at Colon, is on the Pacific side of the canal. They find Panama City a shoppers' paradise. The bay is still a fisherman's paradise. Pearls from the native Indian tongue means abundant fish.

When Morgan, the pirate sacked old Panama City in 1671 more than 175 pack animals were needed to carry away the gold, silver and other loot previously looted from the natives of the Spaniards

The old city was founded in 1519 and is the oldest town on the mainland of America. Tourists never fail to visit the old cathedral the tower of which still stands although its greater part of the church's walls have fallen in. A tree in growing where the centre aisle used to be

Saving Gold From Chimney

U.S. Assay Office Reclaims It From Soot

The fund

Since the U.S. government devaluated the dollar, almost doubling the dollar value of every scrap of gold, the Assay office in New York has been using every conceivable precaution in its melting room to conserve the metal. The Assay Office is housed in a relatively new building, white and severe, at the corner of Old Slip and Pearl Street. One of its important installations is called a fume precipitator in reality, a series of metal sleeves, each plumbed by a water pipe. Through these sleeves run through the chains and the sleeves; and, as smoke passes up the chimney, the most particles, containing minute quantities of gold, are dashed from the air by this electric barrage, and fall to the bottom of the flue. This precious residue is collected once or twice a year by men who go into the basin of the chimney and shovel it out. The Assay Office realizes $10,000 to $15,000 on the sale of gold reclaimed from chimney soot. When the dust on the walls is collected for gold.

Easy To Remember

The debate over "I" and "me" goes on unendingly, but there is one rule that is easy to stop. It is the phrase, "between you and I". If the people who use it would reverse the order and say "between I and you," they might learn to use the correct form, but every day we hear from the most unexpected sources the heart-rending "between you and I". The correct form, of course, is "between you and me."

Cheap Television Sets

New System Developed Promises Sets At Low Cost

A new system invented by Mr R. W. Hughes, of Plymouth, England, may result soon in the production of cheap television sets for all.

Mr Hughes said he thought a television receiver, built with light source and amplifier, could be mass produced to sell at £30 or less.

With his somewhat crudely-constructed apparatus, Mr Hughes is able to project a 360-line picture on a screen two feet square.

A system of vibrating mirrors causes a small but bestant spot of light to travel over the screen and form the images

Mr Hughes is also developing an apparatus which, he claims, overcomes the problems of synchronizing one of the chief difficulties of television and also holds the picture steady for considerable periods.

Firms in this country as well as in Germany and the United States have been advised of the invention, and, it is said, that successful negotiations have been concluded with a British company.

Mr Hughes has been working for nearly two years on his new apparatus and has built a special transmitter to test his receiving apparatus at any time.

Your Handwriting Reveals Your Character!

By LAWRENCE HERBERT
(Graphe-Analyst)

(All Rights Reserved)

(Editor's Note This is the first of a series of fascinating articles on this very interesting subject of Character Analysis by Handwriting. The author, a well-known handwriting expert, has an interesting announcement to make, which you'll find in this article.)

There is always something thrilling in the mysterious, for thousands of years, people have paid money to fortune-tellers in return for a glimpse sometimes accurate, flashy, but sometimes, amazingly prophetical of the Future. Down through the ages, people have yearned for an opportunity of tearing aside the veil shielding tomorrow from To-day. There will always be a thrill of the magical or occult in these personalities of the Future

The astrologer who looks at the stars, and predicts your future from them; the mesmerizer who peers into your eyes and tells you what is in the palmist who scrutinizes the hand for the tell-tale lines it shows, the psychologist who searches your head for the "bumps" that will give a clue to the ever-popular amateur at the tea-cup, who foresees on the tea-leaves all have their followers who swear by them.

And, each searching a path that is built on solid scientific deduction, the Graphe-Analyst is gaining the ever-increasing body of adherents who find his analysis of character effectimes scientifically accurate

Graphe-Analysis, the science of character delineation from the study of what it really!

Robert Louis Stevenson, the famous Europe cyclopedist, says: "There is no such thing as handwriting, but only brainwriting." This is because the impulse and motive power come from the brain. Writing is more than a mechanical act. If you think it in, try to write a letter without thinking of it.

The Physicians' Times Magazine some time ago said: "We are inclined that 'the nerves at the extreme finger-tips are extraordinarily sensitive and true and a graphic record is made that in the brain, may be found."

Throughout the world Graphe-Analysis is gaining recognition as a practical science. A number of famous European universities and colleges the subject is being studied as a regular part of their curriculum, and everyday affairs of life it is finding increasing popularity.

Business men, teachers and doctors are using it to supplement their every specialized knowledge. Indeed, many of the largest commercial undertakings in the world submit to graphe-analysts the handwriting of applicants for important positions. And it is being used more and more frequently in criminal and civil courts, and wherever, besides being before stepping off the brink of matrimony, consult a Graphe-Analyst for an analysis of the handwriting of their intended bride or bridegroom.

Do you want a personal analysis of your handwriting? Do you want to know what your friend's handwriting tells? A few lines of writing may open the doors of opportunity to you, and certainly it will astonish you with the fineness of your character peculiarities. Send a letter in your normal writing, and state your choice of birth. Enclose with 10c coin, (for each specimen) and 3c stamped addressed envelope to Lawrence Hibbert, Graphe-Analyst, c/o Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg. Please allow at least two weeks for a reply. Results will be mailed as soon as possible.

Pirates Bold

Are Now Incorporated Into The Chinese Army

The pirates are soldiers now. Thus has fate dealt with the 60 Chinese river marauders who have formed a firing squad for creating an international incident two months ago.

The pirates kidnapped members of British steamer Shantien and kidnapped six British subjects and 18 Chinese.

The pirates were frightened into freeing their captives and last most of the loot they unloaded from the steamer. But the pay of the thieves have been taken into the Shantung provincial army.

They were shown in their desire to surrender and became soldiers," explained Hsu Pu-Chu, governor of the province, who consented to make the pirates part of his army.

A "sweeping search" for the kidnappers was ordered when both Great Britain and the United States became aroused.

Young Farmer: "What happened to those nest puddings you made yesterday, Jane?"

Young Wife: "As you didn't like them, I gave them to the ducks."

Farmer: "No that's where my ducks have gone—they're moult."

SEPTEMBER 9

HEZEKIAH LEADS HIS PEOPLE BACK TO GOD

Lesson text: "God is gracious and merciful" II Chronicles 30 9

Lesson: II Chronicles Chapter 30
Devotional Reading Psalm 72 1-6

Explanations And Comments

Hezekiah Was Made King at Twenty-five Years Old

Hezekiah Leads His People Back to God

Hezekiah began to reign in the second month of the first year of Hoshea, son of Elah, king of Israel, and reigned twenty-nine years in Jerusalem. His mother's name was Abijah, the daughter of Zechariah. (II Kings 18:1, 2) Hezekiah was one of the best kings that ever reigned in Judah. He was a contemporary of Hoshea, the last king of Israel, and of Micah the prophet. He was the son of Ahaz, who was one of the worst kings that ever reigned in Judah. Ahaz was a contemporary of Isaiah the prophet.

Hezekiah Opened the Doors of the House of the Lord

Hezekiah opened the doors of the house of the Lord in the first month of the first year of his reign. The doors had been closed by his father Ahaz. (II Chronicles 28:24) Hezekiah repaired the doors and cleansed the house of the Lord. He gathered the priests and Levites together and commanded them to sanctify themselves and the house of the Lord. They began on the first day of the first month and finished on the sixteenth day of the first month. (II Chronicles 29:17) Hezekiah then gathered the princes and all the assembly in Jerusalem to keep the Passover in the second month. (Numbers 9:10, 11) Hezekiah allowed those who for good reason were prevented from observing the Passover at the regular time to celebrate it in the second month, and the thing was right in the eyes of the king and all the assembly. Dr Charles Reynolds Brown contrasts Hezekiah's broadminded action with the narrow scruples of those chief priests and Pharisees who were so much upon putting Jesus Christ to death upon the cross at another feast of the Passover, and who would not venture into Pilate's judgment hall lest their holy feet should suffer defilement and make them unfit to share in the sacred feast of the Jewish Passover.

The Royal Proclamation to Judah and Israel, verses 1 and 15. So a decree was issued for every one, from Beersheba to Dan, to come to Jerusalem and keep the Passover in customary phrase for the length of the land was "from Dan to Beersheba"; the chronicler, however, in writing the history of Judah naturally mentions the southern city first. A colorum was needed, for they had not kept the Passover in great numbers in such sort as it is written: see Exodus 12:6. Levitical sanctuaries had been established throughout the land (II Kings 18:4); Hezekiah would re-establish the supreme importance of the temple, so he wrote letters to all Israel and Judah and sent them throughout the land by the posts, or couriers. His message was: "Ye children of Israel, turn again unto Jehovah, the God of Abraham, Isaac, and Israel (such as reference to the Hebrew fathers is common in the Old Testament), and he will return to the remnant of God's favor to them in the days of the kings of Assyria." The Assyrian invasion of Samaria had but recently happened and Hezekiah urged those who had not been carried away into captivity not to harden their hearts against God's judgment that had just befallen their fathers and brethren. "Be not stiff-necked as your fathers were, but yield yourselves unto Jehovah, and enter into his sanctuary." A consecrated.

A violinist was very much disappointed with the account of his recital printed in the paper of a small town.

I told you three times," complained the musician to the owner of the paper, "that the instrument I used was a genuine Stradivarius, and in this story there was not a word about it, not a word."

"That is as it should be. When the Stradivarius Company advertises their fiddles in my paper, under it sents a line, you can come round and tell me about it."

Little Journeys In Science

INSECTS

(By Gordon H. Guest, M.A.)

Insects are our greatest friends and our greatest enemies. Some kill some save human life. Almost the whole history of the earth it appeared as if they might inherit the earth and gain control of it. Scientists have estimated that there are about a million species that are living to-day. Of this vast number only a few have domesticated and used the products of the labor of only one—the honeybee

It is of interest to know that an insect that can crawl through the eye of a needle has a little heart and other organs. Insects reverse man's wisdom in the distance and force they add the People assembled at Jerusalem, owing to the fact that the temple was not cleansed until the fourteenth day of Nisan and the fourteenth day was the time for beginning the Passover. Accordingly the king had taken counsel and his princes, and all the assembly in Jerusalem, to keep the Passover in the second month. Num. (Numbers 9:10, 11) allowed those who for good reason were prevented from observing the Passover at the regular time to celebrate it in the second month, and the thing was right in the eyes of the king and all the assembly. Dr Charles Reynolds Brown contrasts Hezekiah's broadminded action with the narrow scruples of those chief priests and Pharisees who were so much upon putting Jesus Christ to death upon the cross at another feast of the Passover, and who would not venture into Pilate's judgment hall lest their holy feet should suffer defilement and make them unfit to share in the sacred feast of the Jewish Passover.

The Royal Proclamation to Judah and Israel, verses 1 and 15. So a decree was issued for every one, from Beersheba to Dan, to come to Jerusalem and keep the Passover in customary phrase for the length of the land was "from Dan to Beersheba"; the chronicler, however, in writing the history of Judah naturally mentions the southern city first. A colorum was needed, for they had not kept the Passover in great numbers in such sort as it is written: see Exodus 12:6. Levitical sanctuaries had been established throughout the land (II Kings 18:4); Hezekiah would re-establish the supreme importance of the temple, so he wrote letters to all Israel and Judah and sent them throughout the land by the posts, or couriers. His message was: "Ye children of Israel, turn again unto Jehovah, the God of Abraham, Isaac, and Israel (such as reference to the Hebrew fathers is common in the Old Testament), and he will return to the remnant of God's favor to them in the days of the kings of Assyria." The Assyrian invasion of Samaria had but recently happened and Hezekiah urged those who had not been carried away into captivity not to harden their hearts against God's judgment that had just befallen their fathers and brethren. "Be not stiff-necked as your fathers were, but yield yourselves unto Jehovah, and enter into his sanctuary." A consecrated.

Not What He Meant

Two English tourists were standing gazing at Niagara Falls.

"Isn't it marvellous!" said one.

"Just magnificent. To stand here makes a man feel like a little grub."

"You're right," replied the other. "I've had nothing to eat since breakfast."

GRANT HALL, VICE-PRESIDENT C.P.R. DIES IN MONTREAL

Montreal A career intimately associated with the opening up of Western Canada was ended here with the death of Grant Hall, 70, vice-president of the Canadian Pacific Railway.

Mr Hall was taken to hospital Aug. 11 suffering from a stroke His condition at first improved and gave hope he might recover, but he failed rapidly and his physician warned the end was near

Although he was a native of Montreal and although he returned here to occupy the high railway post he held at his death, it was chiefly on the western lone that he expacity as an executive was developed

He began his railroad career with the Canadian Pac fic Railway as a fitter. In 1886, he joined the old Intercolonial railway as a general locomotive foreman, stationed at Moncton, N.B.

In 1896 he was again in the service of the Canadian Pacific Railway and held the position of general foreman at McAdam, N.B. Shortly after the turn of the century he went west as general foreman in Winnipeg.

In 1902 he went to Revelstoke B.C., as master mechanic, then returned to Montreal as assistant superintendent of rolling stock, eastern division.

In 1904 he became superintendent of motive power, western lines, and in 1906 was made superintendent of motive power for the company

From 1911 to 1912 he was the company's assistant general manager and in 1913 became general manager for western lines at Winnipeg Two years later he was made vice-president and general manager at Winnipeg.

The position he held at his death, vice-president with jurisdiction over all lines, was his since 1918

He was a recluse, having a thorough knowledge of all railroad problems, and was noted for his ability to avoid friction of all kinds and was known as a hard worker.

Mr. Hall held the affection of his men and was frequently chosen by the company's representative in arbitrating with the railroad unions.

He was born in Montreal, Jan. 7, 1863. He married Mary E. Haley and had a son, William Hall, and a daughter, Madeleine Hall. He was educated at Bishop's college, Lennoxville, Que., and entered railroad work shortly after.

He was a member of several clubs including the Manitoba club, Winnipeg, and Vancouver club, Vancouver, and the Rideau club, Ottawa.

May Abrogate Treaty

Japan Will Not Adhere To Washington Treaty Unless New Plan Is Adopted

Tokyo. Japan will abrogate the Washington naval treaty of 1922 unless other signatory powers "give evidences of favorable consideration to a new scheme for limitation of armaments," Admiral Japan will propose," a foreign office spokesman announced.

The spokesman indicated the proposal would be made during London discussions preliminary to the 1935 naval conference and that the attitude of the powers during and after this conference would be closely watched.

A Woman President

Predicts A Woman Will Head U.S. Government Within A Generation

Chicago. A woman president of the United States within a generation was predicted by Miss Lillian D. Bloch, secretary of the National Association of Women Lawyers.

"I expect that within my own lifetime some brilliant woman will make her way from the ballot box to the presidency," she told the association's annual convention.

"All of our country's presidents have gone forth from women. What is to prevent woman herself from going forth to occupy this exalted post?"

W. N. U. 2022

Assistance For B.C.

Ottawa To Advance Funds For Relief Purposes

Victoria. The Dominion government will assist British Columbia in the financing of direct relief to March 31, 1935, which will amount to approximately $2,000,000 in addition to the $1,200,000 granted from the federal government, John Hart, minister of finance, announced.

Mr Hart returned here from Ottawa where he had several weeks negotiating for financial aid for the province

Mr Hart completed arrangements for a loan from the Dominion of $2,000,000 to meet a maturing obligation on New York and also for an advance of $375,000 on account of [illegible] for the fiscal year

Mr Hart also negotiated a loan to the province of $1,000,000 for advances to municipalities unable to carry their own share of direct relief

Mr Hart stated the Dominion has agreed that, on all the province's unused balance of the $1,000,000 in interest rate will be 4½ per cent instead of 5 per cent., in line with a general reduction of interest rates.

The minister said Prime Minister R. B. Bennett had agreed to loan the province $1,000,000 for a two-year period as the result of representations made by Premier T. D Pattullo, for a loan of $3,000,000

Sale Of Government Cars

Auction Sale In Toronto Realizes Over $37,000

Toronto The University of Toronto's stadium, scene of many famous gridiron struggles, was throng i with a crowd of more than 5,000 to witness the Hepburn government's wholesale auction of automobiles years lease and sundry furnishings of the former Henry government.

When the noose had died away and all the automobiles had changed hands in cash, 87 cars had been disposed of at a sum aggregating about $37,000

A large section that of former Premier Mitchell F. Hepburn, of Quinte, Ont., exhorted the crowd to bid up, saying "You will be proud to tell your grandchildren you bought the first government car sold at public auction, the car of Premier Henry."

There were numerous shouts of "Hepburn."

An exp nave, but p ny-saver old car is which the late Hon F. A. Dunlop used in the days of the 1934 relief, has travelled 70 083 miles. A 1930 model of a less expensive car sold for $405. It has done 116,000 miles.

New Mining Company Has Been Incorporated

Capitalized At Ten Million And Will Promote Gold Production

Toronto.—Canadian Gold and Metals Mining Company, Limited, with authorized capital of $10,000,000, has been incorporated and will launch its campaign shortly after Oct. 1 to promote gold production and to provide a medium for investment in mining securities.

Fifty per cent., or $5,000,000, of the company's capital is to be invested in dividend paying mining stocks, listed on an organized exchange, or government bonds. Twenty per cent. is to be invested chiefly in mining stocks listed on an exchange but not necessarily dividend paying, and the remaining 30 per cent. is for speculative purposes.

Among the directors are Sir Henry Drayton, K.C.; Hon. W. D. Ross, J. W. Hobbs, E. W. Beatty, K.C., president of the Canadian Pacific Railway and David Sloan, of Vancouver.

Noted Explorer Dead

Sydney, Australia. Sir Edgeworth David, noted explorer who led an expedition to the south magnetic pole in 1909 and also took part in Sir Ernest Shackleton's early-century Antarctic explorations, died at his Mornsby, N.S.W., home

Ottawa For War

Fabulous Sums Spent In Europe For Armaments

London (Undated) the "eventual war" will be fought at high speed, the world is grooming that iron setdown to do the job.

While London and Paris army men tended to differ with the opinion Italian military authorities expressed to the effect that trench warfare was obsolete, Great Britain and France nevertheless went forward with Italy in efforts to speed up movements of troops.

The League of Nations' armament yearbook published at Geneva estimated that the world spent between $5,671,000,000 and $4,300,000,000 gold for armaments in 1933

A great part of that army men would add, although he returned here to occupy the high railway post he held at his death, it was chiefly on the western lone that he expacity as an executive was developed

He began his railroad career with the Canadian Pac fic Railway as a fitter. In 1886, he joined the old Intercolonial railway as a general locomotive foreman, stationed at Moncton, N.B.

In 1896 he was again in the service of the Canadian Pacific Railway and held the position of general foreman at McAdam, N.B. Shortly after the turn of the century he went west as general foreman in Winnipeg.

In 1902 he went to Revelstoke B.C., as master mechanic, then returned to Montreal as assistant superintendent of rolling stock, eastern division.

In 1904 he became superintendent of motive power, western lines, and in 1906 was made superintendent of motive power for the company

From 1911 to 1912 he was the company's assistant general manager and in 1913 became general manager for western lines at Winnipeg Two years later he was made vice-president and general manager at Winnipeg.

The position he held at his death, vice-president with jurisdiction over all lines, was his since 1918

He was a recluse, having a thorough knowledge of all railroad problems, and was noted for his ability to avoid friction of all kinds and was known as a hard worker.

Mr. Hall held the affection of his men and was frequently chosen by the company's representative in arbitrating with the railroad unions.

He was born in Montreal, Jan. 7, 1863. He married Mary E. Haley and had a son, William Hall, and a daughter, Madeleine Hall. He was educated at Bishop's college, Lennoxville, Que., and entered railroad work shortly after.

He was a member of several clubs including the Manitoba club, Winnipeg, and Vancouver club, Vancouver, and the Rideau club, Ottawa.

HON. ARTHUR W. ROBERTS

Attorney-General for Ontario who is studying ways and means of tying up the assets of provinces and friends of any kidnapped person in order to prevent payment of ransom as an outcome of the kidnapping of John S. Lahell of London

Drouth Problem

President Beatty of C.P.R. Opposed To Moving Settlers From Wastes

Moose Jaw "The problem of the drouth areas in southern Saskatchewan cannot be solved by moving the people to other parts of the province. This would be unfair to the people involved unfair to the drouth areas and a great mistake for the province" said E. W Beatty chairman and president of the Canadian Pacific Railway Company in an interview here

"The solution of the problem lies rather in the governments standing by the farmers with required assistance to bring them through the emergency, coupled with soil conservation on lands adapted to grain growing, and the development of grazing land for grazing purposes and a policy of water conservation and conservation for use on the farms." Mr Beatty said

"By water conservation and development, Mr Beatty explained, he did not mean large schemes for irrigation works, which experience in this country had shown to be too expensive for the returns possible but rather the development of adequate water supplies for farm use including stock growing

Future Recommendation

Toronto Extension of the recommendation system to supplant examinations in the schools was urged by Duncan McArthur, deputy minister of education for Ontario. Responsibility for determining standing should be placed on those most intimately with the work of the students, he said.

Building Railway Line

Stewart, B.C Construction of the railway line of the Canadian Northern Railway from Stewart, has not been started under the charter granted the company calling for an expenditure of $30 000 this year The line is intended to run ultimately to Fort Grahame, B.C., about 250 miles. ads.

Demand Tax Rate Cut

Edmonton Taxpayers Threaten Strike Unless Rate Is Reduced

Edmonton Edmonton taxpayers took up arms against their city administration and, in a mass meeting at which every one of the 1 450 participants had to produce assessment notice to gain admission, decided on a tax strike unless expenditures are cut and a tax rate of 60 mills adopted. Re-distribution of taxation liability and drastic cut in expenditures are demanded

Edmonton's tax rate now stands at 64 mills one of the highest in Canada.

SCENE OF $417,000 HOLD-UP

In the foreground is seen the push-cart which concealed the machine gun used by the Brooklyn bandits who made the biggest cash haul in North America; the large car in the armored automobile held up by the gangsters. The police are shown questioning witnesses.

BETROTHAL OF PRINCE GEORGE IS ANNOUNCED

London The betrothal of Prince George Edward, fourth son of the king and queen to the beautiful Princess Marina of Greece was announced in the court circular

"It is with the greatest pleasure." the announcement said, "that the king and queen announce the betrothal of their dearly-beloved son, Prince George, to Princess Marina, daughter of Prince and Princess Nicolas of Greece, to which union the king has gladly given his consent."

An acquaintance that dated back five years to the young couple's first meeting in London ripened into romance in a Balkan setting, the picturesque Slovenian Alps of Yugoslavia. London understood. There the princess and prince had been staying at the summer home of Prince Paul of Yugoslavia

The prince will be 32 on December 20 Princess Marina is 27.

The princess has inherited all the beauty and charm of her Russian mother and the pleasing qualities of her father, a brother of the late King Constantine of Greece

Princess Marina will be the third of the children of the reigning house to marry His only sister, Princess Mary the present queen royal, married in 1922 to Viscount Lascelles (now the Earl of Harewood). Their Majesties' second son, the Duke of York, was married in 1923 to Lady Elizabeth Bowes-Lyon

The Prince of Wales, heir to the throne, remains single. He passed his 40th birthday last June

It was understood no plans whatsoever have yet been made for the marriage

The prince next to the Prince of Wales in boat known of the royal children in Canada As an officer on H M S Durban in 1928 he visited Canada with British Columbia cities.

The tall blue-eyed handsome prince and his fiancee have many tastes in common.

Among them is love for music. The prince is an accomplished pianist while the princess has been schooled as an amateur musician

The princess also likes dancing and shooting two amusements of which Prince George, as well, is very fond

A thoroughly modern girl in every respect, the young princess likewise engages enthusiastically in outdoor sports, another trait calculated to endear her to England's sport-loving people

The princess was educated in Athens Paris and London, and speaks fluent French, English, Greek, Russian and German

Four Five Men Drowned

Thrown Into Columbia River When Cable On Cage Broke

Revelstoke B.C Hope has been given up that there were any survivors among the five men who were thrown into the Columbia river when the cable of a cage on which they were crossing the stream broke.

One man of six in the cable cage, Roy Palmer of Winnipeg, reached shore and two others were seen struggling 400 yards down the rushing water, but apparently they did not reach safety.

The men were employed in the relief camp at 10-Mile on the Big Bend highway, and among them themselves on their off-work Sunday in taking an exciting ride across the river.

Mountain Climbing Tragedy

Government Camp, Ore. After 19 hours of rescue efforts in which three rescuers nearly lost their lives, the body of Victor F von Normann, 22, University of Washington student from Hunt Point, Wash., was brought out of the sulphurous crater of Mt. Hood

No Decision On Trip

Ottawa. No definite decision had been reached as to his projected journey to Geneva, Prime Minister R. B. Bennett stated after a lengthy session of cabinet council. It was understood the question was under consideration.

Britain's Motor Car Tax

Average Almost $150 And Is Highest In World

There is only one private or commercial motor vehicle in the United Kingdom to every 37 of the population, a long way below the Canadian percentage. The industry, however, is overcoming the handicap of United States mass production, which, developing during and after the war, gave that country the lump in the the home and foreign markets, including Canada. Ten years ago Great Britain had 71,384 motor vehicles in use. Last year the number was 908,795.

More than one million people are employed in the manufacture, maintenance and operation of British cars, and about three-quarters of the national taxation is derived from motor licenses and gasoline, the figure being about $37 million. Taxes on cars and diesel about the "horse" of about $13.50 per horse power, and as the average British car is 12½ horse power, the average car has to pay $169. You know what the car tax is in Canada. To collect the tax, British engineers have developed meters that measure very little gasoline and must earn run from 60 to 80 miles per gallon. The British licensing law is the first the highest in the world, and as long as it remains anywhere near its present figure, will hamper the industry.

Britain, is fully alive, however, to the importance of the motor vehicle, and has one of the huge motor sport on roads in the Dominion, it cannot disagree the imagination to know that last year the nation spent $400,000,000 on roads and bridges.

And Great Britain is less than one-quarter the area of Ontario. St. Thomas Times-Journal.

Seven-Foot Wheat

Grown In England From Seed Used In Pyramids

Officials of the Indian government dug into a 5,000-year-old Egyptian tomb and found a bundle of wheat.

They planted one ounce of it in England. And behold every grain germinated and sent up a hasty shoot to an average of seven feet.

It is a great discovery.

It is stimulating to the imagination to learn that the farmers of Isis, 5,000 years ago, could produce wheat in every way superior to the scientific product of 1934.

The new wheat will doubtless add much to modern agricultural knowledge and eventually increase the world's wheat yield.

If the world only dig into another 5,000-year-old tomb and learn how to sail it, everything would be lovely.—Vancouver Sun.

A Rare Reptile

Lived Many, Many Years Ago, And Had A Very Long Neck

From the discovery bones of dwells" in Wyoming has been taken the skull of a rare reptile that walked through the swamps 140,000,000 years ago.

Announcement of the find came from T. Trubie Davies, president of the American museum of natural history.

The skull is that of bacosaurus, a huge and little-known dinosaur of which bones in no complete found in existence.

Dinosaurs were on a super-scientific reptile scientists said. Its chief peculiarity was the enormous elongation of the neck vertebrae.

They took the sections of a heavy pipe.

Scarcity Of Glass

Contending that buildings could be made invisible from an end air if made of glass, an ambitious inventor is trying to interest officials of the United States navy to melt all available glassware, including beer bottles, for an immediate start on the construction of such ships.

Schoolmaster—"This makes the fifth time I have punished you this week. What have you to say?"

Bobby—"I am glad it's Friday, sir."

Archaeologists have found a stone linked to former tomb in a ruined church at Monte Mota.

Right Make A Difference

Of Children's Heart Disorder Depends On Right Treatment

It happened the other day in the odd house town. A man standing on the corner across from the post-office noticed an old woman standing in and coming out without any mail. He said something about him and it was this:

"There goes old Archie. You know he used to farm about six miles east until his wife died on the corner and all moved away. Then he took up a little place just on the edge of the town with about an acre of ground, and he lives alone there. He has a few hens and these girls in the family, and he did the best he could by them. He kept a lady of sorts until they are all doing fairly well. The girls are all married and have good homes, too, but they are all some distance away from here. Archie never came down to the post office every day after the train has come in and, he's been doing it every day for a long time. He told me once he was always expecting there would be a letter from one of the children, but he has remarked several times that he guesses they are so busy they haven't time to write. I don't think there is a week goes by that he doesn't get the town paper and mark it here and there with the names of people his children would know, and to stands over there at the counter in the post office and carefully wraps them up to send on to them. Then and goes day after day always hoping for a letter. Very seldom one comes but when it does Archie is the happiest man in town."

There is little need to comment on that little picture of old Archie, or he came to be known in the town to distinguish him from his son, "Young Archie," writing rather slow now. He'll be back in his little house, where he would be alone. His children probably have families of their own and their own circle of friends, and the chances are they would believe it themselves if they said they had no time to write home. If they had sent old Archie money to the post office and nursing every comfy handed, and if they knew that he did this day after day in good weather and rough

well, they might see things differently.—Stratford Beacon-Herald.

The Robert Courtesan

A lady much above the usual size was trying to enter a street car. A passenger who was waiting to get off began to laugh at her diminutive size.

"If you were half a man, you'd help me on this street car," snapped the fat lady.

The passenger retorted, "Madam, if you were half a lady, you wouldn't need any help."

Teacher—"Willie, why do you write 'thank' with a tongue H?"

Willie—"Because Gabby said a hank was no good unless it had a tongue spotted.

Weary Of Life

Gallant Old Trapper Ready To Rest Content Again Reunited

Physicians, stirred by the plea of an 83-year-old man, are planning to push their demand for the legal right to end happiness suffering by an operation of sleeping powder.

The long debated moral question was filed a physician the right to kill" was revived by the plea of the former magistrate of Genoa, in Peace Jungle Land.

Fifty years ago his vigor was equal to the exploration of the Arctic, and he was the man named Cape Crozat in Greenland. Lately Lad Jungle, he was told by his doctors that his condition was hopeless and that he could not live many days.

He at once invited his friends to a party which he called his "swan song." Then he took a long cruise to come to rules up the Amazon and returned to his home in London to die.

In a letter published recently he declared the fact that skepticism will not lessen his end.

"I am more than 83 years old," he wrote. "I am of no use to anyone and a nuisance to many. I would hide with joy a deadly dose of sleeping powder I who suffer without relief and whose eyes can read no more.

"And yet, that is an initiative that I could not take by myself, for I am psychologically opposed to suicide."

It Wouldn't Work

A Toronto minister suggests that editors and presidents should exchange jobs now and again. "What, and have people fall asleep over their newspapers and listen to typographical errors from the pulpit?" says the Border Cities Star.

Need Gradual Approach

People Cannot Grasp Great Inventions Without Preparation

There is a quaint ingenuousness about the 73-year-old Indian in British Columbia, who gathered in 30 or 40 horses and then tried to sell them to their proper owner, with the result that he was committed to a term in jail. He had spent all his life in the wild and had never seen even a locomotive. Cities were unknown to him and all the modern inventions more than merely strange. His eyes were in danger of popping out of his head as each new marvel was brought to him.

The steamer on which he was carried to Vancouver astonished him, and when he came to the city with its wonders he was amazed and speechless. Taken to the zoo, he gazed in fascination at the animals, but when he came to the "funny men" he was overcome. Then he was taken to a department store and spent a long time in the elevators, going up in one and down in another. Finally he was taken to a moving picture theatre and left there. He was found in the morning, still sitting in his seat, fast asleep.

The moral is obvious. Inventions must be introduced gradually if people are to grasp them. Take the radio, for example. Suppose that one day you were suddenly confronted by a man who said: "I have invented a machine which will enable you to hear a man speaking in Timbuctoo." You would probably say: "Nonsense!" and refuse to believe your own ears. But if you had been gradually prepared for the invention by a long series of experiments, you would be ready to accept it as a matter of course.

The condition of this man, regarded as pathetically unsatisfactory in his own environment, may be compared with the mind of a century ago, in the person of any ordinary man of intelligence, if he could have been plunged all at once into the science and inventions of the present day. Almost any, if the man of to-day, knowing what he knows, could suddenly be placed in the world that will be in 2034 A.D.

Dealing with Vancouver's inner and outer harbor and with the mouth of the Fraser river, Mr Swan described plans of railway, highway, bridge and dam development that would make this seaport to the fore among world ports.

Joint interests in connection with the port business of Vancouver, New Westminster and North Fraser will be bettered, because an intercoupled so to make advisable the setting up of one port authority in the entire area.

"As part of a town plan for a seaport," Major Swan declared, "there is a rightful demand that future development of the waterfront facilities should recognize proper access for the free movement of freight and passengers to and from the harbor by highway and railway with a minimum interference to such movement."

"The plan should further recognize the need for adequate railway facilities. There should be, if possible, a unified control for the operation of a waterfront or terminal railway.

"The plan should provide for the systematic development of the waterfront with proper lines of demarcation between deep sea, coastwise, inland and recreational waterfront facilities.

"Waterfront roadways should be provided which allow direct connection between various portions of the harbor front and which enable city fire, police, ambulance, and other services to operate with the greatest dispatch."

Becoming Important Port

Vancouver Has Big Future, Opinion Of Major Swan

Vast future developments of Greater Vancouver's harbor facilities were foreshadowed by Major W G Swan of the Engineering Institute of Canada.

Dealing with Vancouver's inner and outer harbor and with the mouth of the Fraser river, Mr Swan described plans of railway, highway, bridge and dam development that would make this seaport to the fore among world ports.

Joint interests in connection with the port business of Vancouver, New Westminster and North Fraser will be bettered, because an intercoupled so to make advisable the setting up of one port authority in the entire area.

"As part of a town plan for a seaport," Major Swan declared, "there is a rightful demand that future development of the waterfront facilities should recognize proper access for the free movement of freight and passengers to and from the harbor by highway and railway with a minimum interference to such movement.

"The plan should further recognize the need for adequate railway facilities. There should be, if possible, a unified control for the operation of a waterfront or terminal railway.

"The plan should provide for the systematic development of the waterfront with proper lines of demarcation between deep sea, coastwise, inland and recreational waterfront facilities.

"Waterfront roadways should be provided which allow direct connection between various portions of the harbor front and which enable city fire, police, ambulance, and other services to operate with the greatest dispatch."

Had A Good Grievance

Electricians Plead Too Late That Death Grip Was Unintentional

Down at the Hotel Pennsylvania one afternoon not long ago, the employing system in the main banquet hall was in full swing. The clock struck 5 o'clock, and since a convention was scheduled for the next day, the chief electrician of the hall's helpers worked all night putting things to right. It was only a few hours before the convention was to start that they went home wearily to bed, leaving the suites in shape. They hadn't got and till they woke up, and learned what the convention was—the National Association of the Deaf.—The New Yorker

One gram of radium contains enough power to lift a 28,000-ton vessel 100 feet in the air.

REDUCING MADE HER LOOK YOUNGER

A Burden Of Fat Gone

Here is another case where the trim, slim figure of youth has displaced the matron, fat outline of middle age. It is a housekeeper writing. Her age:

"I cannot say what weight I was, but I was very fat, a burden to myself. I have taken three bottles of Kruschen Salts and now I am quite a slim lady. I am over 56, and people take me for 40. I am never than proud of myself. You can take it from me that every word of this is true. I look so invigorated in hot water every morning till I take three bottles. Now I only take half a teaspoonful each morning. I cannot recommend the Kruschen Salts enough, for they are worth their weight in gold."—Mrs. A. H.

Kruschen Salts combat the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

OCCASIONAL WIFE

By
GENA ROSS WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, declining to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a prize-winning statue of Diana, a bad adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter. Prince Tudd, Peter's model and Gus Matson, his former roommate with whom he has quarrelled. After a party at an artists' club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the house-boat they have had fixed up on the sand. When they awaken it is early morning and Avis and another boy are standing near them on the beach. Camilla suggests Peter go to swimming before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of $1,000. Peter finishes his statue and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration." Peter adopts the latter title and Camilla, disgusted, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, me the statue has been shattered to pieces by someone. Camilla, thinking that Peter has destroyed the statue in order to collect the insurance, is horrified by the accusation. Exhibits.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured secretly for her as a wedding gift. They named it "Land of Nod."

Camilla's advertising campaign and Tip Toe broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and in the preparations for his journey to France. After the ship's departure from New York, he is to on his way to his cabin when he meets Avis Worth. During the voyage Avis tells Peter that Camilla smashed his scholarship exhibit in a fit of temper, and he believes her.

(Now Go On With The Story)

CHAPTER LIX

Camilla did not recognize her visitor for a moment. A long had it been since their last meeting. But after an instant, she recalled his name. "Oh—Mr. Matson, good afternoon."

He extended his hand even before she offered hers in greeting. He the clumsy make-believe gentleman that he was. "The very name—Camilla Lord, but you look even! His frank glance admired her from head to heel. "And no wonder! Didn't you just go up in a rocket to success? What do you think, I listen to every one of your broadcasts."

She smiled reservedly. It a nice thing that someone listens in. But why should you be interested in children's stories?"

"I'm not I listen just to hear your voice."

Her manner became more aloof "Is that what you came here to tell me? If it is, I'm frightfully busy, Mr. Matson."

"Oh, me here, little fireworks, don't you get on your nerves a little thing like that. No, I came here to tell you something that I think you might like to hear. How about it?"

"Well?" she waited.

"I just heard the other day that they became part of destroying Peter's exhibit piece."

"Well—I didn't. And Peter knows that."

"Wasn't it that clownish cut, Avis Worth, who accused you of it?"

"What difference does it make if she did?"

"I just thought she might be able to convince him that you did."

"That's a silly thing to bring up now. Peter is on his way to Paris, as you well know."

"Oh, is Avis — and on the same boat." He watched her face closely for the effect, and was gratified with the result.

Camilla grew alarmingly white, as if she had been struck a terrific blow. Her head reeled sickeningly. But she rallied instantly and sat very still, aged to reply bravely. "That's a strange coincidence, isn't it? At least, Peter will have pleasant company on a slow voyage."

"Lord, you're a brick, Camilla. I know how that gets you. You can't help it. But I'm glad I came back to help you, because I've always been crazy about you and can't bear to see you get a raw deal. Want to the boat, hop aboard and I'll take you to Paris."

She hesitated for a moment. "It would be rather a relief to have the company either."

"Well—I did it."

Her startled eyes met his with unbelieving scorn. "You did what? Why should you confess it to me?"

"One at a time, if you're going to give me the third degree." He held up his hand in mock protest. "First, I've told you to give you a square deal. Reason given above. Next, I did it for revenge for your refusal on Peter for a former little incident which you may recall, and to increase the possibility of my own success. There was no doubt that he was one of my best rivals. That eliminated his chances, I thought, and increased mine by one. The results proved that I was right there. I was the Nels Nelson whose 'Flight' was second and had the scholarship. So Peter was my best rival, even with a substitute entry." He laughed harshly. "I may even have bettered his chances by what I did, and hurt my own. Well, he won. Oh, you—one thing more. You will wonder how I did it. I slipped unnoticed into his studio that night of the party, and was listening in the lower hall when you were discussing the exhibit. It was a lucky break for me." He paused.

"But I still don't understand why you are telling me. No one ever suspected you. Don't you know that I could have you arrested?"

"You won't," he said confidently, "Neither would Peter. After all, I have to admit that he's one swell guy. Besides, he won, didn't he? Minus a his kick? Blind gimme a shilly bad more kick in it than a dozen 'inspirations'. But there is no harm done, girlie. And I'm glad I put Peter where he wanted to be by my rotten trick, but I landed myself in a corner with a silver lining. Maybe I didn't deserve it, but just the same I am there and riding pretty.

"Peter can have all the Paris scholarships he wants—me for the good old green. I only wanted to go to Paris to ride over the depressing, anyway. First crack after the exhibit, one of the big money kings buys my 'Flight' and gives me an order to do a bigger copy for the entrance to the airport. Then I almost collapsed when fortune threw her arms around me again, and a twenty-dollar bought the painted one some little moderastic figures that [illegible] put in the five-and-nine above. What do you say, is that a break or isn't it?"

Her face lighted with genuine admiration. "Indeed it is, and I'm awfully glad for you I hate to think that you could do a thing like that to Peter—but since it came out all right, there must have been some reason in the whole plan. I'm glad you told me about it, Gus. I suppose I'm to consider that it does mean something to me. It would have been a dreadful mystery to have hanging over us for all our lives. But don't be so youngwful and petty like that again, will you?" Camilla implored him.

"Not on your life I won't. Me for the straight and narrow and prosperity."

"I hope it continues for you," she smiled. "You have some fine things in you to develop, I am sure."

"Gee, but you're sweet. Tell you what, I might even write you a statement of confession to show to Peter sometime, if you will promise to be born in Paris so that my heart reads it. I don't care to have incriminating evidence like that around."

"You don't need to do that. If you wish me to tell Peter, I shall. He will believe me of course. And we shall be relieved to know how it happened. I'm sure he never believed that I did it, anyway."

"Well, I'd advise you to keep your eye on Avis Worth."

Camilla laughed with a deprecating gesture. "Avis doesn't worry me." But she did not believe what she said, and when Gus Matson had gone, huddled over her drawing board in abject misery and despair. Her thoughts leaped the expanse of land and ocean which divided them, the widened Avis and Peter on the boat together for hours and days. Then Paris—Peter a stranger and a lonely man, and Avis a familiar with the city, the customs, the language, as at home. Avis seductive, amorous, subtle, confident. Would even that be advantage. Angry tears stung in her eyes

After a night of restless pacing of decks and turning in his upper berth, Peter emerged to a victory over his emotions. With bitter reproach for his own folly and vanity? Weakly and cowardly self-control. With a toy in place of the world God made?

Waiting while months and years slip past.

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Wernet's Powder. They fit snugly comfortably they can't slip. Prescribed by world's leading dentists —they know it's the best! Come but Make easy directions.

Mr. Interviewer—Father's afternoon and under transferred themselves to Avis, and Almost before he was aware of what was happening, he found himself caught up and buried along by the mighty force of his demon. Her sentiment tantalized him, maddened him; until on that last magic evening of moonlight and sea breeze, when the emotion were strangely alive and alert with the anticipation of the morning's beginning, he found his lips pressed to hers, himself holding her intoxicating form-passive in his arms, and all else oblivion.

"But—that mean you love," he dully reminded her.

"That mean is you, Peter darling," she confessed

He was dazed. "Oh—I begin to see light"

Laughed softly. "Dear Peter, you are simply too god to be true. Now that you know—what are you going to do about it?"

"I don't know," he confessed dejectedly

After a little while, she consoled him. "Oh, well, why think about now? Tonight is tonight. Tomorrow is another day. Tomorrow, we reach Paris. There is so much to be done. You are going to be very busy. But we can see each other often, and when you are settled, we can have such glorious times together—while we wait." She did not say what they would be waiting for, but it hung in the air between them.

His silence seemed to be an acceptance of her plans.

THE RHYMING OPTIMIST

By Allan Michaelis

THE MAN WHO DREAMS

Who is so wrong as the man who dreams,
Trading the real for the thing which seems,
Shaping the days in the mold of his need,
Building a world for his whim or his greed?

Who is so foolish, so futile as he,
Living this life for reality?
Weakly and cowardly self-content
With a toy in place of the world God made?

Little Helps For This Week

"The Lord bless thee and keep thee: the Lord make His face to shine upon thee and be gracious unto thee; the Lord lift up His countenance upon thee, and give thee peace."—Numbers 6:24-26.

O Love how cheering is Thy ray;
All pain before Thy presence flies
Care, anguish, sorrow melt away,
Where'er Thy beaming beams arise.

O Father nothing may I see,
Nothing desire or seek but Thee.
—P. Gerhardt.

There is a faith in God and a clear perception of His will and designs which gives to its possessor confidence, patience, and a mental composure under all varied and trouble some aspect of events such as no man can realize unless he has felt its influence in his own heart. There is a consciousness with God in which the soul feels the presence of its Creator. One in the profound depths of his own being with a vivid distinctness, and a holy reverence, such as no words can describe. There is a state of union with God, not often reached, but it has been attained in this world in which all the past, present and future seem reconciled, and eternity is won and enjoyed; and God and man, earth and heaven, with all their mysterious are apprehended in truth as they lie in the mind of the Infinite.—Samuel D. Robbins.

The Man In The Moon

Mysterious Tenant Of The Lunar Planet Is Photographed

The man in the moon has posed for his first television transmission.

After smiling down for years into the world's telescope lenses, the mythical tenant of the lunar planet has been photographed by television and the picture transmitted to a radio receiver

Reproduction of the moon's likeness —the first recorded use of television in astronomy—was announced by Philo T Farnsworth, world-old inventor-scientist of Philadelphia.

SPOKEN ON THE WORLD?—THAT'S LOVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and generally "rundown" make the mistake of using calomel, mineral water laxative when what they really need is to get the bile flowing freely to the bowels. Then you feel like a million.

What you need is to wake up your liver bile. That's what Dr. Caldwell's Syrup Pepsin does. Just a few drops of it will help start your bowels. Then you feel like a million. Ask your druggist for Dr. Caldwell's Syrup Pepsin today.

Caution: Little Liver Pills will soon be put on the market. Don't confuse them with Dr. Caldwell's Syrup Pepsin. Refuse substitutes. All 30 all or nothing.

An Interesting Bible

Bible students are interested in a 301-year-old Bible owned by C. S. Cooper, of Windsor, Ontario, which has developed a curious quality of faintly discernible luminescence. Containing all books of the Bible this volume contains the Apocrypha and one of the first concordances ever published. The type used is English script and very difficult for modern eyes. Mr. Cooper inherited the book from his father, S. Moorehouse Cooper.

Jumpy Nerves

Yield to the soothing action of this medicine. You will say honest . . . sleep better . . . feel better . . . look better. Life will seem worth living again. Don't delay any longer. Begin taking it today.

SMITH'S DRUG STORE

"You can't Stop stoking a steam engine" said Wrigley

Interviewed, and asked to what he attributed his phenomenal success, the late Mr. Wrigley, of chewing gum fame, replied, "To the consistent advertising of a good product."

"But," asked the reporter, "having captured practically the entire market, why continue to spend vast sums annually on advertising?"

Wrigley's reply was illuminating.

"Once having raised steam in an engine," he stated, "it requires continuous stoking to keep it up. Advertising stokes up business and keeps it running on a full head of steam."

This applies to your business, too. Don't make a secret of your product. Tell people all about it. Tell them what it does. Tell them its advantages. Tell them where to get it. Tell them through the Press and keep telling them.

Town Council Hold Regular Monthly Meeting

[illegible] regular meeting of the Council [illegible] Fort Saskatchewan [illegible] Council Hall on [illegible] 4th instant at 8 o'clock. [illegible] Mayor G. T. Monteith, Councillors Magee, Pettet, Watt and Gaul.

The minutes of the last regular meeting, and of the special meeting, held were read and adopted.

A letter was received from Mr. M. Luckhurst, M.P., acknowledging the resolution of the Council, in which he says that he has already written to the Hon. Mr. Murphy, Minister of the Interior, and he submits to Ottawa, in regard to the matter of the construction of a gravelled road to Elk Island Park, and concludes by letter by saying "Will advise you in due time of any results of your and my representations."

In Dr. Henry's report for August as Medical Health Officer, he says "Four cases of whooping cough (4) reported in town during the month ending 31st. August, and are cases of German measles. Four houses were placed under modified quarantine in consequence. Five children were affected via (4 with whooping cough, and one with measles.

It is reported that good progress was being made with the new sidewalk being laid on the [illegible] of the Memorial Hall to the Fort Confectionary. Expenses so far in this connection is [illegible] $70.00, as follows $41.00 gravel and sand; $20.00 labor, freight on lumber & Lakeside $5.00.

As applications under the Preliminary relief settlement plan will be considered at a later meeting. An application to rent a vacant Town house was left over pending report from the Medical Health Officer.

A grant of $50.00 was made to the Women's Institute for the upkeep of the Fort Saskatchewan Cemetery.

A mot on was passed that 100 feet of hose be purchased for the Fire Dept., the same to be selected by the Fire Chief, Mr. P. Hiver. The Secretary was instructed to call for tenders for 50 tons of coal, more or less, lump and double screened, single screened or nuts run. Tenders to be in Secretary's hands not later than noon of 18th September.

"You have a nice place here, but the trees are rather small," said a lady visitor at a local residence.

"Yes," replied the hostess, "they are rather small and I hope they'll be much larger by the time you call again."

Farm Hand Badly Hurt When Thrown From Binder

Thrown beneath the carriage of the binder he was driving when the four horse team bolted on the [illegible] near Fort Saskatchewan, last Saturday afternoon, the [illegible] 61, farm laborer, suffered deep cuts on the right leg and back.

Saskatchewan was working in a field at the time when the horses started to run away, throwing him face down-ward on the ground. He was caught by the binder carriage and dragged for nearly two hundred feet before the team came to a halt.

Dr. T. W. E. Henry, med.- a rapid [illegible] Edmonton with the injured man, taking him to the Royal Alexandra hospital by our where his condition is today reported as good.

GAME SEASON TO OPEN

The annual duck season opens in the district south of the Athabasca River at noon on September 15th and the open season extends to Noon Nov 18th.

The open season for deer, moose and caribou opens November 1 for six weeks.

DR. ROSS RETIRES

Dr. John T. Ross, deputy minister of education, after 33 years of service in Alberta, is retiring on pension this month, it is announced by Hon. Perren Baker, provincial minister of education. Dr. Ross' successor has not yet been named.

TO DISCUSS HEALTH INSURANCE

A general meeting of representatives of various organizations in the province, to discuss the legislative committee's report on health insurance, will be held in the medical building at the university in Edmonton, on Friday, September 21st. The meeting is being held in order that the public may be fully informed regarding the proposals recommended by the legislative committee with a view to the adoption of health insurance.

It is hoped that Mr. Hugh H. Wolfenden, consulting actuary to the Canadian Life Insurance Companies association, will be present at the meeting, as he is to be in the West at that time.

Egg-Throwers Appear Before School Board Meeting

[illegible] meeting of the Fort Saskatchewan School Board was held in the [illegible] Monday night. Present were Mr. [illegible] Chairman, Mr. [illegible] and Mr. [illegible] Secretary-Treasurer. The minutes of the last meeting were read and adopted.

The minutes of the last meeting held were read and adopted. A report was read from Provincial Auditor [illegible] that the statement he had [illegible] to examine from attendance at eleven Public School boys for damage suffered on school property of the 5th instant, the sum amounting to $5.00 [illegible] Board was instructed to [illegible] Public Auditor. Mr. Cameron, [illegible] reminded that the Board [illegible] lowest [illegible] if a [illegible] tender [illegible] is given. Discussion regarded as a [illegible] matter. It was [illegible] and [illegible] at [illegible] The boys [illegible] a dozen [illegible] for the [illegible] trustees, which was [illegible] the [illegible] and expressing a desire [illegible] which was accepted by the Board and the [illegible] withdrawn, but boys were instructed to remain [illegible] the satisfaction of the Janitor for damage done. Two young men, [illegible] of whom were from Edmonton, were alleged to be the ringleaders in this escapade, and the Secretary was instructed to write their parents requesting an apology from each of them. A resolution was passed hereby [illegible] the action of the Principal, Mr. Anderson, and [illegible] taken by him.

Requisitions from Miss Dishaw, Miss Robertson, and Miss Turner, for supplies, were approved, and the same authorized to be purchased through Mr. F. W. Smith.

The Secretary was instructed to advertise in the local paper for tenders for 100 tons of coal, more or less, double screened or single screened. Tenders to be in the Secretary's hands not later than noon of the 20th September, 1934.

Authority was given for the purchase of a ladder for the school, cost not to exceed $16.00. The following accounts were passed for payment: Fort Hardware $20.70, A. E. Cockenden $13.80, C. A. Brown labor painting and making general repairs to [illegible] Motor, J. T. Lefort $6.00; Calgary Power Co., $1.50; E. N. Heyer Co., $10.50.

At the opening of School 62 entrants for High School and 75 for Public School, a total of 207, compared with a total of 208 last year.

SUPPORT THE ADVERTISERS

YPRES VALLEY

Mr. Mark Lawrence and Miss Clara Ibbitson returned to Edmonton on Sunday after spending holidays at the home of their parents.

Mr. Bill Pearce and daughter Molly, and Mr. and Mrs N. Latimer were Sunday visitors at the home of Mr. R. Latimer, New Norway on Sunday.

The ladies aid held their September meeting at the home of Mrs. Carl Armstrong.

The children are busy getting ready for the school fair on Friday.

Don't forget the last Barn Dance held here Friday at Bert Davis barn.

YOUTHS STORM 30 HOUSE WITH ROTTEN EGGS

Last Thursday evening, several youths tried their hands at stripping the school building with rotten eggs and did a very fine job, so well did they accomplish the feat, that on thinking the matter over decided they would clean-up the mess. So on Friday evening, with the aid of ladders, lanterns, flashlights, and many buckets of water, the boys set to work. Attracted by the noise over at the school, a large crowd gathered and had all the fun.

On Monday night, the boys, (five out of the seven), appeared before the School Board, where they appeared for their actions. The Board after due consideration accepted the boys apologies.

It was reported that the homes of Mr. E. Anderson and Mr. F. Atkinson also suffered from rotten eggs, but the report was found to be false.

Advertise—Bring Buying Dollars Into the Open.

FRASER CHURCH OFFERS POST TO REV. D. C. RAMSAY

Erskine United church, in the Norwood district of the city, has invited Rev. D. C. Ramsay to be its minister, in succession to Rev. J. A. Caldwell, whose pastorate of seven years was concluded last month.

A congregational meeting was held Sunday to deal with the matter and voted in favor of a call to Mr. Ramsay. Rev. Dr. A. S. Tuttle presided over the meeting, at which a general desire was expressed for an early settlement of the vacancy.

Mr. Ramsay who is already well-known in the city and district through his several years' ministry at "the Fort", accepted the call, which will be submitted to the Edmonton presbytery for approval in the regular course at a meeting held later.

EMBARGO ON FODDER EXPORTS

Canada has placed an embargo on exports of fodder. The United States has removed the import duty of $6 a ton on hay. Some exports will be made from Canada under governmental direction but the hay must be shipped from this country is not large this year. The drouth stricken areas of the prairie provinces will need a lot of hay but the northern areas have an abundant supply. Northern Ontario and a good deal of the southern areas of that province have only a 50 per cent crop, if shortage is also reported in the maritime provinces, notably Nova Scotia.

POLICE COURT ITEMS

For unlawfully allowing cattle to run at large within the Municipality of Sturgeon Municipal District No. 548, contrary to the Municipal By-law, one party was assessed the costs of the Court, and a similar charge against another party was withdrawn by the Crown.

Following An Ideal

THE builders of Alberta Pool Elevators, the farmmen and women who put their money, their time and their energy into the project, had definite ideas before them.

They wanted a co-operative concern, first and foremost, operating on the basis of a public utility, with the profit motive secondary to that of equity and service, and built upon the foundations of co-operation as established imperishably by the pioneers of the movement.

These ideals and principles have been followed as closely as possible by Alberta Pool Elevators. It is the ambition of the organization to make this co-operative enterprise respected and trusted by all grain growers, its operations an open book to its patrons and its standing built on widespread confidence. In its broad sense, confidence is the foundation of all human relationships which possess the quality of endurance. The growth and life of any institution depends on the confidence it inspires and commands and can hold.

There is no more unanswerable way of expressing confidence in the worthiness of the ideals and objectives of this movement than by deliveries of bushels—wagon loads and car loads of grain to

Uniform Price System Advocated

Introduction of a uniform price system throughout Canada as a means of distributing whatever benefits result from protective tariffs and of equalizing production costs, was advocated by J. D. McKenna, St. John, N.B., publisher, in a recent submission to the royal commission investigating [illegible] economic situation.

Urging equalization of wholesale prices of all protected goods manufactured in this country, Mr. McKenna contended that Montreal and Toronto virtually monopolized whatever benefits resulted from protective tariffs. Eighty-five per cent of manufactured goods came out of Ontario and Quebec. So-and-so had become rents of the Dominion industrially as the tariff imposed by governments, provincial and federal, it followed that people of other provinces purchasing these goods had to "pay not only their own tariffs but theirs as well" and that course is a pile of [illegible]

His scheme to equalize costs and to standardize prices throughout the country, involves absorption by manufacturers of freight charges, a process with which many in Western Canada would be prone to agree. Thus, Mr. McKenna claimed, would permit manufacturers to place their products on the market at a uniform price the same in Halifax, Regina and Vancouver as in Toronto and Montreal. From despatches note that at the close of his presentation, Mr. McKenna was complimented by Prof. John Henry Jones, of Leeds University, England, who, noted as an economist, is chairman of the commission.

The contentions and proposals of Mr. McKenna are by no means new in Western Canada. Least of all are they new to a certain small group of Saskatchewan economic students which, for two years or more, had quietly been conducting inquiries along similar lines, with a view eventually of sponsoring a plan which might be adopted as a "Western Policy". This group has concentrated its attention upon the price structure, seeking to determine what inequities exist with it, noting more particularly the effects upon it and upon the purchasing power of the prairie provinces of freight, tariff and taxation customs.

The former favorable disparity in wage and salary scales as between Western and Eastern Canada having disappeared under stress of economic conditions, or being noticeable only in reverse, the Saskatchewan group has been seeking something to compensate the loss. Though prices of manufactured goods had fallen, the drop was commensurate with the drop in prices of farm products, and seemed to be determined largely by the reduced purchasing power of consumers in the West. Somewhere within this price structure, it was felt, lay certain factors which, if equalized or removed, would effect much-needed adjustments. Hence came the attack upon prices.

The Saskatchewan group has laid stress on the fact that, while freights and tariffs have increased farmers' production costs, they have received no compensation from manufacturers of consumers' goods; nor have the advantages accruing to the industrialized areas been distributed as, it was thought, they should be. From this it was argued that, as consumers, prairie farmers were encouraging a system which tended to centralize industry in the Toronto and Montreal areas, which areas derived direct benefits from local taxes payable by the industries and from circulation of the payrolls of such industries. This system, it was contended, placed the West under toll both at home and in the East.

It was felt, therefore, that, inasmuch as these advantages were accorded the manufacturing areas of the East, there should be some compensatory factor, some method of distributing benefits, to all parts of Canada in the price structure. That is to say, while goods might cost a little more in the area of their manufacture, they would cost a little less in the area of their consumption. And inasmuch as the principle already is applied in the case of nationally-priced products, the proposition at first sight appears fair and just. The West will watch eastern reactions to the proposal made by Mr. McKenna, with considerable interest.

Not Very Profitable

Abraham Lincoln Made Very Little From Law Practice

When Abraham Lincoln was elected president of the United States, his bank balance aggregated $681.44.

The original ledger showing his account is on display in the Springfield Marine bank at Springfield, Illinois, where Lincoln was a depositor from March 1, 1855, until his death. His account after his death was continued by his administrator, Judge David Davis, of Bloomington, Ill., being finally closed on May 12, 1887.

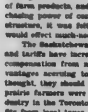
The ledger in which his name appears is displayed in a glass and wrought-iron show case. The ledger is turned to a page on which is written in fine script the name "A. Lincoln" and the entries on the page bear out the certainty that he became from the practice of law very meagre at times.

Value Of The League

Needs An Imposing Force In The Prevention Of War

There probably not a single country in Europe where the common people would blindly follow its leaders into war, if calm figure to do so. All the nations of the world have in fact formally renounced war as an instrument of national policy; and the machinery of the League of Nations exists for its prevention. It is quite certain that, if war were imminently threatening, or were actually to break out in one quarter, resort would be made to the League, whose power of action is immense, even if never yet fully utilized, is potentially to turn to page one which is written in fine script the name "A. Lincoln" and the entries on the page bear out the certainty that he became from the practice of law very meagre at times.

Few People Escape Attacks Of Summer Complaint



Summer Complaint may be slight, or it may be serious, but you can't tell what it means you how it may end. After the pains diarrhoea, the vomiting and purging is continue, for a day or less, and you may be weak and prostrated.

Just as soon as you find any looseness of the bowels get at once to your druggist and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check the intestinal action before the weakening and pain set in.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 70 years.

WORLD HAPPENINGS BRIEFLY TOLD

The French plane Arc-En-Ciel arrived at Natal, Brazil, after successfully flying the south Atlantic from Dakar, French West Africa.

Dr. Carl Clad Jensen, one of the world's most eminent cancer research workers died recently at Copenhagen, Denmark.

A new attendance record was recorded at the Canadian National Exhibition with 365,000 persons entering the grounds on Labor Day.

The "Ontario Bulletin" official publication of the Ontario government offices in London, England, has resumed publication as the result of the government's decision to abolish the office.

The William [illegible] board of industrial relations is considering minimum wage regulations for male office workers, after Basil Hall, chairman of the board and deputy minister of labor, announced.

The U.S. farm administration received [illegible] up to August 31 it had purchased 4,250,000 cattle in more than a score of drouth states, for which part payment of $262,511,875 already has gone to nearly 300,000 farmers.

Returned from a five-week tour of the Canadian west, Frank Ahern, western district manager for South Fisheries Canadian Co., Ltd., said that fish stocks in the northern prairie provinces has been "enormous" this summer.

A delegation of the Japan Prohibition League visited Premier Keisuki Okada and urged that the embolishing official give up the use of alcohol. The premier replied that he was enough to entertain the object of his visitors and then turned away without commenting.

George Batho, of the Manitoba department of agriculture, announced the finding of a new weed plague in Manitoba. The weed, which he said, had been named near Winkler, in the southern part of the province. He said he was the first time the weed has been encountered in Manitoba.

COULD NOT SEW A BUTTON ON

Her Hands Were Helpless With Rheumatism

At one time she thought she would have to give up her family duties, said Mrs. Fleming—in the form of Kruschen Salts—put her right again.

"I was not in bed quite," she writes. "In fact, I could not do my housework, I was so helpless with rheumatism in my arms and hands. I could not sleep at night, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on. My arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change for the better that I kept on taking it, and I sleep all night—thanks to Kruschen—both and rested."—(Mrs.) H. Fleming.

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts are required to expel these dissolved crystals through the natural channels.

Wheat Situation Hopeful

Supply For 1934-35 Have Greatly Improved In Possible Demand

The crop year 1934-35 is commencing with the general wheat situation not without its hopeful aspects, the Dominion bureau of statistics states.

The supply of wheat available for the present cereal year has been greatly reduced by the partial failure of the Canadian crop, the shortage of a low yield in Canada, a sharp reduction in production in many European countries and the prospects of a small crop in Australia. These developments combine to present a situation where the available supply of wheat to move closely related to probable demand than at any time in recent years, the bureau said.

According to the United States department of agriculture, production of corn, wheat, oats, barley, rye and flaxseed are expected to be the smallest in 10 years.

Plug tobacco goes farther, because it lasts longer in your pipe. It's fresher, too, because the big plug doesn't dry out and you cut it coarse or flaky, to suit yourself.

PLUG SMOKING TOBACCO

Border Cats Off Hospital

Free State Board Has To Cross Line To Inspect It

Derry Port sanitary board has just held a remarkable meeting, the members having Northern Ireland to go into the Free State to deal with the business for which the meeting was summoned.

The board crossed the border in taxis to inspect its hospital at Ballyrattan, near Moville, in County Donegal, a hospital which has never had a patient since its opening thirteen years ago. It was built to deal with cases of infectious illness which vessels coming to Derry, but before its completion, the border had been created, with the result that the board was left on one side of the border and the hospital on the other.

No solution of the situation has ever been devised and the board decided to effect repairs to the institution, the chairman remarking that "the present state of affairs cannot go on forever."

It Could Be Done

Midland Gardener Used Only Waste Water For Plants

At the Midland Bank Horticultural Society's show it was remarked that the winner of seven prizes exhibited blooms watered entirely with waste water, bath-water, basin-water, or any rain not fresh tap water, of which he recently boasted that he had not used a drop in his garden during these months of drought.

It can be done. Therefore it ought to be done—as Hugo Steward was fond of remarking mainly of things that were not done in his time. Do not ask no please, how to get or convey bath water. Himself find out, or don't use any water. A moral maxim for horticulturists.—London Daily Mirror.

Switzerland Heads List

Leads All Countries In Annual Consumption Of Milk

Statistics released" by the Department of Agriculture show that Switzerland leads all other countries of the world in the annual consumption of milk, with 300 quarts per person.

Second place for this distinction is shared by United States and Germany, each of which boasts of 230 quarts a per person. Canada ranks next with 200 quarts.

The figures on other large milk-drinking nations also compelled annually and per person, are as follows: Great Britain, 150 quarts; France, 100 quarts, and Chile, 30 quarts.

Doorkeeper—Say, some back. Dogs are not allowed to here, sir.

Improves flavour of meats, fish and vegetables. Helps digestion. Prepared from choicest herbs and spices. Keeps for years. All druggists, grocers or write...

Little Journeys In Science

COKEN PRODUCTS

(By Gordon H. Guest, M.A.)

Corn, which grows abundantly on this continent and in the West Indies, is perhaps one of the most widely used grains. Apart from being a common food in the form of meal or cereals, the kernel when opened, is found to have three parts: the outside, or husk, the small oily germ, and the mass of white material which is mostly starch

One half of corn gives approximately one pound of oil which is refined and sold as a vegetable fat for cooking. The less refined grades are utilized for soap making or for the production of glycerine and nitroglycerine.

Starch from the corn is made into corn starch, for cooking, and into laundry starch.

Another important use of this grain is in making corn syrup which is a widely used product. Corn syrup is made by converting the starch in the corn into a sugar, known as glucose, through treating it with acid in large [illegible] tanks called [illegible] pounds of steam. This treatment changes the starch into the thick sweet substance which we know as corn syrup.

From corn also is extracted a type of gum, which is used in place of rubber in some cereal. "Sad rubber" erasers and sponges may be made from this substance. It is also used in the manufacture of rubber soles for shoes.

Other banks of the corn and some residue left the oil producers are made into cattle food, adding still another to the many products of this common grain.

Radio-Telegraphic Service In Northern Hinterland Now Proving Of Great Importance

Radio telegraphic business in the North West Territories is increasing with indications the current year may establish a mark for the service. Installed about six or seven years ago the chain of wireless stations, operated by the Royal Canadian Signals, a branch of the permanent force, is busier with commercial traffic than with official or departmental work. This chain extends from Edmonton to McInnery and from that point, which is the terminus of the landline down to the mouth of the Mackenzie River.

The principal stations are at Fort Chipperyan, Fort Smith, Snag, Elkance, Fort Norman, Cansell River and Cameron Bay on Great Bear lake and Aklavik. Two radio stations are operated in the Yukon, at Mayo and Dawson. The most northerly is at Herschel island.

The general movement into the north country has emphasized the importance of the government's chain of wireless stations. Mineral deposits around the shores of Great Bear lake have resulted in the establishment of [illegible] small settlements in that region, while reports coming from Fort Chipperyan indicate a rush of gold prospectors to the latest discovery on Lake Athabasca.

Of prime importance, particularly to agriculturists and to shippers of perishable goods, are the daily meteorological reports sent by the government signallers. The weather for the North American continent is "made" in the valley of the Mackenzie River, and the compiling of these reports constitutes one of the most important of government services.

Highest In World

Great Britain Nets Millions From Income Tax

The St. Thomas Times-Journal says: "In no country are the succession duties so high as in Great Britain, where, if the estate are large enough, the Chancellor of the Exchequer confiscates almost the lion's share, as the Astors and the Cowdray estates are a case in point.

"The first Lord Cowdray died in 1927, leaving an estate valued, in dollars, at $9,000,000. The death duties amounted to $6,000,000. In 1932, his widow died, her estate passing at just over $7,000,000. Of that amount the Treasury garnered exactly $5,000,000. This year the second Lord Cowdray passed away leaving about $7,500,000, and the duties were around $750,000."

The late Hiram Hamilton Maxim noted for the government nearly $13,000,000 out of an estate that was originally $30,000,000.

There is not much left for the third Lord Cowdray, who is the only son, and his five sisters. The British Treasury certainly makes the rich pay."

Bishop's Robe Shown In Cathedral Paintings

Structure Said To Have Been Built As Penance

Wall paintings 500 years old have just come to light in Norwich cathedral, England, as the result of restoration work by Professor Tristram of the Royal College of Art.

Especially interesting are three medallions supposed to depict the life story of the cathedral founder, Bishop Herbert de Lostage. The paintings bear out in a remarkable way the tradition that Lostage built the cathedral as a penance for buying the bishopric.

One medallion shows the bishop passing money across a table. The next shows him clothed in the full robes of a bishop with hands joined in prayer, and the last and be a picture of the completed cathedral. Professor Tristam says the paintings may last another 100 years.

A novelist, who confesses that he is a bad sailor, declares that he has never yet discovered any pleasure in a sea-trip. As far as he is concerned, it is all bunk.

Development Of Television

Trials Made In Germany Said To Show Encouraging Progress

The German post office announces a sportscaster plan to introduce "television-telephony" in the near future.

Trials between Berlin and Munich were reported to have resulted favorably. Postal authorities planned to install television-telephone not between the larger cities, further extension of the system depending on public reaction "because of the still high cost of apparatus."

The announcement was made while German still thrilled at the high television called "satisfactory" sound film broadcasts, which were demonstrated at the 11th German radio show by means of a "television set."

Daily transmission of home scenes taken from the top of a television car of the German Radio Company stationed in the immediate vicinity of Berlin's radio tower comprised thousands of the curious.

Scenes were shot with an ordinary sound picture camera from the top of the car and were developed and ready for reproduction after 75 seconds. The car was equipped with developing, fixing and drying apparatus.

The technical side of the procedure reveals that each picture is dissected into dots by means of a perforated disc. The dots are converted into electric impulses which are broadcast on a seven-metre wave length while sound is transmitted simultaneously over an ordinary radio wave.

Technical appliances permit transmission of 30 pictures a second.

The receiving set is equipped with a large tube based upon the cathode ray system. The tube produces a clear stream of invisible electrons which are thrown on a fluorescent screen. The pictures appear clearly

Should A Duck Swim?

Too Much Exercise Bad For Them Under Authority

From the creation of the first farmyard a pond has been regarded as the necessary complement to the duck's happiness.

Now comes "Duck and Goose," a bulletin published by His Majesty's stationery office, to chide the farmer for believing that his ducks should swim. Swimming is only a purposeless exercise, which ducks are concerned, according to his authority.

Though it is grudgingly admitted that swimming tends to keep duck's plage clean of body and contented of mind.

Swimming, says the bulletin, provides the ducks with too much exercise

"It is dangerous for any girl to throw herself at a man, however eligible he may be," he is said, that where is the danger if he is a good catch?

Efficiency Of Inspectors Has Made The Dominon The Best Egg Market In The World

Starting Western Career

Associate Recognizing Importance Of Big Home Poultry Industry In Asia

The egg boom, which is the sustenance of so many millions in Asia, is beginning to have a curious fit America. Those who do not know about the way boom likes to have its excellence broken to them gently or they will be unable to account all the glowing testimonies paid to its worth they beans are as good as a wife and family and a farm to boot, if one ever does hood a farm. They can be made into almost anything, including fresh milk from the cow without the intermediary assistance of the cow

Boy beans can also be made into various foods and into motor car accessories fuel oil glue, soap and other commodities. Henry Ford has an idea that may beans may turn small farms into factories, for once the beans are raised they can be manufactured into almost anything the farmer chooses. Ford is encouraging this view by planting a model plot and having them displayed in Chicago They are not yet being raised in quantity, but if the farmers of America once start growing them, their hardy qualities will make them a favorite crop The Chinch bug won't touch them, though other caterpillars find them toothsome.—Hamilton Spectator

Objects To Purple Reefs

Lord Leverhulme Has No Fresh Buildings On His Estate

Plans for preserving the amenities of the countryside were revealed by Lord Leverhulme at a meeting in Lyndes, where he spoke of a ban on steam tramps and the prohibition of purple roofs to his Cheshire estate

"On my estate in Cheshire," he said "I have a rule that no building may be erected on any land if it conjures without the plans and elevations being approved by my advisory architect."

Some conditions Lord Leverhulme imposes are yellow brick not to be used in the elevations terra-cotta glazed or hard patent red bricks are not to be used in face work; purple slates are not permitted on roofs; all half-timber work must be properly constructed and framed together and must not be sham; and no colored wash shall be permitted in the windows.

Within reasonable limits, his lordship added, a great deal could be done to prevent some of the bad development at present taking place.

Cactus plants cannot live without water, and they grow better in summer if they get a good deal of moisture

[illegible] which fell practically all over the land its origin in the Sahara Desert.

Will Improve Conditions

Philadelphia Zoo To Use Moats Instead Of Fences

With a view toward providing the animals with conditions approximating their native habitat, the Philadelphia Zoological Garden is now engaged in an extensive program of withdrawing fences around animal runs.

Soon all the animals in the zoo, including lions, tigers, leopards, etc., will be confined only by seven ferocious looking their natural habitat, with no suggestion of an enclosure between them and the public.

This will be accomplished by substituting wire fences with deep, concrete-faced moats, over which it will be impossible for the animals to leap.

Looking across the moats, animal are concealed by a slight rise in the ground level, visitors are given the impression the animals are running about free with no enclosure of any sort.

Two such "ferocious runs," built with CWA funds, already have been opened. One is occupied by the bison herd, while the other run is occupied by two bull-tempered lions.

In a smaller pit, built on a smaller lions as the "ferocious runs," visitors may view more than 100 lizards, turtles and snakes mingling together in their natural surroundings.

Variety Of Products

Canada shipped a large variety of products to South Africa last year over 200 different commodities, including apples, rolled oats, wheat, flour, canned vegetables, binder twine, preserved fish, lumber, agricultural and other implements, etc.

What Does Your Handwriting Tell?

By LAWRENCE EDMONDS
(Graphic Analyst)

(All Rights Reserved)

Handwriting analysis, to be accurate and helpful to the writer, must be based on lengthy research and a painstaking regard for basic values.

I am repeatedly asked if there is anything magical about character reading from handwriting. So I am making this opportunity of again stressing that when I make an analysis of a specimen of hand writing I am not literally taking a rabbit out of your best hat, to the approved conjuring manner!

It may seem to the lay-person that, for a Graphs-Analyst to give what turns out to be an accurate analysis from handwriting is to perform a regular magician's trick a sort of bloodless cum Machiavian cum Thurston device.

Nothing could be further from the truth! It is simply a scientific examination of the impressions revealed in the pressure graph—analysis readily by the handwriting specimen. What you go to a doctor, and he tells you that you have a certain organic ailment, you do not imagine him mentally as a magician. You know that his familiar instructions, are training his memory and has prior to have all condensed into an ability to diagnose ailments. He himself will not organic ailments are invisible, he may quite genuinely call in extra-medical advice from his confreres.

And even if, as on occasion does, he makes a mistake, you do not stigmatize medical men as quacks. Because doctors are human and not yet found a cure for cancer, you do not hesitate to go to a medical man when you are suffering pain, or feel that you have some physical derangement.

Graphs-Analysis, like medicine and surgery is a plain searching for hidden truths about its own science. It is being tremendous and rapid strides. But do not dream it because many times in the past, you have been disappointed with your character reader's analysis.

I have been asked of what emotional value is it to people, to have their handwriting analysed. An analyst might one ask what use is it to a salesman to learn how to become a better salesman; or a business man to know more about his business; or a nurse to learn to better understand; or, and more relevant sympathy with her patients.

For, as all these are sensible suggestions, and it just as essential for you to know Yourself. Graphs-Analysis can help you not only in your general characteristics, but hidden tendencies that may burst into characteristics at any time.

It shows you where are your faults, and thereby gives you a chance to correct them. And it also puts a person on the path to greater personal understanding, and enables one to get more from others.

Here are a few brief extracts from analyses made for readers:

R. C.—There is a frank, generous and sympathetic nature revealed. One who longs for affection, but is sensitive to praise or blame; is sensitive, perhaps. You have a strong desire for intellectual companionship, and have a love of the beautiful in nature or art.

T. A.—Your writing shows that you have an enquiring turn of mind; you wish to get at the bottom of things, but you are inclined to be a little forgetful about those things in which you are not interested and to slight them. Don't let this grow.

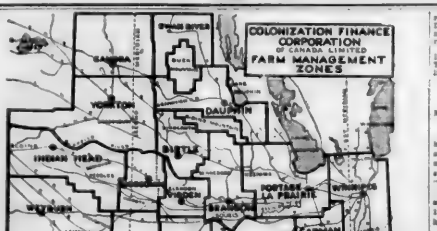
A. W.—You have a masterful nature, and are likely to consider your own interest at all times, before responding to claims from others. You are not inherently generous. Do not let this tendency develop into "rigidity or meanness."

Do you want a personal analysis of your own handwriting, showing your faults and virtues? If so, I will probably put you with its revelations of your character, and may be the door of opportunity be yet to find a letter in your normal writing, and state your exact birthdate. Address with 10c coin (for each specimen) and the stamped address envelope to Lawrence Hibbert, Graphs-Analyst, c-o Winnipeg Newspaper Union, 173 McDermot Ave., E., Winnipeg.

Rapid Progress

Brother Says Canadians Will Find Strength In Union

Citizens of the Dominion be they of French, English, Jewish, Swedish, Irish or Scottish ancestry were warned against racial prejudice and urged never to forget that first, last and always they are Canadians. Remember that "you will find strength in union," came from Rt. Hon. R. A. L. Fraser, minister of education in Great Britain and warden of New College, Oxford, speaking at a civic luncheon in Montreal tendered the official delegation of Great Britain, France and the United States to the quatercentenary Jacques Cartier celebrations.



Colonization Finance Corporation

Ready To Do The Work It Was Organized For

Mr. Louis L. Lang, of Galt, Ontario, president of the Colonization Finance Corporation, stated on arrival in Winnipeg, "This is the second inspection trip made by myself, but is the first trip which is being undertaken jointly with executive officers of member companies associated in the formation of the Colonization Finance Corporation. My colleagues on this inspection tour are, Mr. J. F. Weston, vice-president of the Colonization Finance Corporation and managing director of the Imperial Life Assurance Company; A. N. Mitchell, general manager of the Canada Life Assurance Company, and W. H. Beaverville, general manager of the Mutual Life Assurance Company. We are interested in the farm management program of our corporation because we realize what improvement in agriculture the Colonization Finance can be used as to the business interests in the West. Take your profits the first year of the operation of our corporation. Beginning in 1928 with 25,000 acres under the supervision of two farm managers we have at present a field staff of fifteen farm managers and assistant farm managers covering all of Manitoba and Saskatchewan. The same farm managers' headquarters at Yorkton, Melita, Carman, Portage la Prairie, Brandon, Hillsburg, Battleford, Prince Albert and Dauphin in Manitoba; and Outlook, Saskatoon, Weyburn, Indian Head, Yorkton, and Gamblers in Saskatchewan. These men have under their supervision 1,750 farms containing 250,000 acres. About 70% of these farms are occupied and operated by their former owners;—the balance of the farms are operated by tenants, or are vacant, or are being represented by mortgages or an agreement of sale. Only 25% of the farms are operated by tenants. One of the objects of our work is to assist farmers to retain the farms they are at present operating by re-operating with them in any business which are possible, and also to make it possible for the farmer tenants to purchase the farms which they are at present farming under lease. The farm management service supplied by the Colonization Finance Corporation covers, at first cost all of the needs land in Manitoba from the information obtained from north to hereafter 30, and the Mutual, our part of Saskatchewan as far as Prince Albert. On July 1st we expect to have a farm management men in the Swan River area, the only district not yet covered until this year.

The object of this inspection trip for my associates and myself is to inspect the work which is being carried on, to note how it is being regarded by the farm population and the communities and districts in which we operate, and to give us the necessary information with which we can formulate a policy for the future of this work. I believe it to be worth while. As rapidly as conditions warrant and as additional men can be obtained and trained for farm management, we hope to open new zones. The necessary attention to detail and the rest of the work are naturally lasting factors.

While Mr Somerville and I have had most of the farm management last year, I am particularly pleased with the appointment of Captain Clarke in the Riding Mountain Municipality. He will give Mr. A. N. Mitchell, and our Vice-president Mr. J. F. Weston, an opportunity of meeting the people of Dauphin do not consider their Lord. This perverseness has brought punishment upon them, and it is only because of Jehovah's mercy that they have escaped the fate of the people of Sodom and Gomorrah.

Colonel Sugg of Religious Education, Brandon, Manitoba, will be in charge of the Field Crops Department for the province of Alberta and the Peace River District. Mr. W. C. McKillican, former Dean of the Manitoba Agricultural College, whose name we shall visit. Our trip last year covered the Southern Manitoba, particularly that portion affected by the Crocus, and Southern and South Eastern Saskatchewan. This year we have planned to visit the Northern portion of the Swan River Valley; we shall visit the Portage la Prairie district, the Carman district, and we expect to visit the Swan River district. We shall be accompanied by Mr. W. B. Mitchell of Regina, by a member of our loan committee, and by the local officials of our corporation. In Saskatchewan we shall visit Regina in the Cairn, Yorkton, and Indian Head districts. We shall bring our Colonization Finance Corporation inspection trip to a close at Regina, after which some of our party are returning East while others are proceeding to Edmonton to attend to respective individual companies."

Rods For Security

Complete prevention of war, not simply a futile attempt to humanize it, will give the world its security is urged Arthur Henderson, president of the disarmament conference, told the Co-operative Societies of England at a meeting in London.

repentance and amendment Recall David's cry after his great sin "Create in me a clean heart, O God, and renew a right spirit within me"

"Cease to do evil, learn to do well" it is not enough to cease from sin. True worship consists also in right living in service for others

Silence Zone

Motor Horn Order Given British People A Chance To Sleep

An "anti-honking" order to motorists during sleeping hours has proven so successful in London that the ministry of transport has decided to extend it to every city, town and "built-up" area in the country

Thus England will become a vast silence zone between the hours of 11.30 p.m. and 7 a.m. no fair as motor horns are concerned.

Gliding taste are to be made by German air pilots over the South Atlantic.

HITLER DECLARES REVOLUTION IN GERMANY AT END

Nuremberg, Germany. Adolf Hitler, dictator of Germany, declared here "The National Socialist revolution is ended. It has fulfill d all its hopes."

This declaration he made at the annual convention of the Nazi party, through Robert Wagner, Baden Nazi district leader, who read the proclamation.

Dr Fuehrer and revolutions which took a permanent character result-ed in anarchy and chaos and merely served the purposes of greedy politicians, and that an evolution had to come to bring about better conditions.

The German leader said the German way of life was fixed for the next 1,000 years, during which time there would be no further revolutions. He described the German regime of the past 60 years as run by international freebooters and put-house politicians. He declared later generations would exalt the accomplishments of the Nazi movement as the "German miracle."

Then he turned to the Soviet, pheasie, and stated:

"If foreigners imagine the 4,000,000 'No' voters constituted a dangerous opposition, they are privileged to smile . . . Our next attack will demolish the opposition."

Hitler reiterated that Germany while insisting on her own right, wanted peace and friendship with others.

He took up the subject of religion, saying: "We have endeavored to reconcile the religious confessions with the best state. As far as the Protestants are concerned, we are determined to weld them all into one great evangelical church church.

Concerning the Roman Catholic Church, he said: "Despite lapses on both sides, we shall arrive at a sincere and honorable understanding."

Hitler concluded with a statement that the program was to consolidate the party organizations such as the Schuts Staffel, or picked guard, and the storm troops, into one solid bloc posited of all elements that were not heart and soul with them, to win over all those who still hold aloof.

Customs Officers Seize Opium

Who Disguised As Third Class Passengers

Vancouver. — (opium valued at $6,000 was seized by Canadian customs officers on board the Canadian Pacific steamship liner Empress of Asia here.

The opium, contained in 200 one-tael tins, was concealed in the false bottom of a wardrobe cupboard in a third class stateroom in the after part of the ship.

One-tael tins have seldom been seen here, most of the opium seized being contained in five-tael tins. Authorities believe the drug was intended for either Honolulu or Manila.

It was the first opium seizure here in months. No arrest has been made.

Frost Damages Oats

Prospect Of Seed In North Is Not Promising

Prince Albert, Sask. Frost has taken his toll of crops in the northern Saskatchewan and the prospect of seed for the 1929 crop is anything but promising, R. H. Tuxley, chief supervisor of the Soldier Settlement Board, Saskatchewan branch, stated here.

The quality has deteriorated to some districts to such an extent it is unlikely farmers of the north will have a surplus for seeding the 1929 crop, Mr. Tuxley said.

Oppose Emigration Plan

Weymouth, Eng Delegates to the Trades Union congress were warned by J. Jagger, Canadian delegate, against emigration schemes "put forward by some members of the House of Commons." He declared such schemes would be "fraught with difficulties, privations and want" unless there was provision for substantial government grants covering a period of years.

St. Lawrence Waterway

Matter May Be Taken Up In Next Session Of U. S. Senate

Hyde Park N.Y. Frank P. Walsh chairman of the New York power authority after a talk with President Roosevelt predicted re-submission of the St Lawrence waterway pact with Canada in the next session of the United States senate and its ratification

He has just returned from the northwestern states

He named the following statement after his visit with Mr. Roosevelt

"The project will be re-submitted to the January session and I am confident construction work will get under way in the spring. The Great Lakes and the St Lawrence commissions, legal and most valuable natural resources, and they will be fully developed and utilized in the public interests, for both power and navigation purposes as an integral part of the public works program

"The present Roosevelt administration will build the St Lawrence project, and thus give the United States a new port about 2,000 miles in length placing Chicago, Milwaukee, Cleveland, Detroit, Toronto, Superior, Duluth and other great inland cities on deep water, and give the northwest 1,000 000 horsepower of the cheap st electricity in the world."

Need Larger Army

U.S. Secretary Of War Says Present Force Is Inadequate

Raritan Arsenal, N.J. Secretary of War George Dern and the United States needed a larger, more effective regular army.

The secretary, who came here for the concluding four days of the army's war game manoeuvres against the invading blue army under said he thought the regular army was not adequately equipped at present, and advocated increasing its strength from 125,000 to 140,000 men.

"The army," he said, "is sadly in need of modernization and modernization must. In the present size the army is not large enough to perform all the peace time tasks assigned to it."

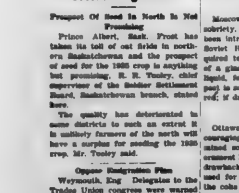
Heard The Program

Manager Of Arctic Post Gets Radio Reception From Steamer

Moosonee, Ont. "I have heard your speech and also the piccolo," said the manager of an Arctic post when he decided to climb back into the cockpit. He is now taking instruction at the Montreal Light Aeroplane Club, preparatory to re-gaining a pilot's license.

Col. Bishop, however, is only going into flying again for a pleasure. He wants to be able to commute between Montreal and his summer home in Muskoka, Ont.

Princess Marina To Fly To England



News comes from Jugoslavia that Prince George and Princess Marina, whose engagement was announced a few days ago, will fly to England to receive the blessing of King George and Queen Mary. The 27-year-old Grecian Princess and her British fiance, are shown above. It is expected the wedding will take place at Westminster Abbey some time in December.

FIRST WOMAN PILOT

Mrs. Amy Johnson Mollison the first woman appointed as regular pilot of a transport plane on the London-to-Paris route, explains that she took the job for experience in all-weather flying in preparation for a London to Australia flight that fall.

In Favorable Position

Canada Is Friendly In Relations With Other 4 countries

Montreal While elected there in little sense for "powerful spark", Canada is in a favorable position. Its relations with other countries being friendly, the results on international relations reported to the Canadian Bar Association in annual convention here.

At present, the report notes, the whole world is faced with a situation in which members of each of the many groups are discussing how best to destroy one another Each of them is already conscious that both defender and aggressor in any conflict will be destroyed as a likely result, without any assurance that one group or nation will emerge clearly dominant, the report contends.

Call Of The Clouds

Col. Bishop, War Ace, To Take Up Flying Again

Montreal. The call of the clouds has once more gripped Canada's roaring wartime flying ace, Lieut.-Col. W. A. Bishop V.C. After an absence of 12 years from active flying, he has decided to climb back into the cockpit. He is now taking instruction at the Montreal Light Aeroplane Club, preparatory to re-gaining a pilot's license.

Col. Bishop, however, is only going into flying again for a pleasure. He wants to be able to commute between Montreal and his summer home in Muskoka, Ont.

Women Out Of Industry

Mussolini Plans To Regulate Men In Jobs Held By Women

Rome Benito Mussolini was reported planning to take all women workers out of Italy's industry.

Two reasons it was reliably learned, influenced Il Duce in his decision.

John, he holds, interfere with what he believes to be woman's primary duty, the building up of families and the increase of Italy's population.

The positions women hold should be filled with men, thereby reducing unemployment and raising the morale of the people.

As evidence in Mussolini's newspaper, Popolo D'Italia of Milan, tended to confirm the report that he will move to eliminate woman workers.

Deal With Health Matters

Would Hold Special Conference With Provincial Representatives At Ottawa

Victoria.- A special conference of provincial representatives at Ottawa to deal with health matters is being recommended Hon. G. M. Weir, British Columbia provincial secretary, stated here This province is particularly interested and would support centralized control for dealing with major health problems.

Dr Weir stated B.C. is paying $700,000 a year for the health bills of persons from other provinces.

Try For New Record

Sir Malcolm Campbell Plans To Speed At 270 Miles A Minute

London Sir Malcolm Campbell, Britain's auto speed king, disclosed at a luncheon here that his plans were about complete to make another assault on his own world automobile speed mark at Daytona Beach, Fla., in January It was there he set the present standard of 272.108 miles an hour a year and a half ago Since then he has remodelled himself, his racing car

His goal is a speed of 280 miles an hour five miles a minute.

Rents With Membership

Socialist Party And C.C.F. Taking Vote On Merger

Vancouver The proposed merger of the British Columbian branch of the Co-operative Commonwealth Federation and the Socialist Party of Canada will rest with the general membership. The C.C.F. provincial council has decided to submit the question to a referendum of members of each constituency in the province. The vote will be taken as soon as possible and a return must be made within 90 days.

Deal With Dumping

Would Establish Fair Values

Vancouver Possibilities for a sulphide pulp mill on the British Columbia coast are being investigated by R. O Sweezey, American agent for British capitalists interested in supplying England with raw material for artificial silk and paper manufacturing, he said here.

Flagship Leaves Vancouver

Vancouver. H.M.S. Norfolk, flagship of the British West Indies fleet, sailed from here after a four-day visit, bound for her base at Bermuda and thence to England She is due at Bermuda, October 17, and will return to England the following month.

Turkey Would Join League

Geneva. Turkey has decided to present herself as candidate for the League of Nations council seat to be vacated this month by China.

A DEMAND FOR CANADIAN WHEAT IN UNITED STATES

Winnipeg.— With a shortage of Durums wheat in United States becoming more and more apparent, demand for Canadian Durums by United States mills reached a season's peak on the Winnipeg Grain Exchange with the uncontract south of the international boundary approximating 500,000 bushels. Such exports total about 1,000,000 bushels covering the last two weeks.

Recently top grades of Durum wheat were commanding a 32-cent premium over the September future at both Duluth and Minneapolis, while Canadian Durums were quoted at 17½ cents over Winnipeg October spot. This brings the Canadian Durums quotation to approximately $1 a bushel which despite the 42-cents-a-bushel duty and 2½ cents-a-bushel handling charge still makes the Canadian grain considerably under the United States price

The United States Durum price at Duluth was $1.39½ per bushel plus a 32-cent premium making a total of $1.60½.

Bulk of Canadian Durum wheat is grown in Manitoba and supplies of the variety are being quickly cleaned up.

U.S. Textile Strike

Two Men Killed And Many Wounded In Disorders

Washington.— Rioting and death suddenly punctuated the gigantic United States textile strike even as capital and labor prepared to lay their grievances before a board of President Roosevelt's choosing.

Two men were killed, another was near death more than a score were wounded by bullets and clubs as a wave of violence surged through the strike-torn mill towns of Georgia and the Carolinas

Francis J. Gorman, chairman of the textile strike committee, blamed "management and reactionary public officials" for the bloodshed. He warned that a continuance would awaken "all the bitterness that can be aroused" in the ranks of the textile army.

France Has Suggestion

Wants To Collect Large Sum From Germany For Saar Valley Mines

Paris. France, conceding the Saar valley may vote to become a part of Germany, is prepared to demand any start figuring how how to pay for $100,000,000 worth of French mining properties in the territory.

In a note to the League of Nations France asked that the league avert trouble after the Saar plebiscite next January by having Germany make preparate relative to payment for the French holdings. France intends to collect "in gold".

Saoji Accepts Post

Toronto The provincial committee of the Canadian corps council organized following the veterans' reunion here early in August, has received acceptance of the honorary presidency of the council from Archdeacon F. G. Scott of Quebec, "beloved padre" of the Canadian forces

Bandit Held Fdr. Will

Vancouver Possibilities for a sulphide pulp mill on the British Columbia coast are being investigated by R. O Sweezey, American agent for British capitalists interested in supplying England with raw material for artificial silk and paper manufacturing, he said here.

How To Buy Butter

Government To Guarantee To Be Issued Public Interest

Among the eight Acts relating to agriculture passed during the last session of parliament, the bill relating to the dairy industry has a particular appeal to the consumer in that it deals with commodities which are in daily use in every Canadian household. Of particular interest to the creamery industry and to the housewife are the new regulations providing for the grading of butter for domestic consumption and the placing of the grade of the butter on the wrapper and on the carton. That grading is optional except in provinces which may pass enabling legislation. The regulations also prohibit the making of false, misleading or exaggerated claims with respect to the quality of butter or any other dairy product whether such claims are made by advertisement or on the package.

The grading of butter for domestic consumption has been established in the hope that the quality will be improved through the preference of the consumer for higher quality in the past there have been many first grade butter sold under fancy trade names that did not merit anything like the first grade and every creamery in the province is expected to qualify if it is expected that the placing of the grade on the carton and wrapper will mean that the consumer will be encouraged to ask for "First Grade" butter, thereby discouraging the manufacture of lower grades. Also, it is expected that the introduction of the grade will have a tendency to create a wider differential of price between the grades and consequently reflect back in the prices received for the cream by the producer. In other words, it is expected there will be better prices all round.

The grades of creamery butter are first grade, second grade, third grade, and grade "No grade but." according to the regulations, means and includes any butter on which any mould has appeared either on the butter itself or on the parchment lining on the package, as well as any butter otherwise unfit for third grade. A dairy produce grader may refuse to grade any butter or cheese which in his judgment is either of too high or too low a temperature to permit of proper examination, until the temperature is brought within satisfactory range. The graders are the only persons allowed to mark or brand the packages, and a person is not allowed to pack butter in a package which bears any of the grade marks stamped by the official grade.

Three Boys Can Cook

Two Brothers Of Stratford, Ontario, Ended An Dispute

Whether it is baking powder biscuits or cake, or candy you want, 12-year-old Allan and 13-year-old Fred, sons of Mr. and Mrs. G. W. Hargy of Stratford, Ontario, are the boys to see. Between them they entered 39 varieties of home cooking and preserving in the Canadian National Exhibition competitions at Toronto. Allan's interest in the baking has been toward muffins, chocolate sponge cake and cookies, but Fred's ambition ran to such things as layer cakes, sponge cakes, apple pie and scones. His son turn out delicacies that are the dream of many a cook-ing expert.

Chest Development

Steps Overcome And Prevented

Above It and Over The Football Player

Husky football players with brawny arms, bulging chests and sturdy legs may be fine physical specimens, but they actually have less chest expansion than crooners, flute players and bass horners, according to Dr. H. C. Carlton, of the department of physical education, University of Pittsburgh.

Addressing coaches attending the Eire-Carlton coaching school at College University, Dr. Carlton said he had examined hundreds of men and had found invariably that the men with the big chest expansion were the slowest and slowest of wind before-hands.

The greatest known tunnel is a gale, one of Australia's hard roads.

SALVAGING NEAR THE END OF THE BRITT'S GOLD

With the salvaging of another $5,000,000 of gold from the eastern liner Egypt the salvage ship Artigho is believed to have recovered nearly the whole of the treasure. For years the salvagers have been working hard to recover the gold bullion, but it has been a most difficult feat, because of the depth at which the liner lies in the Mediterranean. Above is a diagram of the diver and the various apparatus which has been specially designed for deep salvage operations. At the left is a view of the machine cylinder being emptied on board the Artigho, while the picture at the right shows the end of the instrument.

Dangers Of Mechanical Cleaning

Cleaning Machines Can Be Dangerous Unless Precautions Are Taken

Mount Washington continues to be the scene of the most modern methods of care of the world, the challenge of an "unsinkable" bank.

Mr. and Mrs. Don Munday, a boy whose early game went across the prairie from his home in Portage in Prairie Man., and a girl born among the lumberjacks of Cayuga, have most about this invincible pile and declare it can't be climbed. They recommend that the only way to get to the top is by "chair-lift," a sort of cable, and skier idea, too, was the opinion of their companions on the expedition, Henry S. Hall, Jr., of Boston, and Hans Fuhrer, Swiss guide. The latter two have succeeded in making an ascent on Mount Robson in the Canadian Rockies.

"The snow pack will never be packed," Munday declared. "Even Monday, Mr. Hall, myself and the guide, Hans Fuhrer, climbed the summit of Mount Washington, but the higher of the twin peaks appeared to be unscalable."

The party's final attempt on Wednesday was made from a camp 10 miles up the giant Franklin Glacier after a storm which lasted nine days. The attempt failed but the party did achieve seven non-consecutive ascents to the footsteps they endured and the dangers they faced in the performance.

The Mundays left Vancouver July 11 and, with the aid of a specially-built pack-pedaler up the 22-mile-long Franklin Glacier from Knight Inlet, reached the base camp on the 27th of the month by Hall and Fuhrer and started the assault on glacier-clad Mount Washington at once.

Munday was the first to reach the lower peak several years ago and they have made several attempts on the wild crags since. On the mountain Hall made an unsuccessful attempt to climb Washington alone, but was forced back by the Swiss guide, noted for his excellent judgment in ice and snow. He was a guide for several seasons in Jasper National Park.

The rock Mundays has already claimed one life this season. Alex Dalgleish, of Vancouver, fell to his death June 26 as he and three companions made an unsuccessful attempt to make the ten-pronged pinnacle below the summit.

The Mundays en route in to the Washington region, met a group of Vancouver Alpine members who were burying Dalgleish near the high shores of Franklin Glacier, for up the mountain. The grave will be marked by a grim reminder of the dangers they would face in the assault upon the virgin peaks of peak.

Quote help the farmer by making many weed seeds.

Completing Mountain Road

Work In Alberta Will Take Three More Seasons

That $4 million of a total of 147 of the new Lake Louise and Jasper highway are finished, that the whole work will take three more seasons and that $648,000 is the value of the work so far done, were statements made at Banff by J. M. Wardle, superintend and chief engineer of national parks, who recently returned from a peak-trap trip through the country between the ends of the completed sections.

"The new road will be an improvement," he stated. "It will connect the Canadian Canada, running through Calgary and Revelstoke and the projected trans-continental highway, to run through Edmonton and Jasper and down the Thompson river. It is the most ambitious mountain project attempted in Western Canada. It will not be less than 18 feet wide and no bend will be more than 10 per cent. ourselves. The road as now completed could have rails laid on it excepting for the fact that in spots the grade is more than 6 per cent. grade.

"Tree-Hermit" Hunts

August Kasner of Mayerhofen, in Tyrol, is making himself famous by his "tree-branch" music. He constructs the crooked limbs of trees into wind instruments from which he vainly extracts music. One piece he performs on eight-foot monstrosity gives forth a moaning sound.

Napoleon's sad sadness at the battle of Phoenix in 1794 is the only county lines from a great distance.

Prestige Of Canadian Corps

Improvement Of Conditions For Ex-Service Men Of Vital Necessity

"Re-establishment of the prestige of the Canadian Corps and Allied Veterans is a vital necessity to the improvement of general conditions for the ex-servicemen," says a state ment issued by provisional officers of the Canadian Corps Council, "and with the whole-hearted co-operation of your units we feel that this can be accomplished."

The council is an out-growth of the corps re-union held in Toronto when representatives of many units of the Canadian corps, Imperial and other Allied forces met and elected a provisional council, carrying on the work of organization until such time as a permanent council can be established.

The statement reported the provisional council was engaged in drawing up a constitution and bylaws, and was seeking suggestions from all units associations of ex-servicemen, to the end that every unit be represented, by brigades or other groups of units associations. It appointed the standing of unit associations where none exist.

"It is our earnest desire to co-operate with all other veteran organizations," the statement said, "but at the same time to maintain the spirit and traditions of the Canadian corps and other Allied forces to perpetuate their friendships, associations and camaraderie, and to uphold the solidarity of the British Commonwealth of Nations."

Manchuria is to have many new highways.

Agricultural Notes

Interesting Items Gleaned From Many Sources

The air mail postage from Canada to the British Isles is now six cents for the first ounce, and five cents each ounce after.

Exports of Canadian live cattle to the British Isles for 1934 from January 1 up to August 31st totalled 34,136 as against 23,627 for the corresponding period of 1933.

The number of hogs graded in Canada for the first 34 weeks of 1934 ending August 25 was 1,926,642 compared with 2 this last for the corresponding period of 1933

Shipments of livestock from Western to Eastern Canada from January 1 to August 17 1934 included 52,366 cattle 540 calves 145,125 hogs and 45,660 sheep.

With the egg export season close at hand, there are indications that there will again be an active export trade in Canadian eggs to the British Isles

Total exports from Canada to Australia for the fiscal year ended June 30 1933 were valued at $3,215,962

Delayed storage plays an important part as a cause of wet maid and sogginess in commercial apples.

Fiji Islanders are very fond of Canadian canned strawberries. This Canadian product has a very wide

FORT SASKATCHEWAN RECORD

An Independent Paper, printed and published weekly, every Wednesday at Fort Saskatchewan, Alberta, Canada
Gordon Neale, Editor & Publisher

WEDNESDAY, SEPT. 12th, 1934

The laying of the new sidewalk from the Memorial Hall corner to the Fort Confectionary has been completed and a further piece between the Fort Hotel and the old furniture store is now under construction.

When this is finished, it will end the sidewalk construction for this year.

Mr. and Mrs. A. H. Rogers paid a visit with Mr. and Mrs. Frank Gerhart on Cooking road the week-end

Mr. C. L. Gibbs, M.L.A., passed away in a Bash St. Marie hospital last Wednesday afternoon while on a holiday trip to Ontario. The funeral was held in Edmonton on Monday.

The parents of Lionel Gibbs, Labor Alderman and M.L.A., will be a great blow to the labor movement through out the entire province.

The late Mr. Gibbs spoke in Fort Saskatchewan last year, and is well known to a great many in the district.

Driven by a heavy wind, rain soaked in the clouds, which in some cases would be thrashed this week-end Thursday will be delayed several days by the present moisture. Up till Tuesday evening, about 1 1/4 of an inch of rain had fallen rendering it impossible to apply himself gets good results. Never has there been so much money spent on the business of elementary education—the cost is said to be half greater than in 1914—but the interest of the pupils seems to decline rather than increase with better opportunities. No doubt a good many causes contribute to this condition, but I suggest only one for present consideration and that one is which the fault lies with us, the parents. It is this, that we have failed to create sympathetic influence for the true worth of it—its enlarging and refining result in the student—and have stressed only the hard practical side, that the student may thereby better his social position or get a better job, and the results are not encouraging. I do not suggest that the giving of prizes is sufficient in itself to restore the spirit that we miss in the schools but it is at least a turning in the right direction. It will help to stimulate a healthy rivalry in academic work, and as contributions for excellence, which, I think, are sadly lacking today. I venture to say that $100, annually spent with discrimination in books for school prizes would bring returns in good-will, without adding unthinkably to the tax bill.

Speaking of examinations, it was remarked not long ago by a wise man that the tendency seems to be to give first place to the student who can most successfully disgorge upon the examination paper what he has received during the term; and yet, he said, since education from its derivation connotes nourishment, we should remember that it is what is retained, not what is disgorged, which nourishes.

These articles are written each week ostensibly for The Record and do not appear in any other newspaper.

CEMETERY FUND

The Cemetery Committee of the Women's Institute wish to acknowledge the following donation for July and August.

Mr. H. Webb, Edmonton $1.00
Mr. A. H. Rogers, ... 10.00
Partridge Hill U.F.A. 5.00
Town of Fort Sask. 50.00
H. M. Graham, Convener.

TENDERS

Sealed tenders, marked on envelope "Tenders for Coal for Town Hall", and addressed to the undersigned, will be received up till noon of the 19th day of September 1934 for 50 tons more or less, lump coal, double screened, single screened mine run. To be delivered as required at the Town Hall, and weighed on the Town scales. All tenders to be accompanied by accepted bank cheque, for ten per cent of the contract price, and stating what mine the coal comes from.

Lowest, or any tender, not necessarily accepted.

Jas. Ritchie, Sec.-Treas.

The Observer

WHY NOT A PRIZE!

The opening of school has turned the thoughts of most of us during this week to scholars and their concerns. I would like to make a suggestion. It is that the old practice of giving school prizes might be revived. One is inclined to grow critical over the complacency with the scholars of the day accept the matter of a failure in the annual examinations. Almost it might be said they seem to expect to fail in a number of classes. It is not a good, healthy at itude towards our school work, and on the part of the parents is liable to result in a spirit of puzzled resentment. The opportunities are much better than they were forty years ago; why should not the pupils grasp them with eager hands? One man can lead a horse to water but forty cannot make him drink. This apparent indifference of the students is not to be explained on the score that the standard required is too high. Each year we have abundant proof that the student who is willing to apply himself gets good results. Never has there been so much money spent on the business of elementary education—the cost is said to be half greater than in 1914—but the interest of the pupils seems to decline rather than increase with better opportunities. No doubt a good many causes contribute to this condition, but I suggest only one for present consideration and that one is which the fault lies with us, the parents. It is this, that we have failed to create sympathetic influence for the true worth of it—its enlarging and refining result in the student—and have stressed only the hard practical side, that the student may thereby better his social position or get a better job, and the results are not encouraging. Commities Makes Appeal For Vegetables To Be Sent To Drouth Areas

Extreme drought in parts of Eastern Central Alberta has caused practically a total crop failure, particularly in potatoes and vegetables. From a survey conducted by the Department of Agriculture it is estimated that at least fifty carloads of this produce will be required. In view of the fact that many districts will have a large surplus of garden produce and potatoes, a public appeal is being made to local organizations to make donations for distribution in the afflicted areas.

Arrangements are now under way in the Fort Saskatchewan District to duplicate the effort that was done two years ago by sending one carload from the Town and immediate district and one carload from the Eastern side of the municipal district with the shipping point at Joseph Lamp.

The Department of Agriculture will direct all shipments, and the Railways are co-operating by absorbing the freight charges.

The organizing committee in a few days will be making an appeal to the residents of this district for donations of edibles vegetables in order to assist those less fortunate than ourselves. Any assistance that can be given in the way of potatoes, will be appreciated. Full details as to the collection of vegetables will be given out in the course of a few days.

New Hardware Store Opens in Williamson Block

Mr. R. B. Klassen of Herbert, Sask., last Saturday, opened to the residents of the town and surrounding district a new hardware store in the Williamson Block.

The store has been renovated and redecorated throughout, and the trends to make it very bright and cheery. A large new stock of shelf and heavy hardware is now on display.

Mr. Klassen arrived in Herbert, Sask., in 1904, and started the first store there, consisting of the Post-office, Hardware and general store, and lived there, ever since except for several years spent in Manitoba. Later he returned to Herbert. He saw the town grow to a population of 1200 persons. At the present time it is only about 200.

For the past six years, Herbert district has experienced a drouth, with severe depression period, and after looking over the possibilities of the Fort district, Mr. Klassen decided to throw in his lot with us, and locate a hardware store.

"The Record" wishes Mr. Klassen success in his new venture.

Bank of Canada Bonds Placed Before Public

Shares of the Bank of Canada to amount of $5,000,000 are offered for public subscription by Honourable Edgar N. Rhodes, Minister of Finance. The shares are of $50.00 each and are offered at par. Not more than 50 shares may be held by any one person and only persons who are British subjects ordinarily resident in Canada or Canadian corporations controlled in Canada, may own such. These provisions will ensure a widespread interest in all parts of Canada in the sale of the stock of an institution to which Parliament has entrusted wide powers and responsibilities affecting the financial and economic welfare of Canada.

The Bank is authorized to pay cumulative dividends from its profits, after provision for expenses, depreciation, etc., at the rate of 4% per cent per annum, payable half-yearly, which is considered to be an attractive return in comparison with rates of interest on first grade securities. Surplus profits are to be applied to the cost of the fund of the Bank or paid into the Consolidated Revenue Fund as provided by the Bank of Canada Act.

The subscription list will open on September 17th and close on or before September 21st. The price at which being offered simultaneously in every part of Canada on the 17th instant and whether or not the list is closed before September 21st, consideration will be given to all applications posted not later than midnight of the day on which the list is closed.

Subscriptions are to be mailed direct to the Minister of Finance, Ottawa, and must be accompanied by an initial payment of $12.50 for each share and by a statutory declaration which forms part of the application form, evidencing the eligibility of the applicant to become a shareholder. The balance of the subscription price of $37.50 a share, will be payable on January 2nd, 1935, on or about which date the Bank is expected to commence operations.

The official prospectus and application forms are obtainable from post offices, banks and other financial institutions.

Removal Notice

Mr. W. Seymour wishes to announce that he has moved his Shoe Repair Shop over into the building next door to the Fort Hardware. For first class shoe repairing, W. Seymour.

WE WONDER WHY?

If a member of your family died, would you send out the obituary in a circular letter? If your wife entertained would you run a slide on the screen of the movie show? If you had visitors from out of town would you run a notice up in the post office? If you were improving and enlarging your store would you tell people in a hotel register? If you were having a wedding at your house, would you mark the news on a telephone pole? Then why in the heck don't you use your advertising in the newspaper too.

Service Station Broken Into

Bill's Service Station was burglarized during the early hours of Monday morning last, and the amount of change usually left overnight, was taken. The glass of the West window in the office at the back was broken and entry made in this way. Constable Johns of the Mounted Police was early on the scene and he was able to secure some finger prints and an arrest is expected in the near future.

Bill's Service Station "Bill" was robbed in broad day light about two months ago.

The tenants of the Williamson Block have suffered intensely from the cold during the past ten days, due to the heating system being out of order. The plant has been undergoing repairs, and it is reported that will be on within the next two days.

Partridge Hill NEWS

Harvey Harris who has been in the employ of Wilmot Alton for the past nine months returned last Sunday to his home in Alliance, Alberta. Some of our friends were singing the refrain "Will ye no' Come Back Again?" When about it, Gladys, Bessie and Blanche?

Mr. and Mrs. J. H. Lawrence and Mrs. Tom Whitson were guests of Mr. and Mrs. H. Attewell of Horse Hills a week last Sunday.

Mr Harry Smith is seen these days sporting a beautiful new Cheer Attat Boy! Harry step out and show 'em!

At the school fair held at Ardrossan, September 14th, Partridge Hills school made a fine showing in school work, handicraft, stocks and vegetables. Two scholarships in the form of short courses at the Vermilion School of Agriculture were won by Ona and Elmer Gordon. The youngsters were also in there at sport, winning three out of four games of softball.

Much credit is due the teacher, Mr. Lambly for the results shown.

Bruce Whitson and Don Rye are attending Fort High school this term, taking work in grade 11 and 10.

Mrs. R. Warring will be hostess to the W.M.S. and Ladies Aid at a Harvest tea, Thursday, Sept. 20th.

The Observer

It is very cheering news indeed in these discouraging times to hear that the Endeavor has already two wins to her credit, and, in the opinion of competent judges, shows herself in every way the equal of the Rainbow; probably, in anything but a nephyr, her superior. This is all as it should be. The hope is not merely a test of greyhounds of the water. It is a coiling match on salt water and it would be disappointing if the winning boat were not as well the one best able to cope with heavy weather.

At a meeting in Montreal lately the Premier of Quebec, who is also the Attorney General for that Province, made some observations about our enforcement of the Criminal Law which demand our careful attention. It is well known that the principle upon which we have proceeded in the trial of persons charged with crime is that the person on trial is presumed to be innocent until the contrary is shown. In almost any criminal trial one may hear that principal extolled before the jury, usually to the encouragement of a good deal of table thumping, and we are assured, in if we doubted it, that it is better that ninety-nine guilty men should escape rather than that one innocent man should be punished. Quite by the way, I have often wondered how it is that no honored but public spirited person has arisen who might win himself glorious immortality by offering to suffer a wrongful conviction upon the disputed point in order to achieve the great public service of bringing about the conviction of those ninety-nine guilty ones. At any rate Premier Taschereau thinks that we are too tender with the criminal and that unless we are to suffer a practical terrorism it will be necessary for us to tighten up the rules a bit. He rather regrets, I think, that only the Civil Code was retained by the terms of peace in 1763, and suggests that it may not yet be too late to try the plan of questioning the suspected criminal, as they do in La Belle France. I am inclined to think that a good fourth degree grilling by an inquiring and astute prosecutor has some things to recommend itself by, and I am very sure of this that it will not be welcomed at all by the guilty parties.

Fort Tennis Club To Hold Dance on Sept. 28

Arrangements have been made by the Fort Community Tennis Club to hold their annual dance and presentation of trophies in the Recreation Hall on Friday evening, September 28th.

Frank Smith's Orchestra which made a decided hit with the dancing public last year, has been engaged to supply the music, which will consist of a program of modern, with a sprinkling of old-time numbers.

At midnight refreshments will be served, after which the presentation of trophies to the winners of the different events in the recent tennis meet will be made.

A good time is assured, and everyone is invited to attend.

"Turkey Shoot" postcards on hand at the "Record Office".

5 PIECE DANCE ORCHESTRA
Open for Dance Engagements.
A trial will convince you.

Russia And The League Of Nations

Soviet Russia having applied for admission into the League of Nations, the ruling bogie in Geneva and in many of the European capitals is whether that application should be approved or rejected. Russia has the powerful support of Great Britain, France and Italy as well as of some other countries, but is opposed by a number of the smaller nations, including, as it is reported, Belgium, Poland and Greece, while Switzerland, the home of the League, is said to be sharply divided on the question. The London Times has expressed the belief that Canada and Ireland will line up with the opposition.

Unless unanimity can be reached through advance negotiations and conferences, the forthcoming meeting of the General Assembly of the League will be the scene of an animated, possibly bitter, debate, with the further possibility of the failure of Russia's application because an unanimous decision cannot be reached. It looks like a knotty problem to solve, yet most people in this country would be inclined to regard it as a very simple one.

It is not necessary to recite the reasons which led to the establishment of the League of Nations, nor to set forth its aims and objectives. Its very name implies that it was the intention of the founders that it should include not some nations, but all nations. As long as certain nations remain outside its membership, the League is not as strong as it should be. It is weakened by the absence of even one nation. In the past one of its great weaknesses has resulted from the refusal of the United States to join, from Russia's absence, and the early stipulation that barred Germany. Now that Russia is willing to come in, why refuse to permit it?

The only answer forthcoming is that the Government of Russia is Communistic. Premier Tschicherin of Greece is reported as saying that he will vote against Russia's election to membership on the ground that it would sanction international Communism. This may be offered as an excuse, but surely it is not a valid and logical reason for opposition.

Italy is a member of the League, but that does not constitute sanction of international Fascism by the other nations of the world. Other nations may set up or bow to dictatorships or other forms of autocratic government. Some might turn socialistic, others become more democratic, and others again return to absolute monarchies. Such developments are the right and privilege of the people of the nations concerned, but they do not constitute reasons why they should be treated as outlaws among the nations of the world.

The people of any country have the sole right to determine their own form of government,—but, when in their opinion it has been united to their particular conditions or state of development. This is one of the fundamental principles underlying the structure of the League of Nations, namely, self-determination of peoples and nations. Failure to recognize it, and give effect to it, would quickly destroy the usefulness of the League and ultimately destroy the League itself as an organization.

There are times when, following internal upheavals and revolutions, a nation may lose the diplomatic recognition of other nations, but this is largely because the fact is not clearly established as to which of the contending groups really enjoys the support of the people in such country and can therefore be safely recognized as "the Government". But when a Government once becomes established, recognition of it by other nations as a rule quickly follows. The means by which it came into being, its principles and policies are a matter for its own people to approve or disapprove, and recognition by other nations does not necessarily imply approval.

The Union of Socialist Soviet Republics (Russia) has an established form of government; has had for years. It is recognized by most of the other nations. Agreeably or otherwise, it is accepted by the Russian people. What reason is there, then, why Russia should not be recognized by the nations acting jointly through the League of Nations and full membership in that body be granted to it? It is silly to argue that the granting of such membership in the League is to sanction international Communism. Canada might as well argue that to now admit the United States would be to give international sanction to all the policies and implications of Roosevelt's "New Deal", or in the case of Germany by place the stamp of approval on Hitler and his Nazi policies and programme.

Regardless of what one may think of Russian Socialism and the policies and methods of the Soviet Government, and quite opposed as one may be to the introduction of similar policies and methods into their own country, people the world over should wish Russia well. It is far better for the world that Russia should succeed and not fail in its experiment, and certainly it would be unchristian and cruel towards the Russian people to desire failure. Even though the Russian system may not be desired nor prove beneficial elsewhere, it may suit Russia in its present state of development.

The best way to promote international understanding and goodwill, and thus promote the cause of peace, is for the nations to get together,—the closer the better. And the best way yet devised for such getting-together is in the General Assembly of the League of Nations. Therefore, let every nation in who is willing to join, and do everything possible to bring in those which presently are averse to joining.

Antelopes is a name given to diminished sentiment of vision not relieved by the use of glasses and in many cases not accompanied by any visible ocular changes.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry is such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and sometimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the intestinal system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 80 years—yes to not experiment when you use it.

Famed Racing Husky Dead

Mr. Godard Mourns Loss Of Nine-Years-Old Team Leader

Head St. Godard world champion dog racer, mourns the death of his gallant leader Toby, one of the great est dogs that ever stepped in harness.

Toby died at Peterborough, New Hampshire. The veteran of races across the continent suddenly suffered stomach trouble and although three doctors worked on him they failed to save his life.

Toby was nine years old He was part husky and part greyhound, a combination of staying power and speed. He was one of the St. Godard kennels and won 35 long distance races.

Toby led the St. Godard string in six of the grueling 200-mile derbies between The Pas and Flin Flon. He was also well known in competition in Ottawa, Quebec and New Hampshire.

It's tough all right," said Emil, when Veronda heard the news. "Toby was a wonderful dog I intended to have here in August to start training for the New Hampshire. I will have to train a new lead. I have several of Toby's pups at the ranch and expect to work one of them in Toby's place."

DOCTOR SAID SHE MUST REDUCE

Fat a Danger to Her Heart

Overweight is not merely a matter of appearance. It affects health, Excess fat robs the system of energy —the internal organs grow lax and flabby, and under the burden of needless strain is put on the heart Here is an instance. A woman writes:—

"I have been treated by specialists who tried to reduce my weight, as I suffered with heart attacks. But no matter what they gave me, nothing would reduce me. Illness taking a serious turn, wherever I felt excessive about how much flesh I have had. I took it at first for rheumatism, and it has done me a world of good, as well as greatly reducing my weight. Before Christmas I weighed 224 lbs. Now I am considerably less—in fact, a card I had worn last year I have had to take in be altered before I was able to wear it again. I have not really made any difference with my diet, so there is only Kruschen to thank."—(Mrs.) M. H.

The six salts in Kruschen assist the internal organs to throw off each day the wastage and poisons that encumber the system. Thus, little by little, that ugly fat goes—shortly, yet—but surely.

Alberta In The Lead

Province Has Highest Marriage Rate In Canada

A bridegroom of 65 with a bride of 18; 30 brides under 16; three mothers who have borne their third child when but 16 years old; two men who married when they were more than 80 years old are some of the highlights of a report compiled from the vital statistics records of Alberta. The province has the highest marriage rate in the Dominion and the highest birth rate west of Quebec.

Englishmen are still the greatest progenitors, followed by Ukrainians and Germans. Alberta does not follow the majority. The month of June proved the popular month in which to be married.

The boys apparently do not care to assume marital duties as readily as do the girls, for while there were only 76 grooms under the age of 21, as has been 3,616 girls of a total of 5,264 became brides before they reached their majority.

Blind Man Checks Racetracks

Portland Publishers Aided By Dog Makes Long Journey

Although he is totally blind, Ed. C. Robbins, publisher of a Portland weekly newspaper, has realized his long ambition of climbing the stone capped summit of Mt. Hood. He was aided by his faithful police dog, "Prince", in making the long ascent.

Asked what he wanted to climb the peaks for, the blind editor said, "For the experience, man, for the experience!"

Scotland is testing the innovation of sending tots blear by rockets shot from ship to shore instead of the other way around.

Japan Grows Own Wheat

Country Now Able To Supply Its Own Requirements

The Japanese government's five year wheat growing project, initiated in 1932 by the ministries of agriculture and forestry, to enable the country to supply its own requirements of the cereal has achieved its objective two years ahead of time. Estimates published at a recent cabinet in Tokyo of the chief officials of the wheat encouragement bureaucracy of the various prefectures, showed the wheat crop in Japan this year will yield 44,819,000 bushels while the estimated consumption of the country is 45,000,000 bushels

Since the domestic crop is now practically equal to consumption, the officials have decided to relax their efforts to increase production and to concentrate their attention on effecting improvements in quality.

Although local by no means major plants rice which remains the staple cereal it has been popular as a food for several years and army regulations prescribe mixing wheat with rice before boiling it for soldiers' rations The wheat constituents counteract the tendency of polished rice alone to cause beriberi (kakke as it is called in Japanese).

Many households consequently now mix some wheat with the rice before boiling it for the family table with resultant good effects on the general health

Due to the world rise in wheat prices, Japanese flour mills have been failing back recently chiefly on domestic wheat. It is likely that the mills will continue to import a fair quantity of Canadian and Australian wheat of qualities not yet produced there, for mixing purposes, for some time at least

The Art Of Making Tea

Method To Use In Order To Obtain The Full Delicious Flavor

No beverage in the world is as universally popular as tea It is used in nearly every civilized country and this delightful drink not only refreshes and invigorates the mind and body but also serves as the medium by which people meet in a spirit of friendship and understanding the world over

If the following directions (which were supplied by Salada Tea) are followed, each cup will yield the full delicious flavour that makes tea so enjoyable

1. Use a tea of fine quality.
2. Use fresh water always.
3. Use an earthenware tea-pot.

Shall we start out the pot to make it warm, place in it a level teaspoon of tea for every cup desired, and one for the pot. Add fresh boiling water Allow to steep about five minutes and stir slightly before serving.

Tea made according to the above rules will be fragrant, delicious and completely satisfying.

In Densely Populated

The most densely populated small area in the world is 113th street between First and Second avenues, New York, Miss Marguerite Wales, social worker, said. The block is only 700 feet long, but 2,700 people make it their home. Seventy per cent. of them, Miss Wales said, are on relief.

If you talk of a bridge expert you may mean a dentist, an engineer or a card player.

Annual Purchases Of Railways Run Into Millions Of Pounds

This distinction belongs to British railways whose annual purchases include locomotives, carriages, wagons, rails, bridges, signals, and other equipment for the railways of the world. Over 1,000 miles of track are laid or renewed annually, for which 210,000 tons of steel rails, 4,000,000 sleepers, and 2,000,000 cubic yards of ballast must be bought. The 14,000,000 tons of coal consumed by 21,000 locomotives, steamships and 3-ton keeps a large army of the mining industry regularly employed. 3 hundred yards of cloth are purchased from British mills for making the locomotives—a permanent way and works, and 419 locomotives, locomotives carriages and wagons.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

Without Calomel

You are looking pale simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination are both impaired, and your entire system is poisoned.

What you need is a liver stimulant. Recommended for over forty years. Dr. Morse's Indian Root Pills. Gentle, yet sure. Purely vegetable. Act surely, but gently. Ask for them by name. Refuse substitutes. 25c at all druggists.

Floating Factory Designed To Produce Electric Power By Use Of Warm And Cold Sea Water

A unique floating factory designed to make tropical sea water perform strange tee where it is most needed—situated out of Dunkirk harbor recently for its first test.

The experiment is to be conducted at Rio de Janeiro said it is there the low's inventor, Georges Claude, 66 year-old Frenchman, asserts her A few hours behind the ice ship sailed the Sit Mynes, carrying a tube which, when fitted together, is one-half mile long, part of the ice-making equipment.

The ice ship is the 10,000-ton steamer, Tunisie, outfitted with a fantastic plant for producing electric power by the action of warm and cold water drawn from different levels of the sea.

That free power inventor intends to produce 1,000 tons of ice/ice a day to cool the drinks and preserve the food of parching South Americans. It looks like a half-mile 1700 metres or M Claude, whose capital investment is estimated at less than $500,000

On the deck of the floating ice factory are immense reservoirs and a complex system of pipes, turbines and refrigerating units and to supply these with the requisite sea water of differing temperatures is a sheet-iron tube a half-mile 1700 metres or 2,300 feet long and 2.5 metres eight feet) long and 2.5 metres eight feet) in diameter.

M. Claude's new venture, with which he thinks Jules Verne would have been delighted, is the fruit of experiments at Cuqres, Belgium, in 1928 and of the coast of Cuba in 1931 in which he used a similar tube to test his theory that man can harness forces in warm and cold currents of the same sea.

The process, briefly, consists of making warm water from the surface of tropical seas boil by inducing it into a vacuum, utilizing the vapor to run turbines, and then condensing it with cold water drawn from the depths.

When the Tunisie reaches Rio de Janeiro, or some other point near the Brazilian coast, it will drop its long tube overboard, with an anchor to hold one end near and the other, and a huge special float, some metres (30-ft. feet) in diameter, to keep the other end above sea level. The Tunisie then will fire up in the buoy, connect its shipboard apparatus to the submerged pipe and commence, Claude hopes, its ice production

Canned Remove Noise

Engineers Will Have To Put Up With Locomotive Whistle

In a 2,000 word judgment, the board of railway commissioners for Canada decided that railway engineers will just have to sit there and take it. The locomotive whistle rings in their ears, it's too bad, but the board can do nothing about it.

It all started when the Brotherhood of Locomotive Firemen and Enginemen asked the board to order railways to place whistles "where the sounds therefrom will not be injurious to the ears of the engineer." The board heard many witnesses, instructed the men to ride in locomotive test whistles with their ears bare, investigated types of whistles and measured different engines.

The Solomon-like judgment was then rendered. It ended with these words: "It does not appear that anything can be done, unless the railways find they can move this whistle forward and increase the distance between it and the cab windows."

Stories Of Superstition

Children had to rush for shelter when hordes of dragonflies descended on the seaside town of Scunthorpe, Denmark. Millions of the insects darkened the sky for several hours. They flew in people's faces and made walking impossible.

"Do you want a job as proof reader?"

"Yes, sir"

"And do you understand your responsibility?"

"Yes, sir, when I go to make a mistake. I take all of the blame."

W. N. U. 1904

How It Originated

Two Explanations As To Source Of Term "Gone Widow"

The term "gone widow" is said to have originated among the Anglo-Indians about the middle of the Nineteenth Century from the practice of European husbands residing in India sending their wives and children to the hills during the hot season. In this section the grass is plentiful

A more plausible suggestion is that a spree in America during the gold rush in California; a man not infrequently put his wife and children out to board, while he went to the diggings This he called "putting his wife to grass

TOOTHFUL AND CHARMING—BUT IT!

Spotted white silk to add gaiety to your wardrobe

Fashion centres much interests in spots—particularly light and blue spots on white ground for spectator sports and town wear.

It is tuxedo silk, that is so easily laundered and ironed. The shirtwaist dress is finished with a dainty embroidery frill, with tiny tucks (affords) the cape for those chilly evenings is rolled by hand. And isn't that rest of the French people enough to smile?

The Salmon-like judgment was then rendered. It ended with these words: "It does not appear that anything can be done, unless the railways find they can move this whistle forward and increase the distance between it and the cab windows."

Houses Of The Future

Will Be Vastly Different From The Kind We Know

What will the houses of the future be like," asks a writer in the Birmingham Weekly Post

Already in place of brick and stone walls it is possible to have hollow walls of metal-containing composition, forming rooms like vacuum flasks that can be kept at a steady temperature night and day They can also be lined with soundproof materials, so that one can read or study in happy ignorance of what is going on in other parts of the house. Whether this is an advantage, of course, is a matter of opinion.

Another sort of house already in the realms of possibility is one of limited or clear toughened glass. The great advantage of the is that its walls can be saturated with sunshine.

At the Building Research Station at Watford, England, a house is being erected that is successful, will be impervious to all climatic conditions. One or two rooms are being formed inside a shell Here all sorts of "weather" are reproduced, as the requirements for combatting excessive damp, heat and cold can be thoroughly tested.

It is not only in structure however, that the houses of the future promise to be more nearly perfection. Life outside them should be a luxurious, not to say exciting, affair Professor A M Low, the inventor has fitted his home with a radio-controlled army of labor-saving gadgets Among these is a device for making the garage doors open at the sound of his gardener's motor horn. A robot alarm clock five minutes before going off lights a fire in the bedroom and there is an arrangement by which from anywhere in the house will light a cigarette for the master.

But perhaps the most useful device of all is an indicator that shows when visitors are coming up the garden path. Connected with it is another gadget for stopping the bell ringing if these callers are undesired.

No doubt all these present time a certain amount of risk attaches to such inventions. The professor was once nearly killed by a new power that was supposed to have enormous powers. It had! Simultaneously it ejected itself out of the window and the professor out of the door.

Tonic Fifty Centuries Old

What is described as a "beautifully-painted tomb nearly fifty centuries old" has been discovered by Professor Quibell near the Step Pyramids The tomb belongs to Ti Thanes, presumably a member of the Council of Ten comprising the executive of the then Egyptian Government. The paintings, depicting high personages, birds and flowers, are in colors as fresh that they look nearly new.

British Professor Shows That Tree Cultivation Is Best Means Of Conserving Moisture Supply

A Necessary Precaution

Apples Need To Be Thoroughly Washed Before Eating

Health authorities are warned these trying to keep the doctor away by eating an apple a day that the doctor's services may be needed if the apple is not properly cleaned before eating It is not sufficient to follow the time-honored schoolboy practice of giving the apple a scrub on the shirt sleeve

All that comes about through a combination of circumstances. In these hotter years the only good apples come from trees whose foliage has been sprayed with poison. In ordinary seasons most of this spraying is computed early and a normal rainfall probably has a part in washing away the residue of poison before the fruit ripens.

This year spraying was the more necessary because the growth encouraged insect pests, and of course the drench little rain washed the apples. So far no case of sickness or death has been ascribed to poisoning from fruit eaten in Canada. It would be foolish to abandon the apple-eating practice from fear of spray poisoning.

But it is well enough to take the health authorities' advice and give the apple a bath. It is a wholesome practice anyway.

A Flourishing Industry

Bones Go Through Many Stages To Produce By-Products

The millions of bones that are thrown away every year help to make a flourishing industry. Their by-products and uses are practically endless, and there is no waste Bones are collected with a wide net and sent to the factories. It is extremely valuable. Sugar, salt, and other refineries utilize bones in some of their refining processes. Bones are also used for cane-handles, buttons, and steel. The Tunisie, presumably a member of the Council of Ten comprising the executive of the then Egyptian Government. The paintings, depicting high personages, birds and flowers, are in colors as fresh that they look nearly new.

Found In Desert

Ancient Pottery Indicates Early Civilization Existed There

Ancient pottery found in the Gobi desert indicates that a civilization existed there in early times, Dr. Sven Hedin, Swedish explorer, said in Stockholm.

Dr. Hedin, who has been exploring the desert for the last two years, said he found the pottery in the ruins of a city which he discovered.

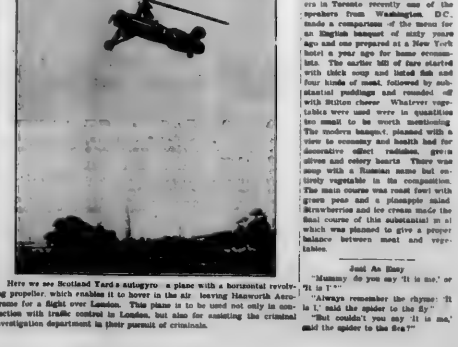
LONDON'S NEW SKY POLICE



Here we see Scotland Yard's autogyro a plane with a horizontal revolving propeller, which enables it to hover in the air leaving Hanworth Aerodrome for a flight over London. The plane is to be used not only in connection with traffic control in London, but also for assisting the criminal investigation department in their pursuit of criminals.

Highly complex and delicately balanced, the associated flora and fauna of the forest provide an abundance of material on which depends the prosperity of a nation depends, declared Prof A W Borthwick, president of the botany section of the British association, at the annual meeting in Scotland

Professor Borthwick said the destruction of forests was increasing at a rate which gave serious apprehension as to their capacity to withstand increasing and unchecked exploitation.

The professor gave the opinion the main trouble was that in the past 50, woods had not been managed with a view to natural regeneration. Under light intermittent shade, the more open canopy and crown room enables the trees to respond almost immediately to the influence of the seed falling

Although it had not been decided that it could be claimed the forest is of great importance as a conservator of water and as an equalizer in the drainage of the land.

"Where no forests exist in the upland or collecting regions of watersheds," he said, "the rainfall being during the earliest hard or cooling it down to the bare rock," he pointed out. "There is nothing to check the downward rush of water, which collects into mountain torrents which rush unbridled into the main rivers and streams, causing floods, destructive swollen and flooded. The damage done by severe and sudden floods to land, bridges, agricultural crops and stock, including human habitation, is well-nigh incalculable"

Where forest existed in the upland districts or collecting ground of the water, rivers were more uniform in their flow; peat did not wear out, and carried much less silt and debris.

Rain broken by the tree crowns percolated more slowly into the soil and found its way into springs and watercourses. Further the influence of the forest was that the melting of the snow was more gradual, the water being absorbed and stored and feeds evenly. The forest regulated the off-flow of water after heavy rains.

Found For Vegetables

People Raising More And Output Has Increased

Government reports tell of the increased output of vegetables in the last half century. Farms that were given more attention and highly specialized vegetable farms have been developed near the centres of population Sheet cultivation after many kinds of vegetables from plain cabbage to the bright hued peppers The housewife may be interested to know that if she has no garden of her own she purchases fresh and regularly The result may be very the same

At the meeting of vegetable growers in Toronto recently one of the speakers from Washington D.C. made a comparison of prices for an English banquet of sixty years ago and one prepared at a New York hotel a few years ago for business men. The earlier bill of fare started with thick soup and listed fish and four kinds of meat, followed by substantial puddings and rounded off with Stilton cheese Whatever vegetables were used were in quantities too small to be worth mentioning. The modern banquet, planned with a view to economy and health had for decorative effect a centre piece of olives and celery hearts There was soup with a Russian name but entirely vegetable in its composition. The main course was roast fowl with green peas and a pineapple salad Strawberries and ice cream made the final course of the substantial meal which was planned to give a proper balance between meat and vegetables.

Just As Easy

"Mummy do you say 'it is me,' or 'it is I'?"

"Always remember the rhyme: 'It is I,' said the spider to the fly"

"But couldn't you say 'it is me,' said the spider to the fly?"

Relieved/

Mrs. Edward Jagger' baby had been teeth when less than three months old. She writes: "For less 15 now and I can truthfully say that giving him Baby's Own Tablets was nothing nursing by mother. Baby's Own Tablets are a wonderful medicine for babies and the little one can always be counted on for fever relieved by giving sweet, safe Baby's Own Tablets. Very easy to take, no after effects. Price 25c everywhere.

Dr. Williams' Medicine Co., Brockville, Ont.

WORLD HAPPENINGS BRIEFLY TOLD

Banned for England after six years as British high commissioner to Canada, Sir William Clark sailed from New York to Great Britain.

The British Columbian government will construct a new bridge across the Fraser river at New Westminster, Premier T. D. Pattullo has announced.

A new deal for song-bird orators was declared when Robert Mason, commissioner of New York parks, announced that nine city parks, in addition to traditional Union Square, will be available for open-air meetings.

The general business outlook in Great Britain has brightened since June, Sir Josiah Stamp, well-known British economist and a director of the Bank of England, declared before members of the Aberdeen Chamber of Commerce.

An Irish Free State army newspaper with three occupants crashed in the garden of Joseph McGrath's home at Dublin. Lieutenant Arthur Hassell and Private Twomey were burned to death. Sergeant Chauvel jumped clear of the wreckage but was seriously injured.

With a view to developing a market in Japan for British Columbia sheep, the government has made a brief shipment of Shropshires for breeding purposes, Premier T. D. Pattullo said. The shipment was made by the Hsian Maru.

Don't Round Tide

Unless you are interested in a condition which before you had 700,000 women and girls. Take it before and after Mrs. Pinkham for Change of Life whenever you are nervous and chilly, feel out of time sex. "It helps me!"

Film Stars' Handwriting Analyzed

By LAWRENCE MESSERT
(Graphe-Analyst)
(All Rights Reserved)

(Editor's Note: This article will be found especially interesting, dealing as it does with well-known film stars. What does YOUR handwriting tell? See the invitation following this article).

A correspondent sends me samples of the writing of several well-known people, and asks me to analyze the writing for her. There is no much of interest in these analyses that I am making them the subject of a special article.

Perhaps you have wondered why many men have been led into the silver screen, a field in which they have gained fame and fortune. It is immensely interesting to find out what might have been if different individuals had been born with traits of character that were entirely different from the real characteristics of their nature.

Men and women are born into this or in with definite talents and abilities that they must learn in order to take full advantage of them. Some go through life and never learn their early years, while others find and develop them early in life.

Samuel Goldwyn, the prominent film star, is particularly fortunate in finding his talent and making it a success. He has a keen flair for writing shows, as well those who have seen "The Silver Slime know, that he is a great dramatic actor that he can interpret a role in a way that few people can even approach, but he has a shrewd ability and another very outstanding talent with which he has won recognition his ability in music. The rhythm and breadth of his writing show immediately to the handwriting analyst a talent and appreciation of the musical arts.

Ad Art Director Samuel Hoffenstein has achieved fame that is not often given to a man. His talent is manifest in his writing. Like Goldwyn, his first choice of expression is the line and another characteristic. He has another ability. His writing shows the ability to use his talents in creative way perhaps in painting, literature, or some other means of expression. Few men are born with such pronounced artistic ability in so many lines. Music and the sculpture arts.

Take the handwriting of John Boles another star. The dominant trait in his character is his self-reliance. This is the quality that makes him stand only on himself for anything that he wants. He is not a party (quite the contrary) to his money friends, but, at the same time, he leans to one man only to get it—and that man is himself.

John Boles could not be anything else if he desired there is no independence of thought and action that will not allow him to think of himself as the Lord." Others may only the dying thing. Individualism though events to God who so back of them. The rulers of Judah rulers that there is unrest at peril of Jerusalem's being taken by the Assyrians, but they give no thought to God himself pronounces woe upon them for going down to Egypt for help, relying upon the horses, chariots and horsemen of that country in the hour of their peril, and failing to seek the help of Jehovah. "Jehovah, too, is wise." the prophet proclaims the speaks satirically, and he will bring calamity upon the evildoers. The Egyptians are men, not God, as the great man of Judea seems to be their horses are flesh, not spirit when Jehovah acts, both helper and helped will fall and be destroyed together.

"Take mitre was the shaft best fitted to pierce the body of the rulers of Judah," Dr. George Adam Smith comments. "Wisdom, a practical plan for their times and prudence in carrying it out, was the last thing they thought of associating with God whom they relegated to what they called their religion—their temple worship, and poetry."

A fall to Bedouins, 21:6-9. Turn yourn him from whom ye have deeply revolted, O children of Israel; put away your idols.

"It is the duty of nations as well as men to own their dependence on the overruling power of God, to confess their sins and transgressions in humble sorrow, yet with assured hope that genuine repentance will lead to mercy and pardon; and to look upon the sublime truth announced in the Holy Scriptures and proven by all since the quarts isst right on the lake shore. Assays as high as $100 have been reported.

Pat which has become slightly tattered, or fat that has been used for cooking, should be saved and rendered sweet again by boiling it with a few slices of raw potato.

SUNDAY SCHOOL

By JACK MEHER, Canadian Naturalist

"The little hope that I wanted with in Sunday School twenty-five years ago are to-day the two wives of the church executive. In other words the fondest hopes of to-day are the foundation of to-morrow's Church and Christianity. And without some or way of interesting during our children to Jesus and His ways our Church and Christianity are bound to go down, and if we allow our established Christianity to go down we lose the very soul of the best government and civilization in continent on the earth to-day. We could be no underprivileged, handicapped, uneducated, mass rise up and have his grey hairs respected by all classes of people more than I have in the last twenty years of my life, and when my little seven-year-old boy took me by the hand and led me to the very of the Saviour picked out thirty years ago. Remember, Sunday School and Christianity are the foundation of our public schools and all other good things that follow. The best public school teachers I have known, producing the best results in the public schools, were, in every case, Christian Sunday School teachers.

My public school education was extremely limited to the first, or A.B.C. book, but through the Sunday School, and by my own study, I am now able to read and write and am now writing my third book. As far as education is concerned, the same can be said of my brother, who never went to public school one day in his life, but the Sunday School teacher taught him to read.

Then I have just reason to bow down and thank God for the Sunday School and its influence.

Jack Miner's Bulletinboard.—The photo shows a sign placed by a hike in British Columbia on Vancouver Island, which is 6,000 miles more or less from Jack Miner's home.

will do as other nations have whenever we ignore the blessed privilege that our fathers bequeathed us and that we may live.

Moreover, I wish to say that I know as fact that there is no other way that a young man can develop a sterling character and Christian courage and loyalty in his own heart then by handing a class of boys in Sunday School. In other words the more we invest in the Sunday School the greater our daily lessons of blessing is.

Possibly I have nothing to lose at, but all to thank God for, or there every case, Christian Sunday School lessons.

BRAKES FALSE TEETH FEEL LIKE NATURAL

There must be a reason Dr. Wernet's Powder is the world's largest seller and guaranteed by leading dentists it holds teeth so firmly—they fit so comfortably—that all day long you forget you have had false plates. Leaves no colored, gummy, pasty film. Sweetens your breath pleasant. Get the best powder you can buy; you cost is small—any druggist.

SUNDAY SCHOOL LESSON

SEPTEMBER 25

ISAIAH COUNSELS RULERS

Golden text: "Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee." Isaiah 26:3.

Lesson: Isaiah, Chapters 7:31, 36 and 37.

Devotional Reading: Psalm 23:1-7

Explanations And Comments

Trust not in Egypt, but in Jehovah, 31:1-3. When Isaiah's wife heard him call to be a prophet, in the ninth chapter he began by saying, "To us grew that King Uzziah died, I saw also the Lord." Others may only the dying thing. Isaiah always saw through events to God who so back of them. The rulers of Judah rulers that there is unrest at peril of Jerusalem's being taken by the Assyrians, but they give no thought to God himself pronounces woe upon them for going down to Egypt for help, relying upon the horses, chariots and horsemen of that country in the hour of their peril, and failing to seek the help of Jehovah. "Jehovah, too, is wise." the prophet proclaims the speaks satirically, and he will bring calamity upon the evildoers. The Egyptians are men, not God, as the great man of Judea seems to be their horses are flesh, not spirit when Jehovah acts, both helper and helped will fall and be destroyed together.

"Take mitre was the shaft best fitted to pierce the body of the rulers of Judah," Dr. George Adam Smith comments. "Wisdom, a practical plan for their times and prudence in carrying it out, was the last thing they thought of associating with God whom they relegated to what they called their religion—their temple worship, and poetry."

A fall to Bedouins, 21:6-9. Turn yourn him from whom ye have deeply revolted, O children of Israel; put away your idols.

"It is the duty of nations as well as men to own their dependence on the overruling power of God, to confess their sins and transgressions in humble sorrow, yet with assured hope that genuine repentance will lead to mercy and pardon; and to look upon the sublime truth announced in the Holy Scriptures and proven by all since the quarts isst right on the lake shore. Assays as high as $100 have been reported.

Little Journeys in Science

ATMOSPHERIC PHENOMENA

(By Gordon H. Grant, M.A.)

Dust, commonly associated with the gritty particles which fill the air in the course of "dust storms", is in fact responsible for some of the most prevalent beauties in nature. Blue skies, purple twilight and rain drops are caused by small dust particles which fill the air. Day would be almost as black as night, scientists say, if it were not that the particles of dust break up all the components of white light except the blue which we see in the sky. Sunset, with its richly-colored clouds, is the result of dust particles blotting out all the same colors which combine to make white light, except those we see reflected in the sky. Twilight is the reflection of the shooting sunlight from particles of dust high in the air.

To dust, too, is due the rain and snow fall. Moisture in the clouds forms into drops or flakes by clinging around the small dust particles suspended in the air. Rain clouds usually travel about a mile above the earth.

The "ring around the moon" which is a frequent phenomenon in cool weather, is caused by ice crystals in high clouds. The crystals break up the moon's light and scatter some of the colors, reducing others, and giving the familiar effect. "Sun dogs" across the sky are produced in this same way.

Sun spots activities projected on the atmosphere, are responsible for two other common spectacles in the sky, the aurora borealis and the rainbow. Contrary to popular belief, the rainbow forms a full circle in the sky, and not the arc with which we are familiar. Could man ascend high enough into the air in would perceive the rainbow in its entirety. This has been demonstrated by observers in recent years.

Stay On The Rolled Standard

It seems difficult, sometimes, to stay on the Gold Standard, but the "rolled" standard — ah! that's something else again. Once a man has "rolled his own" with Ogden's Fine Cut he's on the "Rolled" standard of smoking enjoyment for life.

Ogden's is might easy to roll and it does give a smoother, cooler and more fragrant smoke . . . To try Ogden's is to like Ogden's — particularly if you own "Chancellor" or "Vogue" Cigarette Papers. Ogden's Fine Cut and either of these makes of cigarette papers ensure you a standard of satisfaction that's well worth staying on.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

P.S.—At any Poker Hand Previous Show, or by mail, you can get 2 large bundles of "Vogue" or "Chancellor" cigarette papers in exchange for one complete set of Poker Hands.

Your Pipe Knows Ogden's Cut Plug

Now You Tell One

Old Sol is "mother" to two chicks at Jonesboro, Arkansas. After Biddy had kept her nest in a field with only a few of her eggs hatched, Old Sol hastened down on the nest and two weeks later two more chicks broke through the shells. The sun-hatched chicks are quite normal and healthy. Mrs. W. D. Cobb, owner of the strange brood, said.

ADVOCATE STEPS TO FACILITATE TRADE WITH U.S.

Winnipeg Early action by the governments of Canada and the United States toward reciprocal trade concessions was urged by the ninth annual convention of the Canadian Chamber of Commerce here.

Support of reciprocity came as the convention adopted the annual report of the policy committee which also urged a trade mission to China to [illegible] Commission, consideration of the Gaspé

Economy in government and a national unemployed relief policy with the Dominion contributing equitably on a basis of provincial needs also were approved. Administration of relief should be under provincial departments or commissions.

Land settlement as a step toward solving unemployment was advocated. The convention also recommended a Canadian research institute to stimulate marketing and use of Canadian wheat in markets of the world and co-operation between federal and provincial governments for protection of the public in sale of securities.

The convention approved steps taken by various federal governments to negotiate trade agreements that would overcome barriers against agricultural products in new markets, and urged that every advantage be taken of every possible opportunity to extend this principle.

Appointment of committees by the incoming national council to study the system of immigration and another to deal with upset social conditions and allied problems was decided. Duplicating taxation was condemned and steps toward elimination

"That chamber approves the report presented by the joint international committee and the conclusions reached by it at its meetings," declared the policy section dealing with the reciprocity question.

"It notes that on June 12, 1934, the president of the United States was granted by congress authority to enter into foreign trade agreements and to modify existing agreements. It expresses the opinion the governments of Canada and the United States should enter into negotiations at the earliest possible date to determine the extent to which mutual concessions can be arrived at with a view to accelerating the movement of trade between the two countries."

Immediate removal of duplicatory taxation and steps to cut costs of government in the federal, provincial and municipal field were written into the policy report as a result of previous action of the convention. It asked reduction of membership of the federal cabinet, house of commons, senate and provincial legislatures. End of duplication and overlapping of governmental services such as administration of insurance, company law, agricultural and health and social services, was advocated.

Waste Money Back

Has Unused Railway Ticket Purchased In 1930

Chicago. John Watt isn't going to take that train ride he bought a ticket for 1870—so he wants his money back.

The Chicago office of the Canadian National-Grand Trunk Railways reported that Watt, who lives at Asbrooke, Miss., bought the ticket in Chicago for passage between Detroit and Boston.

Watt presented the ticket and it was forwarded to the general office in Montreal, with the request for his money back.

The ticket, Watt said he was told, was good "until used."

Sir George Perley

Ottawa. Born in Lebanon, N.H., on September 12, 1857, Sir George Perley is celebrating his 77th birthday. He first entered the House of Commons as member for Argenteuil in 1904 after two defeats, in 1900 for Russell and in 1902 in a by-election in Argenteuil.

W. N. U. 3004

Deplorable Intrigue

Du Vallera Of Irish Free State Before To Remain And League

Geneva. Small nations raised their voices as the League of Nations assembly opened general discussion. Austria in fervent declaration and the Irish Free State in fervent praise.

Chancellor Kurt Schuschnigg rigidly guarded by secret service men stated Austria's case yesterday saying Austria's sanctions on independence

Long hour Eamon de Valera president of the Irish Free State followed Schuschnigg and somewhat heatedly declared he did not object to Russia's entry into the league but he did object vigorously to the back stairs intrigue going on over the wording of the invitation to Russia. De Valera demanded the whole matter be put before the league assembly.

Schuschnigg stressed his words as he declared the intention of his government to remain in Austria's internal and external independence. He denied the Austrian constitution was reactionary. "We are not reactionaries," he said, but essentially realists to dispense with a backward glance at the policy of an ideal day."

Mr de Valera said flatly that he didn't like the lobbying that has been going on to secure membership. He objected to the "hotel room intrigues", the drafting and redrafting of the text of invitation.

He was ready to vote for Russia's entry, he said, although the ideals of the Free State and of the Soviet were poles apart. From what he has made he gathered that Russia would have the necessary two-thirds majority to enter the assembly and that Russia was ready to join.

"Then why not get down to business and stop being the matter before the assembly without sit mpty to deprive any state of its right under the convention to object to Russian membership," he demanded.

Chinese Demand Food

Inland Province Faces Famine After Severest Drought

Nanking, China.—The wolf growls loud and louder in famine-stricken Anhwei province.

A summer-long drought that has seared fields, dried water sources and made desolate that thickly-populated province gave no sign of ending. And hungry desperate farmers swarmed in on the various districts seeking food from rice shops. Those closed, fearing attacks.

Advices from the inland province — where the rigors of the winter are to be added to the misery — said official relief must be forthcoming promptly if widespread disorders and bloody are to be averted.

There were grim stories of hungercrazed wolves sweeping down on famine villages, farmers losing their last small supplies of drinking water in fruitless efforts to save parched crops, peasants dying everywhere of hunger, disease and polluted water supplies.

Will Enforce Bird Act

R.C.M.P. Official Issues Orders To Arctic And Sub-Arctic Posts

Montreal Instructions were sent out at the closing session of the International Association of Game, Fish and Conservation here by Colonel J. W. Spalding, deputy commissioner of the Royal Canadian Mounted Police, to officers of the force in 146 Arctic and sub-Arctic posts to see that the Migratory Birds Act was obeyed by white men and Eskimos. He stated if there were a 5% decrease in the number of migratory birds in the next 30 years as there had been during a like period in the past, Canadians of the future would never see wild geese or ducks.

James Brown, of Montpelier, Vt., was chosen president. John Farley, of San Francisco, was elected first vice-president.

Michel Prudhomme

Ottawa.—A huge increase was shown in the production of nickel for the six months ending June, when it amounted to 40,253,606 pounds as against 22,760,201 pounds for the corresponding period of 1933, the Dominion bureau of statistics reported.

BANK GOVERNOR

Graham Ford Towers, assistant to the General Manager of the Royal Bank of Canada, son of the youngest of the Dominion's high banking officials, who has been appointed Governor of Canada's new Central Bank.

Cargo For Churchill

Livestock Pool And Wheat Pool To Forward Shipments On S.S. Brandon

Saskatoon Sask. Co-operatives will play the chief part in furnishing cargo for the second voyage of the S.S. Brandon from Churchill this year. The Saskatchewan Livestock Pool will furnish all the cattle, sending 350 head to the co-operative Livestock Society of England. In the hold will go a cargo of wheat from the Saskatchewan wheat pool, which may have the same destination.

The Brandon will leave for London or Liverpool during the latter part of September. J. C. Hackney, manager of the livestock pool said the pool will try to make the cattle shipment a representative one, drawing from northern Saskatchewan as from as many producers as possible who can supply first class quality. It is expected that there will be drawn chiefly from the Prince Albert area.

Stronghold Of Peace

Adolf Hitler Pledges Germany To Peaceful Measures

Berlin. Adolf Hitler again solemnly declared Germany to be the cause of peace. The new German ambassador to the diplomatic corps in the reichspresident's office met occupied by the reichsminister Von Neurath and fell the assembled envoys:

"The unalterable goal of my policy is to make Germany the stronghold of peace."

Indians Claim Rights

Mistassinis Tribe Attacks Small's Funds Improperly Spent

Prince Albert, man. Aged Chief George Dreaver, 79-year-old head of the Mistawasis Indians, testified in the exchequer court hearing of the band's petition of right here that an speeches made at the signing of the treaty in 1876, commissioners of Queen Victoria promised that medicine would be supplied free to the Indians on their reserve located west of here.

In their petition the Indians allege that the department of Indian affairs improperly spent $21,375 of the band's funds. Medicine and education, which they claim were to be free were charged against funds held in trust by the government for the band. Other expenditures for farm instructors' salaries, shoeing and head of horses and payment of treaty money to two women not members of the band were improper and without sanction, it is alleged.

Electric Lights In North

Mission Hospital Generates Its Own Electricity

Ottawa. — Encountering severe gales, ice, rain and fog, the steamer Nascopie, carrying the 1934 department of interior's expedition to the posts in the Canadian Arctic archipelago, continues to make progress on this season's patrol.

A highlight of the visit to Pangnirtung was the installation in the Anglican mission hospital of a plant for the generation of electricity, a donation by the family of the late Sir Edmund Walker, Toronto. The hospital was ablaze with light before the steamer left to proceed northward.

Would Stop Hasty Strikes

Chicago. Action aimed at preventing hasty calling of printers' strikes was taken by the International Typographical Union, in convention here. Delegates voted to change the union rule which required a strike vote of local members within 24 hours after his authorization by the executive council of the international, to allow the council discretion in fixing the time for a vote.

Germany Offers To Pay

London. — German importers of yarn, facing a complete shutdown at the source of supply, have offered to pay £250,000 owing to Lancashire cotton companies in 12 monthly instalments, it was announced. In the offer, it was declared essential that delivery of yarn to Germany recommence immediately.

MOTOR MAGNATE PREFERS BICYCLE

Recently Lord Nuffield (formerly Sir William Morris), famous British automobile magnate, stated that the best days of his life were spent on a bicycle and that for health and pleasure he still preferred to tour the country by that means. As a sequel to that statement the British Cycle and Motor-Cycle Manufacturers and Traders Union sent a deputation to Lord Nuffield's home at Cowley and presented him with a new bicycle. The picture shows the happy pair riding his new steed.

TELL OF HUGE PROFITS FROM WAR MUNITIONS

Washington.—The vast Du Pont corporation of Delaware was shown before United States senate munitions investigators to have done a war order business totaling $1,265,000,000 between 1914 and 1918 part of the profits from which went into General Motors stock.

Pierre Du Pont, member of the munitions manufacturing family, told investigators that $47,000,000 of the corporation profits were spent to buy one-fourth of the common stock of General Motors.

Three brothers Irenee Du Pont, Pierre S Du Pont and Lammot Du Pont and their cousin Felix Du Pont, were in the room.

The testimony brought out that Du Pont was the first United States company to receive great war orders. In the first year of the war, from September 1914, to September 1915, it received $265,000,000 worth of war orders from Europe. In all of 1915 orders totaled $823,000,000. During the year after the war the company's business amounted to only [illegible]

The end of the war brought a cancellation of $280,000,000 in contracts held by the Du Pont Company.

The Du Pont company issued a great change for us," said Pierre "a great change."

A report said the company showed a net loss of $10,001,000 in 1919.

Appeal For Unemployed

Legion Head Suggests Plan To Help Them Keep Confidence

Calgary A plea to all Canadians that efforts be made to prevent unemployed persons from losing confidence in themselves, their country and beliefs was made here by Brig.-Gen. Alex Ross, president of the Canadian Legion.

"It is only by proper application of sympathy and understanding we shall be able to help them back to normal life," declared General Ross, "and I can suggest no work more appealing to service clubs than the task of rebuilding these men into normal healthy citizens."

The Canadian Legion, General Ross continued, was studying a plan that would provide vocational and physical training for returned men out of work.

Export Of Food

Would Withhold Shipments To The Needy

Melita Man Reeves of 12 municipalities in southeastern Manitoba petitioned the Manitoba government to withhold export licences for feed into the United States until the needs of dried-out areas in the province are fully met.

It was estimated 32,100 tons of fodder will be required for livestock quartered in the southwest this winter. Practically no grain was threshed over a wide area.

Big Ben Is Furnished

Historical London Clock Has New Coat Of Paint

London Big Ben has had his faces washed and all dolled up with crimson paint and bright gold.

A drab and gloomy landmark when it was put in upside down yesterday, Big Ben reappeared in the same glittering finery as it did in the early nineties.

The gold is real gold, too, applied in the form of the thinnest of gold leaf.

Receives Appointment

Winnipeg Appointment of W. A. Mather, formerly assistant to the vice-president in Montreal, to be general manager of Western lines of the Canadian Pacific Railway was announced here by W. M. Neal, vice-president of Western lines. Mr. Neal also announced appointment of C. A. Cotterell, general superintendent of the British Columbia district, to the post of assistant general manager in charge of the British Columbia region including Vancouver Island.

Ships Of The World

One-Third Of Sailing Shipping Is Owned By Great Britain

The old song almost Britannia rules the waves is not so high flown just now. Still, there can be no harm in pointing out that, in a memorable year, the wave remains under Britannia's rule. Lloyd's Register of Shipping published for the 161st time recently set that by far the largest sh-ports in the world are the British and that of all the countries shipping to the world, one-third is owned by Britain.

At Havre the French Line is busy putting the finishing touches on the flagship of the new fleet destined for the transatlantic Queen Mary will immediately to the Clyde there to launch a 73,000-ton monster which in 1936 will take away the Normandie's crown of glory. The new queen will be the Victoria

Most of us remember when a 20,000-ton ship was an "ocean greyhound." They were called that at the turn of the century Lloyd's Register of Shipping reports that ships of this size on the world's oceans now number exactly 78. Of ships between 20 and 40 thousand tons there are more than two dozen.

Since 1914 total world tonnage has jumped from 45,000,000 to 86,000,000, with one-third of this, as said, within the British Empire. Next largest merchant marine belongs to the United States with 16,000,000, curiously, of 2,500,000 tons of Great Lake shipping. Japan and Norway follow with 4,000,000 each, then Germany with 3,700,000, then France with 3,500,000, then Italy with 2,700,000.

At the turn of the century one-third of the world's shipping was sail; the old "wind ships". the barque, brigs and brigantines remained. To-day all but 1,000,000 tons are either steam or motor. Before the war nine-tenths of all self propelled ships turned coal; to-day one-half burns oil. On sea, on land, transportation has been revolutionized.

Ottawa Journal

Have Difficult Task

Committee Of Twelve Members Seeking For Real "Quads"

The age-old endeavor to find a tangible, real dyed - in - the - wool "quark" is to be undertaken by a committee of distinguished scientists, philosophers and psychologists of the University of London which has been formed to investigate psychical phenomena.

This new committee, consisting of 12 members, will take over the work of the National Laboratory of Psychical Research, but it will not, however, be officially connected with the university.

Among the various "phenomena" to be investigated will be included telepathy, clairvoyance, automatic writing, psychometry (supernormal knowledge of the past history or associations of objects handled by a medium), poltergeists and other alleged mental and physical manifestations produced by so-called mediums.

Foreign correspondents for the committee, representing the United States, Britain, Dominions and several other European countries, are to be chosen to aid in the gathering of data for the study.

The committee hopes to receive the aid of the general public in obtaining data for the investigations, members explained that only with such co-operation will it be possible to elucidate those mysteries of the human nature which for nearly a century have been studied under the term "psychical research."

Substitute No Good

Customer - "I want to buy three potted gymnasiums."

Florist - "We have no geraniums but I can give you chrysanthemums."

Customer - "Chrysanthemums won't do. Those plants are to replace some geraniums I promised my wife to water while she was away.

Some species of moths in the American tropics measure almost a foot in wingspread.

The world's driest spot is a desert of 300,000 square miles in Chinese Turkestan.

W. N. U. 2004

RETURNS TO HIS ROYAL PALACE FOR FIRST TIME IN TWENTY-FIVE YEARS

When the Guards Brigade left London to take part in military manoeuvres Britain took over guard duties at Buckingham and St. James' Palaces for the first time for twenty-five years. Our main picture shows the 2nd Battalion Cameron Highlanders arriving at St. James' Palace where a huge crowd assembled to see the change over. Inset, a little roads guard orders during the change over at Buckingham Palace during the changing of the guard.

Taking Your's Vacation

Wife And Daughter Of Trading Company's Arctic Manager Had Long Trip

The chill winds and low temperatures of the Arctic won't frighten a thing this winter to Mrs. E. Paisley and her two-year-old daughter, June, who arrived in Edmonton recently to start a year's vacation from their home at Cambridge Bay on the northeast end of Victoria Island off the Boothia Peninsula.

It took them nearly two months to reach Edmonton from their northern home. They walked 10 miles along the rocky coast of Victoria Island with Eskimos carrying their luggage before they reached what sufficiently open to allow them to use an open boat with a kicker engine. Then they travelled for two days to where the Nigtik trading ship of Capt. Paisley, had been frozen in when caught in the ice last fall.

A storm was blowing as they sighted the vessel and they had to lay to until the winds abated. We were out of food and had to sleep on the rock in the storm, said Mrs. Paisley. "When we did board the ship we were held 10 days in the icepack before we could get away to Coppermine to take the 'plane to Edmonton."

They left their home on June 10, and arrived in Edmonton, Aug. 16.

Little June was born at Cambridge Bay in the Arctic circle on Feb. 22, 1932. Her father has charge of the Canadian Trading Company's Arctic post there, and shipped the trading ship Nigtik, meaning Wild Goose in Eskimo.

The nearest doctor and the nearest white woman to the Paisley's home are at Aklavik, 1,000 miles away. June plays with the Eskimo children and has apparently spoken more of their language than she does English.

Mrs. Paisley came from England to Canada when she was 16 years old. She met Capt. Paisley, then a non-commissioned officer of the Royal Canadian Mounted Police in Edmonton and married him in 1930 at Vancouver. Capt. Paisley accepted the post of Arctic manager for the trading company and with his bride sailed from San Francisco in their new home, a journey of seven months.

"Coal is $150 a ton at home," said Mrs. Paisley, "and in winter we wear Eskimo clothes made of sealskin with the fur next to our bodies."

All lumber, building supplies and fuel must be brought 1,500 miles to Cambridge Bay from Aklavik. Mail arrives once a year by the R.C.M.P.

The Greeks appear to have been the first to invent an alphabet in which the single sounds of their language, vowels as well as consonants, were expressed by a series of letters.

Dry cows and heifer or prize cattle are two general methods for curing meat.

Bones Are Visitors

Yesterday Congress Finds Them Of Mosquito, Chemist Declares

The mosquito has once more been identified as a leading "thief of the world," as the Irish would say. She, for it is the female mosquito that bites and poisons, has a long record of knavery to her discredit. Yellow fever is one of those terrible plagues the mosquito carries around. Malaria of various kinds and several other diseases not all of which are fully determined. These are for human torture.

Now comes the news that Mrs. Mosquito, not satisfied with afflicting the human species, has turned to the equines for her pleasure and gives them sleeping sickness at the end of her short proboscis. The identification has been made at a meeting in New York of the twelfth international veterinary congress.

It will scarcely be credited that one small mosquito can give a horse encephalopolomitis, but one jab of its astonishing surgical apparatus, consisting of lancets, saws, tubes, pumps and a medicine chest and case of ingenious weapons for getting under one's skin, combines it to plant the poison and the horse is no longer an asset, but a liability.

They call it sleeping sickness, and it attacks cattle and dogs as well as horses, for Mrs. Mosquito is no respecter of persons. No wonder her spouse's duty is Boredom, the bird of flies. He places death in her punctures.—Hamilton Spectator.

"Hour is it," asks a writer, "that widows always seem to marry again?"

It would be unkind to put forward the theory that it is because dead men tell no tales.

Information About Pillows

Goose Feathers Lighter And Softer Than Chicken Feathers

We spend at least a third of our lives in bed, and our comfort there depends much upon the kind of pillows we have, yet we ordinarily give little thought to their quality.

A good pillow will not pack down, when given a hard shaking from one end. If the feathers sink more than four inches from the end, that shows that the pillow was not filled sufficiently or is of poor feathers.

Goose feathers are much softer and lighter than chicken feathers and will not pack in a pillow but will remain fluffy with use. It is unwise for the housewife to give them a thorough shaking and punching up every time she makes the bed. This helps them to air out and to keep light and dry. It is a common opinion that white goose feathers are of better quality than gray, but the color makes no difference in the softness or endurance.

A high-grade goose feather pillow would weigh on the average about five pounds, while a chicken feather pillow of the same size would weigh about seven.

Chinese Corner

Will Act As Technical Adviser At Filming Of "The Good Earth"

Maj.-General Theodore Tu of the Chinese National government at Nanking, has arrived at Hollywood to act as technical adviser and "censor" to the film studio now making a picture of Pearl Buck's novel, "The Good Earth."

Tu's aid was solicited because of frequent complaints recently that American films do not correctly portray Chinese life.

Ancient Ruins Unearthed

Tanhet Was Once Capital Of Hassian Kingdom Of Ilak

The ruins of the ancient city of Tanhet, whence merchant caravans once travelled to trade with Persia, India, China and the Byzantine empire, have been discovered by Soviet archaeologists ninety miles from Tashkent.

Preliminary surveys have disclosed the whereabouts of the old palaces and market places of the vanished city once say the explorers a piece of white straight streets, broad squares and many reservoirs.

In the nearby mountains these have been discovered clay heaps and mine shafts sunk what since the ninth or tenth centuries, demonstrating that the principal wealth of Tanhet was in its lead ores.

According to Arab historians, Tanhet was once the capital of the Kingdom of Ilak, a populous town, surrounded by a thirty-foot wall. Remnants of this fortification have been discovered and more extensive excavations are expected to begin shortly.

The warm summer months are open season for Russian archaeologists and Tanhet is not the only recent discovery.

Near Nukus Tagh in the Turkis pile dwellings at least 2,500 years old have been found recently by an expedition from the State Historical Museum. In the houses were discovered sculptures of elks and other animals vessels in the shape of bird heads and a number of cars of rare workmanship.

At least as old, according to experts are a series of ancient Scythian tombs discovered near the village of Dalankir in Armenia by an expedition from the Academy of Sciences.

A good pillow will not pack down, when given a hard shaking from one end. If the feathers sink more than four inches from the end, that shows that the pillow was not filled sufficiently or is of poor feathers.

Goose feathers are much softer and lighter than chicken feathers and will not pack in a pillow but will remain fluffy with use. It is unwise for the housewife to give them a thorough shaking and punching up every time she makes the bed. This helps them to air out and to keep light and dry. It is a common opinion that white goose feathers are of better quality than gray, but the color makes no difference in the softness or endurance.

A high-grade goose feather pillow would weigh on the average about five pounds, while a chicken feather pillow of the same size would weigh about seven.

Immunity Of Pacific Ocean

More Extensive Than Whole Land Surface Of Globe

The immunity of the Pacific Ocean is seldom realized. Huge and terrible as is the Atlantic, its size cannot be compared with that of the same as a farm pond with Lake Ontario. The Pacific is enclosed in a hemisphere of water, and it is startling to think that, if the whole land surface of the globe could be fitted together like a jig-saw puzzle, the resulting continent would not be so extensive as this ocean! A few figures will show this. For instance, the well-traversed Atlantic route from Liverpool to New York is 3,060 miles, but from Yokohama to Valparaiso, a similar southern trend, across the Pacific, the distance is 10,000 miles. Across this ocean's narrowest part, namely, from Vancouver to Yokohama, is 4,300 miles. The Pacific stretches from the Arctic Ocean to the Antarctic Ocean, and contains seventy million square miles of area. In the Pacific are over 1,000 thousands of islands, some little larger than a farm cereal, and others which would be called large continents but are dwarfed by their situation.

As The Crow Is

The rector had invited the village boys to the rectory for a strawberry tea. After they had finished he said, seeking to point the moral:

"Now, boys, wasn't that nicer than breaking into my garden and helping yourselves?"

"Yes, sir," chorused the boys.

"And why was it nicer?" he asked a chubby-faced boy.

"Because, sir," was the reply, "we shouldn't have had any sugar and cream with them."

Unless the saintare is branded "whey butter", any butter which consists of whey butter and creamery butter or whey butter and dairy butter is not allowed to be sold in Canada.

The dog days of midsummer get their name from Sirius the dog star.

FANCIFUL FABLES

BABY'S OWN SOAP

THE TENDERFOOT

By GEORGE B. BONNEY

Author of "The Coronado Trail", "The Canyon Trail" Etc

CHAPTER I

When you tell me that you're going out to Cheyenne County to claim your half of the old Hourglass ranch, I tell you Mr. Keene that you're just asking for trouble."

Sumner Burwell first vice-president of the Drovers Bank in Cale, leaned back in his chair, spread his hands together and stared at his visitor. He took him in from head to foot and frankly liked what he saw. The he studied an open letter on his desk.

Your uncle was a good friend of mine, he said. "But he was very careless or unwise to make the will he did."

"What's wrong with that?" Gerald Keene straightened up in his chair and Sumner Burwell grinned at him.

"Don't carry a chip on your shoulder my boy. I'm not criticising old Peter Why, boy, I loved him. You and I lived many years in the West. He and old Carr were partners for years. It was quite natural that when Peter died he should leave the Hour-glass ranch to his partner, Jon Carr. But when he dragged you into the matter he only complicated matters. How long since you saw your uncle?"

"I never laid eyes on him in my life," said Keene. "He was my mother's brother and the family was widely separated. I happened to learn of the bequest quite accidentally. I had been in business in the Northwest and I happened to drop in at my old home. There I learned about the will so I got the letter from Judge Frame to you to identify myself. The old judge told me that you have always handled the ranch's business. That's so isn't it, sir?"

"It sure has," said Burwell. "There is no business worthy speaking of. You've got a half-interest in a big ranch that doesn't pay a dollar of dividends . . . and won't. Have you seen your uncle's will?"

Burwell did not wait a reply He went to a wall safe and came back with a slim document that he read mistechously. Accenting every word.

"You see, he left the Hour-glass equally to you and old Joe Carr and he provided that in case either shall die, the entire property passes to the other It's a queer sort of way to devise property. For more'n ten years old Joe Carr has tried to make a good thing of that ranch and this year he's only got deeper in the red."

for BURNS

Fifty second years of Mineral's Liniment. Keep a bottle handy. Rub it in. Relief is sure. Refuse substitutes. Keep on hand for 70 painful everything stings!

MINARD'S "KING OF PAIN" LINIMENT

W. N. U. 2004

"What odds him." Doesn't he know his business?"

"Oh, he knows his business all right There's not a better cattleman south of the Palisades You may as well know the worst at once, Mr. Keene. Old Joe drinks quite a bit He didn't always, but he does now I think that's one reason for his failure to make the Hour glass pay. He has lured there for years with his daughter He has an excellent manager in Frank Crews, but How, mind you, this is absolutely under your hat I believe, though to save my soul I couldn't prove it that the Hour glass ranch has been for years and is being robbed right and left by rustled and consistently lusted

"Hah" Gerald keen a gray eyes half closed and his brows drew it noted vaguely that they were shot with oblong hazel sparks "You're mad either a lot too much or too little Mr Burwell" he said in pleasant

And he bit his lip as he turned to the desk as Burwell lowered his voice Well" It began about five or six years ago when the men Sam Austin and Spike Goddard bought a lot of scrip that they put up and paid up a ranch below They called it the place the Broken Spur and it was steadily given over to rank underbrush. They didn't have the money good stock with old Joe Carr a record yet Herefd bulls on the open range All I really know is that his spirit developed between the two spreads I don't know what started but I do know that when a lot age Carr's herd Girton sheriff of Cressane County notified both ranches to pay off their men a different days The men was a against a bucket-point in a corral regular Civil War Anyhow old and busted hell out of his right leg That's when he began to drink, I suppose Goddard has up a great deal Not enough to keep him from ruin but enough to make him a keen man with cattle and with range and land and grass old Joe is getting deeper and deeper in bad water That's all I can tell you, that you're half owner in a big ranch and that, If you're not mighty careful, you'll have your head pulled under."

"Hah, Still I don't quite see If old man Carr is losin' money, who pays it out? Where's it comin' from"

"I've tried to tell you God help you if you try to keep old Joe Carr's head above water. He'll only drown you But your job'll be better than there you self, Mr. Keene, and take a look at things."

"Thanks. I'm going to do exactly that"

As Gerald Keene rose and took his hat Simon Burwell got a glimmering of what had narrowed in the glare and of a mouth that was almost straight above a full lower lip. The hovering vice-president grinned a little.

"I think my visitor will go far," he said to himself "I never even asked him what his occupation is Huh. A man used to selling bonds'll not learn much about a ranch. Low-grade Quality Frame evidently takes an interest in him And I'm well quit of the business." But he kept his grin to the long ride down and watched his late caller as he left.

A half-hour later Gerald Keene plunged through the door of a hotel room, slammed the door and gripped the shoulder of a man who was drinking in a chair by the window watching the world spin past between the toes of his boots on the sill

"Dave," he said, "you're in a mess right up to our hocks. I swear I don't see any answer to it" "His face fare it and his eyes twinkled "There are two men I despise and eyes that twinkle. These twinkled. There is a difference. One has humor; the other has none. Keene studied his friend for a brief moment.

"Shoot," he said.

"Well, I gave old man Burwell my letter of introduction and he told me all he knew about the Hour-glass ranch. It seems that by my uncle's will half the ranch is mine; the other half belongs to his old partner, Joe Carr. He lives on the Hour-glass with his daughter and has made a first failure of it. If either of us dies, the other gets the entire ranch . . . ."

"What could he tell you about your uncle?" demanded Stone.

"Very little; only that he was a lovable old fellow and that he was mighty fond of Carr. Oh! He told me, too, that two men, Dustin and Goddard, in the past few years have bought up a lot of 'scrip' and started a ranch next to the Hour-glass They call it the Broken Spur Burwell says old man Carr drinks a bit and is convinced that Dustin and Goddard have been systematically lootin the Hour-glass for years. You had about old man Carr's drinkin', last it."

"It sure is. You can reform anybody but a systematic drinker Go on"

That's all Burwell said therem a regular feud between the two ranches that reached the station of a Civil War on pay days I reckon old man Carr's been shootin off his mouth too much after a drinkin spell You know how it is This may a lot more than they ever started to say Could you find out anything"

A little While you were over at the bank I hunted up a man I know. You see, I used to work for the Lazy M in Nebraska They were a member of the Black rangers Association, an' that's a quirky bet on a cattle country Just because Nebraska went crazy over Free Silver's no reason her pony shouldn't be sane o spots Old Bo Lyon who was in the their attorney in practice here now I saw him straight I went to see him whose pay were with Burwell

Well go on

Stone thoughtfully rolled a cigarette and went on as though talking to himself

"His story was he's known Joe Carr since he was a pup He says that drunk or sober old Carr was straight as a total but that of your uncle's he's been up against hell back Just plain up against it About three years ag a pony skinned him and

"What's the matter with that the short sect us?"

"Oh, I said it hash smashed hundreds! funds."

"I CAN'T AFFORD TO RISK FAILURES DUE TO IMPROPER BAKING POWDER. THAT'S WHY I INSIST ON MAGIC. IT'S ECONOMICAL, TOO—LESS THAN 1¢ WORTH MAKES A BIG CAKE."

says MISS M. McFARLANE, Dietitian of St. Michael's Hospital, Toronto

MAGIC Baking Powder costs so little—and can always be depended on to give you uniformly good results. It actually takes less than 1¢ worth of Magic to make a big three-layer cake. So why take chances with inferior brands? Always bake with Magic and be sure!

MAGIC

"CONTAINING NO ALUM." "The statement on every tin of Royal Purchasers that Magic Baking Powder is free from alum is of very material importance."

Requires Drastic Action

Only Way To Solve Problem Of Highways' Peril

In Great Britian they put on a "safety-on-the-highways week." The result was that in that particular week 126 persons were killed and 3,505 injured, the second highest casualty list for British highways on record

The experience suggests that carelessness on the highways calls for something stronger than experiments in good precepts

The cold truth is that the only way a certain type of driver can have it impressed upon him that he must drive carefully is through the medium of a stiff fine and in many cases the cancellation of his license

One year of a most vigilant watch for traffic offenders with the offenders dealt with ruthlessly might prove more to solve the highways peril problem than all that has been written and talked about it these past ten years. Ottawa Journal

A Banker's Passport

Carries Engraved Portrait Clipped From Ten Dollar Bill

All passports bear a photograph of the holder but there is one properly authorized and issued to a Canadian without his photograph it carries an engraved portrait clipped from a $10 Bank of Montreal bill The holder's name is Sir Frederick William-Taylor, a director and formerly general manager of the Bank of new Montreal

The circumstances under which Sir Frederick clipped the bill and attached the engraving to his passport application are not known, but this well known Canadian exercised the usual caution attributed to bankers by retaining the serial numbers in order that the bill might be replaced by a new note. THE RHYMING OPTIMIST

By Aline Michaelis

LUPUS

Life would defeat us as we go by Yet, can she cheat us, though she try?

Though she forget the promises made,
Think of us we yet be wholly betrayed?

For all her scorning,
Of hope's night gleams,
In Youth's glad morning
He gets fair dreams.

She gave us laughter
And love's sweet cheer;
Then, what comes after
We need not fear

Though youth must perish
Its hour endures;
Brave hearts still cherish
Bright bygone lures.

Infantile Paralysis Vaccine

Canadian Research Worker Has Developed Vaccine For Dread Disease

Discovery of an apparently effective infantile paralysis vaccine was explained to 3,000 delegates and lay members at the closing session of the American Public Health Association convention.

Dr Maurice Brodie, young Canadian research leader formerly of Ottawa, Ont., now connected with the New York City health department, described recent experiments with the poliomyelitis vaccine which apparently has proved successful on a group of human volunteers, including Dr Wilbur H Park, head of the New York City health department research laboratories, Dr Josephine Baker, Brodie himself and number of children.

The Alberta honey crop of 1933 was almost twice as large as that of 1932 and was readily marketed at increased prices. As a result, owners of commercial apiaries in the southern part of the province report a fairly satisfactory year.

(To Be Continued)

Little Helps For This Week

"I have called upon Thee for Thou wilt hear me O God. Incline Thine ear unto me and hear my speech" Psalm 17 6

"To people poor cast your heart before Him God is a refuge for us." Psalm 42 9

Whatever the care that breaks your heart,
Whate'er the wish that swells thy breast,
Spread it before God that wish, that care.
And change anxiety to prayer.

Trouble and perplexity drive us to prayer, and prayer driveth away trouble and perplexity

Whatsoever it is that presseth thee go tell to thy Father, put the matte, into His hand and so shall get rid deal with ruthlessly. Ought to be more to solve the highways peril problem than all that has been written and talked about it these past ten years. Ottawa Journal

Way to Ease Headaches, Pain Almost Instantly

METHOD OFTEN RELIEVES NEURALGIA AND RHEUMATIC PAINS IN MINUTES!

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin

Millions have found that *Aspirin* eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

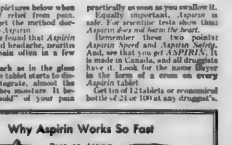
In the stomach as in the glass here, an *Aspirin* tablet starts to disolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain practically as soon as you swallow it.

Equally important, *Aspirin* is safe. For scientific tests show that *Aspirin does not harm the heart.*

Remember these two points: *Aspirin Speed* and *Aspirin Safety.* And see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast



IN 2 SECONDS BY STOP WATCH An Aspirin tablet starts to disintegrate and go to work.

What happens in your stomach when an Aspirin tablet starts "taking hold" of pain is how amazing after taking.

When in Pain Remember These Pictures

— ASPIRIN DOES NOT HARM THE HEART —

Thursday, September 23, 1915

New homes are being built for Chester Wing and John McLellan.

Mrs. Mooney and Mrs. Opfergelt-Collins were hostesses at a patriotic tea last Friday at the home of Mr. James Harvey.

Miss Jessie Motherwell of Granney Lake, has succeeded Miss Bess as book-keeper at Gordon & Dalzue's.

Members of the congregation of St. George's Church presented a very handsome solid silver cake stand to the Rev. Gerald McComas and his bride on their return from their honeymoon.

A potato top six feet in length was brought to the office last week by Art Greenlees.

Mr. and Mrs. Wm. Corbett are occupying Mr. D. Harper's residence for the winter months.

"The Observer"
(Continued from page 1)

But has the Quebec premier considered to what extent the strong public support which our courts enjoy is to be attributed to the perfect confidence which our citizenry feel in the perfect fairness of our present system. The public mind is absolutely assured that the suspected man will be given fair treatment, and in that confidence the public gives the enforcement of law its whole hearted support. Law enforcement in fact is impossible without that support. It is worth considering whether it will be strengthened or weakened by any proposed change.

The ideal home of man, as depicted in the Revelation of St. John, is not a sweet rural country but a large and splendid city—full of pleasure grounds and trees and with a clear broad river. The tendency of present day city plans is to "spread the city over the country" or in other words to make a garden city full of open spaces and recreational centres. It is not unreasonable to expect, to give the idea a local application, that the city of Edmonton may spread along this river or out towards St. Albert in a succession of loosely connected village communities, and that in the Edmonton of fifty years hence the Fort may be a suburb.

FORT SASKATCHEWAN RECORD

VOL. 13 : NO 35 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, SEPT 26th, 1934 $1 to PER YEAR IN ADVANCE

Town Council Hold Regular Monthly Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held on Wednesday the 19th. instant at 8:00 p.m.

Present Mayor Montgomery, Councillors Watt, Graham, Poirot and Gaul.

The minutes of the last meeting held were read and adopted.

Mr. F. M. Baker interviewed to the Council a delegation from the Boy Scouts and one from the Town Band. They asked for the use of the north room of the Memorial Hall upstairs, and asked for the privilege of changing from the Town Hall. It was pointed out that the room would be needed for about 4 nights a week between them, the two organizations to furnish their own fuel and light. The Council heartily agreed to the request.

An application to rent a vacant town house was not approved because the building had been condemned by the Medical Health Officer.

An application under the Relief settlement plan was considered again by the Council, but was not approved.

Tenders for coal were opened and the following awards made:—
25 tons, more or less, Bush mine run lump at $3.75 per ton to Glover & Graham, and 25 tons, more or less single screened coal from Ostervelt mine, at $4.75 per ton to J. F. Etherton.

Tenders for 50 Sanitary Buckets opened and that of the Fort Hard ware Co., at $1.65 each being the lowest, was accepted.

The following accounts were passed for payment:- McMurray Asphaltum & Oil Ltd., sidewalks, $457.23; The Record, $3.80; Glover & Graham $14.80; F. Etherton work on streets $12.80; Beaver Lumber Co., $69.40; W. A. Graham $1.30; Labor on sidewalks $17.06; Calgary Power Co., $135.20.

RE-OPENING OF VERMILION SCHOOL

Definite announcement of the re-opening of the Vermilion school of agriculture, on October 29, was made by Hon. F. S. Grisdale, minister of agriculture. The school at Olds will also open at the usual time this fall. The Vermilion school will draw pupils from the Peace River country south to the Canoroe line of the C.P.R., while the Olds school will draw from the balance of the territory in the province.

The price of bacon for the domestic and overseas markets depends on volume which must be maintained at a normal flow.

Car of Vegetables Promised; Possibility of Another Car

The following letter will give an idea of how the car of vegetables shipped from Fort Saskatchewan to Shannon in the drought area in 1931, was appreciated.

Shannon, Alberta.
October, 19th, 1931.

J. Ritchie, Esq.,
Fort Saskatchewan,
Alberta.

Dear Sir:-

I beg to advise you that the car of vegetables donated by the generous people of Fort Saskatchewan, farmers in the District and the Provincial Gaol, arrived here in good condition, and were distributed to the people of our district under my own supervision.

There were 123 families supplied, with an average family of five. It is a long time since I saw so many smiling faces in town.

I can assure you that your valuable donation has been very much appreciated. Not one family in the whole district had sufficient vegetables, in fact the majority only had a few, on account of the drought.

Kindly convey to the Donor's our warmest appreciation for their kind gifts, it has brought comfort to a great many homes. Perhaps at some future time we may be in a position to express in a more tangible form our deep gratitude.

Again thanking you,

Yours very truly,
R. Burton, Sec.-Treas.

American Boat Retains Much Coveted Trophy

The "Endeavor", the British entry for the sailing trophy of the world was defeated by the American ship "Rainbow" on Tuesday, making it four to three wins for the latter ship, which will continue to hold the cup.

It is unfortunate that the Endeavor was unable to lift the trophy this year, especially after having demonstrated its superiority in the first two races.

After many days of inclement weather, Tuesday and today turned out to be very excellent drying days, and some farmers have started to thresh. The grain however is still tough and would do no harm to stand till the week-end before threshing.

If present weather conditions hold, threshing will be general throughout the district by Saturday.

Fort Tennis Club To Hold Dance on Friday

A large crowd is expected at the Fort Tennis Club's annual dance this Friday in the Rabenstein Hall.

Dancing to suit both young and old have been arranged, and dancers are assured of excellent music.

Refreshments will be served, after which the presentation of trophies and prizes will be awarded to the winners in the recent tournament.

Unfortunately, the men's doubles and mixed doubles were unable to finish the tournament, and unless the games can be played off before the night of the dance, no doubt the events will be held over until next season.

Throughout the entire season, tennis was interrupted by unfavorable weather, and consequently the tournament was greatly delayed.

United Church Bible Classes Honor Leaving Members

Over one hundred young people, under the auspices of the Junior and Senior Bible Class of the United Church, gathered in the Memorial Hall in honor of Jean, Stewart and Menzies Ramsay, who are leaving shortly to reside in Edmonton.

Mr. and Mrs. F. Baker acted as host and hostess to the young people.

The young folk began to gather about eight o'clock and participated in dancing till 12 midnight.

A lovely buffet luncheon was served in the dining room where Mr Art Stinson, president of the Senior Bible Class, presided as toastmaster of ceremonies.

Rev. D. C. Ramsay, Mr. Art Stinson, Miss Muriel Kelterborn and Mr. and Mrs. F. Baker sat at the

Following the luncheon, the toastmaster, in a few well chosen words thanked Mr. Ramsay for his contribution and assistance in building up such a successful Young People's Bible Class. He concluded by Presenting, on behalf of the Senior and Junior Bible Classes, a lovely Waterman's pen as a token of respect and remembrance from the Young People. Stewart Ramsay was also presented with a Waterman's pen.

Miss Muriel O'Brien, on behalf of the Senior Bible Class, in a suitable manner presented Jean with a brass net bowl as a token of remembrance.

Mr. Stan Hambly presented to Menzies Ramsay from the Junior Bible Class and young friends a Waterman's Pen as a token of friend ship.

Mr. Ramsay replied very suitably; expressing his thanks for the gift and for the co-operation of his class in making the organization a success.

Jean, Stewart and Menzies were allowed to reply individually, which they did in a very concise and pleasing manner.

Mr. Baker then addressed the Young People expressing a welcome to all to join the class.

Toasts were then made; to the King; to Mr. Ramsay and Family.

The orchestra composed of: Miss Rita Sherman, Miss Margaret Kelterborn, Mr. A. Smith, Mr. Mel Stackhouse, Mr. Alf. Fry, Mr. Orvil Kelterborn, Mr. Wilfred Lamoureux, and Mr. Albert Underwhats, are to be congratulated on their contribution to the enjoyable evening.

WHEAT POOLS TO GIVE RADIO TALKS THIS FALL

The three prairie Wheat Pools will co-operate in presenting a series of 13 radio talks during the fall months, the first to be given on October 3rd when Louis Brouillette, president of the Saskatchewan Wheat Pool will be the speaker. These talks will be given on Wednesday evenings from 8:15 to 8:30 Mountain Time, the Alberta stations being C.F.C.A., Edmonton Journal, and C.F.C.N., Voice of the Prairie, Calgary.

INCREASED POOL INITIAL PAYMENT ACT

The Alberta Wheat Pool announces that commencing October 1st wheat placed in the 1934-35 pool will receive an initial payment based on No. 1 Northern, Vancouver, of 90c a bushel. The posting of wheat, of course is entirely optional with the growers. Those desirous of placing wheat in this pool should see the Pool Elevator agent.

Boy Hurt When Dynamite Cap Explodes

The eight-year old son of Art Irwin, Partridge Hill farmer, met with a very painful accident last Sunday afternoon, when he found a live dynamite cap in the woodshed, and exploded same by pounding it. The form of the explosion blew off parts of three fingers and bruised other parts of his body.

Dr T. W. E. Henry was summoned and rushed the injured lad to an Edmonton Hospital.

He is reported to be doing as well as can be expected.

JOSEPHBURG NEWS

The Josephburg Reformed Church will hold Service next Sunday afternoon at 2 p.m. Rev. Wolff of Bruderheim will have charge of the service.

After the service choir practice will be held.

Is This Real Sport?

The international yacht race for the America Cup between the British challenger "Endeavour" and the United States defender "Rainbow" is the subject of innumerable newspaper and magazine articles surveying the history of this famous Cup and setting forth facts and figures indicating the vast expenditure of money and effort on the part of the multi-millionaires who alone can afford to indulge in this sport. This yacht race is but a money-making venture on the part of those who engage in it; quite the reverse. No gate admission can be charged, and the spectacle is free to all those who can get within sight of it.

But the cost of building even one of these yachts and financing it during the brief time used the short race period runs well over a million dollars, and with several boats involved, the actual total cost is staggering. Is it all worth while? Are such huge expenditures of money for such a purpose justified at any time, and particularly at a time like this when millions of people in the two countries concerned are in need of the bare necessities of life? Are those who devote their wealth to such a purpose real sports, and are they making any actual contribution to the well-being of their fellowmen?

What is real sport? What is, or should be, its aim and object? Real sport, if we understand it aright, should provide recreation from the everyday toils and worries of life, and it should, therefore, be for the many, not for a select few, but by the masses. Secondly, its aim should be the development of the physical well-being of all who engage in it, coupled with the inculcation and development of those traits of character which recognize and foster upon fairplay, respect for a competitor, observance of the rules of the game whatever it may be, acceptance of defeat with good grace and a smile, and of victory with a becoming modesty.

If this is a correct definition of real sport, then it should never become a mere money-making enterprise in any of its branches. As a matter of fact, when it develops into a money-making enterprise it ceases to be sport in its true sense and becomes a business with great revenue and profits as the main objective, while all the principles underlying real sport are sacrificed to shill.

Unfortunately, much of the so-called sport of to-day has degenerated from the ideal of amateurism to professionalism, from love of the game to love of the dollars that may be earned. It is no longer sport or recreation, but a cold, competitive business.

This has long been true of baseball in the United States. Tens of thousands of people pack the stands to watch eighteen highly trained experts "play" ball. These thousands cheer themselves hoarse for the "home" team, although not one of the "players" may be a native son or even a resident of the home city, but imported men from anywhere simply because they have the knack to enroll in a certain position on the baseball diamond. Such is the great national game of the United States; but it is not sport. It is nothing but a business highly organized, to the nth degree to make money for the owners of the franchise and their high-salaried ball-playing employees. Instead of the thousands of spectators being benefited physically or otherwise, the reverse is true; they ought to be actively participating during these leisure hours in some health giving recreation.

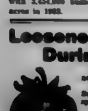
In its heyday, lacrosse, the old national game of Canada, was on something of the same order. Professionalism crept in, and Canada's national game died. Canada's great winter game, ice-hockey, is travelling the same road, thanks to the adoption of the game by the United States and the invasion of the so-called sport magnates with their offers of large salaries to expert hockey players. Professionalism makes inroads into football, golf, tennis. Only a few games, curling, for instance, remain free of the taint.

What and who are responsible for this deterioration? First, the money grabbing instinct of man. Secondly, universities and colleges to a considerable extent. Large universities pay extravagant salaries to so-called sports managers and trainers, not for the purpose of developing the physical well-being of all members of their student bodies, but to build up a championship crew or team in the varied departments of sport to carry the college colors to victory and thus advertise the university and command the consideration and ultimate enrolment of youth from all over the country. It is no longer sport in its truest sense, but a business proposition with such institutions.

With but few exceptions, people love sports. Practically every child likes to play games. It is a natural born instinct, and it has its place, and a big place, in the physical, mental and moral development of youth. But it is being perverted to great material ends, with the result that sport in its real sense is largely lacking in the large centres of population. We must go to the small towns, villages and rural communities to find games and sporting events engaged in by the masses for the intrinsic love and joy of the game. Sport in its true sense and meaning is the ideal of the clean, encouraged everywhere, but it is time a halt was called to professionalism in sport, and to its twin evil of making proficiency in any one branch of it the end-all of one's existence.

Fall rye in Canada, as at August 1. The number of sheep in New Zealand, 1934, shows a yield of 5,239,000 and as shown by the returns on April bushels from 467,000 acres, compared 30, 1934 are 30,555,779, an increase with 3,454,000 bushels from 434,000 of 900,000 compared with the corresponding date in 1933.

Looseness Of the Bowels During the Summer Months



It is seldom, during the summer, that most people are not troubled with some degree of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly.

Do not experiment with a new and untried remedy, but take Dr Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 65 years.

Be on hand always a reasonable supply. Be sure and get "Dr. Fowler's" when you ask for it.

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Prince Assisted Miners

Worked Shoulder to Shoulder Mine On Welsh Hills Was Self-Supporting

The Prince of Wales went down a fourteen-foot coal mine that came to life close to the spot where a coal mine had died.

There is a human story behind this "new coal field for an old one." The prince heard it from one of the dumpily West of England colliers who conducted him round the mine.

Thirteen years ago a coal mine at Farrington Gurney closed down. Three hundred men were thrown out of work. They were idle and forced to go on the "dole."

Three years later, determined to make work for themselves, a small band of them applied to the Prince of Wales for a concession to dig close to the dead coal field. It lay on the prince's land, as it still does.

The prince lent a sympathetic ear to the colliers' plea. He told the men they would never any royalties until the mine was self-supporting.

The men set to work. After deep enervating they struck coal. Every day's output made the prince happier how the mine was working.

Now the mine is paying for itself and is in full-fledged management; one hundred and thirty-five tons of household coal are raised every day. And the Duchy of Cornwall is receiving its due.

The prince received a royal visit came from the black-faced colliers

Then he disappeared half a mile under the ground for a quarter of an hour and watched the men dig for coal. He reappeared in his bright black from the low corridors where he had been almost double

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

He had run his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong. Read what he says:

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am now beginning than a young man to-day. Thanks, many to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But now for nearly a year I have a day sometimes. Kruschen Salts have done it." J. J.

Rheumatic conditions are the result of an excess of uric acid in the body. Five of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channel. In addition there are still other aids in Kruschen which prevent food fermentation in the bowels and thereby check the further accumulation of not only of uric acid, but of other body poisons which undermine the health.

Preparing For Trip

Duke Of Gloucester Studied Books On Australia

A tall, fresh-complexioned, well-tailored young man in brown tweed hat and brown shoes was exploring an Oxford-street book shop in a recent morning.

He had found his way to a large collection of books, some old but most of them recent, dealing with Australia and the South Seas Empire. From the way he went about the collection, with one of the assistants, studying maps and pictures of certain countries, it was clear that he was either a student or a traveller preparing to go on a long voyage, or both. As a matter of fact he was both. It was the Duke of Gloucester. Evidently he was making a careful selection of books to prepare himself for the long journey to Australia.

Difficult To Replace

Substitution of other forms of revenue for the tariff as a source of national income would be difficult in Canada, Hon. George H. Sedgewick, chairman of Canada's tariff board, declared before the maritime conference on Canadian affairs held at Halifax.

Of 30,000 insured workers in Luton, England, only 700 are out of work.

Cook's Home Rebuilt In Australian Park

Knew Ivy Taken To de-luxe Home With Explorer's Cottage

Packed in 232 boxes and tins posted by Sir Hubert Wilkins, Cook's cottage was taken through the streets of Melbourne Australia on its arrival by the steamer to the Fitzroy Gardens, where it is being re-erected in connection with the centenary celebrations.

Everything about the Yorkshire cottage has been preserved with amazing thoroughness even to the creak on the staircase, as one of its married Sisters for the stills and stones for the floor, joists, rafters and beams have all been marked and numbered.

A bag has been forwarded containing the original mortar with which bed brick and stone together, also a bag of nails which will not be in such use for hammering in, but interest ing as showing the type used.

The ivy alone will not be replaced in its original state The quantities necessitate removal of the foundated as a potential bearer of diseases. In exchange for the cottage Cook's birthplace, Great Ayton, Yorks, is to be presented with a club modelled on the monument commemorating his discovery of Cape Everard.

Lignite Coal

Development Of Coal Field in Saskatchewan Carried On Successfully

Development of high moisture lignite coal seams in southern Saskatchewan, which are located a considerable distance to the east of other fuel sources of Western Canada, has been carried on successfully throughout the depression years, R. L. Rutherford, commissioner of the Saskatchewan Coal Operators' Association, told the western meeting of the Canadian Institute of Mining and Metallurgy at Calgary.

"The increase in production in the Saskatchewan field and use in recent years, during the general trend of production has been downward," he said, "has been due in part to economic conditions and in part to improved preparation at the mines."

The more densely populated sections of Saskatchewan and Manitoba, he said, offered a wide market for the southern Saskatchewan fuel

Skating Rink On Glacier

James Simpson, guide, naturalist and artist, has scraped smooth the surface of a glacier lying between two mountains near Banff, Alberta, to make a summer skating rink for his husky daughters, Mary and Margaret. He said skating on glaciers will be common in a few years.

Nessus coins were minted in the temple of Juno.

A Review By Means Of Allusions

To what does each allusion belong refer.

And the night of the Gentile was made by the sword.
Hath melted like snow in the glance of the Lord.—Byron

Up, Christians, leave your caves and do!—F. B. Meyer

Let each one ask himself whether he is seeking to please God by doing justly, loving mercy, and walking humbly before him, whether he is on the side of God and of the things which are pleasing in God's sight Broden F. Bowne

With the cords of a man Jesus is drawing men, in the bands of love by binding the world together."

When the bowl drives up, the word of the Lord often comes to men Where he withdraws his gifts it is that we may see himself.—F. Stuart Holden.

There is much splendid work of this kind done by the Friends. But it is likely to be missed by those who despair of the Kingdom of God There are a host who have not bowed the knee to Baal."

What asks our Father of his children, save
A reasonable service of good deeds,
Pure living tenderness to human needs,
Reverence and trust, and prayer for light to see
The Master's footprints in our daily ways?—Whittier.

I see the oil of thy Word will never have increasing whilst any bring an empty heart.—Thomas Fuller.

"Let justice, unimpeded by avarice of selfishness or cruelty, roll down as waters."

In the three Prairie Provinces on August 10, 1934, the estimated average abstood a decrease of 1,581,000 acres, or 7.5 per cent. in wheat, a decrease of 70,000 acres or 2.3 per cent. in oats, and an increase in flaxseed of 17,500 acres, or 7.4 per cent. Oats increased by 170,000 acres or 1.9 per cent., and rye also increased by 140,300 acres, or 28.7 per cent

"It Helps Me!"

That's what 96 out of 100 women say after taking this medicine. It quiets quivering nerves, gives them more energy, before and after childbirth, calms them over Change of Life . . . makes life seem worth living again.

Labor Saving Inventions Lead To Freedom From Soul Destroying Toil And Much Routine Work

If science is to be blamed for all the ills that have been mankind in into years including soul-shattering war then science will accept the blame but it will short, assuredly has given man control over nature, before he has gained control of himself

Sir James Jeans, eminent physicist, stepped out of the field in which he is one of the world's foremost leaders, to speak on behalf of science at large when he delivered the presidential address at the British Association gathering in Aberdeen

No doubt, said Sir James a large part of economic depression and unemployment results from wars, national rivalries, tariff barriers, and other causes which had nothing to do with science But a residue must be traced to scientific research which produced labor-saving devices which in times of depression were only too likely to be welcomed as wages-saving devices and to put men out of work

Science gave rich gifts to the community, labor saving inventions which displace labor, more fundamental discoveries which may ultimately lead to new trades and new popular demands providing employment for vast armies of labor The former had in consequence from mind-destroying toil and routine work, to greater leisure, the latter to the comfort and pleasures, health and wealth of the community.

"If a perfect balance could be maintained between the two, there would be employment for all, with a continual increase in the comfort and dignity of life," he declared.

But trouble is bound to arise if the balance is not maintained and a steady flow of labor-saving devices with no accompanying steady flow of new industries created will lead to unemployment and chaos in the field of labor

"Unhappily no amount of planning can arrange a perfect balance For as the wind bloweth where it listeth, so no one can control the direction in which science will advance The investigator in pure science does not know himself whether his researches will lead to labor-saving device or to a new industry

Crop Testing Plan

To Try To Improve General Quality Of Wheat Grown In The West

During the past three years the Cereal Division of the Dominion Experimental Farms has been interesting itself in a scheme which is known as a "Crop Testing Plan". The main objective of this plan thus far has been to step up" the general quality of the wheat in the Prairie Provinces by growing in small lots samples collected by elevator agents from farmers' fields as it delivered to them with a view, first, to ascertaining the names of those farmers who would be encouraged to secure better seed stock, and, second, to obtain for these farmers information as to the nearest points at which such stock might be obtained. In 1933 the wheat grown by over 3,000 farmers was checked according to this plan and it was found that over 60 per cent. of these farmers were growing grain which they should not use for seed. Extension of this plan is being extended on a comprehensive scale in the West this year and is being tried out in certain districts in the East.

Always Very Near

Happiness Can Be Found In World About Us

True happiness can never be founded upon falsehood. The profits of lying are much over-estimated. It pays to be true. At least we shall be at peace with ourselves. Where is happiness? It is to be found in the world all about us, in the stillness of a summer night, in the pride of a good thing done, in the flash of a summer dawn, the following of an ideal, the strong grip of a friend, the perfect heart of a rose, or the wild sweetness of a song It is always very near.—Dame Nellie Melba.

Trans-Atlantic Air Service

Canada Looking Forward To Possibilities Of New Airway

Hopes of a trans-Atlantic air service to have an adequate air system of its own and looks even beyond the transcontinental system the new air way will inaugurate to a trans Atlantic mail-carrying line The first step will be a $1½-day plane and steamship service from Montreal to London. The step thence gained in such a service it is believed, will lead in good time to a trans-Atlantic mail service Along one of the three routes across these possible the two shortest of which touch Canada Phila delphia Bulletin

Envious Of Dry Areas

B.C. Blighted Claimed To Be Weakest Spot In America

Reports of continued heat waves and droughts in eastern and central Canada are read by residents of the district of Headman Lake B.C. with a faint feeling of jealousy

This is the wettest spot in British Columbia and one of the rainest in the world

This doubtful title has been held by Henderson Lake on the west coast of Vancouver Island, just east of Pipesters Inlet off Barkley Sound for many years.

F. Napier Denison superintendent of Dominion meteorological observatory, just released another batch of statistics which if those who can read such things that about two thirds of an inch of rain has fallen every day during the last 12 months The lake-head is located at latitude of 366 26 north, 126 west. This more than its longer average of 230.13 inches The precipitation is made up of 213.72 inches of rain and 122.5 inches of snow the latter making up to 12 inches of rain.

All The Same To Her

Mrs. Sylvia Watt resident of Lac Seul, Kenora district writes:

To the county clerk office where a would rush in a hurry to have the and the county's license of $10 The clerk said that the county was for dead wolves, so Mrs. Watt stepped out of the courthouse, climbed the wolf rub with a hammer.

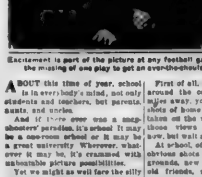
The SNAPSHOT GUILD

School Ahead! Pictures, Too!



Excitement is part of the picture at any football game. It's easily worth the missing of one play to get an ever-cherished shot like this!

ABOUT this time of year, school is in every body's mind, not only students and teachers, but parents, aunts and uncles.

And if there ever was a snapshooters' paradise, it's school! It may be a one-room school or it may be a great university Wherever, whatever it may be, it's crammed with absorbable picture possibilities.

Yet we might as well face the silly fact of the matter—few snapshooters make the most of school picture shooting opportunities.

Perhaps they are dazzled by the very wealth of the material at hand Move lively, they assume that somebody else is going to take the pictures. And that's a fatal mistake For nobody else can see things as you see them, and it's what you see that means most to you—and to the folks at home, now or years from now

The question, then, is how to make the most of school picture possibilities. A little planning will do the trick

First, shoot the right camera for school Any camera will do, provided it is even used in good order and once a size of film that is easily available anywhere. If yours has a fast lens and a fast shutter, you'll have an advantage in taking shots at sporting events, but such a camera is not at all essential. With a little care you can make even the simplest box camera turn out entirely satisfactory pictures.

Then, how can snapshooting be planned? All of it, of course, cannot be planned, but many of the most important shots can be. Why not work out a season's Hollywood fashion?

First of all, whether school's just in still a good idea to avoid "posed" pictures as much as possible. People standing up in a stiff line, gazing intently at the camera, simply don't look comfortable, that's all. Catch them at leisure moments, as they perch on the school steps or lounge on the lawn.

A really good collection of school pictures is hard to find, so any school year-book editor will tell you. Yet there's nothing much easier to take, and few snapshots increase in value, year after year, as surely as those taken at school.

JOHN VAN GUILDER

Committee Looks Forward With Hope To Time When Empire Emigration Can Be Resumed

Good Roads Association

Minister Of Highways For Prince Edward Island Is Elected President

Hon G Stanley Sharp minister of highways for Prince Edward Island was elected president of the Canadian Good Roads Association at the annual general meeting of the 21st annual convention held at Murray Bay Quebec

Third vice-president, Hon T. D. Macquarrie minister of highways Ontario

Secretary-treasurer Geo A. McVannee Montreal

A committee planned up-to-provincial and municipal authorities to construct sidewalks or footpaths along highways in congested areas It was also decided to memorialize the Dominion government to re-establish the fund for the elimination of grade crossings.

Next year's talk behind your back

No wonder I am sad

To Canada for ten pounds—or $50—is one of the aims of the British committee which has been delving into the question of emigration again

The committee whose members attended extension to include the road rate in three areas, namely

416 to Montreal and east of Montreal 412 to Winnipeg and east of Winnipeg to Montreal 414 to west of Winnipeg

The present rate of Canada for Quebec is 417 and five shillings.

The committee proposed the cost of the reduced rate should be equitably shared between the United Kingdom and the Dominion governments, and, of any private organizations concerned

In no case should the United Kingdom's share exceed 50 per cent., it was decided.

The report generally looked forward with hope to the time when empire emigration could again assume its normal course but it frankly recognized that with the present situation and the prices for agricultural products obtaining, settlement for the time being on any large scale is out of the question

Migrants if they are to live must be able to sell what they produce in order to buy what they need The combination of the marketing of most agricultural commodities at the moment is however such that even a comparatively slight additional production might well bring the level of prices below even their present unremunerative point and thereby bring disaster to a far larger number of persons than the settlers themselves said the report For these reasons as a general regard the encouragement of any considerable scheme of migration at the present time as out of the question.

The report recommended "it would appear to follow that the United Kingdom government can give no greater or more direct assistance to emigration than by assisting to create increased markets in that country or elsewhere for the Dominions produce thereby breaking the vicious circle whereby low returns to the producer and the low purchasing power of this country result from and are caused by one another"

Under the best conditions, the report held a great settlement could not account for more than 10 000 settlers a year at a cost of $1 000 per settler. Whereas settlement at the "ordinary" kind in the past accounted for 150 000 to 200 000 yearly at a cost of $75 per person. The committee thus gained little hope from the greater expense

On deportation, the report observed "The migrant should in our opinion be liable to deportation only within a period say three years after his arrival, and within that period deportation should only take place where the settler becomes a public charge for reasons personal to himself not for reasons applicable to the whole community in which he settled."

"As regards persons who become public charges from physical causes we would suggest that the period at the request of the person concerned."

Every endeavor should be made to arrange with the Dominion government to extend the nomination system to cover all classes of emigrants preceding that to Canada, the report said The "boarding-out" system for children should be resumed under defined safeguards

---

Workers Could End War

Refusal of the workers to obey the call of the war lords of any country is the only way to frustrate war, John Marchbank of London, England, told the Trades and Labor Congress of Canada at their convention at Toronto. All wars are capitalist wars, he said, and whether it is the country of the victor or the vanquished the workers suffer on every occasion

WORLD HAPPENINGS BRIEFLY TOLD

Col. H. E. Bank, Royal Canadian Artillery, will be transferred to Regina as district officer commanding military district No. 12, with the rank of brigadier. It was announced at the department of national defence.

Traffic earnings of the Canadian Pacific Railway Company for the week ended Sept. 14 totalled $2,942,000, an increase of $486,000.

Jeffrey Arnett, assistant purchasing agent of the Canadian Pacific Railway, has been promoted to the post of assistant purchasing agent with headquarters at Vancouver. R. W. Roberts, general purchasing agent, Montreal, announced.

The cost of living in England increased by one per cent during August, the Labor Ministry Gazette stated. Taking July, 1914, as the average, the cost of living index was 148 per cent on September 1 compared with 143 on August 1. The index stood at 141 in September, 1923.

Full freedom for civil servants to participate in politics, even to the extent of being a candidate in the federal, provincial or municipal arenas through leave of absence without pay, will be sought during the coming session of parliament by the Amalgamated Civil Servants of Canada.

Grave fears as to the survival of the French-Canadian race as a distinct entity on Canadian soil are felt by Mayor Camillien Houde, of Montreal. Speaking at a ceremony to commemorate the arrival in Canada of Jacques Cartier, Mayor Houde questioned the likelihood of the race's survival.

The weekly illustrated paper, "Canada", published in London for the past 37 years, is being merged with another weekly, the "Canadian Gazette". The editor and founder of the former publication, Walter Lefroy, closes 37 years of prominent association with Canadian news work in London.

Little Journeys In Science

GOLD FROM THE SEA

(By Gordon H. Ould, M.A.)

Science has shown that there is gold in the sea, but the authorities on this subject now in dispute as to the quantity. Figures given indicate that there are about 700 cunces of the precious metal for each of the two billion inhabitants of the earth, which would amount to $20,000 per person if gold is valued at $35 per ounce.

It is easy wonder then, that ever since chemistry became an exact science plans have been proposed to mine this wealth from the sea." One famous scientist lured by the idea was the late Dr. Fritz Haber, who was awarded the Nobel prize for his method of producing ammonia gas from the air. He found such small amounts in sea water that he concluded the idea was impractical. In his opinion there is more gold on the living organisms of the sea than there is in the sea water.

Recent developments seem to indicate that the chemist of the near decade may be able to extract gold from sea water commercially. This is based upon the fact that a plant has been built in the United States for the extraction of bromine from the ocean.

Bromine is used in the production of ethyl gasoline and hence is in great demand. A few years ago chemists turned to sea water for bromine and found that it contained only seventy parts of bromine in a million of water. Very large quantities of water must be treated 2,000 gallons to obtain a pound of bromine.

It is easy to see why scientists talk so confidently of securing gold from sea water when it is only worth twenty cents a pound whereas gold is valued at about $35 an ounce. Then, in spite of the fact that there is much more gold than bromine in sea water, a worker in hopeful of mining gold on a commercial scale from the ocean. It has been estimated that the gold content of a water is about $30,000,000 a cubic mile.

WHAT DOES YOUR HANDWRITING SHOW?

By LAWRENCE MERRIOTT
(Graphe-Analyst)
(All Rights Reserved)

The increased interest in Graphe-Analysis, the science of character delineation from handwriting, has brought in its train not only a host of converts, but the inevitable sceptic.

One of the most frequent objections to passed by those who ask "How can handwriting show one's character when we are taught how to write from the same copybook in school?"

The answer to this objection only proves how strongly handwriting does show character. Because if you will study the writing of any single class of students who have learned writing from the same copybook, a few years afterwards, you will not find two who write alike.

Each will write differently a different stand, a different pressure, and differing conformations of letters. This shows that, as one grows, one's character changes or strengthens, and one's handwriting changes too.

And, whilst I am discussing objections, I would like to stress that it is not possible to tell a person's age or sex from handwriting. Here and there, a trained grapho-analyst will be able to hazard a guess. There is no scientific foundation for it, however, and consequently, no reputable grapho-analyst will attempt it.

I have seen women's writing that looked masculine, and, conversely I have examined the writing of men that looked for all the world like that of a woman. Then again some young people write a mature hand, and on the other hand, I have seen the writing of a man of 80 remain seemed to be that of a youth in his teens. We can only get from handwriting what is in it.

There is increasing evidence that certain ailments can be discerned from handwriting. People suffering from heart trouble reflect this condition in their writing.

But grapho-analysis has not yet attained the point where it is possible to analyse ailments from handwriting with entirely scientific accuracy.

These are factors that time and continued research will attain, but character analysis from handwriting is an accomplished fact. And it is also true that vocational guidance can be given by trained grapho-analysts.

If you want to discover your own characteristics and traits, be recommended by your handwriting, take advantage of the offer made at the foot of the article.

D.N.—You are ruled by your heart impulsive; emotional appeals will always draw your sympathy. You are inclined to get hysterical. There is evidence of good powers of concentration. If you get really interested in anything, you find no difficulty in concentrating all your powers on it. You like to move around to change environment. You are not content to remain passive in a routine way.

P.B. You have considerable depth of feeling and a desire to get on in the world. There is a sense of balance displayed. You do not talk too much. You are inclined to be fanciful; you do not make friends unless certain. Mechanical or engineering work is indicated.

There are, of course, merely brief extracts from analyses.

Would you like to know what your writing tells? Send half a dozen friends. You will be amazed at the revelations that will flood a letter in your home. Send stamped addressed envelope for each separate specimen and 3c stamp if addressed envelope. Helpful will be mailed as well as pamphlet, but please state if hand is right or left. Address: Hilda Lee, Graphe-Analyst c/o Winnipeg News paper Union, 17 Mulberry Ave., Winnipeg, Man.

"How do you make your living?" "Selling things to men who go fishing."

That's interesting. How is the fisherman's equipment business?"

"I don't know. You see I run a fish market."

To Safeguard Pedestrians

Beacons To Be Erected In London Streets For This Proposal

Britain's beacons will be erected for protection of London pedestrians and the feature of the war on motor vehicles. They get their name from Lieut.-Col. Hugh Belisha minister of transport, who presided at a conference when it was decided to introduce them.

There are posts seven feet high with a yellow-painted globe glowing sunlighted, at the top. They will be put at the crossing-places for pedestrians. In the dark they will reflect headlights a quarter of a mile away.

Now..
AIR-CELL BRINGS AN ENTIRELY NEW THRILL IN RADIO

"Heard the big ball game this afternoon. Great. Is that as a fact. Ha, Ha, we haven't electric wiring in our home, but our Air-Cell set that sounds every bit as good as my cousin's electric set down in the city."

"I used to get into town every time our storage battery ran down. This new radio uses an Air-Cell battery that never needs recharging. I don't mind carrying home, though, because our Air-Cell set brings in programs we never heard clearly before."

"That new Air-Cell radio is a wonderful set. Storage battery ran down. This set was always giving trouble, and I'm glad to be rid of it. I don't mind carrying home, though, because our Air-Cell set brings in programs you can hear perfectly all the time."

EVEREADY
RADIO BATTERIES

The invention of the EVEREADY Air-Cell "A" Battery has made possible this entirely different battery-powered radio that gives the glorious full tone volume only found in electric sets.

The EVEREADY Air-Cell "A" Battery lasts for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household, and as there is no acid in it, it can be used in any position, anyone can use it. One has to forget recharging.

Used in conjunction with EVEREADY Imperial "B" Batteries, Air-Cell radios, made by the leading radio set manufacturers, will perform with all the simplicity and reliability of any electric set.

AC 101

DISCLOSE PLOT TO OVERTHROW SPANISH GOV'T

Madrid—The government was confident it had disclosed a plot of enormous proportions to overthrow the Spanish republic and establish a proletarian state" by means of a revolution more bloody than the recent abortive uprising in Austria.

Wholesale murder of public officials terrorism throughout the country capture of the government arms manufacturing plants at Oviedo and Trubia and co-operation of Leftists elements of the air force and army had been planned, according to information the government claimed to have obtained.

Premier Ricardo Samper conferred with President Alcala Zamora at his home and an announcement afterward said he was sure the leading plotters socialists and extremists, would be apprehended promptly.

Plans said to have been discussed included a revolutionary general strike throughout Spain with a carefully-schemed campaign of sabotage and other terrorism.

Squads of machine gunmen were to have been designated for transporting in trucks to larger and towns arousing the proletarian masses and massacring the opposition, cutting communications, taking over banks, and assuming complete power.

While civil guards continued searching homes of known extremist leaders for weapons, the premier gave the president the details of the reported conspiracy to set up "a proletarian state" and assured Zamora that the government was prepared for any emergency. All government buildings were guarded.

A truckload of arms captured and documents found in the possession of Francisco Ramirez, athletic coach at Madrid University, arrested on the university athletic field, gave away the plot, authorities said, and created widespread alarm in government circles.

In the truck seized were 54 cases of machine gun bullets, 60 cases of rifle shells, 300 rifle clips, 34 machine gun belts, 200 hand grenades, bombs, and three 14-millimeter guns capable of piercing armor plate.

Huge Wedding Cake

Cake For Royal Couple Will Weigh 300 Pounds

London.—The wedding cake for Prince George and Princess Marina of Greece will be seven feet, eight inches high and will weigh 300 pounds, it was learned as preparations for the wedding went forward.

The cake was ordered from an Edinburgh baking establishment, famous for its fancy pastries, and will be one of the largest ever made in the United Kingdom. It will be necessary to send it to London in several parts.

Prince George and his fiancee at present are staying at Balmoral castle with the king and queen and Princess Marina's parents.

Creamery Survey In Alberta

For Purpose Of Determining Cost Of Manufacturing Butter

Edmonton—Beginning in Calgary and in Edmonton, a creamery survey has been launched under the joint auspices of the provincial dairy branch, the University of Alberta, and the Dominion department of agriculture.

The purpose of the survey is to make a study of the cost of manufacturing butter in Alberta and also of the cost of trucking or otherwise delivering cream supplied.

Ship Reaches Craig Harbor

Ottawa.—Canada's 1924 expedition to the posts in the eastern Arctic has reached its most northerly objective, Craig Harbor, on the south coast of Ellesmere Island. Wireless despatches received in the department of the interior report the S.S. Nascopie, carrying the Dominion government party, had reached the far northern post.

War Is Denounced

Church Of England Supreme Synod An Means Of Settling Disputes

Montreal—With almost unanimous accord, members of the general synod of the Church of England in Canada, by resolutions, denounced war as a means of settling disputes between nations.

The resolution moved by Rev. Canon W. H. Davison, Montreal and second d by Magistrate J. K. Bone, Toronto was to accept the principle laid down by the Lambeth conference of the Church of England

"In the principle that Canada should be prepared one dissenting voice raised, however, by F. E. Richards, Victoria.

We must have the best instruments of war available, he said. "There is something worse than war that is national dishonour." He was met by loud cries of "No," when he declared "I say that the movers of this resolutions are responsible for the men's deaths."

Ven. Archdeacon F. G. Scott of Quebec called war padre rose to reply to Mr. Richards.

"The last thing General Sir Arthur Currie did," Archdeacon Scott reminded the synod, was to send a message to the university veterans in Toronto imploring them to start a movement to say that war is a futile test and not a test of the manhood of the world. "That came at the general's last order from his death bed."

Communists Shout Insults At Queen Wilhelmina

Three Members Of Parliament Arrested At The Hague

The Hague, Netherlands—Three Communist members of parliament who shouted insults after Queen Wilhelmina had finished her speech from the throne were arrested and jailed as an infuriated mob tried to get at them.

Police fearing an outbreak of violence as the temper of the throng about the parliament building grew hostile, led the men to prison by a secret route.

It was the first time in the history of the Netherlands that members of parliament were arrested in the course of a session. They were released later.

War Danger Lessened

Say Relations Between Japan And Russia Are Improving

Geneva. Busy with efforts to end war in South America, delegates to the League of Nations heard that the danger of war in the Far East has lessened.

A day of debate as to the best way of halting the conflict in the Chaco Boreal was lightened by the assertion of Russian spokesmen, made privately, that relations between Japan and Russia have improved.

The Russian sources also stated their belief that both Japan and Germany, recent withdrawals from the league, may be induced to return. Other quarters held similar hopes but declined to forecast their quick realization.

West Financial Aid

Canadian Fisheries Ask Government Grant For Advertising Purposes

Montreal—J. C. Eckman, Vancouver, and John Dykhaven, Prince Rupert, B.C., were named vice-presidents of the Canadian Fisheries Association at the 19th annual convention here. Captain Frederick W. Wallace, Montreal, was elected president.

A resolution was adopted urging the Dominion government to vote $100,000 at the next session of parliament to pay the cost for newspaper advertising for the development of Canada's home market for fish. Date of Canada's annual fish week was fixed for October 29 to November 3.

Criticism Of Lottery

New York.—A broadside of criticism was directed at the city's proposals to raise relief funds through new taxes and a municipal lottery. Threat of a legal fight against the lottery was voiced. Mayor F. H. Laguardia submitted a lottery stood about one chance in 10 of being declared legal.

MAY BE CHAIRMAN

It is understood that Sir Thomas White will be the chairman of the Royal Commission on Maritime rights which has been appointed by the Dominion Government to settle some time amicably which the Maritime Provinces should receive from the Dominion Treasury.

Takes Heavy Toll

Chinese Refugees Tell Of Lives Lost In Flood

Tsaiyow China.—An unending stream of bedraggled refugees from the region flooded by the Yellow river their homes and livelihood destroyed, has poured into Tsaiyow.

Government officials were considering a drastic proposal to transfer many of the refugees from the river valley to unsettled territories in Szepuan province for rehabilitation.

Their crops destroyed and not knowing what to do, the refugees, wandering aimlessly tell stories of acute suffering as vast beds of life behind them. Hundreds of millions of Hopei and northern Honan provinces.

It was reported thousands remained together like frightened sheep still occupy high spots in the Yellow river valley. Some still live in tree tops. Rescue work is proceeding slowly. The walled city of Changyuan has become an inland, swirling flood water surrounding it.

Rush To Nome

Steamship Supplies To Beach Fire Stricken City Before Freeze-Up

Nome, Alaska.—Another rush to Nome was in the making that will have little resemblance to the gold rush of 1898 and subsequent years.

This time it will be a rush of supplies and a battle of man against time and temperature.

Hoping to relieve the fire-stricken city in part at least before the Arctic ice shuts out all shipping a few weeks hence, the citizenry laid plans for quick transportation of lumber and other construction materials as well as food and medical supplies.

The Alaska Steamship Company cut its freight rates in half for building material and relief supplies arriving Seattle aboard the steamer Dirigo.

Herro Castle Quiz

Startling Information Is Claimed From Investigation

New York—If obeyed, the last order from the bridge to the engine room of the Morro Castle would have left the flaming Ward liner circling about the ocean, a wheel of death and fire evidence at the United States department of commerce inquiry showed.

The engine crew, however, disobeyed the order and put the engines into neutral.

This testimony was given by an 18-year-old Massachusetts Institute of Technology student, William Wesley Tripp, who was on the tragic voyage from Havana as a cadet engineer.

Details of the death of Captain Robert E. Willmott who suffered an acute attack of indigestion and died only several hours before fire broke out on his liner were given by Howard Hannen the fourth officer, who testified he saw no marks or bruises on the body.

Rumors have been persistent that the master met foul play. The few charred bones found in the cabin where his body was cremated in the holocaust are now being examined for any evidence of poisons.

Against Works Program

Calgary Wants To Spend Federal Grant In Own Way

Calgary—By a polling of more than five to one Calgary's property owners turned down a public works program involving expenditure of $150,000 granted by the Dominion government for that purpose above the philebite in which only one-fifth of the registered voters cast their ballots, coincided with the city's determination to seek leave from the Dominion government to spend the apportionment on civic finance other than public works. Mayor Andrew Mutrie who visited Edmonton to enlist the backing of the Alberta government in such an arrangement.

The citizens voted 2,839 against and 555 for repairs to the horse shoe building at the exhibition grounds and the wounded animal with a pistol bullet.

British Films

Large Sums Being Spent To Produce Better Pictures

London—Opening of the newly enlarged Twickenham studios will mark the beginning of a serious effort to produce greater British pictures, it was made known.

Julius Hagen spent $2,000,000 to equip the Twickenham studios already one of the largest in England—with modern devices, including underwater film apparatus. Six major films are on the program of the company Hagen stated, and $2,000,000 will probably be spent in the first year of work.

New Bank Governor

Quebec—"I was very pleased to note the choice of G. F. Towers as governor of the central bank of Canada," commented Sir Edward R. Peacock, Canadian-born director of the Bank of England, who has been here. Sir Edward is in Canada to visit his mother in Toronto.

Rumbos Gift Shocking

Halifax—A. G. Sandoz, tuchanan at Dalhousie University here, claims he has found what every girl is looking for a rumless silk stocking. He has evolved a solution which, when applied to any textile in the form of a wash or rinse, is supposed to make the fibres stronger and more elastic.

New Bank Notes Issued

Ottawa—Canada's new bank notes, under the Bank of Canada, will be issued in about four months. It is reported they will be six inches long and 2½ inches wide. The present notes are 7¾ by 3¾ inches and United States notes are 6 5-16 by 2 11-16 inches.

Eight Doukhobors Fined

Nelson, B.C.—Eight of eleven Doukhobors arrested for failing to fight forest fires were sentenced to a fine of $25 or to serve one month's imprisonment. Three who produced doctor's certificates were dismissed. They appeared before Stipendiary Magistrate John Chatmal.

INSURANCE PLAN IN CANADA FOR THE UNEMPLOYED

Montreal—Premier R. B. Bennett is preparing to launch an unemployment insurance plan in Canada upon his return from Europe Ward C. Pitfield announced at the annual general meeting of the Montreal Conservative Association Inc. at which he was elected president.

Mr. Pitfield a prominent business man and a leader in the Montreal Conservative field stated "The premier minister has under way an unemployment insurance scheme, worked out on an actuarial basis, which I think is the fit plan I have ever seen to combat unemployment.

"If the provinces agree, the plan will go into effect." Mr. Pitfield went on. "If they don't I don't see that it possibly can. The provinces have power over civil rights. They have, for instance, power over mortgages.

"I don't see why we can't reduce interest on mortgages from seven to six and eventually to five per cent. The only reason why we cannot do it is that each province has the right to govern its own mortgage legislation."

Circus Lion Caused Panic

Shot By Guards After Escape From Cage During Parade

Richmond, Va.—Breaking open his cage during a circus parade a lion dragged down a horse pulling one of the wagons and then ran at liberty down North boulevard while crowds of spectators fled in panic.

Several guards shortly after shot the animal to death.

The beast ran several hundred yards down the street after Patrolman John Robert Paul had fired five times at him as he sank his fangs into the horse's neck, killing it. Lion in the Hankins-Johann sheet metal works. A circus guard fired four times at the beast. A policeman finished the wounded animal with a pistol bullet.

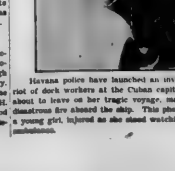
Return Home Via Canada

Vancouver, Miss Sheila MacDonald, daughter of Premier Ramsay MacDonald, who left London, Sept. 1 for Melbourne via the Suez Canal to attend the Melbourne and Victoria state centenary, will return home to England by way of Canada according to advices received by the Canadian Pacific Steamship Company here.

No Lives Lost In Fire

Nome, Alaska.—It has been found that the two Eskimos that were reported to have lost their lives in the $3,000,000 fire of Monday are safe. This means that no lives were lost in the fire.

HAVANA RIOT LINK IN SHIP FIRES?



Havana police have launched an investigation to determine whether a riot of dock workers at the Cuban capital as the liner Morro Castle, was about to leave on her tragic voyage, may have some connection with the disastrous fire aboard the ship. This photo shows an aftermath of the riot, a young girl, injured as she stood watching the rioting, being lifted into an ambulance.

Where Investors Fail

Mr Hoover Not Developed To Stand On Shaky Limbs

With drought gripping many sections of the country many suggestions for stopping it poured into the U S weather bureau at Washington.

Officials said just as many are received for stopping floods in times of excessive rainfall. In fact, they revealed, a simple cause for example, the wide use of radio, is often advanced if for both I might and flood.

"No device yet developed by man is of any practical value in starting or stopping rain," Dr. W. J. Humphreys, of the weather bureau, said. "The early radio which neither has to me nor retards evaporation, and does not affect the air in any way whatever. I could not say what effect the broadcasting of the moisture in the air, cannot be a factor in producing or hindering rainfall.

Nature's method of making rain Dr. Humphreys explained at first is to get an abundance of water into the atmosphere by evaporation from water surfaces or surfaces plants, vegetation and damp soil and then to saturate it cool by lowering the temperature.

"Practically he said "there is enough moisture in the air to precipitate at least a moderate rainfall whenever the machine is in its control. Attempts to produce rain artificially by seeding supercooled clouds with crystals of dry ice have failed in the past that there may be enough crystals in the air to produce rain.

Dr. Humphreys said that electrical devices sprinkling the clouds with dry ice starting large fires, and setting off high explosives among the clouds rain-making schemes suggested in this old world or cent too much for practical use All of the electrical schemes investigated by the weather bureau are utterly worthless he said.

Seeding cooling substances up into the clouds to cause rain is about a century old he added. Even Napoleon has been tried. This plan, however is wrong in principle and no rain has ever resulted from such practices.

The last of fire to produce rain was strongly advocated 30 or 90 years ago, and that suggestion continues to be made from time to time. This method is correct in principle, but the cost of a fire big enough to break a drought would be prohibitive."

England Has Extended Order For Quietness

Vancouver Also Considering Ban On Unnecessary Noises

If you have your hour born in England between 11:30 at night and seven in the morning you are liable to be arrested. This began September 16.

Recently London authorities placed a ban on motor horns. Now the order has been extended and England will be quieter than ever before

Unnecessary noises in Vancouver will be banned if the city council acts on a recommendation of the police commissioner.

The commission has decided to ask the council to adopt a by-law which would prohibit motorists from the unnecessary honking of their automobile horns, and ban street radios, phonographs and other noise-making instruments.

If We Had Fish

Alves Would Be Happier And Women Worry Avoided

If we could face the changes and chances of mortal life in the same simple faith that they are meant to be stepping-stones and not stumbling-blocks, we could face them with hand resolve to bear the heart of goodness out of what appears to us evil, confident that all things must work together for good to those who love God, how much useless friction and fretting we should escape, and how much braver and happier our lives would be.—Dean Inge.

Explain Historic Name

Qu'Appelle Was Called After Fine Cup Many Years Ago

Aubrey Roche the man who refused the 47-year-old edict of Old Country doctors that he would die early of tuberculosis, has explained the belief concerning the historic name "Qu'Appelle" in Saskatchewan province.

Pierre Jean Delorme, well known Indian patriot, in one of his poems entitled Qu'Appelle means "who calls" and told of a young Indian brave who made the request no answer except the echo which reverberated through the valley.

"The Indian church in the valley," said Aubrey Roche "was a Catholic one called a "Chappelle" The word Qu'Appelle comes from the French chappelle he stated

University of Alberta student and white chief of the Stoney Indians on the Qu'Appelle valley reserve the 64-year-old Englishman has lived the life of a near peasant for 25 years In this time he has left the valley only for occasional trips to the Rockies exhibition and one journey to England in 1897 for the occasion of Queen Victoria's Diamond Jubilee.

At sixteen years of age Old Stoney Indian Chief Goodstoney Roche spent a few months in the bush before he surrendered to the ravages of tuberculosis. Hoping to see more of the world before he died and possibly regain his health Roche left for Western Canada and settled in the Qu'Appelle valley. He adopted the language of the Stoney Indians and became a member of the tribe.

Strange as it may seem Herr Brunner Austrian inventor, has produced a new balloon which requires no costly gases. It uses merely hot air. The basket carries a small oil-engine which heats the bag to any required temperature and can be shut off to permit air to cool again. The picture was taken after Herr Brunner had completed successful trials near Berlin

AUSTRIAN INVENTOR UTILIZES "HOT AIR"

Interesting Memoirs

Midnights Of Victoria Days Revealed In Private Papers And Letters

"The second boy is the sharper." was the late Lord Esher's private opinion of the child-head quirkes of the present Prince of Wales and the Duke of York but Lord Esher fully recognized the "charm of manner" of the elder boy

This is revealed in the private letters and papers of Lord Esher, who married three British monarchs in intimate secretarial capacity

The papers are those of Sir Reginald Brett second viscount who died in 1930 He was keeper of the king's archives for many years and for 13 years was a permanent member of the committee on imperial defence

They contain candid delights of Victorian and Edwardian court days

Lord Esher crossed with mapping the changes round the throne after Queen Victoria's death "It may be my imagination," he writes, "but the sanctity of the throne has disappeared. Hip-hurrah kind, debonnair and not undignified, but he is too human."

The 1934 European wheat crop says the Monthly Review, will fall short of the thousand end-tons of 1933 The point of major interest is the probable reduction in production in France, Germany and Italy. These countries constitute the most important element in determining import requirements to Continental Europe. In 1933 production in these three countries was so large that imports during the past crop year were abnormally small

Legend Of The Unicorn

Purely Fabulous Creature Shown In British Coat Of Arms

The unicorn which figures on the British Royal Coat of Arms is an alternate of Scotland and was introduced in the Royal Coat of Arms at the time of the Union of Scotland and England The unicorn is a purely fabulous creature having the head of a horse the hind legs of an antelope the tail of a lion and sometimes the beard of a goat The horn which projects from the centre of the forehead is similar to that of a narwhal Though as a rule savage and ferocious the unicorn at nesting time was said to become very gentle to his mate which is supposed to have given rise to the medieval idea that the unicorn was subdued to gentleness at the sight of a virgin, and would come and lay his head in her lap which was the only means by which he could be caught on the hunting of the fabulous beast. The picture of a unicorn on a drinking cup symbolized an ancient belief of the efficacy of the unicorn's horn in connections used as a drinking cup against poison. Another medieval legend about the unicorn is that when it stooped to drink from a pool, its horn, dipping into the water, purified and rendered it pure.

As a newspaper reporter we have learned only one thing: Never to print who was to blame for an automobile accident.

"Wonder what causes indigestion?" "Frequently it is caused by the inability of a round stomach to adjust itself to a square meal."

London's Car Parker Puts Charge On Shoulders

J Butterfield in the Vancouver Province says "The English are not anywhere obnoxious to the opportunism displayed for a while by the cars of new national customs The modernization of the Old Country upon the vast scale that is current has produced several many and varied forms of subsidiary services, not all of them necessary but mostly tolerated

The newest is the car parker He is a well spoken person of the same class as the better hall porter and he has a hand on his arm giving him authority under the city to oversee and control the parking and unparking of cars in city areas

He guides you in and out with a sure hand and eye, takes you with a nicety and precision born of experience into the most intricate stream of traffic and if you want to know how intricate traffic can be, you must come to London to find out!) and then you say to him: "How much?" He says: "There is no charge, sir It is left to you."

That phrase is as old as Abraham and shows that it does not take a professor to understand psychology. For Pay Him will usually be seen a sigh and mutter: "I suppose that means a bob."

Advantage Of Straw Loft

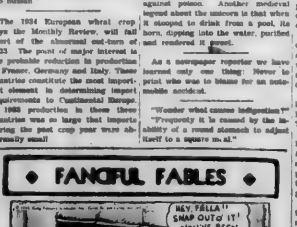
Keeps Temperature In Poultry House Warm And Moderate

The poultry house that is provided with a straw loft has an advantage over some of the common type of houses in that a uniform and moderate temperature is more easily maintained in the straw-loft house owing to the cheap insulation afforded by the straw This factor alone is worth much in a variable climate because losses in egg production often follow radical temperature changes.

If sanitary conditions are maintained in a straw-loft house and quarters and pigeons kept out, there should be no trouble from lice or mites getting into the straw The amount of straw used in the loft will vary, but as a rule about two to three feet of loose straw is sufficient. The straw used in the loft helps considerably if kept dry and free from vermin.

Building according to specifications and plans from reliable sources is the only safe and economical procedure in constructing a hen house. Correcting mistakes once the house is built is costly. Properly constructed and managed, the straw-loft poultry house has proved very satisfactory.

FANCIFUL FABLES



Legend Of The Peace Pipe

Started With Thunder Storm According To Story Told Washington Man

How come the Pipe of Peace?

Legend says it all started with a thunderstorm.

And the legend was recalled recently when Indians on the reservation south of Washington found that the bill of Buffalo. They passed the pipe around.

According to the legend told Chief Puchana, of Montmartre, the Assiniboines so many moons ago you could not count them had come through the snow and ice to the prairies. Hunting was good, horses were needed to hunt the buffalo.

Warriors gathered in council while the chiefs smoked.

Custer's was most and finally it all came to pass. Assiniboines, brothers took weapons against brothers and the Blackfeet and Sioux. Hunting and peaceful pursuits depended on the success of a horse raid.

Many moons ago the red braves gave it up. But a camp had been agreed and raised it carefully laid plans against the Sioux. Then, on the night of the council Blackfeet as they slept that night

The stringbeats back of the camp had established a gathering storm thunder and lightning suddenly awakened the sleepers and revealed the raiders.

The raiders regrouped and No 2 when they found their buffalo in on the ranges. Some of the Blackfeet then would be pursued by hundreds.

So the weary Assiniboines dug in once small hills to defend the stolen horses.

Blackfeet were turned back in their first attack and each side suffered a casualty. The Assiniboine remained then stand was hopeless. They must resort to strategy

A Blackfeet brave was finally accepted He took the longest pipe the Assiniboines had with them and from each an eagle feather feathers they had taken as trophies of honor on the field of battle. These he fastened to the pipe stem filled the pipe bowl with sacred tobacco and lighted it.

Next thing the Blackfeet rebuild was the sub-chief standing out in the open, grasping the smoking pipe in his right hand, high above his head

His left hand he raised also, palm open to the foe

They were so astonished they forgot to kill him

Legend says the smoke of his pipe went curling upward until it reached the curtains of the lodge of the Great Manitou And it warmed his heart so that he pitied the sufferings of the Assiniboines The clouds were parted and a ray of sunlight came to earth and fell on the young subchief

It shone upon the glory of his headdress Shortly it left him and moved straight to the Blackfeet chief, who, wise in the ways of life, knew the sign, and, dropping his weapons, came to meet the Assiniboine

By signs the Assiniboine made known his people's distress and needs. Friendship was offered and accepted. Nothing was in this manner.

Laying the peace pipe on his own left breast, then on his right, pointing east, west north, south to the skies and earth, and then placing the pipe on the left and right breast of the Blackfeet chief, the Assiniboine gave the pipe to the other

"From my heart to your heart, so the four winds may know it, on the number earth may hear it, from your heart to my heart, let there be peace. And in giving you this pipe with its eagle feathers hanging, the honor of our head I place in your keeping."

Camp was made and the strangers feasted. Next day the Assiniboines started homeward, mounted on horses that were presents from the Blackfeet. Since that time the pipe has been used in all ceremonies where trust or honor has been given.

A Matter Of Taste

Members of the British Association for the Advancement of Science discussed profoundly at their convention in Aberdeen, Scotland, the question of what constitutes facial beauty. Prof. C. S. Myers observed that a girl regarded beautiful in Cyprus has an's face like a frog, while the ideal beauty of one of the Balkan States, in his opinion, has a face like a horse.

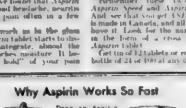
Even Rheumatic Pains Eased Fast Now!

BAD HEADACHES, NEURITIS PAINS OFTEN RELIEVED IN MINUTES THIS WAY

Remember the pictures below when you want fast relief from pain, Demand and get the method doctors prescribe for it.

Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to disintegrate, almost the instant it touches moisture. It begins taking hold of your pain



Why Aspirin Works So Fast

Drop an Aspirin tablet in a glass of water and see how it FIZZES at once. Same principle at work in your stomach when you take Aspirin

IN 2 SECONDS BY STOP WATCH

What happens in these glasses happens in your stomach when you take Aspirin start taking relief in a few minutes after taking.

Aspirin

Get 12 tablets or economical bottle of 24 or 100 at any druggists.

When in Pain Remember These Pictures

— ASPIRIN DOES NOT HARM THE HEART —

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Cheyenne Trail", "The Canyon Trail", Etc.

SIX Pistols

You've fallen heir to a half-share in plenty of trouble," the lawyer told Cheyenne Kearney. "The Broken Spur has been systematically looting the ranch and old Joe Carr, your partner, is drinking himself into his grave."

(Now Go On With The Story)

CHAPTER I Continued

"What means he to the trouble?" Keene's tone was antitoon.

"Exactly what I asked old Ben. He said that as far as he can see there are two reasons: Carr is mighty old and fashioned . . and the Broken Spur is next to em."

"Well, most of it? These days seems one's got to be next door."

"Huh. You're damned innocent for the man I know you to be. I suppose you've never heard of rustlin'?"

"That's archaic," said Keene sharply. "Men don't rustle these days."

"Think so? Wait a bit! Old man Carr is always short of cash. He has to hire his men just for the time he needs 'em. He's got only about four or five men permanent on his pay-roll. That means that poverty keeps him from buildin' up a bunch o' wranglers he could count on to change brit with a cup o' water if the Hour-glass needed it. He's honest, too, and that's a handicap when he lives next to the Broken Spur. For years Dustin and Goddard have been tryin', by a lawsuit, to get the water supply that makes the Hour-glass valuable. Can't you see what happens" Old man Carr, crippled, is bein' robbed deaf, dumb and blind to make him sell the place. . ."

"But he can only sell his share. Half of the place is mine. . ."

"Well then Stone hauled himself erect in his chair. "It looks to me as if one Gerald Keene, before long, will find himself partner to two crooks. If old man Carr is right Don't you see? Old man Carr will have to sell his half of the Hour-glass to these men Dustin and Goddard to stand square with the world

Does your friend Lyon say these men Dustin and Goddard are two crooks"

"He didn't have way to say. He said he couldn't understand 'em. Old Ben is so straight that the only man he doesn't understand is a crook Why"

"Well . . I told old man Burwell I was goin' to run down to the Hour-glass and have a look at the place If I go as the half-owner I'll learn exactly nothin' if there's any crooks at work goin' on. I thought I'd be best for me to go down there with a letter of introduction from Gerald Keene. You've known him for years and Dustin felt that sting. He knew that silence under the whip-lash of the tongue would annoy Spike more than any speech

Dustin and Goddard had owned the Hour-glass for several years and all Cheyenne County wondered how they made it pay That they did make money they did it. Old Sim Peters, the decrepit old cashier at the only bank in Seco, could tell to the penny how much good reason why Peters should tell nothing that affected Sam Dustin.

"Five years old ten and three years ago that you were aimin' to graduate old Shannay Skin Kaze," said Goddard, I'd have told you it was the silliest fool."

"I know. An' then you stepped me from talkin' up the Hour-glass to a purchaser for you," snapped Dustin. "That cost me over ten thousand. All because you were conned to take a chance."

That time Spike flushed. A man does not care to be reminded of his timorous moments that cost him money He stood by his partner scowling off into the sunset Joint owners of the Broken Spur, they were as different as black is from white. Sam Dustin's tall lithe figure, his dark, handsome face, his flawless taste in clothes, a perfect foil for his partner who was, as Jameson, Editor of the Seco Courier said "As red as a fox and twice as shifty" . . I wouldn't trust the pair any further'n I'd trust a coyote in a hen-yard."

The negro cook came out and announced the supper preparations on a big iron triangle that hung on a China-berry tree and the men trooped from the bunk-house to supper but the two partners gave no sign They continued to stare across the corral at a great red dust-cloud that moved slowly along the Seco range-fence Under that dust-cloud dim shadows resolved themselves into three packed horses followed by a slouching figure that prodded the rear-most horse with a short goad. At each prod the reluctant horse trotted a few steps but dropped back into a walk. Dustin laughed.

(To Be Continued)

Nurse Was Heroine

Stirred Life To Save Hospital From Terrible Disaster

Few stories are more thrilling than that of Sister Thomas, who risked her life to save the main theatre of the Middlesex Hospital from a terrible disaster One morning the oxygen in a large cylinder caught fire and a stream of sparks and flame rushed from its mouth It was a fearful moment for the condensed oxygen within the cylinder might explode and blow a bomb and fearful deal death and destruction all round Everyone left the theatre, and the last of all to go was Sister Thomas, who has stayed behind long enough to remove the other out of harm's way and to shut doors in order to minimize the effect of the explosion Then she did a marvellous thing She quickly made up her mind to risk burns and possible death in an attempt to save the building itself She opened the door ran across to the cylinder and turned off the tap which supplied the oxygen to the flame So fierce was the heat that the steel neck of the valve above the flame had been melted This cool act of courage saved medical apparatus worth thousands of pounds, and Sister Thomas has been awarded the medal of the Order of the British Empire for gallantry.

THE RHYMING OPTIMIST

By Aline Michaelis

DAWN

Dawn, coming up with its splendor
Diamond-set gold and in blue.
Dawn, with its message of courage,
Call to creation, yet new!

Tasks that are waiting the toiler,
Call that is waiting the old.
Hopes are the gifts dawn is bringing
Now, as its banners unfold.

Labor and laughter and loving,
Planning and pleasure and pain,
Dawn with its daily beginning,
Lilting the ringing refrain

Dawn with its promise of power
Setting the restless heart free
Bringing men's thoughts with fresh order
Hunting of triumphs to be

Answer to prayers made in anguish,
Symbol of sorrow withdrawn,
Dawn after night and doubting,
After the dark, comes the dawn!

Canadian-grown root seed compares favourably with the best imported seed in its ability to produce profitable crops.

The Mennonites are members of a religious sect founded by Menno Simons, a Dutch religious reformer born in 1492

Dr. Worst's Powder For FALSE TEETH

A Joy To All Users

Can't Slip or Slide

Sprinkle on Dr Worst's Powder and you won't have to think about your plate. Teeth fall by from your mouth like they were. Eat anything you want —it holds plates firmly in place. Also positively can't slip or slide. Forms protective cushion for sensitive gums. Leaves no colored, gummy substance. Keeps breath sweeter. Breath pungent. Recommended by world's most noted dentists. The cost is small. Use constant ones. Any druggist.

Little Helps For This Week

"Let I pray Thee Thy loving kindness be for my comfort, according to Thy word unto Thy servant" Psalm 119 76.

Love divine has seen and counted
Every tear it caused to fall.
And the storm which Love appointed
Was its choicest gift of all

O that then resided dwell in the knowledge and sense of this, even that the Lord beholds thy sufferings with an eye of pity and is able not only to uphold thee under them, but also to do thee good by them. Therefore put out of thy sight all discontented look at the hardness of thy condition, but when the storms of vexation are sharp look up to Him who can give meekness and patience, can lift up thy head over all, and can cause thy life to grow and be a gainer by all If the Lord God help thee according to thy condition of affliction and distress thou wilt have no cause to complain, but will bless His name — I Pennington.

Laws Of Physics

Intricate Point Is Settled At The University Of Saskatchewan

Laws of physics as operating in the court of Magistrate J S McKenzie in Saskatoon recently, have no validity in Saskatchewan. In the physics laboratory at the University of Saskatchewan are two suspended bodies table of equal weight When one ball swinging slowly struck up one swinging rapidly in the other direction, it is the slowly-moving ball that bounces back while the one previously in rapid motion becomes almost motionless. An authority on physics points out that if two bodies of differing momentum (weight or velocity) meet, the resultant momentum will be the mass in direction as that of the major force. The majority carries.

ANNUAL MEMBERSHIP DRIVE

Under the auspices of the Women's Institute

The annual Membership Tea will be held in the store next door to W. G. Bean' Real Estate office, on Saturday, Sept. 29th, opening at 3 p.m.

WIN children, please help to make this sale a success by looking up any clothing, furniture, house furnishings, dishes, kitchen utensils etc., that they can spare and have their contributions ready to be called for on Thursday and Friday, Sept. 27th and 28th.

Get your "No Shouting" cards at the "Record".

THE OBJECTIVE!
Alberta Pool Elevators are out to prove that a co-operative grain handling concern can be an instrument of usefulness to all grain growers and a successful business concern as well.
Every grain grower in the vicinity of an Alberta Pool Elevator is invited to aid in this effort to perpetuate in Alberta, by Alberta farmers, for the good of all, a strong, grower-controlled, co-operative elevator organization.
This can be done with advantage by delivering grain in wagon lots or car lots to
Alberta Pool Elevators.

SHOULD CO-OPERATE WITH NEWSPAPERS

"I am thoroughly convinced that if the merchants would only get behind their local newspaper in telling the people of the district of their merchandise that it would certainly conspicuous to a considerable degree the business that is now going to the mail order houses. I do not mean an advertisement left to run for weeks at a time, but that the method of the larger institutions would be followed in carefully preparing an advertisement each week. The effects may not be seen just at first but they certainly will be eventually."

GEO. E. MATTHEWS,
Secretary, British Columbia Board of Trade.

As a result of the last ten years' effort in strawberry breeding by the horticultural division of the Dominion Experimental Farms, 39 varieties of new hybrid strains selected for earliness, lateness, productivity and general health and vigour have been named, and distributed, chiefly in 1933.

FORT SASKATCHEWAN RECORD

VOL. [illegible] No. 26 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, OCT. 3rd, 1934 $1.50 PER YEAR IN ADVANCE

VICTORY BOND CONVERSION HELPS BUSINESS RECOVERY

Ottawa, October 2.—The Prime Minister's frank concise statement regarding the 1934 Refunding Loan has met with warm and encouraging response from bankers, insurance and trust company executives, business men, professional men, agriculturists and labor leaders throughout the country. The concrete evidence of business recovery from the low point of last year which Mr. Bennett stressed in his opening announcement such as a 56% increase in industrial production, 17% increase in employment, 43% increase in farm products prices, as well as a substantial improvement in merchandise, electric power production and wholesale prices, emphasizes the strengthening of the national credit, the progress in achievement of national economy and the steady general uptrend in business.

Conviction of this year's refunding programme will bring the total war loan refinancing (inaugurated in 1931) to over $1,800,000,000.

$,000,000 per annum has already been saved in interest charges and when this year's operations are completed, the annual saving in interest will be about $14,000,000. This saving more than offsets interest charges on debt incurred to meet the extraordinary burdens loaded to unemployment relief; and eventually should enable the government to reduce taxes.

The tenor of the comments from bankers, insurance and trust company executives, industrialists, agriculturists and labor leaders is ably summed up by the unanimity of their opinions, which are that Canada has emerged from the depression with probably less strain than that experienced in many other countries; and that, while our progress is gradual, it is well founded. There have been no disturbing recessions consequent upon too rapid a rise.

The consensus of opinion is that by reason of the favourable basis of conversion and the attractive yield offered(particularly in the long term bonds) the majority of 1919 Victory Bond holders will convert, and new investors hasten to secure an allotment of the new Bonds.

Fort School Board Holds Monthly Meeting

A regular meeting of the Fort Saskatchewan School Board was held in the Council Chambers on Monday the 1st of October at 7:30 p.m.

Present Mr. F. Atkinson, Chairman, and Trustees Dr. Calhoun, Dr. Turner and Mr. R. M. Ray.

The minutes of the last meeting held were read and adopted.

Letters of apology were received from the two outside boys involved in the happenings at the School on the 6th., ultimo, were received by the Trustees, and accepted.

Tenders for coal for the ensuing year were opened, and after consideration by the Board, a motion was passed, to purchase one car load from the Alberta Pacific Grain Co., Ltd., of Marcus double screened lump at $4.00 per ton delivered in the school bins, and one car load from Glover & Graham, of Bush Mine double screened lump, at $4.00 per ton delivered in the school bins. The first car load to be taken from the Alberta Pacific Grain Co.

It was decided to change the form of the monthly school report cards to that suggested by the Principal, and that an order should be placed for same.

It was reported that the bells in the school were not working satisfactorily and a motion was passed that Mr. Ed. Barnett attend to the matter of adjusting them as may be needed.

The Principal, Mr. Anderson, was present and submitted attendance and other reports.

The following accounts were passed for payment: The Record $8.56; F. W. Smith $17.35; North British & Mercantile Insurance Co., Public School Liability $60.00; Alta Pacific Grain Co., 17160 lbs coal @$4.00, $34.32; P. Robinson, wood $7.00; Fort Hardware $1.70.

Fort Tennis Club Holds Successful Dance

The Fort Saskatchewan Tennis Club brought the tennis season to an end by holding their annual dance in the Badminton Hall last Friday evening.

Frank Smith's orchestra playing a variety of old-time and modern dances, were enjoyed by the large gathering.

A dainty lunch was served at midnight and after supper, Dr. T.W.E. Henry, President of the Club, called on the Honorary President, Mr. J. D McLean, who in his genial manner presented the trophies and prizes to the following winners: Miss Muriel C Beirn, winner of the ladies singles event; Mrs. T.W.E. Henry and Miss Muriel O'Brien, winners of the ladies' doubles event; and Earl Sherman, winner of the men's singles.

Cups were given for the ladies and men's singles, and handsome purses to the ladies doubles.

The recipients replied in turn suitably.

The mixed doubles and men's doubles events were unable to finish the tournament owing to unfavorable weather, and these will be left over until next year.

Fort Badminton Club Holds Annual Meeting

The annual meeting of the Fort Saskatchewan Badminton Club was held on Monday evening, in the Badminton Hall, with a large and enthusiastic gathering in attendance.

Mr. H. Looker, President, occupied the chair and opened the meeting. The Secretary, Miss M. Trotter being absent, Miss R. Shackleton was elected Secretary, pro tem.

The financial report was given by Mr. H. A. Rogers, Treasurer, which showed a very healthy balance in the bank.

The election of officers resulted in the following balding office for the ensuing year: President, Mr. J. D. McLean; Vice-Pres., Dr. T. W. E. Henry; Social Convenor, Miss Lillian Berg; Secretary-Treasurer, Miss R. Shackleton; Mrs. C. Ashton, Mrs. J. Westover, Mr. T. Holt, Mrs. H. Looker were added to the executive committee.

The rent for the hall for dances was increased to $11.50. The extra amount pays for the cleaning up of the hall after the dances.

After a lengthy discussion by the members it was decided to reduce the Badminton fees to $2.50, with the executive having power at anytime to call on additional amount, to the extent of 2.50, making the total fees not more than 5.00 per person.

It was decided to hold a dance on November 23rd, of which further particulars will be given later.

Tuesday evening, October 9th, was set for the opening day at the Badminton Hall, and in the meantime several improvements will be carried out.

The Observer

Quite frequently of late I have heard the idea expressed that interest charges are the cause of most of our present day woes. Something must be allowed for the feeling of helplessness which possesses the individual in the face of a condition which he cannot control. He is liable to jump at any conclusion which appears to

(Continued on page 3)

Congregation And Friends Bid Farewell to Rev. and Mrs. Ramsay

In recognition of Mr Ramsay's last church service here a fine turnout appreciated his sermon Such a crowd has not been seen at the United Church for a long time. The church, aisles, vestibule and all were filled to overflowing. The choir contributed well to the service, Mrs. A. Gibson and Mr. H. Watt, assisting very admirably with solos

After the regular service, Mr. Floyd Baker, as elder of the church, asked the congregation to remain seated and, acting as chairman, called on Mr. H. Watt for another solo.

A pleasing feature of the evening was that a large number of the congregation was made up of Patricia residents. Mr. Baker then called upon numerous of those attending, both from Patricia and the Fort, to say a few words in appreciation of Mr. Ramsay's services. Members of the Sunday School, of the Session and of the Church Board were called upon in turn. Each expressed his sorrow at the departure of Mr. and Mrs. Ramsay, and acknowledge the assistance and contribution made by each to the church and community at large.

Mr. A. H. Gibson spoke at some length of his long acquaintance with Mr. Ramsay, referring particularly to call-ups and later associations.

Dr. G. Turner delivered a very fine address following which, Mr. and Mrs. Ramsay were asked to come forward to the front of the church. Here Mrs. F. Baker presented, on behalf of the congregation and friends in Mrs. Ramsay, a bouquet of lovely flowers.

Mr. Bentley of Patricia, then presented Mr. Ramsay with a purse as a token of friendship and esteem. In replying Mr. Ramsay expressed his pleasure, regarding the friendliness and co-operation of the people of the church. He extended to his friends the invitation to visit his home and church in Edmonton.

Immediately following, the congregation assembled in the classroom of the church and enjoyed a dainty lunch prepared by the ladies of the church.

Rev. and Mrs. D. C. Ramsay came to the Fort from Belleville, Ontario, some six years ago. In that time they have not spared themselves in contributing to the life of the church and community. The building up of a very enjoyable Sunday School for the young people has been a special feature of Mr. Ramsay's work here. At all times he has enjoyed the co-operation of the younger set, and both in church and socially he has been a prominent factor in contributory life of the young people. In losing Mr Ramsay they acknowledge the loss of a good leader.

In sports Mr. Ramsay has also been an asset to the town. Being, in his prime, a powerful athlete himself he has enjoyed at times, the athletic spirit of the town. As an umpire of baseball and as a curler Mr. Ramsay will long be remembered here.

In all things Mrs. Ramsay will also be missed. As a social and family worker Mrs. Ramsay has contained all the qualities of a good helpmate and a sincere friend.

Mr. and Mrs. Ramsay will certainly be missed in the Fort. However, we most certainly wish them God-Speed and sincerest best wishes in their new field. We also hope Mr. and Mrs. Ramsay that it is not "Good-Bye" but only "An Revoir."

CARD OF THANKS

Thanks are extended to the people of Partridge Hill, Josephburg, Good Hope and Tyne Valley districts who contributed to the car of vegetables loaded on Friday and Saturday at Josephburg.

The car goes to Custor, Alberta for relief.

Rev. E. J. Hodgins.

Turn to page three.

Teachers of the Lamont Inspectorate will hold their annual convention in Edmonton this week on Thursday and Friday. This will give the children a two-day holiday.

Measurements taken at the University of Michigan on the bark thickness of several species of forest trees showed hemlock to have the thickest and beech the thinnest bark.

A New And Better Viewpoint

The years' annual convention of the Canadian Chambers of Commerce held at Winnipeg was, it is generally recognized, one of the most important and in many respects the most significant gathering yet held by that body. It was not only one of the largest assemblages of outstanding men in the financial, industrial and commercial life of the Dominion yet convened, but it appears to have been animated by a new spirit based upon a fuller recognition of the responsibilities of what has been termed Big Business to the country as a whole and to the masses of producers, workers and consumers who, in the last analysis, are the backbone of the nation.

Important resolutions dealing with matters of far-reaching social and economic questions, and involving vital issues in national policies, were adopted, and the best significance of which was the declaration in favor of the negotiations of a Reciprocity Agreement with the United States in members of trade. The adoption of this resolution would forecast the change in sentiment and viewpoint of the business world of Canada.

Significant, too, were some of the addresses delivered by men occupying high executive positions in the industrial world. For example, Mr. T. A. Russell, president of the Massey-Harris Co., told the convention that "the success of industry and farming is now wrapped up together in Canada in a way which nothing could separate," and he gave facts and figures to prove it. As the purchasing power of the farmer decreased, said Mr Russell, so did the demand and sales of the farm implements. In the case of the Massey-Harris Co., he said, employment dropped from 4,000 in 1929 to an average of less than 1,200 for the years 1931, 1932 and 1933. "Not only has this caused hardship for the men thrown out of employment through no fault of their own," he said, "but it has tremendously affected their purchasing power, their ability to pay taxes and, generally, to contribute their quota to the common prosperity. Likewise, the investor who has not received his dividends has had to curtail his expenditures and has been a poor customer either for the farmer or for industry." Mr Russell strongly urged the wholesome necessity of complete and guaranteed co-operation between farm and industry in order to bring about the re-establishment and promote its prosperity.

Then, up spoke Mr. W. R. Campbell, president of the Ford Motor Co. of Canada, on behalf of all workers in industry. Space will not admit of any extended quotations from Mr. Campbell's address, but a few will suffice to indicate his position, and the attitude he urged all employers of labor to adopt in the interests of the workers, in their own interests, and in the interests of the country at large. Mr. Campbell said:

"As far as Canada is concerned there can be no assurance that until all of our people who are capable of working have an opportunity for gainful employment in free and undelivered by government aid. In dealing with the ills which must be corrected it is time that the very grave importance of our human relationships be recognized. I regret ...until every man in this country capable of working is able to find gainful employment the prime responsibility of industry is to the worker. The employer's interest must not be subordinated of the interest of the shareholder.

"Perhaps," continued Mr. Campbell, "there are rather amazing statements, but not until this condition is brought about can either capital and management or the worker prosper. Our primary duty, then, should be to make certain not only that the interest of labor in the benefits of industry be not subordinated to that of capital, but also that labor be granted an equitable share of these benefits."

Suggesting the only possible way in which industry can be re-vitalized and employment provided, Mr. Campbell said: "What we must do is to start the ball rolling upward injecting more money into our economic structure at the bottom, through the wages of those industrial workers and profit by the steadily increasing circulation of this money upward through our whole business fabric. That is good business because it is profitable. Perhaps it means even the salvation of our industry itself as we know it today. Our problem at home, then, becomes one of finding greater markets for the products of domestic manufacture, and this again devolves upon the problem of finding greater employment and providing increased purchasing power for our own workers. By increasing the earnings of the average worker, by paying him a greater return for his labor and by increasing the volume of his employment, by pumping into our economic structure more money at this base, we can get a start toward solution of our problem."

Having made a reference to the further development of export trade, Mr. Campbell concluded: "It is an townspeople fact that we have now entered upon an era of social readjustment in this world. In order that this readjustment so that the rights of both capital and labor shall be properly balanced, it devolves upon capital to take the initiative, with the welfare of the whole nation always in mind. Capital must do this, because capital has the imagination, the training and the ability to lead leadership. Until this proper balance is struck and until this country has been able to lift itself by its own courage and its own ability back to normal times, it is imperative that capital defer profits, defer its claim to a return upon its investment, in order to provide all of our people able to work with adequate employment at such a return as to enable them to live in accordance with standards commensurate with the calibre of Anglo-Saxon peoples."

The natives of Java sleep on mere Tarzuh can be cleansed from copper-mats, while all about them flourish pay and brass by using buttermilk, the kapok trees, which furnish the says Cornell University's home economics department.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and use how quickly it will relieve you.

This honest, compleicat remedy has been on the market for the past 80 years. Proof enough that you are not experimenting with some new and untried concoction.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by the T. Milburn Co., Ltd., Toronto, Ont.

Vancouver Is Likened To Constantinople

Should Greatly Add Modern World Studies Lord Tweedsmuir

Vancouver, with its natural advantages and geographical position, should be to the modern world what Constantinople was to the ancient world, Lord Tweedsmuir, (John Buchan), Governor-General of Canada, declared in an address to the Canadian Club at Vancouver.

Lord Tweedsmuir said that Vancouver with its marvelous harbor and a network of railways behind it should be vitally interested in the solution of the world depression. Business, he said, Vancouver should logically hold Asia commercially in fee.

LOST 10 LBS. IN TWO MONTHS

Not too Old to Reduce at 50

Here is a letter which proves that there is no necessity to tolerate excessive fatness, even at the age of 50:—

"I was becoming too fat after reaching 50, and had attacks of rheumatism and indigestion. I took ordinary salts and other medicines, but they did not do any permanent good. Then I commenced taking Kruschen. I soon began to feel different—brighter stronger, had more energy, no rheumatism, and to my surprise, after two months I lost 10 lbs. in weight, although I was certainly more, as digestion influenced nearly left me." W. H. G.

The numerous vital salts in Kruschen stimulate and tone up the bodily functions from a number of different angles. Your stomach, liver, and kidneys all feel the immediate benefit. Your blood is cleansed of impurities and becomes invigorated and refreshed. You forget indigestion, constipation and depression in a new and unaccustomed feeling of physical and mental exhilaration.

Upwards of 12,000,000 in Great Britain are insured against unemployment, and 17,000,000 against sickness, maternity, insolvency, and old age.

Have you Your Nerves?

Mrs. K. Waldon of 60, St. Lawrence Blvd., Montreal, Que., said: "I was in a terrible state and in pains all the time. Fruit-a-tives (or Fruit-Liver Tablets) were recommended to me. In a few days I was perfectly normal and wonderfully tired out and have been ever since. I am grateful indeed for being all right and I recommend Fruit-a-tives to everybody."

Write to Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

Another Wheat Exporter

Report That France Has Joined The Ranks Of Exporters

The press report that France has left the ranks of wheat importing countries to join those of exporters is of considerable importance to Canada, in that still another competitor is added to the list. Prior to 1929, France did not produce sufficient wheat to meet her domestic requirements, except in years when exceptionally large crops were harvested. Large crops were grown in that country in 1928, 1932, and again in 1933, so that a surplus of wheat was been built up. In pre-war years France produced very large crops. The 1890 crop amounted to 330 million bushels, or equivalent to the production of 1932. In the five-year period from 1909 to 1913, production averaged 317 million bushels per annum. From 1920 to 1928 it was 290 million bushels or about 27 million bushels under the pre-war average. France has not reached her pre-war average acreage of wheat which amounted to 16.5 million acres. The 1933 acreage was 12,356,000 and it has not changed materially since 1929.

India Grateful For Help

Grateful thanks on behalf of all India for the world-wide contributions to the earthquake relief fund were expressed by the Earl of Willingdon, viceroy of India, when he declared the fund would close Oct. 1. A sum of $1,250,000 has been contributed.

Him: "I hope you'll dance with me tonight."

Her: "Oh, certainly. I hope you don't think I came down here merely for pleasure."

Stately Wedding

Prince Of Wales Expected To Be Best Man At Marriage Of Prince George And Princess Marina

The world's best-known bachelor, the Prince of Wales, is expected to be the best man at the stately wedding in Westminster Abbey of Prince George and Princess Marina of Greece. The date was announced as Nov. 29.

Little Princess Elizabeth, niece of George, will be a bridesmaid.

The date was chosen after long discussion at Balmoral castle Scotland, in which the King and queen Marina's parents, Prince and Princess Nicolas of Greece, the Archbishop of Canterbury and the betrothed couple themselves participated.

It was expected the service would be performed by the Archbishops of Canterbury and York. The great ceremony in the abbey will be followed by a short service according to the rites of the Greek Orthodox church, in a room in Buckingham palace.

Their Majesties will drive to the abbey in full state. Prince George will drive separately with the Prince of Wales, while Marina will be in a third procession with her parents.

Must Be Registered

After January 1, 1935, any person found to be in possession of a pistol or revolver when its ownership has not been recorded with the police authorities will be liable to a fine of $50 or 30 days in jail, or both. This amendment to the Criminal Code was passed at the last session of parliament and it is being proclaimed in the Canada Gazette.

Car of Vegetables Shipped To Committee District

The Committee in charge of arrangements for shipping a carload of vegetables to the dried out area which is to advise that the car was shipped out on Tuesday afternoon. The car was destined to the Municipal District of Hixon, South of Coronation. It contained approximately forty thousand pounds of mixed vegetables.

The Committee wish to take this opportunity to thank those who donated vegetables, also those who rendered assistance in the form of labor, gas and autos, which made it possible to send this car to these less fortunate than ourselves.

Robert W. Abram Dies at 59 Years

Robert W. Abram, 59, for 26 years a member of the provincial public works staff at numerous points, and latterly chief engineer of the provincial road at Lethbridge, who died in Lethbridge Friday was buried on Monday at 2:30 from Hadenstedt and Sons funeral chapel.

Mr. Abram for many years was secretary of the engineering branch of the Alberta Civil Servants' Association and a past president of the general body. He had assisted in supervising construction of a number of important public works, including the parliament buildings, Tabor bridge, the mental institute at Ponoka and the goal at Fort Saskatchewan where he was chief engineer before transferred South.

He is survived by the widow, the former Miss Grace Walker of Edmonton and family of five daughters and two sons, R. L. Abram, assistant manager of Metals Ltd., Edmonton is a brother, and Mrs. A. L. Marks a sister.

DONATIONS OF VEGETABLES

Handsome donations of vegetables have been made by a number of communities to families in the dried out areas in response to a recent appeal made by the provincial department of agriculture. Carloads are being shipped to the districts concerned from the following points: Bensmith, Rythe, Wembley, Beaverlodge, Clairmont, Grande Prairie, all in the Peace River district, and Josephburg, Waskatenau, Fort Saskatchewan, Lamont and Fort Saskatchewan.

Now is the time to be thinking of paying up your subscription.

Many About

Canada's exports of canned vegetables in 1933 amounted to over 17 million pounds, and of canned fruits over 16 million pounds. Exports of canned fruits increased about 60 per cent over the previous year. Canada's imports of canned fruits consisted mainly of pineapples.

rates have been high and capital indebtedness has an uncanny way of increasing overnight when interest is compounded. But it has been such a normal development and has been a part of our commercial creed for so long, that we should distrust such an explanation for anything in the nature of a sudden collapse such as the unprecedented four years ago.

It should be remembered that the development of the practice of interest charges was itself adopted as the remedy for a previous condition which had become intolerable. The earliest mercantile law of England permitted the borrower to pledge his land and to render his person liable for unpaid debts. It was felt that when men discovered that trade and commerce made credit a necessity, strict punishes were necessary to educate people into the habit of not making default in contracts. It is said that much of the slavery which prevailed in early English history was the punishment for unfulfilled contracts, the compensation for debts that could not be paid. In the process of development did not the borrower as a rule with the idea of using the capital so obtained to realize a profit, but they borrowed when compelled by necessity and as a last resort. All that a man built will be given for his life, and usury fattened out upon that fact. But the condemnation of usury had inevitably to legislating fined and equitable charges for the use of capital, otherwise commercial development would have been strangled in its infancy. When the fathers of the Christian Church condemned usury. They threw all money dealings into the hands of the Jews who had no scruples about charging usury to the Gentiles. It was the spectacle of the Christian world paying tribute to the Jew which induced the Fathers to grant a modified approval to fixed interest charges. If they were unwise they have been a long time, about a thousand years, in finding it

DOMINION OF CANADA

1934 REFUNDING LOAN

The Minister of Finance offers for public subscription

Two-year 2% Bonds, due 15th October, 1936
Issue price: $98.40 and accrued interest, yielding 3.67% to maturity.

Five-year 2½% Bonds due 15th October, 1939
Issue price: $98.15 and accrued interest, yielding 3.00% to maturity.

Eight-year 3% Bonds, due 15th October, 1942
Issue price: 97.00 and accrued interest, yielding 3.48% to maturity.

Fifteen-year 3½% Bonds, due 15th October, 1949
Issue price: 96.50 and accrued interest, yielding 3.81% to maturity.

Principal payable without charge in lawful money of Canada at the Head Office of the Bank of Canada, Ottawa, or at any of its branches in Canada.
Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any chartered bank.

Denominations:
Two-year Bonds, $1,000
Five-year Bonds, $500 and $1,000
Eight-year Bonds, $500 and $1,000
Fifteen-year Bonds, $100, $500 and $1,000

Cash Subscriptions

All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, payment in full for the bonds allotted must be made promptly against delivery of interim certificates, which will be effected on or about 15th October.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1934, *after detaching and retaining the coupon due 1st November next*, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 2% Bonds and the Five-year 2½% Bonds.

100½% of their par value on subscriptions for the Eight-year 3% Bonds if effected on or before 6th October, and 100% of their par value after that date.

100½% of their par value on subscriptions for the Fifteen-year 3½% Bonds if effected on or before 6th October, and 100% of their par value after that date.

Holders will receive in cash the difference between the surrender values of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to $250,000,000.

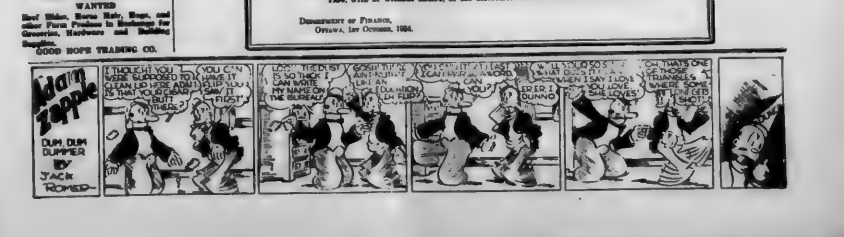
The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire $233,216,850 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 12th October, 1934, with or without notice, at the discretion of the Minister of Finance.

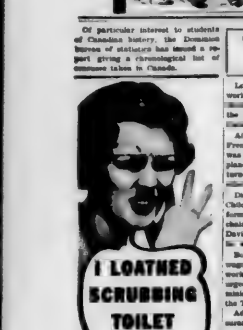
DEPARTMENT OF FINANCE,
OTTAWA, 1st October, 1934.



OGDEN'S "All's well that Smokes Well"

by Lou Skuce

Of particular interest to students of Canadian history, the Dominion Bureau of statistics has issued a report giving a chronological list of commerce taken to Canada.



It flushes off stains without harming enamel or plumbing . . .

HOW to get rid of those ugly toilet-bowl stains! It's easy —with Gillett's Pure Fluke Lye. Once a week pour this powerful cleanser and disinfectant—full strength—down toilet bowl and drains. It flushes off stains without scrubbing. Cannot harm enamel or plumbing. Kills germs and destroys all odors as it cleans!

There's no need to slave over unpleasant cleaning jobs. Let Gillett's Lye work for you—it's quick, thorough and absolutely dependable. Ask your grocer for a tin—today.

Never standby lye in tin cans. The action of lye on tin makes dangerous fumes.

FREE BOOKLET—Send for new revised edition of the Gillett's Lye Booklet. Gives full directions for cleaning sink drains and toilet bowls, tells how to destroy germs of other household pests. Also contains full directions for soap making, dough mixing, and other uses of the lye. Write to Standard Brands Limited, Power Service and Liberty Street, Toronto, Ontario.

GILLETT'S LYE SAVES DIRT

WORLD HAPPENINGS BRIEFLY TOLD

Lord Baden Powell is sailing on a world inspection tour of the Boy Scout movement, of which he was the founder, in the near will end in Canada and last year in Australia.

Air service connecting Algiers and French west and equatorial Africa was established when the first mail plane, which left Algiers, Sept. 7, returned after a successful flight. The airline is operated by Hisadonnie.

Dissolution of the York County Children's Aid Society board, of which former Premier G. H. Henry was chairman was announced by Hon. David Croll, Ontario minister of public welfare.

Boycott of all firms paying unfair wages or forcing their employees to work under sweating conditions was urged by J. F. Marsh, Ontario deputy minister of labor, in an address to the Toronto Local Council of Women.

Adoption of a national health insurance scheme will be urged at the proposed Dominion-provincial conference at Ottawa this fall by Hon. G. M. Weir, British Columbia provincial secretary, in a brief presented on behalf of the Canadian Medical Association.

To mark the centenary of South Australia which in 1936, the government has received a gift of $500,000 towards completion of the new parliament houses. The donor is Sir Langdon Bonython, proprietor of the Adelaide Advertiser, and one of Australia's leading industrialists and philanthropists.

Little Journeys In Science

CARBON MONOXIDE

(By Gordon H. Guest, M.A.)

Frequently we read of accidents caused by the escape of carbon monoxide gas from the exhaust of motor engines or from furnace pipes. Produced by the burning of carbon, in coal gas, and in motor exhausts, this gas, which is also known as carbonic oxide, is very poisonous, and a deadly dangerous because it has almost no odor, and overcomes victims so quickly that they rarely have time to escape from the fumes.

The deadliness of the gas lies in its action on the blood, where it displaces the oxygen in the hemoglobin, through which it reaches the body tissues. It is identified in the body by the bright red color which it gives to the blood.

It is estimated that one volume of carbon monoxide to eight hundred volumes of air is fatal when breathed for half an hour, while much smaller quantities are known to produce unconsciousness if inhaled for any length of time. Small cars travelling at fifteen miles per hours are said to give off forty-one cubic feet of carbon monoxide per hour, while a large car gives off one hundred and eighty-four cubic feet of the gas in one hour. Thus, in large cities the air continually contains small amounts of the gas, and considerable attention has been given in modern centres to purify by the air, particularly in tunnels and underground railways. This is done by passing the air over a substance known as hopcalite, which changes carbon monoxide into harmless carbon dioxide.

Mice and birds are particularly sensitive to carbon monoxide and sometimes rooms given to mice have been asphyxiated by them take into the mines following an explosion in which this gas is believed to have been released.

SUNDAY SCHOOL LESSON

OCTOBER 7

FELLOWSHIP WITH CHRIST

Golden Text. Abide in me, and I in you. As the branch cannot bear fruit of itself, except it abide in the vine; no neither can ye, except ye abide in me. John 15:4.

Lesson. John 15

Devotional Reading Matthew 4 15-25.

Explanations And Comments

Fellowship with Christ and Fruitage, verses 6-11. "Abide in me and I in you." Abide occurs eleven times in John's Gospel "Abiding in Christ" is another more than thrilling in Christ." (Horne: Bushnell: "We can trust God only by abiding in me." In and through you I will live henceforth in Jesus' promises. How can one abide in Christ and the duties and pleasures of life? Only one being is more always face upon him." "You are in a lift until you find it. Although you may be thinking of the lift You have a road until you take a turning right or left, although, engrossed in converse with your friend, you do not think of the road. You are in Christ amid the pressure of daily care, and the temptation of business as your face is toward the Lord. Your attitude of humble submission, and your conscience void of offence." (F. B. Meyer).

"Apart from me ye can do nothing."

One who abides not in Christ is cast forth as a useless branch, and withers. Such withered and dead branches are gathered and burned. "The thought it not to be so pressed as raise the question of the loss of souls who are once united with Christ. We are warned here with service rather than salvation. The words, however, are not without serious implications as to the absolute necessity of real and continuous union with Christ." (Charles H. Erdman).

"Herein is my Father glorified, that ye have much fruit." To "glorify God" means to recognize and acknowledge his true character. The Father in the Christian's much fruit testifies to his skill and care and "And so shall ye be my disciples."

"Abide in my love: even as the Father hath loved me, I have loved you. And then Jesus reminded them that it was only through obedience to his commandments that they could do so, and further encouraged them in obedience by adding that he had remained in his Father's love by keeping his Father's commandments.

Poor Opinion Of Women

Twelve-Year-Old Junkie Cooper Has Bad Bitter Experience

Jackie Cooper, young motion picture actor, arrived in New York recently to fill a theatre engagement and said some bitter things about women. Jack is just 13 years old.

"Women are just suckers for your money," he declared, and then declared himself for celibacy.

"I don't think I'll ever have anything to do with them," he said.

CHILDREN'S COLDS

PATENTS

Would Segregate All Young Law Offenders

Church Of England Synod Urges Action By Parliament

Ottawa should segregate her youthful criminal offenders during both trial and prison terms, the synod of the Church of England decided

The motion of Magistrate J. E. Ellis, Toronto, a resolution was passed urging the parliament of Canada to provide separate trials for boys between 16 and 21 years of age and separate penal institution similar to the Borstal system in England where possible

Miss Bev J C Roper, archbishop of Ottawa, seconded the resolution and undertook to bring the matter before the government.

Up to the age of 16 Magistrate Jones explained, the juvenile courts were available, but between that age and 21 there was no special provision. He pointed out the dangers in young offenders of contamination with older and more hardened criminals.

The synod also approved another resolution by Mr. Jones, urging provincial governments to implement Dominion government legislative respecting problem where it had not already been done

It was certainly the younger offenders to whom attention should be directed, said Rt. Rev A. Bovergn, Bishop of Athabasca. "There are few grey-haired men in our penitentiaries now," he declared. "They are boys, many of them about 18 years old."

"What is a molecule?" asked the headmaster.

"A molecule," said John, "is something so small that it can't be seen, even through a microbe."
